(JPMorgan Chase; or the Firm; NYSE: JPM), a financial holding company incorporated under Delaware law in 1968, is a leading financial services firm based in the United States of America (U.S.), and has operations worldwide; JPMorgan Chase had \$3.4 trillion in assets and \$279.4 billion in stockholders' equity as of December 31, 2020. The Firm is a leader in investment banking, financial services for consumers and small businesses, commercial banking, financial transaction processing and asset management. Under the J.P. Morgan and Chase brands, the Firm serves millions of customers in the U.S. and many of the world's most prominent corporate, institutional and government clients. JPMorgan Chase's principal bank subsidiary is JPMorgan Chase Bank, National Association (JPMorgan Chase Bank, N.A.), a national banking association with U.S. branches in 38 states and Washington, D.C. as of December 31, 2020. JPMorgan Chase's principal non-bank subsidiary is J.P. Morgan Securities LLC (J.P. Morgan Securities), a U.S. broker-dealer. The bank and non-bank subsidiaries of JPMorgan Chase operate nationally as well as through overseas branches and subsidiaries, representative offices and subsidiary foreign banks. The Firm's principal operating subsidiary outside the U.S. is J.P. Morgan Securities plc, a U.K.-based subsidiary of JPMorgan Chase Bank, N.A. The Firm's website is www.jpmorganchase.com. JPMorgan Chase makes available on its website, free of charge, annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K pursuant to Section 13(a) or Section 15(d) of the Securities Exchange Act of 1934, as soon as reasonably practicable after it electronically files or furnishes such material to the U.S. Securities and Exchange Commission (the SEC) at www.sec.gov. JPMorgan Chase also makes additional information about the Firm available on the Investor Relations section of its website at <https://www.jpmorganchase.com/corporate/investor-relations/investor-relations.htm>. The Firm has adopted, and posted on its website, a Code of Conduct for all employees of the Firm and a Code of Ethics for its Chairman and Chief Executive Officer, Chief Financial Officer, Principal Accounting Officer and all other professionals of the Firm worldwide serving in a finance, accounting, treasury, tax or investor relations role. Business segments For management reporting purposes, JPMorgan Chase's activities are organized into four major reportable business segments, as well as a Corporate segment. The Firm's consumer business is the Consumer & Community Banking (CCB) segment. The Firm's wholesale business segments are the Corporate & Investment Bank (CIB), Commercial Banking (CB), and Asset & Wealth Management (AWM). A description of the Firm's business segments and the products and services they provide to their respective client bases is provided in the Business segment results section of Management's discussion and analysis of financial condition and results of operations (Management's discussion and analysis; or MD&A), beginning on page 46 and in Note 32. Competition JPMorgan Chase and its subsidiaries and affiliates operate in highly competitive environments. Competitors include other banks, brokerage firms, investment banking companies, merchant banks, hedge funds,

commodity trading companies, private equity firms, insurance companies, mutual fund companies, investment managers, credit card companies, mortgage banking companies, trust companies, securities processing companies, automobile financing companies, leasing companies, e-commerce and other internet-based companies, financial technology companies, and other companies engaged in providing similar products and services. The Firm's businesses generally compete on the basis of the quality and variety of the Firm's products and services, transaction execution, innovation, reputation and price. Competition also varies based on the types of clients, customers, industries and geographies served. With respect to some of its geographies and products, JPMorgan Chase competes globally; with respect to others, the Firm competes on a national or regional basis. New competitors in the financial services industry continue to emerge, including firms that offer products and services solely through the internet and non-financial companies that offer payment or loan products.

1 Part I Human capital JPMorgan Chase believes that its long-term growth and success depend on its ability to attract, develop and retain a high-performing and diverse workforce, with inclusion and accessibility as key components of the way the Firm does business. The information provided below relates to JPMorgan Chase's full-time and part-time employees and does not include the Firm's contractors.

Global workforce JPMorgan Chase had 255,351 employees in 62 countries as of December 31, 2020, with over 60% of those employees located in the U.S. As of December 31, 2020, of the Firm's global employees that self-identified, 49% self-identified as women and of the Firm's U.S.-based employees that self-identified, 52% self-identified as ethnically diverse (defined as all Equal Employment Opportunity Commission classifications other than white). In addition, of the Firm's U.S.-based employees, 3% self-identified as LGBT+, 3% as military veterans and 4% as people with disabilities. The following table presents the distribution of the Firm's global workforce by region and by LOB as of December 31, 2020:

Firm culture The foundations of JPMorgan Chase's culture are its core values and How We Do Business Principles, which are fundamental to the Firm's success and are represented by four central corporate tenets: exceptional client service; operational excellence; a commitment to integrity, fairness and responsibility; and cultivation of a great team and winning culture. The Firm maintains its focus on its culture of inclusion and respect, which is reinforced by increasing employee awareness and education through engagement, communication and training. An important part of these efforts includes the Firm's Business Resource Groups, which are groups of employees who support JPMorgan Chase's diversity and inclusion strategies by leveraging the unique perspectives of their members.

Attracting and retaining employees The goal of JPMorgan Chase's recruitment efforts is to attract and hire talented individuals in all roles and at all career levels. The Firm strives to provide both external candidates and internal employees who are seeking a different role with challenging and stimulating career opportunities. These opportunities range from internship training programs for students to entry-level, management and executive careers. During 2020, approximately two thirds of the Firm's employment opportunities were filled by external candidates, with the remainder filled by existing employees. Diversity is a critical area of focus throughout the Firm's hiring process. JPMorgan Chase engages in efforts aimed at hiring diverse talent, including initiatives focused on gender, underrepresented ethnic groups, LGBT+ individuals, people with disabilities, veterans and others. The Firm's Advancing Black Pathways program, which seeks to leverage JPMorgan Chase's business and philanthropic resources to accelerate economic opportunity for Black Americans by strengthening education and job training, growing careers, investing in entrepreneurship, and building wealth, includes initiatives to increase representation of talented Black individuals across the Firm. JPMorgan Chase offers a competitive fellowship program that seeks to attract accomplished individuals who have taken a career break and wish to return to the workforce. In addition, where appropriate, the Firm's hiring practices focus on the skills of a job candidate rather than degrees held. Developing employees JPMorgan Chase is committed to supporting the professional development and career growth of its employees. The Firm offers comprehensive training programs to employees, with over seven million hours of training delivered globally in 2020. Leadership Edge, the Firm's global leadership development program that is offered to managers, is focused on creating one Firm leadership culture.

Compensation and benefits The Firm provides comprehensive and market-competitive compensation and benefits programs. JPMorgan Chase's compensation philosophy provides the guiding principles that drive compensation-related decisions across the Firm, including pay-for-performance, responsiveness and alignment with shareholder interests, reinforcement of the Firm's culture and How We Do Business Principles, and integration of risk, controls and conduct considerations. The Firm's commitment to diversity and inclusion for all employees includes compensation review processes that seek to ensure that the Firm's employees are paid equitably for the work they do.

2 The Firm is also committed to supporting employees' well-being. JPMorgan Chase offers a comprehensive benefits and wellness package to employees and their families, including healthcare coverage, retirement benefits, life and disability insurance, on-site health and wellness centers, employee assistance programs, competitive vacation and leave policies, backup child care arrangements, tuition reimbursement programs, mental health counseling and support, and financial coaching. The Firm has taken action to protect and support its employees during the COVID-19

pandemic, including by implementing health and safety protocols and providing additional benefits. Supervision and regulation The Firm is subject to extensive and comprehensive regulation under U.S. federal and state laws, as well as the applicable laws of the jurisdictions outside the U.S. in which the Firm does business. Financial holding company: Consolidated supervision . JPMorgan Chase & Co. is a bank holding company (BHC) and a financial holding company (FHC) under U.S. federal law, and is subject to comprehensive consolidated supervision, regulation and examination by the Board of Governors of the Federal Reserve System (the Federal Reserve). The Federal Reserve acts as the supervisor of the consolidated operations of BHCs, and certain of JPMorgan Chase's subsidiaries are also regulated directly by additional authorities based on the activities or licenses of those subsidiaries. JPMorgan Chase's national bank subsidiary, JPMorgan Chase Bank, N.A., is supervised and regulated by the Office of the Comptroller of the Currency (OCC) and, with respect to certain matters, by the Federal Deposit Insurance Corporation (the FDIC). JPMorgan Chase's U.S. broker-dealers are supervised and regulated by the Securities and Exchange Commission (SEC) and the Financial Industry Regulatory Authority (FINRA), and subsidiaries of the Firm that engage in certain futures-related and swaps-related activities are supervised and regulated by the Commodity Futures Trading Commission (CFTC). J.P. Morgan Securities plc is a U.K.-based bank regulated by the U.K. Prudential Regulation Authority (the PRA) and the U.K. Financial Conduct Authority (FCA). The Firm's other non-U.S. subsidiaries are regulated by the banking, securities, prudential and conduct regulatory authorities in the countries in which they operate. Permissible business activities . The Bank Holding Company Act restricts BHCs from engaging in business activities other than the business of banking and certain closely-related activities. FHCs can engage in a broader range of financial activities. The Federal Reserve has the authority to limit an FHC's ability to conduct otherwise permissible activities if the FHC or any of its depository institution subsidiaries ceases to meet applicable eligibility requirements. The Federal Reserve may also impose corrective capital and/or managerial requirements on the FHC, and if deficiencies are persistent, may require divestiture of the FHC's depository institutions. If any depository institution controlled by an FHC fails to maintain a satisfactory rating under the Community Reinvestment Act, the Federal Reserve must prohibit the FHC and its subsidiaries from engaging in any activities other than those permissible for BHCs. Capital and liquidity requirements . The Federal Reserve establishes capital, liquidity and leverage requirements for JPMorgan Chase that are generally consistent with the international Basel III capital and liquidity framework and evaluates the Firm's compliance with those requirements. The OCC establishes similar requirements for JPMorgan Chase Bank, N.A. Banking supervisors globally continue to refine and enhance the Basel III capital framework for financial institutions. In January 2019, the Basel Committee issued Minimum capital requirements for market risk. The Basel Committee expects national regulators to implement these revised market risk requirements for banking organizations in their jurisdictions by January 2023, in line with the other elements of the Basel III Reforms. U.S. banking regulators have announced their support for the issuance of the Basel III Reforms and are considering how to appropriately apply such reforms in the U.S. In November 2019, the U.S. banking regulators adopted a rule implementing Standardized Approach for Counterparty Credit Risk (SA-CCR), which became effective in April 2020 and which has a mandatory compliance date of January 1, 2022. On October 20, 2020, the federal banking agencies issued a final rule for the net stable funding ratio (NSFR) under which large banking organizations such as the Firm will be required to maintain an NSFR of at least 100% on an ongoing basis. The final NSFR rule will become effective on July 1, 2021. Refer to Capital Risk Management on pages 91-101 and Liquidity Risk Management on pages 102-108 . Stress tests . As a large BHC, JPMorgan Chase is subject to supervisory stress testing administered by the Federal Reserve as part of the Federal Reserve's annual Comprehensive Capital Analysis and Review (CCAR) framework. The Firm must conduct annual company-run stress tests and must also submit an annual capital plan to the Federal Reserve, taking into account the results of separate stress tests designed by the Firm and the Federal Reserve. The Federal Reserve uses the results under the severely adverse scenario from its supervisory stress test to determine the Firm's stress capital buffer (SCB) requirement for the coming year, which forms part of the Firm's applicable capital buffers. The Firm is required to file its annual CCAR submission on April 5, 2021. The Federal Reserve will notify the Firm of its indicative SCB requirement by June 30, 2021 and final SCB requirement by August 31, 2021. The Firm's final SCB requirement will become effective on October 1, 2021. The OCC requires 3 Part I JPMorgan Chase Bank, N.A. to perform separate, similar stress tests annually. The Firm publishes each year the results of the annual stress tests for the Firm and JPMorgan Chase Bank, N.A. under the supervisory severely adverse scenarios provided by the Federal Reserve and the OCC. Refer to Capital Risk Management on pages 91-101 for more information concerning the Firm's CCAR. Enhanced prudential standards . As part of its mandate to identify and monitor risks to the financial stability of the U.S. posed by large banking organizations, the Financial Stability Oversight Council (FSOC) recommends prudential standards and reporting requirements to the Federal Reserve for systemically important financial institutions (SIFIs), such as JPMorgan Chase. The Federal Reserve has adopted several rules to implement those heightened prudential

standards, including rules relating to risk management and corporate governance of subject BHCs. JPMorgan Chase is required under these rules to comply with enhanced liquidity and overall risk management standards, including oversight by the board of directors of risk management activities. Resolution and recovery . The Firm is required to submit periodically to the Federal Reserve and the FDIC a plan for resolution under Title I of the Dodd-Frank Wall Street Reform and Consumer Protection Act (§8220;Dodd-Frank Act§8221;) in the event of material distress or failure (a §8220;resolution plan§8221;). In 2019, the FDIC and Federal Reserve revised the regulations governing resolution plan requirements, and on the basis of those revisions, the Firm's resolution plan submissions will alternate between §8220;targeted§8221; and §8220;full§8221; plans. The Firm's next §8220;targeted§8221; resolution plan is due to be filed on or before July 1, 2021. The Firm also has a comprehensive recovery plan, updated annually, summarizing the actions it would take to avoid failure by remaining well-capitalized and well-funded in the case of an adverse event. JPMorgan Chase Bank, N.A. is also required to provide a resolution plan to the FDIC. The FDIC has proposed changes to its rules relating to the resolution plans of insured depository institutions (§8220;IDIs§8221;) in a 2019 advanced notice of proposed rulemaking. In January 2021, the FDIC announced that the moratorium on the preparation of resolution plans for the IDIs has ended. Banks will be given notice of at least 12 months prior to the required submission date for their IDI resolution plans. The OCC has published guidelines establishing standards for recovery planning by insured national banks, and JPMorgan Chase Bank, N.A. has submitted its recovery plan to the OCC. Certain of the Firm's non-U.S. subsidiaries are also subject to local resolution and recovery planning requirements. Orderly liquidation authority . Certain financial companies, including JPMorgan Chase and certain of its subsidiaries, can also be subjected to resolution under an §8220;orderly liquidation authority.§8221; The U.S. Treasury Secretary, in consultation with the President of the United States, must first make certain determinations concerning extraordinary financial distress and systemic risk, and action must be recommended by the FDIC and the Federal Reserve. Absent such actions, the Firm, as a BHC, would remain subject to resolution under the Bankruptcy Code. The FDIC has issued a draft policy statement describing its §8220;single point of entry§8221; strategy for resolution of SIFIs under the orderly liquidation authority, which seeks to keep operating subsidiaries of a BHC open and impose losses on shareholders and creditors of the BHC in receivership according to their statutory order of priority. Holding company as a source of strength. JPMorgan Chase & Co. is required to serve as a source of financial strength for its depository institution subsidiaries and to commit resources to support those subsidiaries, including when directed to do so by the Federal Reserve. Regulation of acquisitions . Acquisitions by BHCs and their banks are subject to multiple requirements established by the Federal Reserve and the OCC. For example, FHCs and BHCs are required to obtain the approval of the Federal Reserve before they may acquire more than 5% of the voting shares of an unaffiliated bank. In addition, acquisitions by financial companies are prohibited if, as a result of the acquisition, the total liabilities of the financial company would exceed 10% of the total liabilities of all financial companies. Furthermore, for certain acquisitions, the Firm must provide written notice to the Federal Reserve prior to acquiring direct or indirect ownership or control of any voting shares of any company with over \$10 billion in assets that is engaged in activities that are §8220;financial in nature.§8221; Volcker Rule . The Volcker Rule prohibits banking entities, including the Firm, from engaging in certain §8220;proprietary trading§8221; activities, subject to exceptions for underwriting, market-making, risk-mitigating hedging and certain other activities. The Volcker Rule also limits the sponsorship of, and investment in, §8220;covered funds,§8221; and imposes limits on certain transactions between the Firm and covered funds for which a JPMorgan Chase entity serves as the investment manager, investment advisor, commodity trading advisor or sponsor, as well as certain covered funds controlled by such funds. Ongoing obligations . The Firm remains subject to a consent order entered into with the Federal Reserve concerning foreign exchange trading. The Firm is also subject to obligations under the terms of a Deferred Prosecution Agreement entered into with the Department of Justice on September 29, 2020 relating to precious metals and U.S. Treasuries markets investigations as well as under a related order issued by the CFTC. Subsidiary banks: The activities of JPMorgan Chase Bank, N.A., the Firm's principal subsidiary bank, are limited to those specifically authorized under the National Bank Act and related interpretations of the OCC. The OCC has authority to bring an enforcement action against JPMorgan Chase Bank, N.A. for unsafe or unsound banking practices, which could include limiting JPMorgan Chase Bank, N.A.'s ability to conduct otherwise permissible activities, or imposing corrective capital or managerial requirements on the bank. FDIC deposit insurance. The FDIC deposit insurance fund provides insurance coverage for certain deposits and is funded through assessments on banks, such as JPMorgan Chase Bank, N.A. FDIC powers upon a bank insolvency. Upon the insolvency of JPMorgan Chase Bank, N.A., the FDIC could be appointed as conservator or receiver under the Federal Deposit Insurance Act. The FDIC has broad powers to transfer assets and liabilities without the approval of the institution's creditors. Prompt corrective action. The Federal Deposit Insurance Corporation Improvement Act of 1991 requires the relevant federal banking regulator to take §8220;prompt corrective action§8221; with respect to a depository institution if that institution does not meet certain capital adequacy standards. The Federal Reserve is also authorized to take appropriate action against the parent BHC, such as JPMorgan Chase & Co., based on the undercapitalized status of any bank subsidiary. In certain instances, the BHC would be required to guarantee the performance of the capital restoration plan for its

undercapitalized subsidiary. OCC Heightened Standards. The OCC has established guidelines setting forth heightened standards for large banks, including minimum standards for the design and implementation of a risk governance framework for banks. Under these standards, a bank's risk governance framework must ensure that the bank's risk profile is easily distinguished and separate from that of its parent BHC for risk management purposes. The bank's board or risk committee is responsible for approving the bank's risk governance framework, providing active oversight of the bank's risk-taking activities, and holding management accountable for adhering to the risk governance framework. Restrictions on transactions with affiliates. JPMorgan Chase Bank, N.A. and its subsidiaries are subject to restrictions imposed by federal law on extensions of credit to, investments in stock or securities of, and derivatives, securities lending and certain other transactions with, JPMorgan Chase & Co. and certain other affiliates. These restrictions prevent JPMorgan Chase & Co. and other affiliates from borrowing from such subsidiaries unless the loans are secured in specified amounts and comply with certain other requirements. Dividend restrictions. Federal law imposes limitations on the payment of dividends by national banks, such as JPMorgan Chase Bank, N.A. Refer to Note 26 for the amount of dividends that JPMorgan Chase Bank, N.A. could pay, at January 1, 2021, to JPMorgan Chase without the approval of the banking regulators. The OCC and the Federal Reserve also have authority to prohibit or limit the payment of dividends of a bank subsidiary that they supervise if, in the banking regulator's opinion, payment of a dividend would constitute an unsafe or unsound practice in light of the financial condition of the bank. Depositor preference. Under federal law, the claims of a receiver of an IDI for administrative expense and the claims of holders of U.S. deposit liabilities (including the FDIC and deposits in non-U.S. branches that are dually payable in the U.S. and in a non-U.S. branch) have priority over the claims of other unsecured creditors of the institution, including depositors in non-U.S. branches and public noteholders. Consumer supervision and regulation. JPMorgan Chase and JPMorgan Chase Bank, N.A. are subject to supervision and regulation by the Consumer Financial Protection Bureau (“CFPB”) with respect to federal consumer protection laws, including laws relating to fair lending and the prohibition of unfair, deceptive or abusive acts or practices in connection with the offer, sale or provision of consumer financial products and services. The CFPB also has jurisdiction over small business lending activities with respect to fair lending and the Equal Credit Opportunity Act. As part of its regulatory oversight, the CFPB has authority to take enforcement actions against firms that offer certain products and services to consumers using practices that are deemed to be unfair, deceptive or abusive. The Firm's consumer activities are also subject to regulation under state statutes which are enforced by the Attorney General or empowered agency of each state. Securities and broker-dealer regulation: The Firm conducts securities underwriting, dealing and brokerage activities in the U.S. through J.P. Morgan Securities LLC and other non-bank broker-dealer subsidiaries, all of which are subject to regulations of the SEC, FINRA and the New York Stock Exchange, among others. The Firm conducts similar securities activities outside the U.S. subject to local regulatory requirements. In the U.K., those activities are conducted by J.P. Morgan Securities plc. Broker-dealers are subject to laws and regulations covering all aspects of the securities business, including sales and trading practices, securities offerings, publication of research reports, use of customer funds, the financing of client purchases, capital structure, record-keeping and retention, and the conduct of their directors, officers and employees. Refer to Broker-dealer regulatory capital on page 101 for information concerning the capital of J.P. Morgan Securities LLC and J.P. Morgan Securities plc. Investment management regulation: The Firm's asset and wealth management businesses are subject to significant regulation in jurisdictions around the world relating to, among other things, the safeguarding and management of client assets, offerings of funds and marketing activities. Certain of the Firm's subsidiaries are registered with, and subject to oversight by, the SEC as investment advisers and broker-dealers. The Firm's registered investment advisers are subject to the fiduciary and other obligations imposed under the Investment Advisers Act of 1940, as well as various state securities laws. The Firm's bank fiduciary activities are subject to supervision by the OCC. 5 Part I Derivatives regulation: The Firm is subject to comprehensive regulation of its derivatives businesses, including regulations that impose capital and margin requirements, require central clearing of standardized over-the-counter (“OTC”) derivatives, mandate that certain standardized OTC swaps be traded on regulated trading venues, and provide for reporting of certain mandated information. JPMorgan Chase Bank, N.A., J.P. Morgan Securities LLC and J.P. Morgan Securities plc are registered with the CFTC as “swap dealers” and may be required to register with the SEC as “security-based swap dealers.” As a result, these entities are or will be subject to a comprehensive regulatory framework applicable to their swap or security-based swap activities, including capital requirements, rules requiring the collateralization of uncleared swaps and security-based swaps, rules regarding segregation of counterparty collateral, business conduct and documentation standards, record-keeping and reporting obligations, and anti-fraud and anti-manipulation requirements. Similar requirements have also been implemented in the EU under the European Market Infrastructure Regulation (“EMIR”) and MiFID II. J.P. Morgan Securities LLC is also registered with the CFTC as a futures commission merchant and is a member of the National Futures Association. Data, privacy and security regulation: The Firm and its subsidiaries are subject to numerous U.S. federal, state and local as well as international laws and regulations concerning data that are central to the Firm's businesses, functions and operations. These include laws and regulations relating to data protection,

privacy, data use, confidentiality, secrecy, cybersecurity, technology, artificial intelligence, data localization and storage, data retention and destruction, disclosure, transfer, availability, integrity and other similar matters. The application, interpretation and enforcement of these laws and regulations are often uncertain, particularly in light of new and rapidly evolving data-driven technologies and significant increase in computing power. These laws and regulations are evolving at a rapid pace, remain a focus of regulators globally, may be enforced by private parties or government bodies, and will continue to have a significant impact on all of the Firm's businesses and operations. For example, the EU's General Data Protection Regulation (“GDPR”) includes a complex range of obligations and operational requirements for companies that receive or process personal data of persons in the EU and provides for significant penalties for non-compliance. In addition, there are a number of legislative proposals in the EU, the U.S. (at both the federal and state level) as well as other jurisdictions that could impose new obligations or limitations in these areas that could affect the Firm's businesses. The Bank Secrecy Act and Economic Sanctions: The Bank Secrecy Act (“BSA”) requires all financial institutions, including banks and securities broker-dealers, to establish a risk-based system of internal controls reasonably designed to prevent money laundering and the financing of terrorism. The BSA includes a variety of record-keeping and reporting requirements, as well as due diligence/know-your-customer documentation requirements. The Firm is also subject to the regulations and economic sanctions programs administered by the U.S. Treasury's Office of Foreign Assets Control (“OFAC”). In addition, the EU and the U.K. have adopted various economic sanctions programs targeted at entities or individuals that are, or are located in countries that are, involved in terrorism, hostilities, embezzlement or human rights violations. Anti-Corruption: The Firm is subject to laws and regulations relating to corrupt and illegal payments to government officials and others in the jurisdictions in which it operates, including the U.S. Foreign Corrupt Practices Act and the U.K. Bribery Act. Compensation practices: The Firm's compensation practices are subject to oversight by the Federal Reserve, as well as other agencies. The Federal Reserve has issued guidance jointly with the FDIC and the OCC that is designed to ensure that incentive compensation paid by banking organizations does not encourage imprudent risk-taking that threatens the organizations' safety and soundness. The Financial Stability Board (“FSB”) has also established standards covering compensation principles for banks. The Firm's compensation practices are also subject to regulation and oversight by regulators in other jurisdictions, notably the EU Fourth Capital Requirements Directive (“CRD IV”), which includes compensation-related provisions. The European Banking Authority has instituted guidelines on compensation policies which in certain countries, such as the U.K. and Germany, are implemented or supplemented by local regulations or guidelines. The Firm expects that the implementation of regulatory guidelines regarding compensation in the U.S. and other countries will continue to evolve, and may affect the manner in which the Firm structures its compensation programs and practices. Other significant international regulatory initiatives: The U.K.'s transition period for its departure from the EU, which is commonly referred to as “Brexit,” formally ended on December 31, 2020, and accordingly, from January 1, 2021, the U.K. is no longer obligated to implement EU laws. In preparation for the completion of Brexit, numerous EU laws and regulations were separately adopted into U.K. domestic legislation in order to ensure continuity. However, the U.K. plans to evaluate the extent to which these EU-legacy laws and regulations should change going forward and has already indicated some areas where it may take a different approach from the EU. For example, the U.K. announced it will develop a U.K. settlement discipline regime rather than adopting the EU's settlement discipline regime which will apply in the EU beginning in February 2022. Additionally, the U.K. will not incorporate into U.K. law the reporting obligation of the EU's Securities Financing Transactions Regulation for non-financial counterparties, which will apply in the EU beginning in January 2021. The full impact of these differences is not yet known as further details have not yet been published. In the EU, policymakers continue to implement an extensive and complex program of regulatory enhancement relating to financial services, several key elements of which are discussed below. In response to the COVID-19 pandemic, in July 2020, the European Commission (“EC”) published a legislative proposal amending the Markets in Financial Instruments Directive (“MiFID II”). MiFID II requires the trading of shares and certain OTC derivatives to take place on trading venues, and also significantly enhanced requirements for pre- and post-trade transparency, transaction reporting and investor protection, and introduced a position limits and reporting regime for commodities. The EC's proposal included targeted changes to the MiFID II framework intended to reduce the compliance burden on financial services firms as part of the EC's broader initiative to assist in the EU's economic recovery from the COVID-19 pandemic. The proposed changes include amendments to the commodity derivatives regime, investor protection rules and rules relating to research on small and medium-sized Enterprises. The proposal is in the final stages of becoming EU law and is expected to go into effect in 2022. The EC has also begun a review of the broader MiFID II framework and is expected to publish a further legislative proposal for changes to MiFID II in 2021. The U.K. is also re-evaluating the MiFID II framework and how the U.K. version of MiFID II will apply going forward. The EU capital and liquidity legislation for banks and investment firms implemented many of the finalized Basel III capital and liquidity standards, including in relation to the leverage ratio, market risk capital, and a net stable funding ratio. These requirements will begin to take effect from June 2021. EU legislation also includes a requirement for certain

non-EU banks operating in the EU to establish an intermediate parent undertaking (IPU) located in the EU. The IPU rule will allow a second IPU to be established if a single IPU would conflict with home country bank separation rules or impede resolvability. The Firm will be required to establish a legal entity structure that complies with the EU's IPU rule. The U.K. Government has delayed the effective date of the U.K. version of the EU's legislation relating to changes in Basel III requirements until January 1, 2022. The Basel Committee recently finalized certain changes to the Basel III framework, including revisions to the credit risk and operational risk calculation methods. The Firm's banking entities in the U.K. and EU will be required to comply with these changes when they are implemented in those jurisdictions. The Prudential Regulatory Authority (PRA) and European Central Bank (ECB) have published their supervisory expectations applicable to U.K. and EU banks, respectively, for management of financial risks arising from climate change. The supervisory expectations for managing these risks address bank strategy, risk management, scenario analysis and disclosure. U.K. banking entities, including J.P. Morgan Securities plc, will be expected to align their practices with PRA expectations by the end of 2021. J.P. Morgan Securities plc is expanding its risk management framework to comply with PRA expectations by the end of 2021.

7 Part I Item 1A. Risk Factors. The following discussion sets forth the material risk factors that could affect JPMorgan Chase's financial condition and operations. Readers should not consider any descriptions of these factors to be a complete set of all potential risks that could affect the Firm. Any of the risk factors discussed below could by itself, or combined with other factors, materially and adversely affect JPMorgan Chase's business, results of operations, financial condition, capital position, liquidity, competitive position or reputation, including by materially increasing expenses or decreasing revenues, which could result in material losses or a decrease in earnings.

Summary The principal risks that could adversely affect JPMorgan Chase's business, results of operations, financial condition, capital position, liquidity, competitive position or reputation include:

- Risks related to the COVID-19 pandemic, including the significant harm that the pandemic has caused and is causing to the global economy and the further negative effects that it could have on certain of JPMorgan Chase's businesses.
- Regulatory risks, including the impact that applicable laws, rules and regulations in the highly-regulated financial services industry, as well as changes to or in the interpretation of those laws, rules and regulations, can have on JPMorgan Chase's business and operations; the ways in which differences in financial services regulation in different jurisdictions or with respect to certain competitors can disadvantage JPMorgan Chase's business; the higher compliance costs and potential for operational restrictions due to heightened regulatory scrutiny; risks associated with complying with economic sanctions and anti-corruption and anti-money laundering laws; the ways in which less predictable legal and regulatory frameworks in certain countries can negatively impact JPMorgan Chase's operations and financial results; the losses that security holders will absorb if JPMorgan Chase were to enter into a resolution; and risks related to the regulatory uncertainties associated with the U.K.'s departure from the EU.
- Political risks, including the potential negative effects on JPMorgan Chase's businesses due to economic uncertainty or instability caused by political developments.
- Market risks, including the effects that economic and market events and conditions, governmental policies concerning taxation, regulation and other matters, changes in interest rates and credit spreads, and market fluctuations can have on JPMorgan Chase's consumer and wholesale businesses and its investment and market-making positions.
- Credit risks, including potential negative effects from adverse changes in the financial condition of clients, customers, counterparties, custodians and central counterparties; and the potential for credit losses due to declines in the value of collateral in stressed market conditions or from concentrations of credit and market risk.
- Liquidity risks, including the risk that JPMorgan Chase's liquidity could be impaired by market-wide illiquidity or disruption, unforeseen liquidity or capital requirements, the inability to sell assets, default by a significant market participant, unanticipated outflows of cash or collateral, or lack of market or customer confidence in JPMorgan Chase; the dependence of JPMorgan Chase & Co. on the cash flows of its subsidiaries; the adverse effects that any downgrade in any of JPMorgan Chase's credit ratings may have on its liquidity and cost of funding; and potential negative impacts on JPMorgan Chase's funding, investments and financial products, as well as litigation risks, associated with the transition from LIBOR and other benchmark rates.
- Capital risks, including the risk that any failure by or inability of JPMorgan Chase to maintain the required level and composition of capital, or unfavorable changes in the capital requirements imposed by banking regulators, could limit JPMorgan Chase's ability to distribute capital to shareholders or to support its business activities.
- Operational risks, including risks associated with JPMorgan Chase's dependence on its operational systems and the competence, integrity, health and safety of its employees, as well as the systems and employees of external parties; the potential negative effects of failing to identify and address operational risks related to the introduction of or changes to products, services and delivery platforms; risks from JPMorgan Chase's exposure to external operational systems; legal and operational risks related to safeguarding personal information; the harm that could be caused by a successful cyber attack affecting JPMorgan Chase or by catastrophes or other events; risks associated with JPMorgan Chase's risk management framework, its models and estimations and associated judgments used in its financial statements, and controls over disclosure and financial reporting or from changes in accounting standards or policies; and

potential adverse effects of failing to comply with heightened regulatory and other standards for the oversight of vendors and other service providers. • Strategic risks, including the damage to JPMorgan Chase's competitive standing and results that could occur if management fails to develop and execute effective business strategies; risks associated with the significant and increasing competition that JPMorgan Chase faces; and the potential adverse impacts of climate change on JPMorgan Chase's business operations, clients and customers. • Conduct risks, including the negative impact that can result from the failure of employees to conduct themselves in accordance with JPMorgan Chase's expectations, policies and practices. • Reputation risks, including the potential adverse effects on JPMorgan Chase's relationships with its clients, customers, shareholders, regulators and other stakeholders that could arise from employee misconduct, security breaches, inadequate risk management, compliance or operational failures, litigation and regulatory investigations, failure to satisfy expectations concerning social and environmental concerns or other factors that could damage JPMorgan Chase's reputation. • Country risks, including potential impacts on JPMorgan Chase's businesses from an outbreak of hostilities between countries or within a country or region; and the potential adverse effects of local economic, political, regulatory and social factors on JPMorgan Chase's business and revenues in certain countries. • People risks, including the criticality of attracting and retaining qualified and diverse employees; and the potential adverse effects of unfavorable changes in immigration or travel policies on JPMorgan Chase's workforce. • Legal risks relating to litigation and regulatory and government investigations. The above summary is subject in its entirety to the more complete inventory and discussion of the risks facing JPMorgan Chase set forth below.

COVID-19 Pandemic The COVID-19 pandemic has caused and is causing significant harm to the global economy and could further negatively affect certain of JPMorgan Chase's businesses. On March 11, 2020, the World Health Organization declared the outbreak of a strain of novel coronavirus disease, COVID-19, to be a global pandemic. The COVID-19 pandemic and governmental responses to the pandemic led to the institution of social distancing and shelter-in-place requirements in certain areas of the U.S. and other countries resulting in ongoing severe impacts on global economic conditions, including: • significant disruption and volatility in the financial markets • significant disruption of global supply chains, and • closures of many businesses, leading to loss of revenues and increased unemployment. A prolongation or worsening of the pandemic, or the emergence of other diseases that give rise to similar effects, could deepen the adverse impact on the global economy. The adverse economic conditions caused by the pandemic have had a negative impact on certain of JPMorgan Chase's businesses and results of operations, including: • reduction in demand for certain products and services from JPMorgan Chase's clients and customers, resulting in lower revenue, and • increases in the allowance for credit losses. Certain models used by JPMorgan Chase in connection with the determination of the allowance for credit losses have heightened performance risk in the economic environment precipitated by the effects of the COVID-19 pandemic and government stimulus. There can be no assurance that, even after adjustments have been made to model outputs, JPMorgan Chase will not recognize unexpected losses arising from the model uncertainty that has resulted from these developments. A prolongation or worsening of the COVID-19 pandemic and the negative economic impacts of the pandemic could have other significant adverse effects on JPMorgan Chase's businesses, results of operations and financial condition, including: • recognition of credit losses and further increases in the allowance for credit losses, especially to the extent that businesses remain closed, unemployment continues at elevated levels, clients and customers draw on their lines of credit or significant numbers of people relocate from metropolitan areas • material impacts on the value of securities, derivatives and other financial instruments which JPMorgan Chase owns or in which it makes markets • downgrades in JPMorgan Chase's credit ratings • constraints on liquidity or capital due to elevated levels of deposits, increases in risk-weighted assets (ÜRWAÝ) related to supporting client activities, downgrades in client credit ratings, regulatory actions or other factors, any or all of which could require JPMorgan Chase to take or refrain from taking actions that it otherwise would under its liquidity and capital management strategies, and • the possibility that significant portions of JPMorgan Chase's workforce are unable to work effectively, including because of illness, quarantines, shelter-in-place arrangements, government actions or other restrictions in connection with the pandemic. The extent to which the COVID-19 pandemic negatively affects JPMorgan Chase's businesses, results of operations and financial condition, as well as its regulatory capital and liquidity ratios, will depend on future developments that are highly uncertain and cannot be predicted, including the ultimate scope and duration of the pandemic, the effectiveness of vaccination programs and actions taken by governmental authorities and other third parties in response to the pandemic. Those negative effects, including the possible recognition of charge-offs, may be delayed 9 Part I because of the impact of prior and potential future government stimulus actions or payment assistance provided to clients and customers. In addition, JPMorgan Chase's participation directly or indirectly, including on behalf of customers and clients or by affiliated entities, in U.S. government programs designed to support individuals, households and businesses impacted by the economic disruptions caused by the COVID-19 pandemic could be criticized and subject JPMorgan Chase to: • increased governmental and regulatory scrutiny • negative publicity, and • increased exposure to litigation, any or all of which could increase JPMorgan Chase's operational, legal and compliance costs and

damage its reputation. To the extent that the COVID-19 pandemic adversely affects JPMorgan Chase's business, results of operations and financial condition, it may also have the effect of heightening many of the other risks described below. Regulatory JPMorgan Chase's businesses are highly regulated, and existing, new or changed laws, rules and regulations that apply to JPMorgan Chase have a significant impact on its business and operations. JPMorgan Chase is a financial services firm with operations worldwide. JPMorgan Chase must comply with the laws, rules and regulations that apply to its operations in all of the jurisdictions around the world in which it does business. Regulation of the financial services industry is extensive. The regulation and supervision of financial services firms has expanded significantly over an extended period of time. The increased regulation and supervision of JPMorgan Chase has affected the way that it conducts its business and structures its operations. JPMorgan Chase could be required to make further changes to its business and operations in response to expanded supervision, new laws, rules and regulations, and changes to existing laws, rules and regulations. These changes could result in JPMorgan Chase incurring additional costs for complying with laws, rules and regulations and could reduce its profitability. In response to new and existing laws, rules and regulations and expanded supervision, JPMorgan Chase has in the past been and could in the future be, required to: • limit the products and services that it offers • reduce the liquidity that it can provide through its market-making activities • refrain from engaging in business opportunities that it might otherwise pursue • pay higher taxes, assessments, levies or other governmental charges, including in connection with the resolution of tax examinations • dispose of certain assets, and do so at times or prices that are disadvantageous • impose restrictions on certain business activities, or • increase the prices that it charges for products and services, which could reduce the demand for them. In particular, JPMorgan Chase's businesses and results of operations could be adversely impacted by changes in laws, rules and regulations, or changes in the application, interpretation or enforcement of laws, rules and regulations, that: • proscribe or institute more stringent restrictions on certain financial services activities, or • introduce changes to antitrust or anti-competition laws, rules and regulations that adversely affect the business activities of JPMorgan Chase. Differences in financial services regulation can be disadvantageous for JPMorgan Chase's business. The content and application of laws, rules and regulations affecting financial services firms sometimes vary according to factors such as the size of the firm, the jurisdiction in which it is organized or operates, and other criteria. For example: • larger firms such as JPMorgan Chase are often subject to more stringent supervision and regulation • financial technology companies and other non-traditional competitors may not be subject to banking regulation, or may be supervised by a national or state regulatory agency that does not have the same resources or regulatory priorities as the regulatory agencies which supervise more diversified financial services firms, or • the financial services regulatory framework in a particular jurisdiction may favor financial institutions that are based in that jurisdiction. These differences in the regulatory framework can result in a firm such as JPMorgan Chase losing market share to competitors that are less regulated or not subject to regulation, especially with respect to unregulated financial products. There can also be significant differences in the ways that similar regulatory initiatives affecting the financial services industry are implemented in the U.S. and in other countries and regions in which JPMorgan Chase does business. For example, when adopting rules that are intended to implement a global regulatory standard, a national regulator may introduce additional or more restrictive requirements, which can create competitive disadvantages for financial services firms, such as JPMorgan Chase, that may be subject to those enhanced regulations. Legislative and regulatory initiatives outside the U.S. could require JPMorgan Chase to make significant modifications to its operations and legal entity structure in the relevant 10 countries or regions in order to comply with those requirements. These include laws, rules and regulations that have been adopted or proposed relating to: • the establishment of locally-based intermediate holding companies or operating subsidiaries • requirements to maintain minimum amounts of capital or liquidity in locally-based subsidiaries • the separation (or ring fencing) of core banking products and services from markets activities • the resolution of financial institutions • requirements for executing or settling transactions on exchanges or through central counterparties (CCPs) • position limits and reporting rules for derivatives • governance and accountability regimes • conduct of business and control requirements, and • restrictions on compensation. These types of differences in financial services regulation, or inconsistencies or conflicts between laws, rules and regulations between different jurisdictions, have required and could in the future require JPMorgan Chase to: • divest assets or restructure its operations • absorb increased operational, capital and liquidity costs • change the prices that it charges for its products and services • curtail the products and services that it offers to its customers and clients, or • incur higher costs for complying with different legal and regulatory frameworks. Any or all of these factors could harm JPMorgan Chase's ability to compete against other firms that are not subject to the same laws, rules and regulations or supervisory oversight, or harm JPMorgan Chase's businesses, results of operations and profitability. Heightened regulatory scrutiny of JPMorgan Chase's businesses could result in higher compliance costs and restrictions on its operations. JPMorgan Chase's operations are subject to heightened oversight and scrutiny from regulatory authorities in many jurisdictions. JPMorgan Chase has paid significant fines, provided other monetary relief, incurred other penalties and experienced other repercussions in connection with resolving investigations and enforcement actions by governmental

agencies. JPMorgan Chase could become subject to similar regulatory resolutions or other actions in the future, and addressing the requirements of any such resolutions or actions could result in JPMorgan Chase incurring higher operational and compliance costs or needing to comply with other restrictions. In connection with resolving specific regulatory investigations or enforcement actions, certain regulators have required JPMorgan Chase and other financial institutions to admit wrongdoing with respect to the activities that gave rise to the resolution. These types of admissions can lead to: greater exposure in litigation; damage to reputation; disqualification from doing business with certain clients or customers, or in specific jurisdictions, or other direct and indirect adverse effects. Furthermore, U.S. government officials have demonstrated a willingness to bring criminal actions against financial institutions and have required that institutions plead guilty to criminal offenses or admit other wrongdoing in connection with resolving regulatory investigations or enforcement actions. Resolutions of this type can have significant collateral consequences for the subject financial institution, including: loss of clients, customers and business; restrictions on offering certain products or services, and losing permission to operate certain businesses, either temporarily or permanently. JPMorgan Chase expects that: it and other financial services firms will continue to be subject to heightened regulatory scrutiny and governmental investigations and enforcement actions; regulators will continue to require that financial institutions be penalized for actual or deemed violations of law with formal and punitive enforcement actions, including the imposition of significant monetary and other sanctions, rather than resolving these matters through informal supervisory actions; and regulators will be more likely to pursue formal enforcement actions and resolutions against JPMorgan Chase to the extent that it has previously been subject to other governmental investigations or enforcement actions. If JPMorgan Chase fails to meet the requirements of any resolution of a governmental investigation or enforcement action, or to maintain risk and control processes that meet the heightened standards established by its regulators, it could be required to: enter into further resolutions of investigations or enforcement actions; pay additional regulatory fines, penalties or judgments, or accept material regulatory restrictions on, or changes in the management of, its businesses.

11 Part I In these circumstances, JPMorgan Chase could also become subject to other sanctions, or to prosecution or civil litigation with respect to the conduct that gave rise to an investigation or enforcement action. Complying with economic sanctions and anti-corruption and anti-money laundering laws, rules and regulations can increase JPMorgan Chase's operational and compliance costs and risks. JPMorgan Chase must comply with economic sanctions and embargo programs administered by the Office of Foreign Assets Control (OFAC) and similar national and multi-national bodies and governmental agencies outside the U.S., as well as anti-corruption and anti-money laundering laws, rules and regulations throughout the world. JPMorgan Chase can incur higher costs and face greater compliance risks in structuring and operating its businesses to comply with these requirements. Certain governments have enacted laws, which are commonly referred to as blocking laws, that are designed to prohibit compliance with some U.S. sanctions and may raise significant conflict of laws issues. A violation of a sanction or embargo program or anti-corruption or anti-money laundering laws, rules and regulations, or enforcement of blocking laws, could subject JPMorgan Chase, and individual employees, to regulatory enforcement actions as well as significant civil and criminal penalties. JPMorgan Chase's operations and financial results can be negatively impacted in countries with less predictable legal and regulatory frameworks. JPMorgan Chase conducts business in certain countries in which the application of the rule of law is inconsistent or less predictable, including with respect to: the absence of a statutory or regulatory basis or guidance for engaging in specific types of business or transactions; conflicting or ambiguous laws, rules and regulations, or the inconsistent application or interpretation of existing laws, rules and regulations; uncertainty concerning the enforceability of contractual, intellectual property or other obligations; difficulty in competing in economies in which the government controls or protects all or a portion of the local economy or specific businesses, or where graft or corruption may be pervasive, and the threat of arbitrary regulatory investigations, civil litigations or criminal prosecutions, the termination of licenses required to operate in the local market or the suspension of business relationships with governmental bodies. If the application of the laws, rules and regulations in a particular country is susceptible to producing inconsistent or unexpected outcomes, this can create a more difficult environment in which JPMorgan Chase conducts its business and could negatively affect JPMorgan Chase's operations and reduce its earnings with respect to that country. For example, conducting business could require JPMorgan Chase to devote significant additional resources to understanding, and monitoring changes in, local laws, rules and regulations, as well as structuring its operations to comply with local laws, rules and regulations and implementing and administering related internal policies and procedures. There can be no assurance that JPMorgan Chase will always be successful in its efforts to fully understand and to conduct its business in compliance with the laws, rules and regulations of all of the jurisdictions in which it operates, and the risk of non-compliance can be greater in countries that have less predictable legal and regulatory systems. Requirements for the orderly resolution of JPMorgan Chase could result in JPMorgan Chase having to restructure or reorganize its businesses and could increase its funding or operational costs or curtail its business. JPMorgan Chase is required under Federal Reserve and FDIC rules to prepare and submit periodically to those agencies a detailed plan for rapid and orderly resolution in bankruptcy, without extraordinary government support, in the event of

material financial distress or failure. The agencies' evaluation of JPMorgan Chase's resolution plan may change, and the requirements for resolution plans may be modified from time to time. Any such determinations or modifications could result in JPMorgan Chase needing to make changes to its legal entity structure or to certain internal or external activities, which could increase its funding or operational costs, or hamper its ability to serve clients and customers. If the Federal Reserve and the FDIC were both to determine that a resolution plan submitted by JPMorgan Chase has deficiencies, they could jointly impose more stringent capital, leverage or liquidity requirements or restrictions on JPMorgan Chase's growth, activities or operations. The agencies could also require that JPMorgan Chase restructure, reorganize or divest assets or businesses in ways that could materially and adversely affect JPMorgan Chase's operations and strategy. Holders of JPMorgan Chase & Co.'s debt and equity securities will absorb losses if it were to enter into a resolution. Federal Reserve rules require that JPMorgan Chase & Co. (the Parent Company) maintain minimum levels of unsecured external long-term debt and other loss-absorbing capacity with specific terms (eligible LTD) for purposes of recapitalizing JPMorgan Chase's operating subsidiaries if the Parent Company were to enter into a resolution either: in a bankruptcy proceeding under Chapter 11 of the U.S. Bankruptcy Code, or in a receivership administered by the FDIC under Title II of the Dodd-Frank Act (Title II). 12 If the Parent Company were to enter into a resolution, holders of eligible LTD and other debt and equity securities of the Parent Company will absorb the losses of the Parent Company and its subsidiaries. The preferred single point of entry strategy under JPMorgan Chase's resolution plan contemplates that only the Parent Company would enter bankruptcy proceedings. JPMorgan Chase's subsidiaries would be recapitalized, as needed, so that they could continue normal operations or subsequently be divested or wound down in an orderly manner. As a result, the Parent Company's losses and any losses incurred by its subsidiaries would be imposed first on holders of the Parent Company's equity securities and thereafter on its unsecured creditors, including holders of eligible LTD and other debt securities. Claims of holders of those securities would have a junior position to the claims of creditors of JPMorgan Chase's subsidiaries and to the claims of priority (as determined by statute) and secured creditors of the Parent Company. Accordingly, in a resolution of the Parent Company in bankruptcy, holders of eligible LTD and other debt securities of the Parent Company would realize value only to the extent available to the Parent Company as a shareholder of JPMorgan Chase Bank, N.A. and its other subsidiaries, and only after any claims of priority and secured creditors of the Parent Company have been fully repaid. The FDIC has similarly indicated that a single point of entry recapitalization model could be a desirable strategy to resolve a systemically important financial institution, such as the Parent Company, under Title II. However, the FDIC has not formally adopted a single point of entry resolution strategy. If the Parent Company were to approach, or enter into, a resolution, none of the Parent Company, the Federal Reserve or the FDIC is obligated to follow JPMorgan Chase's preferred resolution strategy, and losses to holders of eligible LTD and other debt and equity securities of the Parent Company, under whatever strategy is ultimately followed, could be greater than they might have been under JPMorgan Chase's preferred strategy. Regulatory uncertainties associated with the U.K.'s departure from the EU could negatively affect JPMorgan Chase's business, results of operations and operating model. The U.K.'s departure from the EU, which is commonly referred to as Brexit, was completed on December 31, 2020. The Trade and Cooperation Agreement entered into between the U.K. and the EU in December 2020 included very limited provisions relating to the conduct of financial services activities between the U.K. and the EU. Accordingly, unless or until the U.K. and the EU enter into further agreements relating to financial services, the regulatory environment for financial services in the aftermath of Brexit can be expected to: significantly limit the ability of U.K.-based financial services firms to conduct business in the EU, and vice versa; prolong uncertainty concerning the levels of market access for trading venues, which could result in a reduction or fragmentation of market liquidity, and; prolong ongoing uncertainties concerning optimal business models for firms providing financial services, especially given that any changes in the regulation of such services by the U.K. may not benefit from equivalence determinations by the EU. As a result of these limitations and uncertainties, JPMorgan Chase: has made and is continuing to make appropriate changes to its legal entity structure and operations in the U.K. and the EU to address the regulatory environment; is now maintaining, and expects that it will be required to sustain, a more fragmented operating model across its U.K. and EU operating entities, and; expects that, due to considerations such as operating expenses, liquidity, leverage and capital, this modified European operating framework will be more complex, less efficient and more costly than would otherwise have been the case. In addition, the COVID-19 pandemic and EU and U.K. government responses to the pandemic, including travel restrictions and lock-downs, have introduced delays and uncertainties into JPMorgan Chase's implementation of its plans for maintaining continuity of service for its clients. Any or all of the above factors could have an adverse effect on the overall operation of the financial services market across the U.K. and the EU as well as JPMorgan Chase's business, operations and earnings in the U.K., the EU and globally. Political Economic uncertainty or instability caused by political developments can hurt JPMorgan Chase's businesses. The economic environment and market conditions in which JPMorgan Chase operates continue to be uncertain due to political developments in the U.S. and other countries.

Certain monetary, fiscal and other policy initiatives and proposals could cause a contraction in U.S. and global economic growth and higher volatility in the financial markets, including : monetary policies and actions taken by the Federal Reserve and other central banks or governmental authorities, including any sustained large-scale asset purchases or any suspension or reversal of those actions ; fiscal policies, including with respect to taxation ; actions that governments take or fail to take in response to the effects of the COVID-19 pandemic, as well as the effectiveness of any actions taken ; isolationist foreign policies ; the implementation of tariffs and other protectionist trade policies, or ; political and social pressures with respect to governmental policies and actions. These types of political developments, and uncertainty about the possible outcomes of these developments, could: erode investor confidence in the U.S. economy and financial markets, which could potentially undermine the status of the U.S. dollar as a safe haven currency ; provoke retaliatory countermeasures by other countries and otherwise heighten tensions in diplomatic relations ; lead to the withdrawal of government support for agencies and enterprises such as the U.S. Federal National Mortgage Association and the U.S. Federal Home Loan Mortgage Corporation (together, the U.S. GSEs) ; increase concerns about whether the U.S. government will be funded, and its outstanding debt serviced, at any particular time ; result in periodic shutdowns of the U.S. government or governments in other countries, and ; increase investor reliance on actions by the Federal Reserve or other central banks, or investor perceptions concerning government support of sectors of the economy or the economy as a whole. These factors could lead to: slower growth rates, rising inflation or recession ; greater market volatility ; a contraction of available credit and the widening of credit spreads ; erosion of adequate risk premium on certain financial assets ; diminished investor and consumer confidence ; lower investment growth ; large-scale sales of government debt and other debt and equity securities in the U.S. and other countries ; reduced commercial activity among trading partners ; the potential for a currency redenomination by a particular country ; the possible departure of a country from, or the dissolution of, a political or economic alliance or treaty ; potential expropriation or nationalization of assets, or ; other market dislocations, including the spread of unfavorable economic conditions from a particular country or region to other countries or regions. Any of these potential outcomes could cause JPMorgan Chase to suffer losses on its market-making positions or in its investment portfolio, reduce its liquidity and capital levels, hamper its ability to deliver products and services to its clients and customers, and weaken its results of operations and financial condition. Market Economic and market events and conditions can materially affect JPMorgan Chase's businesses and investment and market-making positions. JPMorgan Chase's results of operations can be negatively affected by adverse changes in any of the following: investor, consumer and business sentiment ; events that reduce confidence in the financial markets ; inflation or deflation ; high unemployment or, conversely, a tightening labor market ; the availability and cost of capital, liquidity and credit ; levels and volatility of interest rates, credit spreads and market prices for currencies, equities and commodities, and the duration of any changes in levels or volatility ; the economic effects of outbreaks of hostilities, terrorism or other geopolitical instabilities, cyber attacks, climate change, natural disasters, severe weather conditions, health emergencies, the spread of infectious diseases or pandemics, and ; the health of the U.S. and global economies. All of these are affected by global economic, market and political events and conditions, as well as regulatory restrictions. In addition, JPMorgan Chase's investment portfolio and market-making businesses can suffer losses due to unanticipated market events, including: severe declines in asset values ; unexpected credit events ; unforeseen events or conditions that may cause previously uncorrelated factors to become correlated (and vice versa) ; the inability to effectively hedge market and other risks related to market-making and investment portfolio positions, or ; other market risks that may not have been appropriately taken into account in the development, structuring or pricing of a financial instrument. 14 If JPMorgan Chase experiences significant losses in its investment portfolio or from market-making activities, this could reduce JPMorgan Chase's profitability and its liquidity and capital levels, and thereby constrain the growth of its businesses. JPMorgan Chase's consumer businesses can be negatively affected by adverse economic conditions. JPMorgan Chase's consumer businesses are particularly affected by U.S. and global economic conditions, including: personal and household income distribution ; unemployment or underemployment ; prolonged periods of exceptionally low interest rates ; housing prices ; consumer and small business confidence levels ; changes in consumer spending or in the level of consumer debt, and ; the number of personal bankruptcies. Heightened levels of unemployment or underemployment that result in reduced personal and household income could negatively affect consumer credit performance to the extent that consumers are less able to service their debts. In addition, sustained low growth, low or negative interest rates, inflationary pressures or recessionary conditions could diminish customer demand for the products and services offered by JPMorgan Chase's consumer businesses. Adverse economic conditions could also lead to an increase in delinquencies, additions to the allowance for credit losses and higher net charge-offs, which can reduce JPMorgan Chase's earnings. These consequences could be significantly worse in certain geographies and industry segments where economic restrictions and shutdowns have occurred related to the COVID-19 pandemic, declining industrial or manufacturing activity that has resulted in or

could result in higher levels of unemployment, or where high levels of consumer debt, such as outstanding student loans, could impair the ability of customers to pay their other consumer loan obligations. JPMorgan Chase's earnings from its consumer businesses could also be adversely affected by governmental policies and actions that affect consumers, including: policies and initiatives relating to medical insurance, education, immigration, employment status and housing, and policies aimed at the economy more broadly, such as higher taxes and increased regulation which could result in reductions in consumer disposable income. In addition, governmental proposals to permit student loan obligations to be discharged in bankruptcy proceedings could, if enacted into law, encourage certain of JPMorgan Chase's customers to declare personal bankruptcy and thereby trigger defaults and charge-offs of credit card and other consumer loans extended to those customers. Unfavorable market and economic conditions can have an adverse effect on JPMorgan Chase's wholesale businesses. In JPMorgan Chase's wholesale businesses, market and economic factors can affect the volume of transactions that JPMorgan Chase executes for its clients or for which it advises clients, and, therefore, the revenue that JPMorgan Chase receives from those transactions. These factors can also influence the willingness of other financial institutions and investors to participate in capital markets transactions that JPMorgan Chase manages, such as loan syndications or securities underwritings. Furthermore, if a significant and sustained deterioration in market conditions were to occur, the profitability of JPMorgan Chase's capital markets businesses, including its loan syndication, securities underwriting and leveraged lending activities, could be reduced to the extent that those businesses: earn less fee revenue due to lower transaction volumes, including when clients are unwilling or unable to refinance their outstanding debt obligations in unfavorable market conditions, or dispose of portions of credit commitments at a loss, or hold larger residual positions in credit commitments that cannot be sold at favorable prices. An adverse change in market conditions in particular segments of the economy, such as a sudden and severe downturn in oil and gas prices or an increase in commodity prices, could have a material adverse effect on clients of JPMorgan Chase whose operations or financial condition are directly or indirectly dependent on the health or stability of those market segments, as well as clients that are engaged in related businesses. JPMorgan Chase could incur losses on its loans and other credit commitments to clients that operate in, or are dependent on, any sector of the economy that is under stress. The fees that JPMorgan Chase earns from managing client assets or holding assets under custody for clients could be diminished by declining asset values or other adverse macroeconomic conditions. For example, higher interest rates or a downturn in financial markets could affect the valuations of client assets that JPMorgan Chase manages or holds under custody, which, in turn, could affect JPMorgan Chase's revenue from fees that are based on the amount of assets under management or custody. Similarly, adverse macroeconomic or market conditions could prompt outflows from JPMorgan Chase funds or accounts, or cause clients to invest in products that generate lower revenue. Substantial and unexpected withdrawals from a JPMorgan Chase fund can also hamper the investment performance of the fund, particularly if the outflows create the need for the fund to dispose of fund assets at disadvantageous times or prices, and could lead to further withdrawals based on the weaker investment performance.

15 Part I An economic downturn that results in lower consumer and business spending could also have a negative impact on certain of JPMorgan Chase's wholesale clients, and thereby diminish JPMorgan Chase's earnings from its wholesale operations. For example, the businesses of certain of JPMorgan Chase's wholesale clients are dependent on consistent streams of rental income from commercial real estate properties which are owned or being built by those clients. Severe and sustained adverse economic conditions, including higher unemployment caused by the COVID-19 pandemic and governmental actions taken in response to the pandemic, could result in reductions in the rental cash flows that owners or developers receive from their tenants which, in turn, could depress the values of the properties and impair the ability of borrowers to service or refinance their commercial real estate loans. These consequences could result in JPMorgan Chase experiencing higher delinquencies, defaults and write-offs within its commercial real estate loan portfolio and incurring higher costs for servicing a larger volume of delinquent loans in that portfolio, thereby reducing JPMorgan Chase's earnings from its wholesale businesses. Changes in interest rates and credit spreads can adversely affect certain of JPMorgan Chase's revenue and income streams related to the Firm's traditional banking and funding activities. In general, a low or negative interest rate environment may cause: net interest margins to be compressed, which could reduce the amounts that JPMorgan Chase earns on its investment securities portfolio to the extent that it is unable to reinvest contemporaneously in higher-yielding instruments; unanticipated or adverse changes in depositor behavior, which could negatively affect JPMorgan Chase's broader asset and liability management strategy; JPMorgan Chase to reduce the amount of deposits that it accepts from customers and clients, which could result in lower revenues, and; a reduction in the value of JPMorgan Chase's mortgage servicing rights (MSRs) asset, thereby decreasing revenues. When credit spreads widen, it becomes more expensive for JPMorgan Chase to borrow. JPMorgan Chase's credit spreads may widen or narrow not only in response to events and circumstances that are specific to JPMorgan Chase but also as a result of general economic and geopolitical events and conditions. Changes in JPMorgan Chase's credit spreads will affect, positively or negatively, JPMorgan Chase's earnings on certain liabilities, such as derivatives, that are recorded at fair value. When interest rates are increasing, JPMorgan Chase can

generally be expected to earn higher net interest income. However, higher interest rates can also lead to: fewer originations of commercial and residential real estate loans; losses on underwriting exposures; the loss of deposits, including in the event that JPMorgan Chase makes incorrect assumptions about depositor behavior; lower net interest income if central banks introduce interest rate increases more quickly than anticipated and this results in a misalignment in the pricing of short-term and long-term borrowings; less liquidity in the financial markets, and higher funding costs. All of these outcomes could adversely affect JPMorgan Chase's revenues and its liquidity and capital levels. Higher interest rates can also negatively affect the payment performance on loans within JPMorgan Chase's consumer and wholesale loan portfolios that are linked to variable interest rates. If borrowers of variable rate loans are unable to afford higher interest payments, those borrowers may reduce or stop making payments, thereby causing JPMorgan Chase to incur losses and increased operational costs related to servicing a higher volume of delinquent loans. JPMorgan Chase's results may be materially affected by market fluctuations and significant changes in the value of financial instruments. The value of securities, derivatives and other financial instruments which JPMorgan Chase owns or in which it makes markets can be materially affected by market fluctuations. Market volatility, illiquid market conditions and other disruptions in the financial markets may make it extremely difficult to value certain financial instruments. Subsequent valuations of financial instruments in future periods, in light of factors then prevailing, may result in significant changes in the value of these instruments. In addition, at the time of any disposition of these financial instruments, the price that JPMorgan Chase ultimately realizes will depend on the demand and liquidity in the market at that time and may be materially lower than their current fair value. Any of these factors could cause a decline in the value of JPMorgan Chase's financial instruments which may have an adverse effect on JPMorgan Chase's results of operations. JPMorgan Chase's risk management and monitoring processes, including its stress testing framework, seek to quantify and control JPMorgan Chase's exposure to more extreme market moves. However, JPMorgan Chase's hedging and other risk management strategies may not be effective, and it could incur significant losses, if extreme market events were to occur. 16 Credit JPMorgan Chase can be negatively affected by adverse changes in the financial condition of clients, counterparties, custodians and CCPs. JPMorgan Chase routinely executes transactions with clients and counterparties such as corporations, financial institutions, asset managers, hedge funds, exchanges and government entities within and outside the U.S. Many of these transactions expose JPMorgan Chase to the credit risk of its clients and counterparties, and can involve JPMorgan Chase in disputes and litigation if a client or counterparty defaults. JPMorgan Chase can also be subject to losses or liability where a financial institution that it has appointed to provide custodial services for client assets or funds becomes insolvent as a result of fraud or the failure to abide by existing laws and obligations, including under the EU Alternative Investment Fund Managers Directive. A default by, or the financial or operational failure of, a CCP through which JPMorgan Chase executes contracts would require JPMorgan Chase to replace those contracts, thereby increasing its operational costs and potentially resulting in losses. JPMorgan Chase can also be exposed to losses if a member of a CCP in which JPMorgan Chase is also a member defaults on its obligations to the CCP because of requirements that each member of the CCP absorb a portion of those losses. As part of its clearing services activities, JPMorgan Chase is also exposed to the risk of nonperformance by its clients, which it seeks to mitigate by requiring clients to provide adequate collateral. JPMorgan Chase is also exposed to intra-day credit risk of its clients in connection with providing cash management, clearing, custodial and other transaction services to those clients. If a client for which JPMorgan Chase provides these services becomes bankrupt or insolvent, JPMorgan Chase may incur losses, become involved in disputes and litigation with one or more CCPs, the client's bankruptcy estate and other creditors, or be subject to regulatory investigations. All of the foregoing events can increase JPMorgan Chase's operational and litigation costs, and JPMorgan Chase may suffer losses to the extent that any collateral that it has received is insufficient to cover those losses. JPMorgan Chase can also be subject to bearing its share of non-default losses incurred by a CCP, including losses from custodial, settlement or investment activities or due to cyber or other security breaches. Transactions with government entities, including national, state, provincial, municipal and local authorities, can expose JPMorgan Chase to enhanced sovereign, credit, operational and reputation risks. Government entities may, among other things, claim that actions taken by government officials were beyond the legal authority of those officials or repudiate transactions authorized by a previous incumbent government. These types of actions have in the past caused, and could in the future cause, JPMorgan Chase to suffer losses or hamper its ability to conduct business in the relevant jurisdiction. In addition, local laws, rules and regulations could limit JPMorgan Chase's ability to resolve disputes and litigation in the event of a counterparty default or unwillingness to make previously agreed-upon payments, which could subject JPMorgan Chase to losses. Disputes may arise with counterparties to derivatives contracts with regard to the terms, the settlement procedures or the value of underlying collateral. The disposition of those disputes could cause JPMorgan Chase to incur unexpected transaction, operational and legal costs, or result in credit losses. These consequences can also impair JPMorgan Chase's ability to effectively manage its credit risk exposure from its market activities, or cause harm to JPMorgan Chase's reputation. The financial or operational failure of a significant market participant, such as a major financial institution or a CCP, or concerns about the creditworthiness of such a market participant, can have a

cascading effect within the financial markets. JPMorgan Chase's businesses could be significantly disrupted by such an event, particularly if it leads to other market participants incurring significant losses, experiencing liquidity issues or defaulting, and JPMorgan Chase is likely to have significant interrelationships with, and credit exposure to, such a significant market participant. JPMorgan Chase may suffer losses if the value of collateral declines in stressed market conditions. During periods of market stress or illiquidity, JPMorgan Chase's credit risk may be further increased when: JPMorgan Chase cannot realize the fair value of the collateral it holds; collateral is liquidated at prices that are not sufficient to recover the full amount owed to it, or; counterparties are unable to post collateral, whether for operational or other reasons. Furthermore, disputes with counterparties concerning the valuation of collateral may increase in times of significant market stress, volatility or illiquidity, and JPMorgan Chase could suffer losses during these periods if it is unable to realize the fair value of collateral or to manage declines in the value of collateral. JPMorgan Chase could incur significant losses arising from concentrations of credit and market risk. JPMorgan Chase is exposed to greater credit and market risk to the extent that groupings of its clients or counterparties: engage in similar or related businesses, or in businesses in related industries; do business in the same geographic region, or; have business profiles, models or strategies that could cause their ability to meet their obligations to be similarly affected by changes in economic conditions.

17 Part I For example, a significant deterioration in the credit quality of one of JPMorgan Chase's borrowers or counterparties could lead to concerns about the creditworthiness of other borrowers or counterparties in similar, related or dependent industries. This type of interrelationship could exacerbate JPMorgan Chase's credit, liquidity and market risk exposure and potentially cause it to incur losses, including fair value losses in its market-making businesses and investment portfolios. In addition, JPMorgan Chase may be required to recognize higher allowances for credit losses with respect to certain clients or industries in order to align with directives or expectations of its banking regulators. Similarly, challenging economic conditions that affect a particular industry or geographic area could lead to concerns about the credit quality of JPMorgan Chase's borrowers or counterparties not only in that particular industry or geography but in related or dependent industries, wherever located. These conditions could also heighten concerns about the ability of customers of JPMorgan Chase's consumer businesses who live in those areas or work in those affected industries or related or dependent industries to meet their obligations to JPMorgan Chase. JPMorgan Chase regularly monitors various segments of its credit and market risk exposures to assess the potential risks of concentration or contagion, but its efforts to diversify or hedge its exposures against those risks may not be successful. JPMorgan Chase's consumer businesses can also be harmed by an excessive expansion of consumer credit by bank or non-bank competitors. Heightened competition for certain types of consumer loans could prompt industry-wide reactions such as significant reductions in the pricing or margins of those loans or the making of loans to less-creditworthy borrowers. If large numbers of consumers subsequently default on their loans, whether due to weak credit profiles, an economic downturn or other factors, this could impair their ability to repay obligations owed to JPMorgan Chase and result in higher charge-offs and other credit-related losses. More broadly, widespread defaults on consumer debt could lead to recessionary conditions in the U.S. economy, and JPMorgan Chase's consumer businesses may earn lower revenues in such an environment. If JPMorgan Chase is unable to reduce positions effectively during a market dislocation, this can increase both the market and credit risks associated with those positions and the level of RWA that JPMorgan Chase holds on its balance sheet. These factors could adversely affect JPMorgan Chase's capital position, funding costs and the profitability of its businesses. Liquidity JPMorgan Chase's ability to operate its businesses could be impaired if its liquidity is constrained. JPMorgan Chase's liquidity could be impaired at any given time by factors such as: market-wide illiquidity or disruption; unforeseen liquidity or capital requirements, including as a result of changes in laws, rules and regulations; inability to sell assets, or to sell assets at favorable times or prices; default by a CCP or other significant market participant; unanticipated outflows of cash or collateral; unexpected loss of consumer deposits, and; lack of market or customer confidence in JPMorgan Chase or financial institutions in general. A reduction in JPMorgan Chase's liquidity may be caused by events over which it has little or no control. For example, during periods of market stress, low investor confidence and significant market illiquidity could result in higher funding costs for JPMorgan Chase and could limit its access to some of its traditional sources of liquidity. JPMorgan Chase may need to raise funding from alternative sources if its access to stable and lower-cost sources of funding, such as deposits and borrowings from Federal Home Loan Banks, is reduced. Alternative sources of funding could be more expensive or limited in availability. JPMorgan Chase's funding costs could also be negatively affected by actions that JPMorgan Chase may take in order to: satisfy applicable liquidity coverage ratio and net stable funding ratio requirements; address obligations under its resolution plan, or; satisfy regulatory requirements in jurisdictions outside the U.S. relating to the pre-positioning of liquidity in subsidiaries that are material legal entities. More generally, if JPMorgan Chase fails to effectively manage its liquidity, this could constrain its ability to fund or invest in its businesses and subsidiaries (including, in particular, its broker-dealer subsidiaries), and thereby adversely affect its results of operations. JPMorgan Chase & Co. is a holding company and depends on the cash flows of its subsidiaries to make payments on its outstanding securities. JPMorgan Chase & Co. is a holding company that holds the stock of JPMorgan Chase Bank, N.A. and an intermediate

holding company, JPMorgan Chase Holdings LLC (the “IHC”); The IHC in turn holds the stock of substantially all of JPMorgan Chase’s subsidiaries other than JPMorgan Chase Bank, N.A. and its subsidiaries. The IHC also owns other assets and owes intercompany indebtedness to the holding company. The holding company is obligated to contribute to the IHC substantially all the net proceeds received from securities issuances (including issuances of senior and subordinated debt securities and of preferred and common stock). The ability of JPMorgan Chase Bank, N.A. and the IHC to make payments to the holding company is also limited; JPMorgan Chase Bank, N.A. is subject to restrictions on its dividend distributions, as well as capital adequacy requirements, such as the Supplementary Leverage Ratio (“SLR”), and liquidity requirements and other regulatory restrictions on its ability to make payments to the holding company. The IHC is prohibited from paying dividends or extending credit to the holding company if certain capital or liquidity thresholds are breached or if limits are otherwise imposed by JPMorgan Chase’s management or Board of Directors. As a result of these arrangements, the ability of the holding company to make various payments is dependent on its receiving dividends from JPMorgan Chase Bank, N.A. and dividends and extensions of credit from the IHC. These limitations could affect the holding company’s ability to: pay interest on its debt securities; pay dividends on its equity securities; redeem or repurchase outstanding securities, and fulfill its other payment obligations. These regulatory restrictions and limitations could also result in the holding company seeking protection under bankruptcy laws at a time earlier than would have been the case absent the existence of the capital and liquidity thresholds to which the IHC is subject. Reductions in JPMorgan Chase’s credit ratings may adversely affect its liquidity and cost of funding. JPMorgan Chase & Co. and certain of its principal subsidiaries are rated by credit rating agencies. Rating agencies evaluate both general and firm-specific and industry-specific factors when determining credit ratings for a particular financial institution, including: expected future profitability; risk management practices; legal expenses; ratings differentials between bank holding companies and their bank and non-bank subsidiaries; regulatory developments; assumptions about government support, and economic and geopolitical trends. JPMorgan Chase closely monitors and manages, to the extent that it is able, factors that could influence its credit ratings. However, there is no assurance that JPMorgan Chase’s credit ratings will not be lowered in the future. Furthermore, any such downgrade could occur at times of broader market instability when JPMorgan Chase’s options for responding to events may be more limited and general investor confidence is low. A reduction in JPMorgan Chase’s credit ratings could curtail JPMorgan Chase’s business activities and reduce its profitability in a number of ways, including: reducing its access to capital markets; materially increasing its cost of issuing and servicing securities; triggering additional collateral or funding requirements, and decreasing the number of investors and counterparties that are willing or permitted to do business with or lend to JPMorgan Chase. Any rating reduction could also increase the credit spreads charged by the market for taking credit risk on JPMorgan Chase & Co. and its subsidiaries. This could, in turn, adversely affect the value of debt and other obligations of JPMorgan Chase & Co. and its subsidiaries. The reform and replacement of benchmark rates could adversely affect JPMorgan Chase’s funding, investments and financial products, and expose it to litigation and other disputes. Interest rate, equity, foreign exchange rate and other types of indices which are deemed to be benchmarks, including those in widespread and longstanding use, have been the subject of ongoing international, national and other regulatory scrutiny and initiatives and proposals for reform. Some of these reforms are already effective while others are still to be implemented or are under consideration. These reforms may cause certain benchmarks to perform differently than in the past, or to disappear entirely, or have other consequences which cannot be fully anticipated. Any of the benchmark reforms which have been proposed or implemented, or the general increased regulatory scrutiny of benchmarks, could also increase the costs and risks of administering or otherwise participating in the setting of benchmarks and complying with regulations or requirements relating to benchmarks. Such factors may have the effect of discouraging market participants from continuing to administer or contribute to certain benchmarks, trigger changes in the rules or methodologies used in certain benchmarks or lead to the disappearance of certain benchmarks. Any of these developments, and any future initiatives to regulate, reform or change the administration of benchmarks, could result in adverse consequences to the return on, value of and market for loans, mortgages, securities, derivatives and other financial instruments whose returns are linked to any such benchmark, including those issued, funded, serviced or held by JPMorgan Chase. Various regulators, industry bodies and other market participants in the U.S. and other countries are engaged in initiatives to develop, introduce and encourage the use of alternative rates to replace certain benchmarks. There is no assurance that these new rates will be accepted or widely used by market participants, or that the characteristics of any of these new rates will be similar to, or produce the economic equivalent of, the benchmarks that they seek to replace. If a particular benchmark were to be discontinued and an alternative rate has not been successfully introduced to replace that benchmark, this could result in widespread dislocation in the financial markets, engender volatility in the pricing of securities, derivatives and other instruments, and suppress capital markets activities, all of which could have adverse effects on JPMorgan Chase’s results of operations. To the extent that any guidance provided by accounting standard setters concerning the transition from benchmark rates is not comprehensive,

fails to provide the expected relief or the ability to elect or implement that guidance is constrained in any significant respect, the transition could: • affect hedge accounting relationships between financial instruments linked to a particular benchmark and any related derivatives, which could adversely affect JPMorgan Chase’s results of operations, or • increase JPMorgan Chase’s operational costs with respect to the determination of whether the transition has resulted in the modification or extinguishment of specific contracts for accounting purposes. ICE Benchmark Administration, the administrator of LIBOR, has announced that it will consult on its intention to: • cease publication of (i) all tenors of the euro, sterling, Swiss franc and yen LIBORs and (ii) the one week and two month tenors of U.S. dollar LIBOR, in each case, after December 31, 2021, and • cease publication of all remaining tenors of U.S. dollar LIBOR after June 30, 2023. These announcements indicate that it is highly likely that various tenors of the LIBOR benchmark will be discontinued on or about the timeframes mentioned above. Vast amounts of loans, mortgages, securities, derivatives and other financial instruments are linked to the LIBOR benchmark, and any inability of market participants and regulators to successfully introduce benchmark rates to replace LIBOR and implement effective transitional arrangements to address the discontinuation of LIBOR could result in disruption in the financial markets and suppress capital markets activities, all of which could have a negative impact on JPMorgan Chase’s results of operations and on LIBOR-linked securities, credit or other instruments which are issued, funded, serviced or held by JPMorgan Chase. JPMorgan Chase could also become involved in litigation and other types of disputes with clients, customers, counterparties and investors as a consequence of the transition from LIBOR and other benchmark rates to replacement rates, including claims that JPMorgan Chase has: • treated clients, customers, counterparties or investors unfairly, or caused them to experience losses, higher financing costs or lower returns on investments • failed to appropriately communicate the effects of the transition from benchmark rates on the products that JPMorgan Chase has sold to its clients and customers, or failed to disclose purported conflicts of interest • made inappropriate product recommendations to or investments on behalf of its clients, or sold products that did not serve their intended purpose, in connection with the transition from benchmark rates • engaged in anti-competitive behavior, or in the manipulation of markets or specific benchmarks, in connection with the discontinuation of or transition from benchmark rates, or • disadvantaged clients, customers, counterparties or investors when interpreting or making determinations under the terms of agreements or financial instruments. These types of claims could subject JPMorgan Chase to higher legal expenses and operational costs, require it to pay significant amounts in connection with resolving litigation and other disputes, and harm its reputation. Capital Maintaining the required level and composition of capital may impact JPMorgan Chase’s ability to support business activities, meet evolving regulatory requirements and distribute capital to shareholders. JPMorgan Chase is subject to various regulatory capital requirements, including leverage- and risk-based capital requirements, that can change due to actions by banking regulators. JPMorgan Chase’s adherence to these requirements can also evolve dynamically in response to changes in the composition of its balance sheet or other factors. It is possible that these changing requirements, including meeting or exceeding various capital ratio thresholds, could limit JPMorgan Chase’s ability to support its businesses and make capital distributions to its shareholders. Actions by the Federal Reserve and the U.S. government in response to the economic effects of the COVID-19 pandemic have led to an expansion of the Federal Reserve's balance sheet, growth in deposit balances held by JPMorgan Chase and other U.S. financial institutions and, consequently, an increase in JPMorgan Chase's leverage exposure. If these trends were to continue, JPMorgan Chase may be required to hold more capital or take other actions in order to satisfy the leverage-based capital requirements applicable to it. JPMorgan Chase is required to submit, at least annually, a capital plan describing proposed dividend payments to shareholders, redemptions and repurchases of its outstanding securities and other capital actions that it intends to take. JPMorgan Chase considers various factors in managing capital, including the impact of stress on its capital levels, as determined by both internal modeling and the Federal Reserve’s modeling of JPMorgan Chase’s capital position in supervisory stress tests. Because the Federal Reserve and JPMorgan Chase use different forecasting models and methodologies when determining stress test results, there can be significant differences between the estimates of stress loss as determined by the Federal Reserve and JPMorgan Chase, respectively. The Federal Reserve may require modifications to JPMorgan Chase’s capital plan, and may change the Stress Capital Buffer (“SCB”) applicable to JPMorgan Chase, from time to time. Any failure by or inability of JPMorgan Chase to maintain the required level and composition of capital, or unfavorable changes in the capital requirements imposed by banking regulators, could have an adverse impact on JPMorgan Chase’s shareholders, such as: • reducing the amount of common stock that JPMorgan Chase is permitted to repurchase • requiring the issuance of, or prohibiting the redemption of, capital instruments in a manner inconsistent with JPMorgan Chase’s capital management strategy • constraining the amount of dividends that may be paid on common stock, or • curtailing JPMorgan Chase’s business activities or operations. Operational JPMorgan Chase’s businesses are dependent on the effectiveness of its operational systems and those of other market participants. JPMorgan Chase’s businesses rely on the ability of JPMorgan Chase’s financial, accounting, transaction execution, data processing and other operational systems to process, record, monitor and report a large number of transactions on a continuous basis, and to do so accurately, quickly and

securely. In addition to proper design, installation, maintenance and training, the effective functioning of JPMorgan Chase's operational systems depends on: the quality of the information contained in those systems, as inaccurate, outdated or corrupted data can significantly compromise the functionality or reliability of a particular system and other systems to which it transmits or from which it receives information, and JPMorgan Chase's ability to appropriately maintain and upgrade its systems on a regular basis, and to ensure that any changes introduced to its systems are managed carefully to ensure security and operational continuity and adhere to all applicable legal and regulatory requirements. JPMorgan Chase also depends on its ability to access and use the operational systems of its vendors, custodians and other market participants, including clearing and payment systems, CCPs, securities exchanges and data processing, security and technology companies. The ineffectiveness, failure or other disruption of operational systems upon which JPMorgan Chase depends, including due to a systems malfunction, cyberbreach or other systems failure, could result in unfavorable ripple effects in the financial markets and for JPMorgan Chase and its clients and customers, including: delays or other disruptions in providing information, services and liquidity to clients and customers; the inability to settle transactions or obtain access to funds and other assets, including those for which physical settlement and delivery is required; failure to timely settle or confirm transactions; the possibility that funds transfers, capital markets trades or other transactions are executed erroneously, as a result of illegal conduct or with unintended consequences; financial losses, including due to loss-sharing requirements of CCPs, payment systems or other market infrastructures, or as possible restitution to clients and customers; higher operational costs associated with replacing services provided by a system that is unavailable; client or customer dissatisfaction with JPMorgan Chase's products and services; regulatory fines, penalties, or other sanctions against JPMorgan Chase; loss of confidence in the ability of JPMorgan Chase, or financial institutions generally, to protect against and withstand operational disruptions, or harm to JPMorgan Chase's reputation. As the speed, frequency, volume, interconnectivity and complexity of transactions continue to increase, it can become more challenging to effectively maintain and upgrade JPMorgan Chase's operational systems and infrastructure, especially due to the heightened risks that: attempts by third parties to defraud JPMorgan Chase or its clients and customers may increase, evolve or become more complex, particularly during periods of market disruption or economic uncertainty; errors made by JPMorgan Chase or another market participant, whether inadvertent or malicious, cause widespread system disruption; isolated or seemingly insignificant errors in operational systems compound, or migrate to other systems over time, to become larger issues; failures in synchronization or encryption software, or degraded performance of microprocessors due to design flaws, could cause disruptions in operational systems, or the inability of systems to communicate with each other, and; third parties may attempt to block the use of key technology solutions by claiming that the use infringes on their intellectual property rights. If JPMorgan Chase's operational systems, or those of external parties on which JPMorgan Chase's businesses depend, are unable to meet the requirements of JPMorgan Chase's businesses and operations or bank regulatory 21 Part I standards, or if they fail or have other significant shortcomings, JPMorgan Chase could be materially and adversely affected. A successful cyber attack affecting JPMorgan Chase could cause significant harm to JPMorgan Chase and its clients and customers. JPMorgan Chase experiences numerous attempted cyber attacks on its computer systems, software, networks and other technology assets on a daily basis from various actors, including groups acting on behalf of hostile countries, cyber-criminals, hackers; (i.e., individuals or groups that use technology to promote a political agenda or social change) and others. These cyber attacks can take many forms, including attempts to introduce computer viruses or malicious code, which is commonly referred to as malware, into JPMorgan Chase's systems. These attacks are typically designed to: obtain unauthorized access to confidential information belonging to JPMorgan Chase or its clients, customers, counterparties or employees; manipulate data; destroy data or systems with the aim of rendering services unavailable; disrupt, sabotage or degrade service on JPMorgan Chase's systems; steal money, or; extort money through the use of so-called ransomware. JPMorgan Chase has also experienced significant distributed denial-of-service attacks which are intended to disrupt online banking services. JPMorgan Chase has experienced security breaches due to cyber attacks in the past, and it is inevitable that additional breaches will occur in the future. Any such breach could result in serious and harmful consequences for JPMorgan Chase or its clients and customers. A principal reason that JPMorgan Chase cannot provide absolute security against cyber attacks is that it may not always be possible to anticipate, detect or recognize threats to JPMorgan Chase's systems, or to implement effective preventive measures against all breaches. This is because: the techniques used in cyber attacks change frequently and are increasingly sophisticated, and therefore may not be recognized until launched; cyber attacks can originate from a wide variety of sources, including JPMorgan Chase's own employees, cyber-criminals, hackers, groups linked to terrorist organizations or hostile countries, or third parties whose objective is to disrupt the operations of financial institutions more generally; JPMorgan Chase does not have control over the cybersecurity of the systems of the large number of clients, customers, counterparties and third-party service providers with which it does business, and; it is possible that a third party, after establishing a foothold on

an internal network without being detected, might obtain access to other networks and systems. The risk of a security breach due to a cyber attack could increase in the future as JPMorgan Chase continues to expand its mobile banking and other internet-based product offerings and its internal use of internet-based products and applications. Furthermore, increased use of remote access and third party video conferencing solutions during the COVID-19 pandemic, to facilitate work-from-home arrangements for employees, could increase JPMorgan Chase's exposure to cyber attacks. In addition, a third party could misappropriate confidential information obtained by intercepting signals or communications from mobile devices used by JPMorgan Chase's employees. A successful penetration or circumvention of the security of JPMorgan Chase's systems or the systems of a vendor, governmental body or another market participant could cause serious negative consequences, including: significant disruption of JPMorgan Chase's operations and those of its clients, customers and counterparties, including losing access to operational systems; misappropriation of confidential information of JPMorgan Chase or that of its clients, customers, counterparties, employees or regulators; disruption of or damage to JPMorgan Chase's systems and those of its clients, customers and counterparties; the inability, or extended delays in the ability, to fully recover and restore data that has been stolen, manipulated or destroyed, or the inability to prevent systems from processing fraudulent transactions; violations by JPMorgan Chase of applicable privacy and other laws; financial loss to JPMorgan Chase or to its clients, customers, counterparties or employees; loss of confidence in JPMorgan Chase's cybersecurity and business resiliency measures; dissatisfaction among JPMorgan Chase's clients, customers or counterparties; significant exposure to litigation and regulatory fines, penalties or other sanctions, and harm to JPMorgan Chase's reputation. The extent of a particular cyber attack and the steps that JPMorgan Chase may need to take to investigate the attack may not be immediately clear, and it may take a significant amount of time before such an investigation can be completed. While such an investigation is ongoing, JPMorgan Chase may not necessarily know the full extent of the harm caused by the cyber attack, and that damage may continue to spread. These factors may inhibit JPMorgan Chase's ability to provide rapid, full and reliable information about the cyber attack to its clients, customers, counterparties and regulators, as well as the public. Furthermore, it may not be clear how best to contain and remediate the harm caused by the cyber attack, and certain errors or actions could be repeated or compounded before they are discovered and remediated. Any or all of these factors could further increase the costs and consequences of a cyber attack. JPMorgan Chase can be negatively affected if it fails to identify and address operational risks associated with the introduction of or changes to products, services and delivery platforms. When JPMorgan Chase launches a new product or service, introduces a new platform for the delivery or distribution of products or services (including mobile connectivity, electronic trading and cloud computing), or makes changes to an existing product, service or delivery platform, it may not fully appreciate or identify new operational risks that may arise from those changes, or may fail to implement adequate controls to mitigate the risks associated with those changes. Any significant failure in this regard could diminish JPMorgan Chase's ability to operate one or more of its businesses or result in: potential liability to clients, counterparties and customers; increased operating expenses; higher litigation costs, including regulatory fines, penalties and other sanctions; damage to JPMorgan Chase's reputation; impairment of JPMorgan Chase's liquidity; regulatory intervention, or weaker competitive standing. Any of the foregoing consequences could materially and adversely affect JPMorgan Chase's businesses and results of operations. JPMorgan Chase's operational costs and customer satisfaction could be adversely affected by the failure of an external operational system. External operational systems with which JPMorgan is connected, whether directly or indirectly, can be sources of operational risk to JPMorgan Chase. JPMorgan Chase may be exposed not only to a systems failure or cyber attack that may be experienced by a vendor or market infrastructure with which JPMorgan Chase is directly connected, but also to a systems breakdown or cyber attack involving another party to which such a vendor or infrastructure is connected. Similarly, retailers, data aggregators and other external parties with which JPMorgan Chase's customers do business can increase JPMorgan Chase's operational risk. This is particularly the case where activities of customers or those parties are beyond JPMorgan Chase's security and control systems, including through the use of the internet, cloud computing services and personal smart phones and other mobile devices or services. If an external party obtains access to customer account data on JPMorgan Chase's systems, and that party experiences a cyberbreach of its own systems or misappropriates that data, this could result in a variety of negative outcomes for JPMorgan Chase and its clients and customers, including: heightened risk that external parties will be able to execute fraudulent transactions using JPMorgan Chase's systems; losses from fraudulent transactions, as well as potential liability for losses that exceed thresholds established in consumer protection laws, rules and regulations; increased operational costs to remediate the consequences of the external party's security breach, and harm to reputation arising from the perception that JPMorgan Chase's systems may not be secure. As JPMorgan Chase increasingly faces the risk of operational failure or cyber attacks with respect to the systems of those parties. Security breaches affecting JPMorgan Chase's clients or customers, or systems breakdowns or failures, security

breaches or human error or misconduct affecting other external parties, may require JPMorgan Chase to take steps to protect the integrity of its own operational systems or to safeguard confidential information, including restricting the access of customers to their accounts. These actions can increase JPMorgan Chase's operational costs and potentially diminish customer satisfaction and confidence in JPMorgan Chase. Furthermore, the widespread and expanding interconnectivity among financial institutions, central agents, CCPs, payment processors, securities exchanges, clearing houses and other financial market infrastructures increases the risk that an operational failure or cyber attack involving one institution or entity may cause industry-wide operational disruptions that could materially affect JPMorgan Chase's ability to conduct business. JPMorgan Chase's operations could be impaired if its employees, or those of external parties, are not competent and trustworthy, or if measures to protect their health and safety are ineffective. JPMorgan Chase's ability to operate its businesses efficiently and profitably, to offer products and services that meet the expectations of its clients and customers, and to maintain an effective risk management framework is highly dependent on the competence and integrity of its employees, as well as employees of other parties on which JPMorgan Chase's operations rely, including vendors, custodians and financial markets infrastructures. JPMorgan Chase's businesses could be materially and adversely affected by: the ineffective implementation of business decisions; any failure to institute controls that appropriately address risks associated with business activities, or to appropriately train employees with respect to those risks and controls; a significant operational breakdown or failure, theft, fraud or other unlawful conduct, or other negative outcomes caused by human error or misconduct by an employee of JPMorgan Chase or of another party on which JPMorgan Chase's operations depend. JPMorgan Chase's operations could also be impaired if the measures taken by it or by governmental authorities to help ensure the health and safety of its employees are ineffective, or if any external party on which JPMorgan Chase relies fails to take appropriate and effective actions to protect the health and safety of its employees. JPMorgan Chase faces substantial legal and operational risks in safeguarding personal information. JPMorgan Chase's businesses are subject to complex and evolving laws, rules and regulations, both within and outside the U.S., governing the privacy and protection of personal information of individuals. The protected parties can include: JPMorgan Chase's clients and customers, and prospective clients and customers; clients and customers of JPMorgan Chase's clients and customers; employees and prospective employees, and employees of JPMorgan Chase's vendors, counterparties and other external parties. Ensuring that JPMorgan Chase's collection, use, transfer and storage of personal information comply with all applicable laws, rules and regulations in all relevant jurisdictions, including where the laws of different jurisdictions are in conflict, can: increase JPMorgan Chase's compliance and operating costs; hinder the development of new products or services, curtail the offering of existing products or services, or affect how products and services are offered to clients and customers; demand significant oversight by JPMorgan Chase's management, and require JPMorgan Chase to structure its businesses, operations and systems in less efficient ways. Not all of JPMorgan Chase's clients, customers, vendors, counterparties and other external parties may have appropriate controls in place to protect the confidentiality of the information exchanged between them and JPMorgan Chase, particularly where information is transmitted by electronic means. JPMorgan Chase could be exposed to litigation or regulatory fines, penalties or other sanctions if personal, confidential or proprietary information of clients, customers, employees or others were to be mishandled or misused, such as situations where such information is: erroneously provided to parties who are not permitted to have the information, or intercepted or otherwise compromised by third parties. Concerns regarding the effectiveness of JPMorgan Chase's measures to safeguard personal information, or even the perception that those measures are inadequate, could cause JPMorgan Chase to lose existing or potential clients and customers, and thereby reduce JPMorgan Chase's revenues. Furthermore, any failure or perceived failure by JPMorgan Chase to comply with applicable privacy or data protection laws, rules and regulations may subject it to inquiries, examinations and investigations that could result in requirements to modify or cease certain operations or practices, significant liabilities or regulatory fines, penalties or other sanctions. Any of these could damage JPMorgan Chase's reputation and otherwise adversely affect its businesses. In recent years, well-publicized allegations involving the misuse or inappropriate sharing of personal information have led to expanded governmental scrutiny of practices relating to the safeguarding of personal information and the use or sharing of personal data by companies in the U.S. and other countries. That scrutiny has in some cases resulted in, and could in the future lead to, the adoption of stricter laws, rules and regulations relating to the use and sharing of personal information. These types of laws and regulations could prohibit or significantly restrict financial services firms such as JPMorgan Chase from sharing information among affiliates or with third parties such as vendors, and thereby increase compliance costs, or could restrict JPMorgan Chase's use of personal data when developing or offering products or services to customers. These restrictions could also inhibit JPMorgan Chase's development or marketing of certain products or services, or increase the costs of offering them to customers. JPMorgan Chase's operations, results and reputation could be harmed by catastrophes or other events. JPMorgan Chase's business and operational systems could be seriously disrupted, and its reputation could be harmed, by events or contributing factors that are wholly

or partially beyond its control, including: cyberbreaches or breaches of physical premises, including data centers; power, telecommunications or internet outages; failures of, or loss of access to, operational systems, including computer systems, servers, networks and other technology assets; damage to or loss of property or assets of JPMorgan Chase or third parties, and any consequent injuries, including in connection with any construction projects undertaken by JPMorgan Chase; effects of climate change; natural disasters or severe weather conditions; accidents such as explosions or structural failures; health emergencies, the spread of infectious diseases or pandemics, or events arising from local or larger-scale political events, including outbreaks of hostilities or terrorist acts. JPMorgan Chase maintains a Firmwide resiliency program that is intended to enable it to recover critical business functions and supporting assets, including staff, technology and facilities, in the event of a business interruption. There can be no assurance that JPMorgan Chase's resiliency plans will fully mitigate all potential business continuity risks to JPMorgan Chase or its clients and customers or that its resiliency plans will be adequate to address the effects of simultaneous occurrences of multiple catastrophes or other business interruption events. In addition, JPMorgan Chase's ability to respond effectively to a business interruption could be hampered to the extent that the members of its workforce, physical assets or systems and other support infrastructure needed to address the event are geographically dispersed, or conversely, if a catastrophic event occurs in an area in which a critical segment of JPMorgan Chase's workforce, physical assets or systems and other support infrastructure is concentrated. Further, should emergency or catastrophic events such as severe or abnormal weather conditions or health emergencies, the spread of infectious diseases or pandemics become more chronic, the disruptive effects of those events on JPMorgan Chase's business and operations, and on its clients, customers, counterparties and employees, could become more significant and long-lasting. Any significant failure or disruption of JPMorgan Chase's operations or operational systems, or any catastrophic event, could: hinder JPMorgan Chase's ability to provide services to its clients and customers or to transact with its counterparties; require it to expend significant resources to correct the failure or disruption; cause it to incur losses or liabilities, including from loss of revenue, damage to or loss of property, or injuries; expose it to litigation or regulatory fines, penalties or other sanctions, and harm its reputation. Furthermore, JPMorgan Chase may incur costs in connection with disposing of certain excess properties, premises and facilities, and those costs may be material to its results of operations in a given period. Enhanced regulatory and other standards for the oversight of vendors and other service providers can result in higher costs and other potential exposures. JPMorgan Chase must comply with enhanced regulatory and other standards associated with doing business with vendors and other service providers, including standards relating to the outsourcing of functions as well as the performance of significant banking and other functions by subsidiaries. JPMorgan Chase incurs significant costs and expenses in connection with its initiatives to address the risks associated with oversight of its internal and external service providers. JPMorgan Chase's failure to appropriately assess and manage these relationships, especially those involving significant banking functions, shared services or other critical activities, could materially adversely affect JPMorgan Chase. Specifically, any such failure could result in: potential liability to clients and customers; regulatory fines, penalties or other sanctions; lower revenues, and the opportunity cost from lost revenues; increased operational costs, or harm to JPMorgan Chase's reputation. JPMorgan Chase's risk management framework may not be effective in identifying and mitigating every risk to JPMorgan Chase. Any inadequacy or lapse in JPMorgan Chase's risk management framework, governance structure, practices, models or reporting systems could expose it to unexpected losses, and its financial condition or results of operations could be materially and adversely affected. Any such inadequacy or lapse could: hinder the timely escalation of material risk issues to JPMorgan Chase's senior management and the Board of Directors; lead to business decisions that have negative outcomes for JPMorgan Chase; require significant resources and time to remediate; lead to non-compliance with laws, rules and regulations; attract heightened regulatory scrutiny; expose JPMorgan Chase to regulatory investigations or legal proceedings; subject it to litigation or regulatory fines, penalties or other sanctions; harm its reputation, or otherwise diminish confidence in JPMorgan Chase. JPMorgan Chase relies on data to assess its various risk exposures. Any deficiencies in the quality or effectiveness of 25 Part I JPMorgan Chase's data gathering, analysis and validation processes could result in ineffective risk management practices. These deficiencies could also result in inaccurate risk reporting. Many of JPMorgan Chase's risk management strategies and techniques consider historical market behavior. These strategies and techniques are based to some degree on management's subjective judgment. For example, many models used by JPMorgan Chase are based on assumptions regarding historical correlations among prices of various asset classes or other market indicators. In times of market stress, including difficult or less liquid market environments, or in the event of other unforeseen circumstances, previously uncorrelated indicators may become correlated. Conversely, previously-correlated indicators may make unrelated movements at those times. Sudden market movements and unanticipated or unidentified market or economic movements could, in some circumstances, limit the effectiveness of JPMorgan Chase's risk management strategies, causing it to incur losses. JPMorgan Chase could recognize unexpected losses, its capital levels could be reduced and it could face greater

regulatory scrutiny if its models, estimations or judgments, including those used in its financial statements, prove to be inadequate or incorrect. JPMorgan Chase has developed and uses a variety of models and other analytical and judgment-based estimations to measure, monitor and implement controls over its market, credit, capital, liquidity, operational and other risks. These models and estimations are based on a variety of assumptions and historical trends, and are periodically reviewed and modified as necessary. The models and estimations that JPMorgan Chase uses may not be effective in all cases to identify, observe and mitigate risk due to a variety of factors, such as: reliance on historical trends that may not accurately predict future events, including assumptions underlying the models and estimations which predict correlation among certain market indicators or asset prices; inherent limitations associated with forecasting uncertain economic and financial outcomes; historical trend information may be incomplete, or may not anticipate severely negative market conditions such as extreme volatility, dislocation or lack of liquidity; technology that is introduced to run models or estimations may not perform as expected, or may not be well understood by the personnel using the technology; models and estimations may contain erroneous data, valuations, formulas or algorithms, and; review processes may fail to detect flaws in models and estimations. Some of the models and other analytical and judgment-based estimations used by JPMorgan Chase in managing risks are subject to review by, and require the approval of, JPMorgan Chase's regulators. These reviews are required before JPMorgan Chase may use those models and estimations in connection with calculating market risk RWA, credit risk RWA and operational risk RWA under Basel III. If JPMorgan Chase's models or estimations are not approved by its regulators, it may be subject to higher capital charges, which could adversely affect its financial results or limit the ability to expand its businesses. JPMorgan Chase also uses internal models in connection with its stress testing. JPMorgan Chase's capital actions may require regulatory approval and could be constrained if its banking regulators object to a capital plan or require the resubmission of a capital plan due to the perceived inadequacy of JPMorgan Chase's models, estimations or other factors. Under U.S. generally accepted accounting principles (U.S. GAAP), JPMorgan Chase is required to use estimates and apply judgments in preparing its financial statements, including in determining the allowance for credit losses, reserves related to litigation and the credit card rewards liability. Certain financial instruments require a determination of their fair value in order to prepare JPMorgan Chase's financial statements, including: trading assets and liabilities; instruments in the investment portfolio; certain loans; MSRs; structured notes, and; certain repurchase and resale agreements. Where quoted market prices are not available for these types of financial instruments, JPMorgan Chase may make fair value determinations based on internally developed models or other means which ultimately rely to some degree on management estimates and judgment, and these types of estimates and judgments may not prove to be accurate due to a variety of factors, as noted above. In addition, sudden illiquidity in markets or declines in prices of certain loans and securities may make it more difficult to value certain financial instruments, which could lead to valuations being subsequently changed or adjusted. If estimates or judgments underlying JPMorgan Chase's financial statements prove to have been incorrect, JPMorgan Chase may experience material losses. JPMorgan Chase establishes an allowance for expected credit losses that are inherent in its credit exposures. It then employs stress testing and other techniques to determine the amounts of capital and liquidity that would be needed in the event of adverse economic or market events. These processes are critical to JPMorgan Chase's results of operations and financial condition. They require difficult, subjective and complex judgments, including forecasts of how economic conditions might impair the ability of JPMorgan Chase's borrowers and counterparties to repay their loans or other obligations. It is possible that JPMorgan Chase will fail to identify the proper factors or that it will fail to accurately estimate the impact of factors that it identifies. Certain models used by JPMorgan Chase in connection with the determination of the allowance for credit losses have heightened performance risk in the economic environment precipitated by the effects of the COVID-19 pandemic and government stimulus. For example, at times certain macroeconomic variables employed in these models remained well outside the range of historical data used to train the models for some stress scenarios. In addition, the historical relationships between these macroeconomic variables and consumer and wholesale credit losses have deteriorated, in part due to the effects of the CARES Act and government stimulus actions. As a result, there continues to be significant uncertainty about the reliability of the projections produced by the models. To compensate for this uncertainty, JPMorgan Chase has made, and may continue to make, significant adjustments to the quantitative results of model calculations to take into consideration model imprecision, emerging risks, trends and other factors that are not yet reflected in those calculations. There can be no assurance that, even after adjustments have been made to model outputs, JPMorgan Chase will not recognize unexpected losses arising from the model uncertainty that has resulted from these developments. Lapses in controls over disclosure or financial reporting could materially affect JPMorgan Chase's profitability or reputation. There can be no assurance that JPMorgan Chase's disclosure controls and procedures will be effective in every circumstance, or that a material weakness or significant deficiency in internal control over financial reporting will not occur. Any such lapses or deficiencies could: materially and adversely affect JPMorgan Chase's business and results of operations or financial condition; restrict its ability to access the capital markets; require it to expend significant resources to

correct the lapses or deficiencies; expose it to litigation or regulatory fines, penalties or other sanctions; harm its reputation, or; otherwise diminish investor confidence in JPMorgan Chase. JPMorgan Chase could be adversely affected by changes in accounting standards or policies. The preparation of JPMorgan Chase's financial statements is based on accounting standards established by the Financial Accounting Standards Board and the Securities and Exchange Commission, as well as more detailed accounting policies established by JPMorgan Chase's management. From time to time these accounting standards or accounting policies may change, and in some cases these changes could have a significant effect on JPMorgan Chase's financial statements and may adversely affect its financial results or investor perceptions of those results. As of January 1, 2020, JPMorgan Chase implemented a new accounting standard, commonly referred to as the Current Expected Credit Losses (CECL) framework, which requires earlier recognition of expected credit losses on loans and certain other instruments. The allowance for credit losses related to certain of JPMorgan Chase's loans and other lending-related commitments portfolios increased upon implementation of CECL, which has had a negative impact on JPMorgan Chase's capital levels. The ongoing impact of the adoption of CECL could include the following, each of which could result in diminished investor confidence: greater volatility in JPMorgan Chase's earnings and capital levels over economic cycles; potential reductions in its capital distributions, or; increases in the allowance for credit losses. In addition, JPMorgan Chase could be adversely impacted by associated changes in the competitive environment in which it operates, including changes in the availability or pricing of loan products, particularly during periods of economic stress, as well as changes related to non-U.S. financial institutions or other competitors that are not subject to this accounting standard. Strategic If JPMorgan Chase's management fails to develop and execute effective business strategies, and to anticipate changes affecting those strategies, JPMorgan Chase's competitive standing and results could suffer. JPMorgan Chase's business strategies significantly affect its competitive standing and operations. These strategies relate to: the products and services that JPMorgan Chase offers; the geographies in which it operates; the types of clients and customers that it serves; the counterparties with which it does business, and; the methods and distribution channels by which it offers products and services. If management makes choices about these strategies and goals that prove to be incorrect, do not accurately assess the competitive landscape and industry trends, or fail to address changing regulatory and market environments or the expectations of clients, customers, investors, employees and other stakeholders, then the franchise values and growth prospects of JPMorgan Chase's businesses may suffer and its earnings could decline. JPMorgan Chase's growth prospects also depend on management's ability to develop and execute effective 27 Part I business plans to address these strategic priorities, both in the near term and over longer time horizons. Management's effectiveness in this regard will affect JPMorgan Chase's ability to develop and enhance its resources, control expenses and return capital to shareholders. Each of these objectives could be adversely affected by any failure on the part of management to: devise effective business plans and strategies; offer products and services that meet changing expectations of clients and customers; allocate capital in a manner that promotes long-term stability to enable JPMorgan Chase to build and invest in market-leading businesses, even in a highly stressed environment; allocate capital appropriately due to imprecise modeling or subjective judgments made in connection with those allocations; appropriately address concerns of clients, customers, investors, employees and other stakeholders, including with respect to social and sustainability matters; react quickly to changes in market conditions or market structures, or; develop and enhance the operational, technology, risk, financial and managerial resources necessary to grow and manage JPMorgan Chase's businesses. JPMorgan Chase faces significant and increasing competition in the rapidly evolving financial services industry. JPMorgan Chase operates in a highly competitive environment in which it must evolve and adapt to the significant changes as a result of changes in financial regulation, technological advances, increased public scrutiny and changes in economic conditions. JPMorgan Chase expects that competition in the U.S. and global financial services industry will continue to be intense. Competitors include: other banks and financial institutions; trading, advisory and investment management firms; finance companies; technology companies, and; other nonbank firms that are engaged in providing similar products and services. JPMorgan Chase cannot provide assurance that the significant competition in the financial services industry will not materially and adversely affect its future results of operations. New competitors in the financial services industry continue to emerge. For example, technological advances and the growth of e-commerce have made it possible for non-depository institutions to offer products and services that traditionally were banking products. These advances have also allowed financial institutions and other companies to provide electronic and internet-based financial solutions, including electronic securities trading, payments processing and online automated algorithmic-based investment advice. Furthermore, both financial institutions and their non-banking competitors face the risk that payments processing and other services could be significantly disrupted by technologies, such as cryptocurrencies, that require no intermediation. New technologies have required and could require JPMorgan Chase to spend more to modify or adapt its products to attract and retain clients and customers or to match products and services offered by its competitors, including technology companies. In addition, new technologies may be

used by customers, or breached or infiltrated by third parties, in unexpected ways, which can increase JPMorgan Chase's costs for complying with laws, rules and regulations that apply to the offering of products and services through those technologies and reduce the income that JPMorgan Chase earns from providing products and services through those new technologies. Ongoing or increased competition may put pressure on the pricing for JPMorgan Chase's products and services or may cause JPMorgan Chase to lose market share, particularly with respect to traditional banking products such as deposits and bank accounts. This competition may be on the basis of quality and variety of products and services offered, transaction execution, innovation, reputation and price. The failure of any of JPMorgan Chase's businesses to meet the expectations of clients and customers, whether due to general market conditions, under-performance, a decision not to offer a particular product or service, changes in client and customer expectations or other factors, could affect JPMorgan Chase's ability to attract or retain clients and customers. Any such impact could, in turn, reduce JPMorgan Chase's revenues. Increased competition also may require JPMorgan Chase to make additional capital investments in its businesses, or to extend more of its capital on behalf of its clients in order to remain competitive. Climate change manifesting as physical or transition risks could have a material adverse impact on JPMorgan Chase's business operations, clients and customers. JPMorgan Chase operates in many regions, countries and communities around the world where its businesses, and the activities of its clients and customers, could be impacted by climate change. Climate change could manifest as a financial risk to JPMorgan Chase either through changes in the physical climate or from the process of transitioning to a low-carbon economy, including changes in climate policy or in the regulation of financial institutions with respect to risks posed by climate change. Climate-related physical risks include both acute weather events and chronic shifts in the climate. Potential physical risks from climate change may include altered distribution and intensity of rainfall, prolonged droughts or flooding, increased frequency of wildfires, rising sea levels, or a rising heat index. 28 Transition risks arise from the process of adjusting to a low-carbon economy. In addition to possible changes in climate policy and financial regulation, potential transition risks may include economic and other changes engendered by the development of low-carbon technological advances (e.g., electric vehicles and renewable energy) and/or changes in consumer preferences towards low-carbon goods and services. Transition risks could be further accelerated by the occurrence of changes in the physical climate. These climate-related physical risks and transition risks could have a financial impact on JPMorgan Chase both directly on its business and operations and as a result of material adverse impacts to its clients and customers, including: declines in asset values; reduced availability of insurance; significant interruptions to business operations, and negative consequences to business models, and the need to make changes in response to those consequences. Conduct failure by JPMorgan Chase employees can harm clients and customers, impact market integrity, damage JPMorgan Chase's reputation and trigger litigation and regulatory action. JPMorgan Chase's employees interact with clients, customers and counterparties, and with each other, every day. All employees are expected to demonstrate values and exhibit the behaviors that are an integral part of JPMorgan Chase's How We Do Business Principles, including JPMorgan Chase's commitment to do first class business in a first class way. JPMorgan Chase endeavors to embed conduct risk management throughout an employee's life cycle, including recruiting, onboarding, training and development, and performance management. Conduct risk management is also an integral component of JPMorgan Chase's promotion and compensation processes. Notwithstanding these expectations, policies and practices, certain employees have in the past engaged in improper or illegal conduct, and these instances of misconduct have resulted in litigation as well as resolutions of governmental investigations or enforcement actions involving consent orders, deferred prosecution agreements, non-prosecution agreements and other civil or criminal sanctions. There is no assurance that further inappropriate or unlawful actions by employees will not occur, lead to a violation of the terms of these resolutions (and associated consequences), or that any such actions will always be detected, deterred or prevented. JPMorgan Chase's reputation could be harmed, and collateral consequences could result, from a failure by one or more employees to act consistently with JPMorgan Chase's expectations, policies and practices, including by acting in ways that harm clients, customers, other market participants or other employees. Some examples of this include: improperly selling and marketing JPMorgan Chase's products or services; engaging in insider trading, market manipulation or unauthorized trading; engaging in improper or fraudulent behavior in connection with government relief programs; facilitating a transaction where a material objective is to achieve a particular tax, accounting or financial disclosure treatment that may be subject to scrutiny by governmental or regulatory authorities, or where the proposed treatment is unclear or may not reflect the economic substance of the transaction; failing to fulfill fiduciary obligations or other duties owed to clients or customers; violating antitrust or anti-competition laws by colluding with other market participants to manipulate markets, prices or indices; engaging in discriminatory behavior or harassment with respect to clients, customers or employees, or acting contrary to JPMorgan Chase's goal of fostering a diverse and inclusive workplace; managing or reporting risks in ways that subordinate JPMorgan Chase's risk appetite to business performance goals or employee compensation objectives, and; misappropriating property, confidential or proprietary information, or technology assets belonging to JPMorgan

Chase, its clients and customers or third parties. The consequences of any failure by employees to act consistently with JPMorgan Chase's expectations, policies or practices could include litigation, or regulatory or other governmental investigations or enforcement actions. Any of these proceedings or actions could result in judgments, settlements, fines, penalties or other sanctions, or lead to: financial losses; increased operational and compliance costs; greater scrutiny by regulators and other parties; regulatory actions that require JPMorgan Chase to restructure, curtail or cease certain of its activities; the need for significant oversight by JPMorgan Chase's management; loss of clients or customers, and harm to JPMorgan Chase's reputation.

29 Part I Reputation Damage to JPMorgan Chase's reputation could harm its businesses. Maintaining trust in JPMorgan Chase is critical to its ability to attract and retain clients, customers, investors and employees. Damage to JPMorgan Chase's reputation can therefore cause significant harm to JPMorgan Chase's business and prospects, and can arise from numerous sources, including: employee misconduct, including discriminatory behavior or harassment with respect to clients, customers or employees, or actions that are contrary to JPMorgan Chase's goal of fostering a diverse and inclusive workplace; security breaches, including as a result of cyber attacks; failure to safeguard client, customer or employee information; failure to manage risk issues associated with its business activities or those of its clients, including failure to fully discharge publicly-announced commitments to support social and sustainability initiatives; compliance or operational failures; litigation or regulatory fines, penalties or other sanctions; regulatory investigations or enforcement actions, or resolutions of these matters, and failure or perceived failure of clients, customers, counterparties or other parties to comply with laws, rules or regulations, including companies in which JPMorgan Chase has made principal investments, parties to joint ventures with JPMorgan Chase, and vendors with which JPMorgan Chase does business. JPMorgan Chase's reputation may be significantly damaged by adverse publicity or negative information regarding JPMorgan Chase, whether or not true, that may be published or broadcast by the media or posted on social media, non-mainstream news services or other parts of the internet. This latter risk can be magnified by the speed and pervasiveness with which information is disseminated through those channels. Social and environmental activists are increasingly targeting financial services firms such as JPMorgan Chase with public criticism for their relationships with clients that are engaged in certain sensitive industries, including businesses whose products are or are perceived to be harmful to human health, or whose activities negatively affect or are perceived to negatively affect the environment, workers' rights or communities. Activists have also engaged in public protests at JPMorgan Chase's headquarters and other properties. Activist criticism of JPMorgan Chase's relationships with clients in sensitive industries could potentially engender dissatisfaction among clients, customers, investors and employees with how JPMorgan Chase addresses social and sustainability concerns in its business activities. Alternatively, yielding to activism targeted at certain sensitive industries could damage JPMorgan Chase's relationships with clients and customers, and with governmental or regulatory bodies in jurisdictions in which JPMorgan Chase does business, whose views are not aligned with those of social and environmental activists. In either case, the resulting harm to JPMorgan Chase's reputation could: cause certain clients and customers to cease doing business with JPMorgan Chase; impair JPMorgan Chase's ability to attract new clients and customers, or to expand its relationships with existing clients and customers; diminish JPMorgan Chase's ability to hire or retain employees; prompt JPMorgan Chase to cease doing business with certain clients or customers; cause certain investors to divest from investments in securities of JPMorgan Chase, or attract scrutiny from governmental or regulatory bodies. Actions by the financial services industry generally or individuals in the industry can also affect JPMorgan Chase's reputation. For example, the reputation of the industry as a whole can be damaged by concerns that: consumers have been treated unfairly by a financial institution; a financial institution has acted inappropriately with respect to the methods used to offer products to customers. If JPMorgan Chase is perceived to have engaged in these types of behaviors, this could weaken its reputation among clients or customers. Failure to effectively manage potential conflicts of interest can result in litigation and enforcement actions, as well as damage JPMorgan Chase's reputation. JPMorgan Chase's ability to manage potential conflicts of interest is highly complex due to the broad range of its business activities which encompass a variety of transactions, obligations and interests with and among JPMorgan Chase's clients and customers. JPMorgan Chase can become subject to litigation and enforcement actions, and its reputation can be damaged, by the failure or perceived failure to: adequately address or appropriately disclose conflicts of interest, including potential conflicts of interest that may arise in connection with providing multiple products and services in, or having one or more investments related to, the same transaction; deliver appropriate standards of service and quality; treat clients and customers with the appropriate standard of care; use client and customer data responsibly and in a manner that meets legal requirements and regulatory expectations; provide fiduciary products or services in accordance with the applicable legal and regulatory standards, or handle or use confidential information of customers or clients appropriately or in compliance with applicable data protection and privacy laws, rules and regulations. A failure or perceived failure to appropriately address conflicts of interest or fiduciary obligations could result in customer dissatisfaction, litigation and regulatory fines, penalties or other sanctions, and

heightened regulatory scrutiny and enforcement actions, all of which can lead to lost revenue and higher operating costs and cause serious harm to JPMorgan Chase's reputation. Country An outbreak of hostilities between countries or within a country or region could have a material adverse effect on the global economy and on JPMorgan Chase's businesses within the affected region or globally. Aggressive actions by hostile governments or groups, including armed conflict or intensified cyber attacks, could expand in unpredictable ways by drawing in other countries or escalating into full-scale war with potentially catastrophic consequences, particularly if one or more of the combatants possess nuclear weapons. Depending on the scope of the conflict, the hostilities could result in: • worldwide economic disruption • heightened volatility in financial markets • severe declines in asset values, accompanied by widespread sell-offs of investments • substantial depreciation of local currencies, potentially leading to defaults by borrowers and counterparties in the affected region • disruption of global trade, and • diminished consumer, business and investor confidence. Any of the above consequences could have significant negative effects on JPMorgan Chase's operations and earnings, both in the countries or regions directly affected by the hostilities or globally. Further, if the U.S. were to become directly involved in such a conflict, this could lead to a curtailment of any operations that JPMorgan Chase may have in the affected countries or region, as well as in any nation that is aligned against the U.S. in the hostilities. JPMorgan Chase could also experience more numerous and aggressive cyber attacks launched by or under the sponsorship of one or more of the adversaries in such a conflict. JPMorgan Chase's business and operations in certain countries can be adversely affected by local economic, political, regulatory and social factors. Some of the countries in which JPMorgan Chase conducts business have economies or markets that are less developed and more volatile or may have political, legal and regulatory regimes that are less established or predictable than other countries in which JPMorgan Chase operates. In addition, in some jurisdictions in which JPMorgan Chase conducts business, the local economy and business activity are subject to substantial government influence or control. Some of these countries have in the past experienced economic disruptions, including: • extreme currency fluctuations • high inflation • low or negative growth, and • defaults or reduced ability to service sovereign debt. The governments in these countries have sometimes reacted to these developments by imposing restrictive policies that adversely affect the local and regional business environment, including: • price, capital or exchange controls, including imposition of punitive transfer and convertibility restrictions or forced currency exchange • expropriation or nationalization of assets or confiscation of property, including intellectual property, and • changes in laws, rules and regulations. The impact of these actions could be accentuated in trading markets that are smaller, less liquid and more volatile than more-developed markets. These types of government actions can negatively affect JPMorgan Chase's operations in the relevant country, either directly or by suppressing the business activities of local clients or multi-national clients that conduct business in the jurisdiction. In addition, emerging markets countries, as well as certain more developed countries, have been susceptible to unfavorable social developments arising from poor economic conditions or governmental actions, including: • widespread demonstrations or civil unrest • general strikes and demonstrations • crime and corruption • security and personal safety issues • outbreaks of hostilities • overthrow of incumbent governments • terrorist attacks, and • other forms of internal discord. These economic, political, regulatory and social developments have in the past resulted in, and in the future 31 Part I could lead to, conditions that can adversely affect JPMorgan Chase's operations in those countries and impair the revenues, growth and profitability of those operations. In addition, any of these events or circumstances in one country can affect JPMorgan Chase's operations and investments in another country or countries, including in the U.S. People JPMorgan Chase's ability to attract and retain qualified and diverse employees is critical to its success. JPMorgan Chase's employees are its most important resource, and in many areas of the financial services industry, competition for qualified personnel is intense. JPMorgan Chase endeavors to attract talented and diverse new employees and retain, develop and motivate its existing employees. If JPMorgan Chase were unable to continue to attract or retain qualified and diverse employees, including successors to the Chief Executive Officer or members of the Operating Committee, JPMorgan Chase's performance, including its competitive position, could be materially and adversely affected. Unfavorable changes in immigration or travel policies could adversely affect JPMorgan Chase's businesses and operations. JPMorgan Chase relies on the skills, knowledge and expertise of employees located throughout the world. Changes in immigration or travel policies in the U.S. and other countries that unduly restrict or otherwise make it more difficult for employees or their family members to work in, or travel to or transfer between, jurisdictions in which JPMorgan Chase has operations or conducts its business could inhibit JPMorgan Chase's ability to attract and retain qualified employees, and thereby dilute the quality of its workforce, or could prompt JPMorgan Chase to make structural changes to its worldwide or regional operating models that cause its operations to be less efficient or more costly. Legal JPMorgan Chase faces significant legal risks from litigation and formal and informal regulatory and government investigations. JPMorgan Chase is named as a defendant or is otherwise involved in many legal proceedings, including class actions and other litigation or disputes with third parties. Actions currently pending against JPMorgan Chase may result in judgments, settlements, fines, penalties or other sanctions adverse to JPMorgan Chase. Any of these matters could materially and adversely affect JPMorgan Chase's

business, financial condition or results of operations, or cause serious reputational harm. As a participant in the financial services industry, it is likely that JPMorgan Chase will continue to experience a high level of litigation and regulatory and government investigations related to its businesses and operations. Regulators and other government agencies conduct examinations of JPMorgan Chase and its subsidiaries both on a routine basis and in targeted exams, and JPMorgan Chase's businesses and operations are subject to heightened regulatory oversight. This heightened regulatory scrutiny, or the results of such an investigation or examination, may lead to additional regulatory investigations or enforcement actions. There is no assurance that those actions will not result in resolutions or other enforcement actions against JPMorgan Chase. Furthermore, a single event involving a potential violation of law or regulation may give rise to numerous and overlapping investigations and proceedings, either by multiple federal, state or local agencies and officials in the U.S. or, in some instances, regulators and other governmental officials in non-U.S. jurisdictions. If another financial institution violates a law or regulation relating to a particular business activity or practice, this will often give rise to an investigation by regulators and other governmental agencies of the same or similar activity or practice by JPMorgan Chase. These and other initiatives by U.S. and non-U.S. governmental authorities may subject JPMorgan Chase to judgments, settlements, fines, penalties or other sanctions, and may require JPMorgan Chase to restructure its operations and activities or to cease offering certain products or services. All of these potential outcomes could harm JPMorgan Chase's reputation or lead to higher operational costs, thereby reducing JPMorgan Chase's profitability, or result in collateral consequences. In addition, the extent of JPMorgan Chase's exposure to legal and regulatory matters can be unpredictable and could, in some cases, exceed the amount of reserves that JPMorgan Chase has established for those matters.

32 Item 1B. Unresolved Staff Comments. None.

Item 2. Properties. JPMorgan Chase's headquarters is located in New York City at 383 Madison Avenue, a 47-story office building that it owns. The Firm is demolishing its former headquarters at 270 Park Avenue in New York City and is building a new headquarters on the same site. Demolition is targeted to be completed in 2021 and construction of the new building has commenced. The Firm owned or leased facilities in the following locations at December 31, 2020.

Location	Approximate square footage (in millions)
United States (a)	
New York City, New York 383 Madison Avenue, New York, New York	1.1

(a) At December 31, 2020, the Firm owned or leased 4,908 retail branches in 38 states and Washington D.C. The premises and facilities occupied by JPMorgan Chase are used across all of the Firm's business segments and for corporate purposes. JPMorgan Chase continues to evaluate its current and projected space requirements and may determine from time to time that certain of its properties (including the premises and facilities noted above) are no longer necessary for its operations. There is no assurance that the Firm will be able to dispose of any such excess properties, premises, or facilities or that it will not incur costs in connection with such dispositions. Such disposition costs may be material to the Firm's results of operations in a given period. Refer to the Consolidated Results of Operations on pages 54-56 for information on occupancy expense.

Item 3. Legal Proceedings. Refer to Note 30 for a description of the Firm's material legal proceedings.

Item 4. Mine Safety Disclosures. Not applicable.

33 Part II Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities. Market for registrant's common equity JPMorgan Chase's common stock is listed and traded on the New York Stock Exchange. Refer to ÜFive-year stock performance,Ý on page 45 for a comparison of the cumulative total return for JPMorgan Chase common stock with the comparable total return of the S&P 500 Index, the KBW Bank Index and the S&P Financial Index over the five-year period ended December 31, 2020. Refer to Capital actions in the Capital Risk Management section of Management's discussion and analysis on page 99 for information on the common dividend payout ratio. Refer to Note 21 for a discussion of restrictions on dividend payments. On January 31, 2021, there were 199,515 holders of record of JPMorgan Chase common stock. Refer to Part III, Item 12 on page 37 for information regarding securities authorized for issuance under the Firm's employee share-based incentive plans. Repurchases under the common share repurchase program Refer to Capital actions in the Capital Risk Management section of Management's discussion and analysis on page 99 for information regarding repurchases under the Firm's common share repurchase program. On March 15, 2020, in response to the economic disruptions caused by the COVID-19 pandemic, the Firm temporarily suspended repurchases of its common stock. Subsequently, the Federal Reserve directed all large banks, including the Firm, to discontinue net share repurchases through the end of 2020. On December 18, 2020, the Federal Reserve announced that all large banks, including the Firm, could resume share repurchases commencing in the first quarter of 2021, subject to certain restrictions. The Firm's Board of Directors has authorized a new common share repurchase program for up to \$30 billion. Shares repurchased pursuant to the prior

common share repurchase program during 2020 were as follows. Year ended December 31, 2020 Total number of shares of common stock repurchased Average price paid per share of common stock (a) Aggregate purchase price of common stock repurchases (in millions) (a) Dollar value of remaining authorized repurchase (in millions) (a) First quarter 50,003,062; \$ 127.92; \$ 6,397; \$ 9,183; (b) Second quarter; ; ; 9,183; (b) Third quarter; ; ; ; ; October; ; ; ; ; November; ; ; ; ; December; ; ; ; ; Fourth quarter; ; ; ; ; Year-to-date 50,003,062; \$ 127.92; \$ 6,397; \$; (a) Excludes commissions cost. (b) The remaining \$9.2 billion unused portion under the prior \$29.4 billion repurchase program expired on June 30, 2020.

Item 6. Selected Financial Data. Refer to ;Five-year summary of consolidated financial highlights (unaudited); on page 44 for five-year selected financial data.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. Management's discussion and analysis of financial condition and results of operations, entitled ;Management's discussion and analysis,; appears on pages 46-157. Such information should be read in conjunction with the Consolidated Financial Statements and Notes thereto, which appear on pages 162-298.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk. Refer to the Market Risk Management section of Management's discussion and analysis on pages 135;142 for a discussion of quantitative and qualitative disclosures about market risk.

Item 8. Financial Statements and Supplementary Data. The Consolidated Financial Statements, together with the Notes thereto and the report thereon dated February;23, 2021, of PricewaterhouseCoopers LLP, the Firm's independent registered public accounting firm, appear on pages 159-298. Supplementary financial data for each quarter within the two years ended December;31, 2020, are included on page 299 in the table entitled ;Selected quarterly financial data 34 (unaudited).; Also included is a ;Glossary of Terms and Acronyms; ; on pages 305-311.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure. None.

Item 9A. Controls and Procedures. The internal control framework promulgated by the Committee of Sponsoring Organizations of the Treadway Commission (;COSO;), ;Internal Control ; Integrated Framework; (;COSO 2013;), provides guidance for designing, implementing and conducting internal control and assessing its effectiveness. The Firm used the COSO 2013 framework to assess the effectiveness of the Firm's internal control over financial reporting as of December;31, 2020. Refer to ;Management's report on internal control over financial reporting; on page 158. As of the end of the period covered by this report, an evaluation was carried out under the supervision and with the participation of the Firm's management, including its Chairman and Chief Executive Officer and its Chief Financial Officer, of the effectiveness of its disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based on that evaluation, the Chairman and Chief Executive Officer and the Chief Financial Officer concluded that these disclosure controls and procedures were effective. Refer to Exhibits 31.1 and 31.2 for the Certifications furnished by the Chairman and Chief Executive Officer and Chief Financial Officer, respectively. The Firm is committed to maintaining high standards of internal control over financial reporting. Nevertheless, because of its inherent limitations, internal control over financial reporting may not prevent or detect all misstatements. Deficiencies or lapses in internal controls may occur from time to time, and there can be no assurance that any such deficiencies will not result in significant deficiencies or material weaknesses in internal control in the future and collateral consequences therefrom. Refer to ;Management's report on internal control over financial reporting; on page 158 for further information. There was no change in the Firm's internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) that occurred during the three months ended December;31, 2020, that has materially affected, or is reasonably likely to materially affect, the Firm's internal control over financial reporting.

Item 9B. Other Information. None.

35 Part III Item 10. Directors, Executive Officers and Corporate Governance. Executive officers of the registrant Age Name (at December 31, 2020) Positions and offices James Dimon 64 Chairman of the Board and Chief Executive Officer; he had been President from July 2004 until January 2018. Ashley Bacon 51 Chief Risk Officer since June 2013. Lori A. Beer 53 Chief Information Officer since September 2017, prior to which she had been Chief Information Officer of the Corporate & Investment Bank since June 2016. She was Global Head of Banking Technology from January 2014 until May 2016. Mary Callahan Erdoes 53 Chief Executive Officer of Asset & Wealth Management since September 2009. Stacey Friedman 52 General Counsel since January 2016, prior to which she was Deputy General Counsel since July 2015 and General Counsel for the Corporate & Investment Bank since August 2012. Marianne Lake 51 Chief Executive Officer of Consumer Lending and Card Services since May 2019, prior to which she had been Chief Financial Officer since 2013. Robin Leopold 56 Head of Human Resources since January 2018, prior to which she had been Head of Human Resources for the Corporate & Investment Bank since August 2012. Douglas B. Petno 55 Chief Executive Officer of Commercial Banking since January 2012. Jennifer Piepszak 50 Chief Financial Officer since May 2019, prior to which she had been the Chief Executive Officer for Card Services since 2017. She was Chief Executive Officer of Business Banking from 2015 to 2017. Daniel E.

Pinto 58 Co-President and Co-Chief Operating Officer since January 2018, Chief Executive Officer of the Corporate & Investment Bank since March 2014, and Chief Executive Officer of Europe, the Middle East and Africa since June 2011. Peter Scher 59 Head of Corporate Responsibility since 2011 and Chairman of the Mid-Atlantic Region since 2015. Gordon A. Smith 62 Co-President and Co-Chief Operating Officer since January 2018, and Chief Executive Officer of Consumer & Community Banking since December 2012. Unless otherwise noted, during the five fiscal years ended December 31, 2020, all of JPMorgan Chase's above-named executive officers have continuously held senior-level positions with JPMorgan Chase. There are no family relationships among the foregoing executive officers. Information to be provided in Items 10, 11, 12, 13 and 14 of the Form 10-K and not otherwise included herein is incorporated by reference to the Firm's Definitive Proxy Statement for its 2021 Annual Meeting of Stockholders to be held on May 18, 2021, which will be filed with the SEC within 120 days of the end of the Firm's fiscal year ended December 31, 2020.

36 Item 11. Executive Compensation. Refer to Item 10. Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters. Refer to Item 10 for security ownership of certain beneficial owners and management. The following table sets forth the total number of shares available for issuance under JPMorgan Chase's employee share-based incentive plans (including shares available for issuance to non-employee directors). The Firm is not authorized to grant share-based incentive awards to non-employees, other than to non-employee directors. December 31, 2020 Number of shares to be issued upon exercise of outstanding options/stock appreciation rights Weighted-average exercise price of outstanding options/stock appreciation rights Number of shares remaining available for future issuance under stock incentive plans Plan category Employee share-based incentive plans approved by shareholders 3,124,739; (a) \$ 41.25; 66,621,995; (b) Total 3,124,739; \$ 41.25; 66,621,995; (a) Does not include restricted stock units or performance stock units granted under the shareholder-approved Long-Term Incentive Plan (LTIP), as amended and restated effective May 15, 2018. Refer to Note 9 for further discussion. (b) Represents shares available for future issuance under the shareholder-approved LTIP. All shares available for future issuance will be issued under the shareholder-approved LTIP. Refer to Note 9 for further discussion. Item 13. Certain Relationships and Related Transactions, and Director Independence. Refer to Item 10. Item 14. Principal Accounting Fees and Services. Refer to Item 10.

37 Part IV Item 15. Exhibits, Financial Statement Schedules. 1 Financial statements The Consolidated Financial Statements, the Notes thereto and the report of the Independent Registered Public Accounting Firm thereon listed in Item 8 are set forth commencing on page 159. 2 Financial statement schedules 3 Exhibits 3.1 Restated Certificate of Incorporation of JPMorgan Chase & Co., effective April 5, 2006 (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K of JPMorgan Chase & Co. (File No. 1-5805) filed April 7, 2006). 3.2 Amendment to the Restated Certificate of Incorporation of JPMorgan Chase & Co., effective June 7, 2013 (incorporated by reference to Appendix F to the Proxy Statement on Schedule 14A of JPMorgan Chase & Co. (File No. 1-5805) filed April 10, 2013). 3.3 Certificate of Designations for Fixed-to-Floating Rate Non-Cumulative Preferred Stock, Series I (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K of JPMorgan Chase & Co. (File No. 1-5805) filed April 24, 2008). 3.4 Certificate of Designations for Fixed-to-Floating Rate Non-Cumulative Preferred Stock, Series Q (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K of JPMorgan Chase & Co. (File No. 1-5805) filed April 23, 2013). 3.5 Certificate of Designations for Fixed-to-Floating Rate Non-Cumulative Preferred Stock, Series R (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K of JPMorgan Chase & Co. (File No. 1-5805) filed July 29, 2013). 3.6 Certificate of Designations for Fixed-to-Floating Rate Non-Cumulative Preferred Stock, Series S (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K of JPMorgan Chase & Co. (File No. 1-5805) filed January 22, 2014). 3.7 Certificate of Designations for Fixed-to-Floating Rate Non-Cumulative Preferred Stock, Series U (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K of JPMorgan Chase & Co. (File No. 1-5805) filed on March 10, 2014). 3.8 Certificate of Designations for Fixed-to-Floating Rate Non-Cumulative Preferred Stock, Series V (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K of JPMorgan Chase & Co. (File No. 1-5805) filed on June 9, 2014). 3.9 Certificate of Designations for Fixed-to-Floating Rate Non-Cumulative Preferred Stock, Series X (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K of JPMorgan Chase & Co. (File No. 1-5805) filed on September 23, 2014). 3.10 Certificate of Designations for Fixed-to-Floating Rate Non-Cumulative Preferred Stock, Series Z (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K of JPMorgan Chase & Co. (File No. 1-5805) filed April 21, 2015). 3.11 Certificate of Designations for 6.10% Non-Cumulative Preferred Stock, Series AA (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K of JPMorgan Chase & Co. (File No. 1-5805) filed June 4, 2015). 3.12 Certificate of Designations for 6.15% Non-Cumulative Preferred Stock, Series BB (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K of JPMorgan Chase & Co. (File No. 1-5805) filed July 29, 2015). 3.13 Certificate of Designations for Fixed-to-Floating Rate Non-Cumulative Preferred Stock, Series CC (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K of JPMorgan Chase & Co. (File No. 1-5805) filed October 20, 2017). 3.14 Certificate of Designations for 5.75% Non-Cumulative Preferred Stock, Series DD (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K of JPMorgan Chase & Co. (File No. 1-5805) filed September 21, 2018). 3.15 Certificate of Designations for 6.00% Non-Cumulative Preferred Stock, Series EE

(incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K of JPMorgan Chase & Co. (File No. 1-5805) filed January 24, 2019). 3.16 Certificate of Designations for Fixed-to-Floating Rate Non-Cumulative Preferred Stock, Series FF (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K of JPMorgan Chase & Co. (File No. 1-5805) filed July 31, 2019). 3.17 Certificate of Designations for 4.75% Non-Cumulative Preferred Stock, Series GG (incorporated by reference to Exhibit 3.1 to the Current Report on Form 8-K of JPMorgan Chase & Co. Refer to Note 1 for further information. (a) In the second quarter of 2020, the Firm reclassified certain spend-based credit card reward costs from marketing expense to be a reduction of card income, with no effect on net income. Prior-period amounts have been revised to conform with the current presentation. (b) Pre-provision profit, TBVPS and ROTCE are each non-GAAP financial measures. Tangible common equity (“TCE”) is also a non-GAAP financial measure. Refer to Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages 62–64 for a further discussion of these measures. (c) Quarterly ratios are based upon annualized amounts. (d) In the third quarter of

2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans and other assets. Prior-period amounts have been revised to conform with the current presentation. (e) For the years ended December 31, 2020, 2019, 2018 and 2017, the percentage represents average LCR for the three months ended December 31, 2020, 2019, 2018 and 2017. The U.S. LCR public disclosure requirements for the Firm became effective in 2017. Refer to Liquidity Risk Management on pages 102–108 for additional information on the LCR results. (f) As of December 31, 2020, the capital metrics reflect the relief provided by the Federal Reserve Board in response to the COVID-19 pandemic, including the CECL capital transition provisions that became effective in the first quarter of 2020. As of December 31, 2020, the SLR reflects the temporary exclusions of U.S. Treasury securities and deposits at Federal Reserve Banks that became effective in the second quarter of 2020. Refer to Regulatory Developments Relating to the COVID-19 Pandemic on pages 52-53 and Capital Risk Management on pages 91-101 for additional information. (g) The Basel III capital rules became fully phased-in effective January 1, 2019, and for the SLR became fully phased-in effective January 1, 2018. Prior to these dates, the required capital metrics were subject to the transitional rules. As of December 31, 2018, the risk-based capital metrics were the same on a fully phased-in and transitional basis. Refer to Capital Risk Management on pages 91-101 for additional information on these capital metrics. (h) In December 2017, the Tax Cuts and Jobs Act (“TCJA”) was signed into law. The Firm’s results for the year ended December 31, 2017 included a \$2.4 billion decrease to net income as a result of the enactment of the TCJA. (i) Excluding net charge-offs of \$467 million related to the student loan portfolio sale, the net charge-off rate for the year ended December 31, 2017 would have been 0.55%. 44 JPMorgan Chase & Co./2020 Form 10-K FIVE-YEAR STOCK PERFORMANCE The following table and graph compare the five-year cumulative total return for JPMorgan Chase & Co. (“JPMorgan Chase” or the “Firm”) common stock with the cumulative return of the S&P 500 Index, the KBW Bank Index and the S&P Financials Index. The S&P 500 Index is a commonly referenced equity benchmark in the United States of America (“U.S.”), consisting of leading companies from different economic sectors. The KBW Bank Index seeks to reflect the performance of banks and thrifts that are publicly traded in the U.S. and is composed of leading national money center and regional banks and thrifts. The S&P Financials Index is an index of financial companies, all of which are components of the S&P 500. The Firm is a component of all three industry indices. The following table and graph assume simultaneous investments of \$100 on December 31, 2015, in JPMorgan Chase common stock and in each of the above indices. The comparison assumes that all dividends were reinvested. December 31, (in dollars) 2015 2016 2017 2018 2019 2020 JPMorgan Chase \$ 100.00 \$ 134.57 \$ 170.54 \$ 159.20 \$ 234.46 \$ 221.52 KBW Bank Index 100.00 128.51 152.41 125.42 170.72 153.12 S&P Financials Index 100.00 122.75 149.92 130.37 172.21 169.19 S&P 500 Index 100.00 111.95 136.38 130.39 171.44 202.96 December 31, (in dollars) JPMorgan Chase & Co./2020 Form 10-K 45 Management’s discussion and analysis The following is Management’s discussion and analysis of the financial condition and results of operations (“MD&A”) of JPMorgan Chase for the year ended December 31, 2020. The MD&A is included in both JPMorgan Chase’s Annual Report for the year ended December 31, 2020 (“Annual Report”) and its Annual Report on Form 10-K for the year ended December 31, 2020 (“2020 Form 10-K”) filed with the Securities and Exchange Commission (“SEC”). Refer to the Glossary of terms and acronyms on pages 305-311 for definitions of terms and acronyms used throughout the Annual Report and the 2020 Form 10-K. The MD&A contains statements that are forward-looking within the meaning of the Private Securities Litigation Reform Act of 1995. These statements are based on the current beliefs and expectations of JPMorgan Chase’s management and are subject to significant risks and uncertainties. Refer to Forward-looking Statements on page 157) and Part 1, Item 1A: Risk factors in the 2020 Form 10-K on pages 8-32 for a discussion of certain of those risks and uncertainties and the factors that could cause JPMorgan Chase’s actual results to differ materially because of those risks and uncertainties. INTRODUCTION JPMorgan Chase & Co. (NYSE: JPM), a financial holding company incorporated under Delaware law in 1968, is a leading financial services firm based in the United States of America (“U.S.”), and has operations worldwide; JPMorgan Chase had \$3.4 trillion in assets and \$279.4 billion in stockholders’ equity as of December 31, 2020. The Firm is a leader in investment banking, financial services for consumers and small businesses, commercial banking, financial transaction processing and asset management. Under the J.P. Morgan and Chase brands, the Firm serves millions of customers in the U.S. and globally many of the world’s most prominent corporate, institutional and government clients. JPMorgan Chase’s principal bank subsidiary is JPMorgan Chase Bank, National Association (“JPMorgan Chase Bank, N.A.”), a national banking association with U.S. branches in 38 states and Washington, D.C. as of December 31, 2020. JPMorgan Chase’s principal nonbank subsidiary is J.P. Morgan Securities LLC (“J.P. Morgan Securities”), a U.S. broker-dealer. The bank and non-bank subsidiaries of JPMorgan Chase operate nationally as well as through overseas branches and subsidiaries, representative offices and subsidiary foreign banks. The Firm’s principal operating subsidiary outside the U.S. is J.P. Morgan Securities plc, a U.K.-based subsidiary of JPMorgan Chase Bank, N.A. For management reporting purposes, the Firm’s activities are organized into four

major reportable business segments, as well as a Corporate segment. The Firm's consumer business is the Consumer & Community Banking (CCB) segment. The Firm's wholesale business segments are the Corporate & Investment Bank (CIB), Commercial Banking (CB), and Asset & Wealth Management (AWM). Refer to Business Segment Results on pages 65, 84, and Note 32 for a description of the Firm's business segments, and the products and services they provide to their respective client bases.

46 JPMorgan Chase & Co./2020 Form 10-K EXECUTIVE OVERVIEW This executive overview of the MD&A highlights selected information and does not contain all of the information that is important to readers of this 2020 Form 10-K. For a complete description of the trends and uncertainties, as well as the risks and critical accounting estimates, affecting the Firm and its various LOBs, this 2020 Form 10-K should be read in its entirety. Effective January 1, 2020, the Firm adopted the CECL accounting guidance. Refer to Note 1 for further information. Financial performance of JPMorgan Chase Year ended December 31, (in millions, except per share data and ratios) 2020 2019 Change Selected income statement data Total net revenue (a) \$ 119,543; \$ 115,399; 4%; Total noninterest expense (a) 66,656; 65,269; 2%; Pre-provision profit 52,887; 50,130; 5%; Provision for credit losses 17,480; 5,585; 213%; Net income 29,131; 36,431; (20) Diluted earnings per share 8.88; 10.72; (17) Selected ratios and metrics Return on common equity 12%; 15%; % Return on tangible common equity 14%; 19%; Book value per share \$ 81.75; \$ 75.98; 8%; Tangible book value per share 66.11; 60.98; 8%; Capital ratios (b) CET1 13.1%; 12.4%; % Tier 1 capital 15.0%; 14.1%; Total capital 17.3%; 16.0%; (a) and (b) In the second quarter of 2020, the Firm reclassified certain spend-based credit card reward costs from marketing expense to be a reduction of card income, with no effect on net income. Prior-period amounts have been revised to conform with the current presentation. (b) As of December 31, 2020, the capital metrics reflect the relief provided by the Federal Reserve Board in response to the COVID-19 pandemic, including the CECL capital transition provisions that became effective in the first quarter of 2020. Refer to Regulatory Developments relating to the COVID-19 Pandemic on pages 52-53 and Capital Risk Management on pages 91-101 for additional information. Comparisons noted in the sections below are for the full year of 2020 versus the full year of 2019, unless otherwise specified. Firmwide overview JPMorgan Chase reported net income of \$29.1 billion for 2020, or \$8.88 per share, on net revenue of \$119.5 billion. The Firm reported ROE of 12% and ROTCE of 14%. The Firm's results for 2020 included net additions to the allowance for credit losses of \$12.2 billion and Firmwide legal expense of \$1.1 billion. The Firm had net income of \$29.1 billion, down 20%. Total net revenue was up 4%. Noninterest revenue was \$65.0 billion, up 12%, driven by higher CIB Markets revenue, Investment Banking fees and net production revenue in Home Lending. Net interest income was \$54.6 billion, down 5%, driven by the impact of lower rates, predominantly offset by higher net interest income in CIB Markets as well as balance sheet growth. Noninterest expense was \$66.7 billion, up 2%, driven by higher volume- and revenue-related expense, legal expense and continued investments in the businesses, partially offset by lower structural expense. The provision for credit losses was \$17.5 billion, up \$11.9 billion from the prior year, driven by net additions to the allowance for credit losses of \$12.2 billion due to the deterioration and increased uncertainty in the macroeconomic environment as a result of the impact of the COVID-19 pandemic. The total allowance for credit losses was \$30.8 billion at December 31, 2020. The Firm had an allowance for loan losses to retained loans coverage ratio of 2.95%, compared with 1.39% in the prior year; the increase from the prior year was driven by the additions to the allowance for credit losses and the adoption of CECL. The Firm's nonperforming assets totaled \$10.9 billion at December 31, 2020, an increase of \$5.9 billion from the prior year, primarily reflecting client credit deterioration across multiple industries in the wholesale portfolio; and in the consumer portfolio, loans placed on nonaccrual status related to the impact of the COVID-19 pandemic, as well as the adoption of CECL, as the purchased credit deteriorated loans in the mortgage portfolio became subject to nonaccrual loan treatment. In the fourth quarter of 2020, nonperforming assets decreased \$556 million from the prior quarter, reflecting some credit improvement in the wholesale portfolio. The consumer portfolio remained relatively flat, as the increase in loans placed on nonaccrual status in Home Lending related to the impact of the COVID-19 pandemic was predominantly offset by lower loans at fair value in CIB, largely due to sales. Firmwide average loans of \$1.0 trillion were up 1%, driven by higher loan balances in AWM and CIB, as well as loans originated under the Small Business Administration's Paycheck Protection Program (PPP), predominantly offset by lower loan balances in Home Lending and Card. Firmwide average deposits of \$1.9 trillion were up 25%, reflecting significant inflows across the Firm, primarily driven by the impact of the COVID-19 pandemic and the related effect of certain government actions. As of December 31, 2020, the Firm had average eligible High Quality Liquid Assets (HQLA) of approximately \$697 billion and unencumbered marketable securities with a fair value of approximately \$740 billion, resulting in approximately \$1.4 trillion of liquidity sources. Refer to Liquidity Risk Management on pages 102, 108 for additional information. JPMorgan Chase & Co./2020 Form 10-K 47 Management's discussion and analysis Selected capital-related metrics The Firm's CET1 capital was \$205 billion, and the Standardized and Advanced CET1 ratios were 13.1% and 13.8%, respectively. The Firm's SLR was 6.9%. The SLR

reflects the temporary exclusions of U.S. Treasury securities and deposits at Federal Reserve Banks, as required by the Federal Reserve's interim final rule issued on April 1, 2020. The Firm's SLR excluding the temporary relief was 5.8%. The Firm grew TBVPS, ending 2020 at \$66.11, up 8% versus the prior year. Pre-provision profit, ROTCE and TBVPS are non-GAAP financial measures. Refer to Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages 62-64, and Capital Risk Management on pages 91-101 for a further discussion of each of these measures. Business segment highlights Selected business metrics for each of the Firm's four LOBs are presented below for the full year of 2020. CCB ROE 15%; Average deposits up 22%; client investment assets up 17%; Average loans down 6%; debit and credit card sales volume down 3%; Active mobile customers up 10% CIB ROE 160.20%; \$9.5 billion of Global Investment Banking fees, up 25%; #1 ranking for Global Investment Banking fees with 9.2% wallet share for the year; Total Markets revenue of \$29.5 billion, up 41%, with Fixed Income Markets up 45% and Equity Markets up 33% CB ROE 11%; Gross Investment Banking revenue of \$3.3 billion, up 22%; Average deposits up 38%; average loans up 5% AWM ROE 28%; Assets under management (AUM) of \$2.7 trillion, up 17%; Average deposits up 20%; average loans up 13% Refer to the Business Segment Results on pages 65-66 for a detailed discussion of results by business segment. Credit provided and capital raised JPMorgan Chase continues to support consumers, businesses and communities around the globe. The Firm provided new and renewed credit and raised capital for wholesale and consumer clients during 2020, consisting of: \$2.3 trillion Total credit provided and capital raised (including loans and commitments) (a) \$226 billion Credit for consumers \$18 billion Credit for U.S. small businesses \$865 billion Credit for corporations \$1.1 trillion Capital raised for corporate clients and non-U.S. government entities \$103 billion Credit and capital raised for nonprofit and U.S. government entities (b) \$28 billion Loans under the Small Business Administration's Paycheck Protection Program (a) Excludes loans under the SBA's PPP. (b) Includes states, municipalities, hospitals and universities. 48 JPMorgan Chase & Co./2020 Form 10-K Recent events; On January 27, 2021, JPMorgan Chase announced that it will launch a digital retail bank in the U.K. this year, and on February 23, 2021, JPMorgan Chase announced that it will appoint Sanoke Viswanathan, head of International Consumer, to the Operating Committee; On December 31, 2020, JPMorgan Chase acquired the Global Loyalty business (of cxLoyalty Group Holdings, Inc. This includes cxLoyalty's technology platforms, full-service travel agency, and gift card and merchandise services; On December 31, 2020, JPMorgan Chase acquired 55ip, a financial technology company and leading provider of automated tax-smart investment strategies; On December 18, 2020, JPMorgan Chase received the results of the 2020 Comprehensive Capital Analysis and Review (Round 2 stress test from the Federal Reserve. The Firm's Stress Capital Buffer requirement remained at 3.3%. The Federal Reserve also announced that all large banks, including the Firm, could resume share repurchases commencing in the first quarter of 2021, subject to certain restrictions. The Firm's Board of Directors has authorized a new common share repurchase program for up to \$30 billion. The Firm expects to repurchase up to \$4.5 billion of common stock in the first quarter of 2021 and, subject to approval by the Board of Directors, maintain the quarterly common stock dividend of \$0.90 per share; On December 18, 2020, JPMorgan Chase announced the retirement of Lee Raymond, the Firm's Lead Independent Director. Stephen B. Burke has succeeded Mr. Raymond as Lead Independent Director effective January 1, 2021; On December 7, 2020, Phebe N. Novakovic became a member of the Firm's Board of Directors. Ms. Novakovic is Chairman and Chief Executive Officer of General Dynamics Corporation. 2021 outlook These current expectations are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are based on the current beliefs and expectations of JPMorgan Chase's management and are subject to significant risks and uncertainties. Refer to Forward-Looking Statements on page 157, and the Risk Factors section on pages 8-32 of the Firm's 2020 Form 10-K, for a further discussion of certain of those risks and uncertainties and the other factors that could cause JPMorgan Chase's actual results to differ materially because of those risks and uncertainties. There is no assurance that actual results in 2021 will be in line with the outlook set forth below, and the Firm does not undertake to update any forward-looking statements. JPMorgan Chase's current outlook for 2021 should be viewed against the backdrop of the global and U.S. economies, the COVID-19 pandemic, financial markets activity, the geopolitical environment, the competitive environment, client and customer activity levels, and regulatory and legislative developments in the U.S. and other countries where the Firm does business. Each of these factors will affect the performance of the Firm and its LOBs. The Firm will continue to make appropriate adjustments to its businesses and operations in response to ongoing developments in the business, economic, regulatory and legal environments in which it operates. The outlook information contained in this Form 10-K supersedes all outlook information included in the Firm's periodic reports furnished or filed with the SEC prior to the date of this Form 10-K. Full-year 2021 Management expects net interest income, on a managed basis, to be approximately \$55 billion, market dependent; Management expects adjusted expense to be approximately \$69 billion, which includes accelerated contributions to the Firm's Foundation in the form of equity investments, as well as higher revenue-related expense. First-quarter 2021 Management expects net interest income, on a managed basis, to be approximately

\$13 billion, market dependent. Investment banking fees are expected to be flat when compared with the fourth quarter of 2020, depending on market conditions. Fourth-quarter 2021 Management expects net interest income, on a managed basis, to be in excess of \$14 billion, market dependent. Net interest income, on a managed basis, and adjusted expense are non-GAAP financial measures. Refer to Explanation and Reconciliation of the Firm's Use of Non-GAAP Financial Measures on pages 62-64. JPMorgan Chase & Co./2020 Form 10-K 49 Management's discussion and analysis Business Developments COVID-19 Pandemic In response to the COVID-19 pandemic the Firm invoked resiliency plans to allow its businesses to remain operational, utilizing disaster recovery sites and implementing alternative work arrangements globally. Additionally, the Firm implemented strategies and procedures designed to help it respond to increased market volatility, client demand for credit and liquidity, distress in certain industries and the ongoing impacts to consumers and businesses. Throughout 2020, the Firm remained focused on serving its clients, customers and communities, as well as the well-being of its employees, during the pandemic. The Firm continues to actively monitor the health and safety situations at local and regional levels, and will continue to adapt as these situations evolve. Supporting clients and customers The Firm has supported its clients and customers during the challenging conditions caused by the COVID-19 pandemic by providing assistance, primarily in the form of payment deferrals on loans and extending credit, including through its participation in the Small Business Association's (SBA) PPP. Refer to Credit Portfolio on page 112 for information on assistance granted to customers and clients. Refer to Consumer Credit portfolio on page 116 and Wholesale Credit Portfolio on page 122 for information on retained loans under payment deferral. The Firm has gradually re-opened its branches since April 2020, with nearly 90% of its branches returning to full service as of December 31, 2020. Additionally, the Firm continues to provide a wide range of banking services that are accessible to clients and customers through mobile and other digital channels. Protecting and supporting employees In response to the COVID-19 pandemic, the Firm implemented alternative work arrangements, with the vast majority of its global workforce working from home since the onset of the pandemic and continuing into the first quarter of 2021. The Firm also provided additional benefits to employees during the COVID-19 pandemic. Supporting communities Since March, the Firm has committed \$250 million to help address humanitarian needs and long-term economic challenges posed by the COVID-19 pandemic on the communities in which the Firm operates. As of December 31, 2020, over 75% of this commitment has been funded. Departure of the U.K. from the EU The U.K.'s departure from the EU, which is commonly referred to as Brexit, was completed on December 31, 2020. The U.K. and the EU have entered into a Trade and Cooperation Agreement which delineates many significant aspects of the future relationship between the U.K. and the EU. However, the agreement contained very limited provisions relating to cross-border financial services, and the U.K. and the EU are expected to engage in further negotiations concerning financial services. The Firm has executed and continues to execute on its Firmwide Brexit Implementation program, which encompasses a strategic implementation plan across all impacted businesses and functions, including an ongoing assessment of political, legal and regulatory and other implementation risks. A key focus of the program has been to ensure continuity of service to the Firm's EU clients in the following areas: regulatory and legal entities; clients; and business and operations. Regulatory and legal entities The Firm's legal entities in Germany, Luxembourg and Ireland are now licensed to provide and are providing services to the Firm's EU clients, including through a branch network covering locations such as Paris, Madrid and Milan. Subject to limited exceptions, the Firm's U.K.-based legal entities are no longer permitted to transact business from the U.K. with EU clients. Clients Agreements covering substantially all of the Firm's EU client activity have been re-documented to EU legal entities to facilitate continuation of service. The Firm continues to actively engage with those clients that have not completed re-documentation or required operational changes. Business and operations The COVID-19 pandemic introduced additional risk to the Firm's Brexit Implementation program, particularly in relation to staff relocations. As a result, the Firm has worked closely with regulators and employees to ensure that critical staff are relocated in a safe and timely manner so that the Firm can meet its regulatory commitments and continue serving its clients. Further relocations are planned for 2021, and the Firm's longer-term EU staffing strategy will be developed over time in cooperation with its regulators and as the post-Brexit market landscape evolves in order to ensure that the Firm maintains operational resilience and effective client coverage. 50 JPMorgan Chase & Co./2020 Form 10-K Interbank Offered Rate (IBOR) transition JPMorgan Chase and other market participants continue to make progress in preparing for the discontinuation of the London Interbank Offered Rate (IBOR) and other IBORs to comply with the International Organization of Securities Commission's standards for transaction-based benchmark rates. On November 30, 2020, ICE Benchmark Administration, the administrator of LIBOR, announced a public consultation on its proposal to cease the publication of the principal tenors of U.S. dollar LIBOR (i.e., overnight, one-month, three-month, six-month and 12-month LIBOR) immediately following a final publication on June 30, 2023. The Federal Reserve, the OCC and the FDIC also released guidance encouraging market participants to cease dealing in new U.S. dollar LIBOR contracts from the end of 2021. There has been no change in the scheduled cessation of U.K. sterling, Japanese yen, Swiss franc and Euro LIBOR, or the remaining tenors of U.S. dollar LIBOR, from December 31, 2021. The Firm continues to work towards reducing its exposure to IBOR-referencing contracts, including derivatives, bilateral and syndicated loans, securities, and debt and

preferred stock issuances, to meet the industry milestones and recommendations published by National Working Groups (NWG), including the Alternative Reference Rates Committee (the ARRC) in the U.S. On October 23, 2020, the International Swaps and Derivatives Association, Inc. (ISDA) published a new supplement to the ISDA 2006 definitions and the related 2020 IBOR Fallbacks Protocol (the Protocol). These publications are intended to facilitate the incorporation of robust rate fallback provisions into both legacy and new derivative contracts with effect from January 25, 2021. The Firm's client-facing legal entities have agreed to adhere to the Protocol, in accordance with recommendations from multiple industry working groups, including the ARRC. ISDA further announced that bilateral templates have been made available for use with counterparties who choose not to adhere to the Protocol. As a key objective of the ARRC's transition plan to encourage adoption of the Secured Overnight Financing Rate (SOFR), counterparty clearing houses, clearing house members and other impacted market participants successfully executed the discounting and price alignment interest (PAI) switch from federal funds to SOFR on October 16, 2020. The industry completed a similar switch from EONIA to €STR on July 27, 2020. On March 12, 2020 and January 7, 2021, the Financial Accounting Standards Board (FASB) issued accounting standards updates providing optional expedients and exceptions for applying generally accepted accounting principles to contracts and hedge accounting relationships affected by reference rate reform. These optional expedients are intended to simplify the operational impact of applying U.S. GAAP to transactions impacted by reference rate reform. The Firm elected to apply certain of these expedients beginning in the third quarter of 2020. On August 27, 2020, the International Accounting Standards Board (IASB) issued guidance that provides similar relief for entities reporting under International Financial Reporting Standards ("IFRS"). Refer to Accounting and Reporting Developments on page 156 for additional information. The Firm continues to monitor the transition relief being considered by the U.S. Treasury Department regarding the tax implications of reference rate reform. The Firm's initiatives in connection with LIBOR transition include: continuing to reduce its overall exposure to LIBOR; implementing rate fallback provisions developed by NWGs in new LIBOR contracts, where appropriate; continuing to educate and inform clients on LIBOR transition and the necessity to prepare for the cessation of LIBOR; assisting clients with discontinuing their issuance or use of LIBOR-linked products within the timelines specified by NWGs; supporting clients in their efforts to remediate contracts linked to LIBOR, including contracts to which the Firm is a party, which it manages or for which it acts as agent; offering products linked to alternative reference rates (ARRs) across its businesses, and; planning for the implementation of rate fallback mechanisms across products based on the conventions recommended by NWGs to prepare for transition to ARRs upon the cessation of various IBORs. The Firm is on schedule to implement necessary changes to operational and risk management systems in order to transition away from IBORs, including by aiming to meet proposed deadlines set by NWGs for the cessation of new contracts referencing these benchmarks. The Firm continues to engage with and remains committed to NWGs in devising solutions to unresolved issues relating to IBOR transition. The Firm continues to engage with market participants, NWGs and regulators to address market-wide challenges associated with LIBOR transition, including efforts to: improve liquidity in ARRs; develop and introduce forward-looking term rates linked to ARRs, and; support legislative proposals in the U.S., the U.K. and the EU that aim to resolve concerns involving tough legacy contracts (i.e. contracts that do not provide for automatic conversion to another rate or that are difficult to amend in order to add rate fallback provisions). Resolution of these challenges should provide more certainty and help to provide a framework for market participants in transitioning away from IBORs. JPMorgan Chase & Co./2020 Form 10-K 51 Management's discussion and analysis Regulatory Developments Relating to the COVID-19 Pandemic Since March 2020, the U.S. government as well as central banks and banking authorities around the world have taken and continue to take actions to help individuals, households and businesses that have been adversely affected by the economic disruption caused by the COVID-19 pandemic. The CARES Act and the Consolidated Appropriations Act, which were signed into law on March 27, 2020 and December 27, 2020, respectively, provide, among other things, funding to support loan facilities to assist consumers and businesses. Set forth below is a summary as of the date of this Form 10-K of U.S. government actions currently impacting the Firm and U.S. government programs in which the Firm is participating. The Firm will continue to assess ongoing developments in government actions in response to the COVID-19 pandemic. U.S. government actions Eligible retained income definition. On March 17, 2020, the Office of the Comptroller of the Currency (OCC), the Board of Governors of the Federal Reserve System (Federal Reserve), and the Federal Deposit Insurance Corporation (FDIC), collectively the federal banking agencies, issued an interim final rule (issued as final on August 26, 2020) that revised the definition of eligible retained income in the regulatory capital rules that apply to all U.S. banking organizations. On March 23, 2020, the Federal Reserve issued an interim final rule (issued as final on August 26, 2020) that revised the definition of eligible retained income for purposes of the total loss-absorbing capacity (TLAC) buffer requirements that apply to global systemically important banking organizations. The revised definition of eligible retained income makes any automatic limitations on payout distributions that could apply under the agencies' capital rules or TLAC rule take effect on a more graduated basis in the event that a banking

organization's capital, leverage and TLAC ratios were to decline below regulatory requirements (including buffers). The March 17, 2020 interim final rule was issued, in conjunction with an interagency statement encouraging banking organizations to use their capital and liquidity buffers, to further support banking organizations' abilities to lend to households and businesses affected by the COVID-19 pandemic. Reserve requirements. On March 24, 2020, the Federal Reserve issued an interim final rule (issued as final on December 22, 2020) reducing reserve requirement ratios for all depository institutions to zero percent, effective March 26, 2020, an action intended to free up liquidity in the banking system to support lending to households and businesses. Refer to Note 26 for additional information on the reduction to the reserve requirement. Regulatory Capital - Current Expected Credit Losses (CECL) transition delay. On March 31, 2020, the federal banking agencies issued an interim final rule (issued as final on August 26, 2020) that provided banking organizations with the option to delay the effects of CECL on regulatory capital for two years, followed by a three-year transition period (CECL capital transition provisions). The Firm elected to apply the CECL capital transition provisions. Supplementary leverage ratio (SLR) temporary revision. On April 1, 2020, the Federal Reserve issued an interim final rule that requires, on a temporary basis, the calculation of total leverage exposure for purposes of calculating the SLR for bank holding companies (BHC), to exclude the on-balance sheet amounts of U.S. Treasury securities and deposits at Federal Reserve Banks. These exclusions became effective April 1, 2020, and will remain in effect through March 31, 2021. Refer to Capital Risk Management on pages 91-101 and Note 27 for additional information on the CECL capital transition provisions, the impact to the Firm's capital metrics and the Firm's SLR. Loan modifications. On April 7, 2020, the federal banking agencies along with the National Credit Union Administration, and the Consumer Financial Protection Bureau, in consultation with the state financial regulators, issued an interagency statement revising a March 22, 2020 interagency statement on loan modifications and the reporting for financial institutions working with customers affected by the COVID-19 pandemic (the IA Statement). The IA Statement reconfirmed that efforts to work with borrowers where the loans are prudently underwritten, and not considered past due or carried on nonaccrual status, should not result in the loans automatically being considered modified in a troubled debt restructuring (TDR) for accounting and financial reporting purposes, or for purposes of their respective risk-based capital rules, which would otherwise require financial institutions subject to the capital rules to hold more capital. The IA Statement also clarified the interaction between its previous guidance and Section 4013 of the CARES Act, as extended by Section 541 of the Consolidated Appropriations Act, which provides certain financial institutions with the option to suspend the application of accounting guidance for TDRs for a limited period of time for loan modifications made to address the effects of the COVID-19 pandemic. The Firm has granted various forms of assistance to customers and clients impacted by the COVID-19 pandemic, including payment deferrals and covenant modifications. The majority of the Firm's COVID-19 related loan modifications have not been considered TDRs because: they represent short-term or other insignificant modifications, whether under the Firm's regular loan modification assessments or the IA Statement guidance, or the Firm has elected to apply the option to suspend the application of accounting guidance for TDRs as provided by 52 JPMorgan Chase & Co./2020 Form 10-K the CARES Act and extended by the Consolidated Appropriations Act. To the extent that certain modifications do not meet any of the above criteria, the Firm accounts for them as TDRs. Refer to Credit Portfolio on pages 112-113 and Note 12 for additional information on the Firm's loan modification activities. PPP. Beginning April 3, 2020, the PPP, established by the CARES Act and administered by the SBA, authorized eligible lenders to provide nonrecourse loans to eligible borrowers until August 8, 2020 to provide an incentive for these businesses to keep their workers on their payroll. As part of the Consolidated Appropriations Act, additional funding was provided for new PPP loans beginning in early January 2021. This program was designed to target smaller businesses as well as to simplify the loan forgiveness process for loans under \$150,000. As of February 19, 2021, the Firm has funded approximately \$5 billion under this extension of the program. U.S. government facilities. Beginning in March 2020, the Federal Reserve announced a suite of facilities using its emergency lending powers under section 13(3) of the Federal Reserve Act to support the flow of credit to individuals, households and businesses adversely affected by the COVID-19 pandemic and to support the broader economy. The Firm has participated and is participating in the PPP and certain of the other government facilities and programs, as needed, to assist its clients and customers or to support the broader economy. Refer to Capital Risk Management on pages 91-101, Liquidity Risk Management on pages 102-108, Credit Portfolio on pages 112-113, Note 12 and Note 27 for additional information on the Firm's participation in the PPP and other government facilities and programs. JPMorgan Chase & Co./2020 Form 10-K 53 Management discussion and analysis CONSOLIDATED RESULTS OF OPERATIONS This section provides a comparative discussion of JPMorgan Chase's Consolidated Results of Operations on a reported basis for the two-year period ended December 31, 2020, unless otherwise specified. Refer to Consolidated Results of Operations on pages 48-51 of the Firm's Annual Report on Form 10-K for the year ended December 31, 2019 (the 2019 Form 10-K) for a discussion of the 2019 versus 2018 results. Factors that relate primarily to a single business segment are discussed in more detail within that business segment's results. Refer to pages 152-155 for a discussion of the Critical Accounting Estimates Used by the Firm that affect the Consolidated Results of Operations. Revenue Year

ended December 31, (in millions) 2020 2019 2018 Investment banking fees \$ 9,486; \$ 7,501; \$ 7,550; Principal transactions 18,021; 14,018; 12,059; Lending- and deposit-related fees (a) 6,511; 6,626; 6,377; Asset management, administration and commissions (a) 18,177; 16,908; 16,793; Investment securities gains/(losses) 802; 258; (395) Mortgage fees and related income 3,091; 2,036; 1,254; Card income (b) 4,435; 5,076; 4,743; Other income (c) 4,457; 5,731; 5,343; Noninterest revenue 64,980; 58,154; 53,724; Net interest income 54,563; 57,245; 55,059; Total net revenue \$ 119,543; \$ 115,399; \$ 108,783; (a) In the first quarter of 2020, the Firm reclassified certain fees from asset management, administration and commissions to lending- and deposit-related fees. Prior-period amounts have been revised to conform with the current presentation. (b) In the second quarter of 2020, the Firm reclassified certain spend-based credit card reward costs from marketing expense to be a reduction of card income, with no effect on net income. Prior-period amounts have been revised to conform with the current presentation. (c) Included operating lease income of \$5.5 billion for each of the years ended December 31, 2020 and 2019, and \$4.5 billion for the year ended December 31, 2018. 2020 compared with 2019 Investment banking fees increased, driven by CIB, reflecting: higher equity underwriting fees predominantly in follow-on offerings and convertible securities markets due to increased industry-wide fees; higher debt underwriting fees in investment-grade and high-yield bonds driven by increased industry-wide fees and wallet share gains. The increased activity resulted in part from clients seeking liquidity in the first half of the year as a result of the COVID-19 pandemic. Refer to CIB segment results on pages 71 and 76 and Note 6 for additional information. Principal transactions revenue increased, predominantly in CIB, reflecting higher revenue in Fixed Income Markets, driven by strong performance in Currencies & Emerging Markets, Rates, and Credit. The increase in principal transactions revenue also reflected higher net valuations on several legacy equity investments in Corporate, compared with net losses in the prior year. Principal transactions revenue in CIB may in certain cases have offsets across other revenue lines, including net interest income. The Firm assesses the performance of its CIB Markets business on a total revenue basis. Refer to CIB and Corporate segment results on pages 71 and 76 and pages 83 and 84, respectively, and Note 6 for additional information. Lending- and deposit-related fees decreased as a result of lower deposit-related fees in CCB, reflecting lower transaction activity and the impact of fee refunds related to the COVID-19 pandemic, predominantly offset by higher cash management fees in CIB and CB, as well as higher lending-related fees, particularly loan commitment fees in CIB. Refer to CCB, CIB and CB segment results on pages 67 and 70, pages 71 and 76 and pages 77 and 79, respectively, and Note 6 for additional information. Asset management, administration and commissions revenue increased driven by: higher asset management fees in AWM as a result of net inflows into liquidity and long term products, and higher performance fees; and in CCB related to a higher level of investment assets; higher brokerage commissions in CIB and AWM on higher client-driven volume, partially offset by lower volume of annuity sales in CCB. Refer to CCB, CIB and AWM segment results on pages 67 and 70, pages 71 and 76 and pages 80 and 82, respectively, and Note 6 for additional information. Investment securities gains/(losses) increased due to the repositioning of the investment securities portfolio, including sales of U.S. GSE and government agency mortgage-backed securities, particularly in the first and third quarters of 2020. Refer to Corporate segment results on pages 83 and 84 and Note 10 for additional information. Mortgage fees and related income increased due to higher net mortgage production revenue reflecting higher mortgage production volumes and margins; the prior year included gains on sales of certain loans. Refer to CCB segment results on pages 67 and 70, Note 6 and 15 for further information. 54 JPMorgan Chase & Co./2020 Form 10-K Card income decreased due to: lower net interchange income reflecting lower credit card sales volumes and debit card transactions as a result of the impact of the COVID-19 pandemic, largely offset by lower acquisition costs and higher annual fees in CCB, and lower merchant processing fees in CIB predominantly driven by a reporting reclassification of certain expenses to be a reduction of revenue in Merchant Services. Refer to CCB and CIB segment results on pages 67 and 70 and pages 71 and 76, respectively, and Note 6 for further information. Other income decreased reflecting: Increased amortization on higher levels of alternative energy investments in CIB. The increased amortization was more than offset by lower income tax expense from the associated tax credits; lower net valuation gains on certain investments in AWM; net losses on certain equity investments in CIB, compared with net gains in the prior year; higher costs associated with using forward contracts to hedge certain non-U.S. dollar-denominated net investment exposures, and higher losses related to the early termination of certain of the Firm's long-term debt in Treasury and CIO, partially offset by a net increase from a gain on an equity investment. Net interest income decreased due to the impact of lower rates, predominantly offset by higher net interest income in CIB Markets, as well as balance sheet growth. The Firm's average interest-earning assets were \$2.8 trillion, up \$434 billion, and the yield was 2.34%, down 127 basis points (bps), primarily due to lower rates. The net yield on these assets, on an FTE basis, was 1.98%, a decrease of 48 bps. The net yield excluding CIB Markets was 2.30%, down 97 bps. Net yield excluding CIB Markets is a non-GAAP financial measure. Refer to the Consolidated average balance sheets, interest and rates schedule on pages 300 and 304 for further details; and the Explanation and Reconciliation of the Firm's Use of Non-GAAP

Financial Measures on pages 62–64 for a further discussion of Net interest yield excluding CIB Markets. Provision for credit losses Year ended December 31, (in millions) 2020 2019 2018 Consumer, excluding credit card \$ 1,016 \$ (378) \$ (119) Credit card 10,886 5,348 4,818 Total consumer 11,902 4,970 4,699 Wholesale 5,510 615 172 Investment securities 68 NA NA Total provision for credit losses \$ 17,480 \$ 5,585 \$ 4,871 Effective January 1, 2020, the Firm adopted the CECL accounting guidance. In conjunction with the adoption of CECL, the Firm reclassified risk-rated loans and lending-related commitments from the consumer, excluding credit card portfolio segment to the wholesale portfolio segment, to align with the methodology applied when determining the allowance. Prior-period amounts have been revised to conform with the current presentation. Refer to Note 1 for further information. 2020 compared with 2019 The provision for credit losses increased in consumer and wholesale primarily driven by the deterioration and uncertainty in the macroeconomic environment, in particular in the first half of 2020, as a result of the impact of the COVID-19 pandemic. The increase in consumer reflected: • net additions of \$7.4 billion to the allowance for credit losses, consisting of \$6.6 billion for Card, \$520 million for Auto, \$252 million for Business Banking, partially offset by • lower net charge-offs largely in Card, reflecting lower charge-offs and higher recoveries, primarily benefiting from payment assistance and government stimulus. The prior year included a \$244 million net reduction in the allowance for credit losses. The increase in wholesale reflected a net addition of \$4.7 billion to the allowance for credit losses across the LOBs, impacting multiple industries. The investment securities provision for credit losses relates to the HTM portfolio, which became subject to the CECL accounting guidance beginning on January 1, 2020. Refer to the segment discussions of CCB on pages 67–70, CIB on pages 71–76, CB on pages 77–79, AWM on pages 80–82, the Allowance for Credit Losses on pages 132-133, and Notes 1, 10 and 13 for further discussion of the credit portfolio and the allowance for credit losses.

JPMorgan Chase & Co./2020 Form 10-K 55 Management’s discussion and analysis Noninterest expense Year ended December 31, (in millions) 2020 2019 2018 Compensation expense \$ 34,988 \$ 34,155 \$ 33,117 Noncompensation expense: Occupancy 4,449 4,322 3,952 Technology, communications and equipment 10,338 9,821 8,802 Professional and outside services 8,464 8,533 8,502 Marketing (a) 2,476 3,351 3,044 Other (b)(c) 5,941 5,087 5,731 Total noncompensation expense 31,668 31,114 30,031 Total noninterest expense \$ 66,656 \$ 65,269 \$ 63,148 (a) In the second quarter of 2020, the Firm reclassified certain spend-based credit card reward costs from marketing expense to be a reduction of card income, with no effect on net income. Prior-period amounts have been revised to conform with the current presentation. (b) Included Firmwide legal expense of \$1.1 billion, \$239 million and \$72 million for the years ended December 31, 2020, 2019 and 2018, respectively. (c) Included FDIC-related expense of \$717 million, \$457 million and \$1.2 billion for the years ended December 31, 2020, 2019 and 2018, respectively. 2020 compared with 2019 Compensation expense increased driven by higher volume-and revenue-related expense, predominantly in CIB and CCB, as well as the impact of investments in the businesses. Noncompensation expense increased as a result of: • higher legal expense predominantly in CIB and AWM • higher volume-related expense, in particular brokerage expense in CIB and depreciation from growth in auto lease assets in CCB • higher investments in the businesses, including technology and real estate, • an impairment on a legacy investment in Corporate, and • higher FDIC-related expense, partially offset by • lower marketing expense as a result of lower investments in marketing campaigns and lower travel-related benefits in CCB, and • lower structural expense, including lower travel and entertainment across the businesses, and payment processing costs, partially offset by higher contributions to the Firm’s Foundation. Income tax expense Year ended December 31, (in millions, except rate) 2020 2019 2018 Income before income tax expense \$ 35,407 \$ 44,545 \$ 40,764 Income tax expense 6,276 8,114 8,290 Effective tax rate 17.7 % 18.2 % 20.3 % 2020 compared with 2019 The effective tax rate decreased , with the current year rate reflecting the impact of a lower level of pre-tax income and changes in the mix of income and expenses subject to U.S. federal, and state and local taxes, as well as other tax adjustments. The prior year included the effect of \$1.1 billion of tax benefits related to the resolution of certain tax audits. Refer to Note 25 for further information. 56

JPMorgan Chase & Co./2020 Form 10-K CONSOLIDATED BALANCE SHEETS AND CASH FLOWS ANALYSIS Effective January 1, 2020, the Firm adopted the CECL accounting guidance. Refer to Note 1 for further information. Consolidated balance sheets analysis The following is a discussion of the significant changes between December 31, 2020 and 2019. Selected Consolidated balance sheets data December 31, (in millions) 2020 2019 Change Assets Cash and due from banks \$ 24,874 \$ 21,704 15 % Deposits with banks 502,735 241,927 108 Federal funds sold and securities purchased under resale agreements 296,284 249,157 19 Securities borrowed 160,635 139,758 15 Trading assets (a) 503,126 369,687 36 Available-for-sale securities 388,178 350,699 11 Held-to-maturity securities, net of allowance for credit losses 201,821 47,540 325 Investment securities, net of allowance for credit losses 589,999 398,239 48 Loans (a) 1,012,853 997,620 2 Allowance for loan losses (28,328) (13,123) 116 Loans, net of allowance for loan losses 984,525

984,497; Accrued interest and accounts receivable 90,503; 72,861; 24; Premises and equipment 27,109; 25,813; 5; Goodwill, MSRs and other intangible assets 53,428; 53,341; Other assets (a) 152,853; 130,395; 17; Total assets \$ 3,386,071; \$ 2,687,379; 26; % (a) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans and other assets. Prior-period amounts have been revised to conform with the current presentation. Cash and due from banks and deposits with banks increased primarily as a result of significant deposit inflows, which also funded asset growth across the Firm, including investment securities and securities purchased under resale agreements. Deposits with banks reflect the Firm's placements of its excess cash with various central banks, including the Federal Reserve Banks. Federal funds sold and securities purchased under resale agreements increased as a result of higher deployment of cash in Treasury and CIO, as well as the impact of client activity and higher demand for securities to cover short positions in CIB. Refer to Liquidity Risk Management on pages 102;108 and Note 11 for additional information. Securities borrowed increased driven by client-driven activities in CIB. Refer to Liquidity Risk Management on pages 102;108 and Note 11 for additional information. Trading assets remained elevated at the end of 2020, due to stronger client-driven market-making activities in debt and equity instruments and higher derivative receivables as a result of market movements in CIB Markets. Refer to Notes 2 and 5 for additional information. Investment securities increased, reflecting net purchases of U.S. Treasuries and U.S. GSE and government agency MBS in the available-for-sale (AFS;) portfolio, driven by interest rate risk management activities and cash deployment. AFS securities of \$164 billion were transferred to the held-to-maturity (HTM;) portfolio, resulting in a decrease in AFS and a comparable increase in HTM securities. The transfers were executed for capital management purposes. Refer to Corporate segment results on pages 83;84, Investment Portfolio Risk Management on page 134 and Notes 2 and 10 for additional information on investment securities. Loans increased, reflecting: growth in wholesale loans and mortgages in AWM and the impact of PPP loans in CBB and CB, as well as higher wholesale loans related to client-driven activities in CIB Markets largely offset by lower loans in Home Lending primarily due to net paydowns; and lower loans in Card due to the decline in sales volumes that began in March as a result of the impact of the COVID-19 pandemic. The allowance for loan losses increased primarily reflecting the deterioration and uncertainty in the macroeconomic environment, in particular in the first half of 2020, as a result of the impact of the COVID-19 pandemic, consisting of: a net \$7.4 billion addition in consumer, predominantly in the credit card portfolio, and a net \$3.6 billion addition in wholesale, across the LOBs, impacting multiple industries. The adoption of CECL on January 1, 2020, resulted in a \$4.2 billion addition to the allowance for loan losses. There were also additions to the allowance for lending-related commitments, which is included in other liabilities on the consolidated balance sheets, of \$1.1 billion related to the impact of the COVID-19 pandemic, and \$98 million related to the adoption of CECL. Total additions to the allowance for JPMorgan Chase & Co./2020 Form 10-K 57 Management's discussion and analysis credit losses were \$12.1 billion related to COVID-19, and \$4.3 billion related to CECL, as of December 31, 2020. Refer to Credit and Investment Risk Management on pages 110;134, and Notes 1, 2, 3, 12 and 13 for further discussion of loans and the allowance for loan losses. Accrued interest and accounts receivable increased driven by higher client receivables related to client-driven activities in CIB prime brokerage. Refer to Note 16 and 18 for additional information on Premises and equipment. Goodwill, MSRs and other intangibles was flat as the increase in goodwill related to the acquisitions of cxLoyalty and 55ip was offset by lower MSRs as a result of faster prepayment speeds on lower rates, and the realization of expected cash flows, partially offset by net additions to the MSRs. Refer to Note 15 for additional information. Other assets increased reflecting higher cash collateral placed with central counterparties in CIB. Selected Consolidated balance sheets data December 31, (in millions) 2020 2019 Change

Liabilities	2020	2019	Change
Deposits	\$ 2,144,257	\$ 1,562,431	37
Federal funds purchased and securities loaned or sold under repurchase agreements	215,209	183,675	17
Short-term borrowings	45,208	40,920	10
Trading liabilities	170,181	119,277	43
Accounts payable and other liabilities	232,599	210,407	11
Beneficial interests issued by consolidated variable interest entities (VIEs;)	17,578	17,841	(1)
Long-term debt	281,685	291,498	(3)
Total liabilities	3,106,717	2,426,049	28
Stockholders' equity	279,354	261,330	7
Total liabilities and stockholders' equity	\$ 3,386,071	\$ 2,687,379	26

% Deposits increased reflecting significant inflows across the LOBs primarily driven by the impact of the COVID-19 pandemic and the related effect of certain government actions; in the wholesale businesses, while the inflows principally occurred in March as clients sought to remain liquid as a result of market conditions, balances continued to increase through the end of 2020, and in CCB, the increase was driven by lower spending and higher cash balances across both consumer and small business customers, as well as growth from existing and new accounts. Refer to the Liquidity Risk Management discussion on pages 102;108; and Notes 2 and 17 for more information. Federal funds purchased and securities loaned or sold under repurchase agreements increased reflecting: higher secured financing of AFS investment securities in Treasury and CIO, as well as trading assets in CIB, partially offset by a decline in client-driven market-making activities in CIB, including the Firm's non-participation in the Federal Reserve's open market

operations. Refer to the Liquidity Risk Management discussion on pages 102–108 and Note 11 for additional information. Short-term borrowings increased reflecting higher financing of CIB prime brokerage activities. Refer to pages 102–108 for information on changes in Liquidity Risk Management. Trading liabilities increased reflecting client-driven market-making activities, which resulted in higher levels of short positions in debt and equity instruments and higher derivative payables as a result of market movements in CIB Markets. Refer to Notes 2 and 5 for additional information. Accounts payable and other liabilities increased reflecting higher client payables related to client-driven activities in CIB Markets. Refer to Note 19 for additional information. Refer to Off-Balance Sheet Arrangements on pages 60-61 and Note 14 and 28 for information on Beneficial interests issued by consolidated VIEs . Long-term debt decreased as a result of maturities of FHLB advances; net maturities of senior debt, which included the early termination of certain of the Firm's debt; partially offset by an issuance of subordinated debt, and higher fair value hedge accounting adjustments related to lower interest rates. Refer to Liquidity Risk Management on pages 102–108 and Note 20 for additional information. Stockholders' equity increased reflecting the combined impact of net income, capital actions, the adoption of CECL and an increase in accumulated other comprehensive income (“AOCI”). The increase in AOCI was driven by net unrealized gains on AFS securities, and higher valuation of interest rate cash flow hedges. Refer to page 165 for information on changes in stockholders' equity, and Capital actions on page 99, Note 24 for additional information on AOCI.

58 JPMorgan Chase & Co./2020 Form 10-K Consolidated cash flows analysis The following is a discussion of cash flow activities during the years ended December 31, 2020 and 2019. Refer to Consolidated cash flows analysis on page 54 of the Firm's 2019 Form 10-K for a discussion of the 2018 activities.

(in millions)	Year ended December 31, 2020	2019	2018
Net cash provided by/(used in) Operating activities	(a) \$ (79,910)	\$ 4,092	\$ 15,614
Investing activities	(a) (261,912)	(52,059)	(199,420)
Financing activities	596,645	32,987	34,158
Effect of exchange rate changes on cash	9,155	(182)	(2,863)
Net increase/(decrease) in cash and due from banks and deposits with banks	\$ 263,978	\$ (15,162)	\$ (152,511)

(a) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans and other assets. Prior-period amounts have been revised to conform with the current presentation. Operating activities JPMorgan Chase's operating assets and liabilities primarily support the Firm's lending and capital markets activities. These assets and liabilities can vary significantly in the normal course of business due to the amount and timing of cash flows, which are affected by client-driven and risk management activities and market conditions. The Firm believes that cash flows from operations, available cash and other liquidity sources, and its capacity to generate cash through secured and unsecured sources, are sufficient to meet its operating liquidity needs. In 2020, cash used primarily reflected higher trading assets, other assets, and securities borrowed, partially offset by higher trading liabilities and net income excluding noncash adjustments. In 2019, cash provided primarily reflected net income excluding noncash adjustments, lower trading assets, and net proceeds of sales, securitizations, and paydowns of loans held-for-sale, partially offset by higher securities borrowed, an increase in other assets and a decrease in trading liabilities. Investing activities The Firm's investing activities predominantly include originating held-for-investment loans and investing in the investment securities portfolio, and other short-term instruments. In 2020, cash used primarily reflected net purchases of investment securities, higher net originations of loans, and higher securities purchased under resale agreements. In 2019, cash used reflected net purchases of investment securities, partially offset by lower securities purchased under resale agreements, and net proceeds from sales and securitizations of loans held-for-investment. Financing activities The Firm's financing activities include acquiring customer deposits and issuing long-term debt, as well as preferred stock. In 2020, cash provided reflected higher deposits and an increase in securities loaned or sold under repurchase agreements, partially offset by net payments of long-term borrowings. In 2019, cash provided reflected higher deposits, partially offset by a decrease in short-term borrowings and net payments of long-term borrowings. For both periods, cash was used for repurchases of common stock and cash dividends on common and preferred stock. On March 15, 2020, in response to the economic disruptions caused by the COVID-19 pandemic, the Firm temporarily suspended repurchases of its common stock. Subsequently, the Federal Reserve directed all large banks, including the Firm, to discontinue net share repurchases through the end of 2020. *** Refer to Consolidated Balance Sheets Analysis on pages 57-58, Capital Risk Management on pages 91-101, and Liquidity Risk Management on pages 102–108 for a further discussion of the activities affecting the Firm's cash flows.

JPMorgan Chase & Co./2020 Form 10-K 59 Management's discussion and analysis OFF-BALANCE SHEET ARRANGEMENTS AND CONTRACTUAL CASH OBLIGATIONS In the normal course of business, the Firm enters into various off-balance sheet arrangements and contractual obligations that may require future cash payments. Certain obligations are recognized on-balance sheet, while others are disclosed as off-balance sheet under accounting principles generally accepted in the U.S. (“U.S. GAAP”). Special-purpose entities The Firm has several types of off-balance sheet arrangements, including through nonconsolidated special-purpose entities (“SPEs”), which are a type of VIE, and through lending-related financial instruments (e.g., commitments and guarantees). The Firm holds capital, as appropriate, against all SPE-related transactions and related exposures, such as derivative contracts and lending-related commitments and guarantees. The

Firm has no commitments to issue its own stock to support any SPE transaction, and its policies require that transactions with SPEs be conducted at arm's length and reflect market pricing. Consistent with this policy, no JPMorgan Chase employee is permitted to invest in SPEs with which the Firm is involved where such investment would violate the Firm's Code of Conduct. The table below provides an index of where in this 2020 Form 10-K discussions of the Firm's various off-balance sheet arrangements can be found. Refer to Note 1 for additional information about the Firm's consolidation policies.

Type of off-balance sheet arrangement	Location of disclosure	Page references				
Special-purpose entities: variable interests and other obligations, including contingent obligations, arising from variable interests in nonconsolidated VIEs	Refer to Note 14	253-260				
Off-balance sheet lending-related financial instruments, guarantees, and other commitments	Refer to Note 28	283-288				
Contractual cash obligations	The accompanying table summarizes, by remaining maturity, JPMorgan Chase's significant contractual cash obligations at December 31, 2020. The contractual cash obligations included in the table below reflect the minimum contractual obligation under legally enforceable contracts with terms that are both fixed and determinable. Excluded from the table are certain liabilities with variable cash flows and/or no obligation to return a stated amount of principal at maturity. The carrying amount of on-balance sheet obligations on the Consolidated balance sheets may differ from the minimum contractual amount of the obligations reported below. Refer to Note 28 for a discussion of mortgage repurchase liabilities and other obligations.	Contractual cash obligations By remaining maturity at December 31, (in millions)				
Deposits (a)	\$ 2,134,256	\$ 4,321	\$ 2,931	\$ 1,637	\$ 2,143,145	\$ 1,558,040

Total contractual cash obligations	\$ 2,529,130	\$ 67,551	\$ 57,791	\$ 161,716	\$ 2,816,188	\$ 2,248,417

(a) Excludes structured notes on which the Firm is not obligated to return a stated amount of principal at the maturity of the notes, but is obligated to return an amount based on the performance of the structured notes. (b) Includes noncancelable operating leases for premises and equipment used primarily for business purposes. Excludes the benefit of noncancelable sublease rentals of \$593 million and \$846 million at December 31, 2020 and 2019, respectively. Refer to Note 18 for further information on operating leases. (c) Primarily includes dividends declared on preferred and common stock, deferred annuity contracts, pension and other postretirement employee benefit obligations, insurance liabilities and income taxes payable associated with the deemed repatriation under the TCJA. (d) Refer to unsettled resale and securities borrowed agreements in Note 28 for further information. (e) Includes accrued interest and future contractual interest obligations. Excludes interest related to structured notes for which the Firm's payment obligation is based on the performance of certain benchmarks.

JPMorgan Chase & Co./2020 Form 10-K 61 Management's discussion and analysis EXPLANATION AND RECONCILIATION OF THE FIRM'S USE OF NON-GAAP FINANCIAL MEASURES

Non-GAAP financial measures The Firm prepares its Consolidated Financial Statements in accordance with U.S. GAAP; these financial statements appear on pages 162-166. That presentation, which is referred to as "reported" basis, provides the reader with an understanding of the Firm's results that can be tracked consistently from year-to-year and enables a comparison of the Firm's performance with the U.S. GAAP financial statements of other companies. In addition to analyzing the Firm's results on a reported basis, management reviews Firmwide results, including the overhead ratio, on a "managed" basis; these Firmwide managed basis results are non-GAAP financial measures. The Firm also reviews the results of the LOBs on a managed basis. The Firm's definition of managed basis starts, in each case, with the reported U.S. GAAP results and includes certain reclassifications to present total net revenue for the Firm (and each of the reportable business segments) on an FTE basis. Accordingly, revenue from investments that receive tax credits and tax-exempt securities is presented in the managed results on a basis comparable to taxable investments and securities. These financial measures allow management to assess the comparability of revenue from year-to-year arising from both taxable and tax-exempt sources. The corresponding income tax impact

related to tax-exempt items is recorded within income tax expense. These adjustments have no impact on net income as reported by the Firm as a whole or by the LOBs. Management also uses certain non-GAAP financial measures at the Firm and business-segment level, because these other non-GAAP financial measures provide information to investors about the underlying operational performance and trends of the Firm or of the particular business segment, as the case may be, and, therefore, facilitate a comparison of the Firm or the business segment with the performance of its relevant competitors. Refer to Business Segment Results on pages 65–84 for additional information on these non-GAAP measures. Non-GAAP financial measures used by the Firm may not be comparable to similarly named non-GAAP financial measures used by other companies. The following summary table provides a reconciliation from the Firm’s reported U.S. GAAP results to managed basis.

2020	2019	2018	Year ended December 31, (in millions, except ratios)
Reported Fully taxable-equivalent adjustments (b) Managed basis	Reported Fully taxable-equivalent adjustments (b) Managed basis	Reported Fully taxable-equivalent adjustments (b) Managed basis	Other income \$ 4,457

(a) In the second quarter of 2020, the Firm reclassified certain spend-based credit card reward costs from marketing expense to be a reduction of card income, with no effect on net income. Prior-period amounts have been revised to conform with the current presentation. (b) Predominantly recognized in CIB, CB and Corporate. 62 JPMorgan Chase & Co./2020 Form 10-K Net interest income and net yield excluding CIB Markets In addition to reviewing net interest income and the net yield on a managed basis, management also reviews these metrics excluding CIB Markets, as shown below; these metrics, which exclude CIB Markets, are non-GAAP financial measures. Management reviews these metrics to assess the performance of the Firm’s lending, investing (including asset-liability management) and deposit-raising activities. The resulting metrics that exclude CIB Markets are referred to as non-markets-related net interest income and net yield. CIB Markets consists of Fixed Income Markets and Equity Markets. Management believes that disclosure of non-markets-related net interest income and net yield provides investors and analysts with other measures by which to analyze the non-markets-related business trends of the Firm and provides a comparable measure to other financial institutions that are primarily focused on lending, investing and deposit-raising activities. Year ended December 31, (in millions, except rates)

2020	2019	2018	Net interest income – reported
\$ 54,563	\$ 57,245	\$ 55,059	Fully taxable-equivalent adjustments
418	531	628	Net interest income – managed basis (a)
\$ 54,981	\$ 57,776	\$ 55,687	Less: CIB Markets net interest income (b)
8,374	3,120	3,087	Net interest income excluding CIB Markets (a)

1.11	0.46	0.52	Net yield on average interest-earning assets excluding CIB Markets
2.30	% 3.27	% 3.25	(a) Interest includes the effect of related hedges. Taxable-equivalent amounts are used where applicable. (b) Refer to pages 74-75 for further information on CIB Markets. (c) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans. Prior-period amounts have been revised to conform with the current presentation. Calculation of certain U.S. GAAP and non-GAAP financial measures

Certain U.S. GAAP and non-GAAP financial measures are calculated as follows: Book value per share (“BVPS”) Common stockholders’ equity at period-end / Common shares at period-end Overhead ratio Total noninterest expense / Total net revenue Pre-provision profit Total net revenue – Total noninterest expense Return on assets (“ROA”) Reported net income / Total average assets Return on common equity (“ROE”) Net income* / Average common stockholders’ equity Return on tangible common equity (“ROTCE”) Net income* / Average tangible common equity Tangible book value per share (“TBVPS”) Tangible common equity at period-end / Common shares at period-end * Represents net

income applicable to common equity. In addition, the Firm reviews other non-GAAP financial measures which include: Adjusted expense, which is noninterest expense excluding Firmwide legal expense; Allowance for loan losses to period-end loans retained excluding trade finance and conduits; Pre-provision profit, which represents total net revenue less total noninterest expense. Management believes that these measures help investors understand the effect of these items on reported results and provide an alternate presentation of the Firm's performance.

JPMorgan Chase & Co./2020 Form 10-K 63 Management's discussion and analysis Tangible common equity, ROTCE and TBVPS Tangible common equity (TCE), ROTCE and TBVPS are each non-GAAP financial measures. TCE represents the Firm's common stockholders' equity (i.e., total stockholders' equity less preferred stock) less goodwill and identifiable intangible assets (other than MSRs), net of related deferred tax liabilities. ROTCE measures the Firm's net income applicable to common equity as a percentage of average TCE. TBVPS represents the Firm's TCE at period-end divided by common shares at period-end. TCE, ROTCE and TBVPS are utilized by the Firm, as well as investors and analysts, in assessing the Firm's use of equity. The following summary table provides a reconciliation from the Firm's common stockholders' equity to TCE.

Period-end	Average	Dec 31, 2020	Dec 31, 2019	Year ended December 31, (in millions, except per share and ratio data)
2020	2019	2018	Common stockholders' equity	\$ 249,291; \$ 234,337; \$ 236,865; \$ 232,907; \$ 229,222; Less: Goodwill 49,248; 47,823; 47,820; 47,620; 47,491; Less: Other intangible assets 904; 819; 781; 789; 807; Add: Certain deferred tax liabilities (a) 2,453; 2,381; 2,399; 2,328; 2,231; Tangible common equity \$ 201,592; \$ 188,076; \$ 190,663; \$ 186,826; \$ 183,155; Return on tangible common equity NA NA 14; % 19; % 17; % Tangible book value per share \$ 66.11; \$ 60.98; NA NA NA (a) Represents deferred tax liabilities related to tax-deductible goodwill and to identifiable intangibles created in nontaxable transactions, which are netted against goodwill and other intangibles when calculating TCE.

64 JPMorgan Chase & Co./2020 Form 10-K BUSINESS SEGMENT RESULTS The Firm is managed on an LOB basis. There are four major reportable business segments: Consumer & Community Banking, Corporate & Investment Bank, Commercial Banking and Asset & Wealth Management. In addition, there is a Corporate segment. The business segments are determined based on the products and services provided, or the type of customer served, and they reflect the manner in which financial information is currently evaluated by the Firm's Operating Committee. Segment results are presented on a managed basis. Refer to Explanation and Reconciliation of the Firm's use of Non-GAAP Financial Measures, on pages 62-64 for a definition of managed basis.

JPMorgan Chase Consumer Businesses Wholesale Businesses Consumer & Community Banking Corporate & Investment Bank Commercial Banking Asset & Wealth Management Consumer & Business Banking Home Lending Card & Auto Banking Markets & Securities Services; Middle Market Banking; Asset Management; Consumer Banking; J.P. Morgan Wealth Management; Business Banking; Home Lending Production; Home Lending Servicing; Real Estate Portfolios; Credit Card; Auto; Investment Banking; Wholesale Payments; Lending; Fixed Income Markets; Corporate Client Banking; Wealth Management; Equity Markets; Securities Services; Credit Adjustments & Other; Commercial Real Estate Banking Business segment changes In the fourth quarter of 2020, the Firm transferred certain assets, liabilities, revenue, expense and headcount associated with certain wealth management clients from AWM to the J.P. Morgan Wealth Management business unit within CCB. Prior-period amounts have been revised to conform with the current presentation, including the transfer of approximately 1,650 technology and support staff during the second and third quarters of 2020. Ultra-high-net-worth and certain high-net-worth client relationships remained in AWM. In the first quarter of 2020, the Firm began reporting a Wholesale Payments business unit within CIB following a realignment of the Firm's wholesale payments businesses. The Wholesale Payments business comprises: Merchant Services, which was realigned from CCB to CIB; Treasury Services and Trade Finance in CIB. Trade Finance was previously reported in Lending in CIB. In connection with the alignment of Wholesale Payments, the assets, liabilities and headcount associated with the Merchant Services business were realigned to CIB from CCB, and the revenue and expenses of the Merchant Services business are reported across CCB, CIB and CB based primarily on client relationships. In the fourth quarter of 2020, payment processing-only clients along with the associated revenue and expenses were realigned to CIB's Wholesale Payments business from CCB and CB. Payment processing-only clients are those that only use payment services offered by Merchant Services, and in general do not currently utilize other services offered by the Firm. Prior-period amounts have been revised to reflect this realignment and revised allocation methodology. Description of business segment reporting methodology Results of the business segments are intended to present each segment as if it were a stand-alone business. The management reporting process that derives business segment results includes the allocation of certain income and expense items. The Firm also assesses the level of capital required for each LOB on at least an annual basis. The Firm periodically assesses the assumptions, methodologies and reporting classifications used for segment reporting, and further refinements may be implemented in

future periods. Revenue sharing When business segments join efforts to sell products and services to the Firm's clients, the participating business segments may agree to share revenue from those transactions. Revenue is generally recognized in the segment responsible for the related product or service, with allocations to the other segment(s) involved in the transaction. The segment results reflect these revenue-sharing agreements. Expense Allocation Where business segments use services provided by corporate support units, or another business segment, the costs of those services are allocated to the respective business segments. The expense is generally allocated based on the actual cost and use of services provided. In contrast, certain costs and investments related to corporate support units, technology and operations not currently utilized by any LOB, are not JPMorgan Chase & Co./2020 Form 10-K 65 Management discussion and analysis allocated to the business segments and are retained in Corporate. Expense retained in Corporate generally includes parent company costs that would not be incurred if the segments were stand-alone businesses; and other items not aligned with a particular business segment. Funds transfer pricing Funds transfer pricing is the process by which the Firm allocates interest income and expense to each business segment and transfers the primary interest rate risk and liquidity risk exposures to Treasury and CIO within Corporate. The funds transfer pricing process considers the interest rate risk, liquidity risk and regulatory requirements on a product-by-product basis within each business segment. Debt expense and preferred stock dividend allocation As part of the funds transfer pricing process, almost all of the cost of the credit spread component of outstanding unsecured long-term debt and preferred stock dividends is allocated to the reportable business segments, while the balance of the cost is retained in Corporate. The methodology to allocate the cost of unsecured long-term debt and preferred stock dividends to the business segments is aligned with the Firm's process to allocate capital. The allocated cost of unsecured long-term debt is included in a business segment's net interest income, and net income is reduced by preferred stock dividends to arrive at a business segment's net income applicable to common equity. Business segment capital allocation The amount of capital assigned to each business is referred to as equity. As of January 1, 2021, the Firm has changed its line of business capital allocations primarily as a result of changes in exposures for each LOB and an increase in the relative risk weighting toward Standardized RWA. The assumptions and methodologies used to allocate capital are periodically assessed and as a result, the capital allocated to the LOBs may change from time to time. Refer to Line of business equity on page 98 for additional information on business segment capital allocation. Segment Results Managed Basis The following tables summarize the Firm's results by segment for the periods indicated. In the fourth quarter of 2020, payment processing-only clients along with the associated revenue and expenses were realigned to CIB's Wholesale Payments business from CCB and CB. Prior-period amounts have been revised to conform with the current presentation. In the fourth quarter of 2020, the Firm realigned certain wealth management clients from AWM to CCB. Prior-period amounts have been revised to conform with the current presentation, including an increase to net revenue of \$725 million and \$649 million for the years ended December 31, 2019 and 2018, respectively. Ultra-high-net-worth and certain high-net-worth client relationships remained in AWM. (a) In the first quarter of 2020, the Firm reclassified certain fees from asset management, administration and commissions to lending- and deposit-related fees. Prior-period amounts have been revised to conform with the current presentation. (b) In the second quarter of 2020, the Firm reclassified certain spend-based credit card reward costs from marketing expense to be a reduction of card income, with no effect on net income. Prior-period amounts have been revised to conform with the current presentation. (c) Included depreciation expense on leased assets of \$4.2 billion, \$4.0 billion and \$3.4 billion for the years ended December 31, 2020, 2019 and 2018, respectively. (d) Included MSR risk management results of \$(18) million, \$(165) million and \$(111) million for the years ended December 31, 2020, 2019 and 2018, respectively. JPMorgan Chase & Co./2020 Form 10-K 67 Management's discussion and analysis 2020 compared with 2019 Net income was \$8.2 billion, a decrease of 50%, largely driven by an increase in the provision for credit losses. Net revenue was \$51.3 billion, a decrease of 7%. Net interest income was \$33.5 billion, down 10%, driven by: the impact of deposit margin compression in CBB, spread compression and lower loans in Home Lending, predominantly due to paydowns and prior year loan sales, and lower loans in Card due to the decline in sales volume as a result of the COVID-19 pandemic, partially offset by growth in deposits in CBB, and loan margin expansion in Card, the prior year included charges for the unwind of the internal funding from Treasury and CIO associated with the sales of certain mortgage loans. Noninterest revenue was \$17.7 billion, flat, reflecting: lower deposit-related fees due to lower transaction activity and the impact of fee refunds related to the COVID-19 pandemic; lower card income due to lower net interchange income reflecting lower credit card sales volumes and debit card transactions as a result of the impact of the COVID-19 pandemic, largely offset by lower acquisition costs and higher annual fees, and lower asset management, administration and commissions due to a lower volume of annuity sales offset by a higher level of investment assets, offset by higher net mortgage production revenue reflecting higher mortgage production volumes and margins; the prior year included gains on the sales of certain mortgage loans. Refer to Note 15 for further information regarding changes in the value of the MSR asset and related hedges, and mortgage fees and related income. Noninterest expense was \$28.0 billion, relatively flat, reflecting: lower marketing expense as a result of lower investments in marketing campaigns and lower travel-related benefits, and lower structural expenses, offset by investments in the business, higher volume-related compensation, and higher depreciation on auto lease assets. The provision for credit losses was \$12.3 billion, an increase of \$7.4 billion from the prior year, driven by: additions to the allowance for credit losses as a result of the impact of the COVID-19 pandemic, consisting of: \$6.6 billion for Card, \$649 million for CBB, and \$560 million for Auto, partially offset by lower net charge-offs largely in Card, reflecting lower charge-offs and higher recoveries primarily benefiting from payment assistance and government stimulus. The prior year included a \$300 million net reduction in the allowance for credit losses. Refer to Credit and Investment Risk Management on pages 110-134 and Allowance for Credit Losses on pages 132-133 for further discussions of the credit portfolios and the allowance for credit losses. 68 JPMorgan Chase & Co./2020 Form 10-K Selected metrics As of or for the year ended December 31, (in millions, except headcount) 2020 2019 2018 Selected balance sheet data (period-end) Total assets \$ 496,705; \$ 541,367; \$ 560,177; Loans: Consumer & Business Banking 48,810; (d) 29,585; 28,450; Home Lending (a)(b) 182,121; 213,445; 247,721; Card 144,216; 168,924; 156,632; Auto 66,432; 61,522; 63,573; Total loans 441,579; 473,476; 496,376; Deposits 958,706; 723,418; 684,124; Equity 52,000; 52,000; 51,000; Selected balance sheet data (average) Total assets \$ 501,584; \$ 543,127; \$ 548,637; Loans: Consumer & Business Banking 43,064; 28,859; 27,890; Home Lending (a)(c)

In the fourth quarter of 2020, payment processing-only clients along with the associated revenue and expenses were realigned to CIB’s Wholesale Payments business from CCB and CB. Prior-period amounts have been revised to conform with the current presentation, including a decrease to period-end assets of \$6.6 billion and \$6.2 billion and headcount of 4,022 and 4,092, as of December 31, 2019 and 2018, respectively. In the fourth quarter of 2020, the Firm realigned certain wealth management clients from AWM to CCB. Prior-period amounts have been revised to conform with the current presentation, including an increase to headcount of 2,641 and 2,400 as of December 31, 2019 and 2018, respectively. (a) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans. Prior-period amounts have been revised to conform with the current presentation. (b) At December 31, 2020, 2019 and 2018, Home Lending loans held-for-sale and loans at fair value were \$9.7 billion, \$16.6 billion and \$7.9 billion, respectively. (c) Average Home Lending loans held-for sale and loans at fair value were \$11.1 billion, \$14.1 billion and \$9.0 billion, respectively, for the years ended December 31, 2020, 2019 and 2018. (d) At December 31, 2020 included \$19.2 billion of loans in Business Banking under the PPP. Refer to Credit Portfolio on pages 112-113 for a further discussion of the PPP. Selected metrics As of or for the year ended December 31, (in millions, except ratio data) 2020 2019 2018 Credit data and quality statistics Nonaccrual loans (a)(b)(c) \$ 5,675 (f) \$ 3,027 \$ 3,349 Net charge-offs/(recoveries) Consumer & Business Banking 263 298 246 Home Lending (169) (98) (294) Card 4,286 4,848 4,518 Auto 123 206 243 Total net charge-offs/(recoveries) \$ 4,503 \$ 5,254 \$ 4,713 Net charge-off/(recovery) rate Consumer & Business Banking 0.61 % (g) 1.03 % 0.88 % Home Lending (0.09) (0.05) (0.12) Card 2.93 3.10 3.10 Auto 0.20 0.33 0.38 Total net charge-off/(recovery) rate 1.03 % 1.13 % 0.98 % 30+ day delinquency rate Home Lending (d)(e) 1.15 % (h) 1.58 % 1.63 % Card 1.68 (h) 1.87 1.83 Auto 0.69 (h) 0.94 0.93 90+ day delinquency rate - Card 0.92 % (h) 0.95 % 0.92 % Allowance for loan losses Consumer & Business Banking \$ 1,372 \$ 750 \$ 796 Home Lending 1,813 1,890 2,791 Card 17,800 5,683 5,184 Auto 1,042 465 464 Total allowance for loan losses \$ 22,027 \$ 8,788 \$ 9,235 Effective January 1, 2020, the Firm adopted the CECL accounting guidance. The adoption resulted in a change in the accounting for PCI loans, which are considered purchased credit deteriorated (“PCD”) loans under CECL. Refer to Note 1 for further information. In the fourth quarter of 2020, the Firm realigned certain wealth management clients from AWM to CCB. Prior-period amounts have been revised to conform with the current presentation. (a) At December 31, 2020, nonaccrual loans included \$1.6 billion of PCD loans. Prior to the adoption of CECL, nonaccrual loans excluded PCI loans as the Firm recognized interest income on each pool of PCI loans as each of the pools was performing. (b) At December 31, 2020, 2019 and 2018, nonaccrual loans excluded mortgage loans 90 or more days past due and insured by U.S. government agencies of \$558 million, \$963 million and \$2.6 billion, respectively. These amounts have been excluded based upon the government guarantee. Prior-period amounts of mortgage loans 90 or more days past due and insured by U.S. government agencies excluded from nonaccrual loans have been revised to conform with the current presentation; refer to footnote (c) for additional information. (c) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans. Prior-period amounts have been revised to conform with the current presentation. (d) At December 31, 2020, the 30+ day delinquency rates included PCD loans. The rates prior to January 1, 2020 were revised to include the impact of PCI loans. (e) At December 31, 2020, 2019 and 2018, excluded mortgage loans insured by U.S. government agencies of \$744 million, \$1.7 billion and \$4.1 billion, respectively, that are 30 or more days past due. These amounts have been excluded based upon the government guarantee. Prior-period amounts of mortgage loans 30 or more days past due and insured by U.S. government agencies excluded from 30+ day delinquency rate have been revised to conform with the current presentation; refer to footnote (c) for additional information. JPMorgan Chase & Co./2020 Form 10-K 69 Management’s discussion and analysis (f) Generally excludes loans under payment deferral programs offered in response to the COVID-19 pandemic. Refer to Consumer Credit Portfolio on pages 114-116 for further information on consumer payment assistance activity. Includes loans to customers that have exited COVID-19 payment deferral programs and are 90 or more days past due, predominantly all of which were also at least 150 days past due and therefore considered collateral-dependent. Collateral-dependent loans are charged down to the lower of amortized cost or fair value of the underlying collateral less costs to sell. (g) At December 31, 2020, included \$19.2 billion of loans in Business Banking under the PPP. Given that PPP loans are guaranteed by the SBA, the Firm does not expect to realize material credit losses on these loans. Refer to Credit Portfolio on pages 112-113 for a further discussion of the PPP. (h) At December 31, 2020, the principal balance of loans in Home Lending, Card and Auto under

payment deferral programs offered in response to the COVID-19 pandemic were \$9.1 billion, \$264 million and \$376 million, respectively. Loans that are performing according to their modified terms are generally not considered delinquent. Refer to Consumer Credit Portfolio on pages 114-116 for further information on consumer payment assistance activity.

In the fourth quarter of 2020, payment processing-only clients along with the associated revenue and expenses were realigned to CIB’s Wholesale Payments business from CCB and CB. Prior-period amounts have been revised to conform with the current presentation. (a) In the first quarter of 2020, the Firm reclassified certain fees from asset

management, administration and commissions to lending- and deposit-related fees. Prior-period amounts have been revised to conform with the current presentation. (b) Includes tax-equivalent adjustments, predominantly due to income tax credits related to alternative energy investments; income tax credits and amortization of the cost of investments in affordable housing projects; and tax-exempt income from municipal bonds of \$2.8 billion, \$2.3 billion and \$1.7 billion for the years ended December 31, 2020, 2019 and 2018, respectively. Selected income statement data Year ended December 31, (in millions, except ratios) 2020 2019 2018 Financial ratios Return on equity 20 % 14 % 16 % Overhead ratio 48 % 57 % 59 % Compensation expense as percentage of total net revenue 24 % 28 % 29 % Revenue by business Investment Banking \$ 8,871 \$ 7,215 \$ 6,987; Wholesale Payments 5,560 5,842 5,930; Lending 1,146 1,021 999; Total Banking 15,577 14,078 13,916; Fixed Income Markets 20,878 14,418 12,706; Equity Markets 8,605 6,494 6,888; Securities Services 4,253 4,154 4,245; Credit Adjustments & Other (a) (29) 121 (373) Total Markets & Securities Services 33,707 25,187 23,466; Total net revenue \$ 49,284 \$ 39,265 \$ 37,382; In the first quarter of 2020, the Merchant Services business was realigned from CCB to CIB as part of the Firm's Wholesale Payments business. In the fourth quarter of 2020, payment processing-only clients along with the associated revenue and expenses were realigned to CIB's Wholesale Payments business from CCB and CB. Prior-period amounts have been revised to conform with the current presentation. (a) Includes credit valuation adjustments (CVA) managed centrally within CIB and funding valuation adjustments (FVA) on derivatives and certain components of fair value option elected liabilities, which are primarily reported in principal transactions revenue. Results are presented net of associated hedging activities and net of CVA and FVA amounts allocated to Fixed Income Markets and Equity Markets. Refer to Notes 2, 3 and 24 for additional information. JPMorgan Chase & Co./2020 Form 10-K 71 Management's discussion and analysis 2020 compared with 2019 Net income was \$17.1 billion, up 43%. Net revenue was \$49.3 billion, up 26%. Banking revenue was \$15.6 billion, up 11%. Investment Banking revenue was \$8.9 billion, up 23%, driven by higher Investment Banking fees, up 25%, reflecting higher equity and debt underwriting fees. The Firm maintained its #1 ranking for Global Investment Banking fees with overall share gains, according to Dealogic. Equity underwriting fees were \$2.8 billion, up 66%, predominantly in follow-on offerings and convertible securities markets due to increased industry-wide fees. Debt underwriting fees were \$4.4 billion, up 23%, driven by increased industry-wide fees and wallet share gains in investment grade and high yield bonds. The increased activity resulted in part from clients seeking liquidity in the first half of the year as a result of the COVID-19 pandemic. Advisory fees of \$2.4 billion were flat, reflecting an increase in wallet share, despite a decrease in industry-wide fees. Wholesale Payments revenue was \$5.6 billion, down 5%, driven by deposit margin compression and a reporting reclassification for certain expenses which are now reported as a reduction of revenue in Merchant Services, largely offset by higher deposit balances. Lending revenue was \$1.1 billion, up 12%, predominantly driven by higher net interest income reflecting higher yields on new loans and higher loan balances, as well as higher loan commitment fees, largely offset by fair value losses on hedges of accrual loans. Markets & Securities Services revenue was \$33.7 billion, up 34%. Markets revenue was \$29.5 billion, up 41%. Fixed Income Markets revenue was \$20.9 billion, up 45%, driven by strong client activity across products primarily in Rates, Credit, Currencies & Emerging Markets, and Securitized Products. Equity Markets revenue was \$8.6 billion, up 33%, driven by strong client activity across products. Securities Services revenue was \$4.3 billion, up 2%, driven by deposit balance and fee growth largely offset by deposit margin compression. The provision for credit losses was \$2.7 billion, compared with \$277 million in the prior year. The increase was driven by net additions to the allowance for credit losses as a result of the impact of the COVID-19 pandemic across multiple industries. Noninterest expense was \$23.5 billion, up 5%, driven by higher volume- and revenue-related expense and legal expense. 72 JPMorgan Chase & Co./2020 Form 10-K Selected metrics As of or for the year ended December 31, (in millions, except headcount) 2020 2019 2018 Selected balance sheet data (period-end) Assets \$ 1,097,219 \$ 914,705 \$ 909,292; Loans: Loans retained (a) 133,296 121,733 129,389; Loans held-for-sale and loans at fair value (b)(c) 39,588 34,317 36,407; Total loans 172,884 156,050 165,796; Equity 80,000 80,000 70,000; Selected balance sheet data (average) Assets \$ 1,122,939 \$ 993,508 \$ 930,126; Trading assets-debt and equity instruments (c) 422,237 376,182 321,280; Trading assets-derivative receivables 72,065 48,196 60,552; Loans: Loans retained (a) 135,676 122,371 114,417; Loans held-for-sale and loans at fair value (b)(c) 33,792 32,884 30,317; Total loans 169,468 155,255 144,734; Equity 80,000 80,000 70,000; Headcount 61,733 60,013 58,572; In the first quarter of 2020, the Merchant Services business was realigned from CCB to CIB as part of the Firm's Wholesale Payments business. In the fourth quarter of 2020, payment processing-only clients along with the associated revenue and expenses were realigned to CIB's Wholesale Payments business from CCB and CB. Prior-period amounts have been revised to conform with the current presentation, including an increase to period-end assets of \$6.6 billion and \$6.2 billion and headcount of 4,022 and 4,092, as of December 31, 2019 and 2018,

respectively. (a) Loans retained includes credit portfolio loans, loans held by consolidated Firm-administered multi-seller conduits, trade finance loans, mortgage-related secured lending, other held-for-investment loans and overdrafts (b) Loans held-for-sale and loans at fair value primarily reflect lending-related positions originated and purchased in CIB Markets, including loans held for securitization. (c) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans and other assets. Prior-period amounts have been revised to conform with the current presentation. Selected metrics As of or for the year ended December 31, (in millions, except ratios) 2020 2019 2018 Credit data and quality statistics Net charge-offs/(recoveries) \$ 370 \$ 183 \$ 93 Nonperforming assets: Nonaccrual loans: Nonaccrual loans retained (a) 1,008 308 443 Nonaccrual loans held-for-sale and loans at fair value (b)(c) 1,662 644 921 Total nonaccrual loans 2,670 952 1,364 Derivative receivables 56 30 60 Assets acquired in loan satisfactions 85 70 57 Total nonperforming assets 2,811 1,052 1,481 Allowance for credit losses: Allowance for loan losses 2,366 1,202 1,199 Allowance for lending-related commitments 1,534 848 754 Total allowance for credit losses 3,900 2,050 1,953 Net charge-off/(recovery) rate (d) 0.27 % 0.15 % 0.08 % Allowance for loan losses to period-end loans retained 1.77 0.99 0.93 Allowance for loan losses to period-end loans retained, excluding trade finance and conduits (e) 2.54 1.31 1.24 Allowance for loan losses to nonaccrual loans retained (a) 235 390 271 Nonaccrual loans to total period-end loans (b) 1.54 0.61 0.82 (a) Allowance for loan losses of \$278 million, \$110 million and \$174 million were held against these nonaccrual loans at December 31, 2020, 2019 and 2018, respectively. (b) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans. Prior-period amounts have been revised to conform with the current presentation. (c) At December 31, 2020, 2019 and 2018, nonaccrual loans excluded mortgage loans 90 or more days past due and insured by U.S. government agencies of \$316 million, \$127 million and \$155 million, respectively. These amounts have been excluded based upon the government guarantee. (d) Loans held-for-sale and loans at fair value were excluded when calculating the net charge-off/(recovery) rate. (e) Management uses allowance for loan losses to period-end loans retained, excluding trade finance and conduits, a non-GAAP financial measure, to provide a more meaningful assessment of CIB’s allowance coverage ratio.

(d) Long-term debt rankings include investment-grade, high-yield, supranationals, sovereigns, agencies, covered bonds, asset-backed securities (“ABS”) and mortgage-backed securities (“MBS”); and exclude money market, short-term debt, and U.S. municipal securities. (e) Global investment banking fees exclude money market, short-term debt and shelf securities. Markets revenue The following table summarizes select income statement data for the Markets businesses. Markets consists of Fixed Income Markets and Equity Markets. Markets revenue comprises principal transactions, fees, commissions and other income, as well as net interest income. The Firm assesses its Markets business performance on a total revenue basis, as offsets may occur across revenue line items. For example, securities that generate net interest income may be risk-managed by derivatives that are recorded in principal transactions revenue. Refer to Notes 6 and 7 for a description of the composition of these income statement line items. Principal transactions reflects revenue on financial instruments and commodities transactions that arise from client-driven market-making activity. Principal transactions revenue includes amounts recognized upon executing new transactions with market participants, as well as “inventory-related revenue”, which is revenue recognized from gains and losses on derivatives and other instruments that the Firm has been holding in anticipation of, or in response to, client demand, and changes in the fair value of instruments used by the Firm to actively manage the risk exposure arising from such inventory. Principal transactions revenue recognized upon executing new transactions with market participants is driven by many factors including the level of client activity, the bid-offer spread (which is the difference between the price at which a

market participant is willing and able to sell an instrument to the Firm; and the price at which another market participant is willing and able to buy it from the Firm, and vice versa), market liquidity and volatility. These factors are interrelated and sensitive to the same factors that drive inventory-related revenue, which include general market conditions, such as interest rates, foreign exchange rates, credit spreads, and equity and commodity prices; as well as other macroeconomic conditions. 74 JPMorgan Chase & Co./2020 Form 10-K For the periods presented below, the predominant source of principal transactions revenue was the amount recognized upon executing new transactions. 2020 2019 2018 Year ended December 31, (in millions, except where otherwise noted) Fixed Income Markets Equity Markets Total Markets Fixed Income Markets Equity Markets Total Markets Fixed Income Markets Equity Markets Total Markets Principal transactions \$ 11,857; \$ 6,087; \$ 17,944; \$ 8,786; \$ 5,739; \$ 14,525; \$ 7,560; \$ 5,566; \$ 13,126; Lending- and deposit-related fees 226; 10; 236; 198; 7; 205; 197; 6; 203; Asset management, administration and commissions 411; 2,087; 2,498; 407; 1,775; 2,182; 410; 1,794; 2,204; All other income 493; (62) 431; 872; 8; 880; 952; 22; 974; Noninterest revenue 12,987; 8,122; 21,109; 10,263; 7,529; 17,792; 9,119; 7,388; 16,507; Net interest income 7,891; 483; 8,374; 4,155; (1,035) 3,120; 3,587; (500) 3,087; Total net revenue \$ 20,878; \$ 8,605; \$ 29,483; \$ 14,418; \$ 6,494; \$ 20,912; \$ 12,706; \$ 6,888; \$ 19,594; Loss days (a) 4 1 5 (a) Loss days represent the number of days for which CIB Markets, which consists of Fixed Income Markets and Equity Markets, posted losses to total net revenue. The loss days determined under this measure differ from the measure used to determine backtesting gains and losses. Daily backtesting gains and losses include positions in the Firm's Risk Management value-at-risk (VaR) measure and exclude select components of total net revenue, which may more than offset backtesting gains or losses on a particular day. For more information on daily backtesting gains and losses, refer to the VaR discussion on pages 137; 139. Selected metrics As of or for the year ended December 31, (in millions, except where otherwise noted) 2020 2019 2018 Assets under custody (AUC) by asset class (period-end) (in billions): Fixed Income \$ 15,840; \$ 13,498; \$ 12,440; Equity 11,489; 10,100; 8,078; Other (a) 3,651; 3,233; 2,699; Total AUC \$ 30,980; \$ 26,831; \$ 23,217; Merchant processing volume (in billions) (b) \$ 1,597.3; \$ 1,511.5; \$ 1,366.1; Client deposits and other third party liabilities (average) (c) \$ 610,555; \$ 464,795; \$ 434,422; In the first quarter of 2020, the Merchant Services business was realigned from CCB to CIB as part of the Firm's Wholesale Payments business. In the fourth quarter of 2020, payment processing-only clients along with the associated revenue and expenses were realigned to CIB's Wholesale Payments business from CCB and CB. Prior-period amounts have been revised to conform with the current presentation. (a) Total net revenue and loans retained (excluding loans held-for-sale and loans at fair value) are based on the location of the trading desk, booking location, or domicile of the client, as applicable. (b) Client deposits and other third-party liabilities pertaining to the Wholesale Payments and Securities Services businesses, and AUC, are based on the domicile of the client. (c) Prior-period amounts have been revised to conform with the current presentation. 76 JPMorgan Chase & Co./2020 Form 10-K COMMERCIAL BANKING Commercial Banking provides comprehensive financial solutions,

including lending, wholesale payments, investment banking and asset management products across three primary client segments: Middle Market Banking, Corporate Client Banking and Commercial Real Estate Banking. Other includes amounts not aligned with a primary client segment. Middle Market Banking covers small and mid-sized companies, local governments and nonprofit clients. Corporate Client Banking covers large corporations. Commercial Real Estate Banking covers investors, developers, and owners of multifamily, office, retail, industrial and affordable housing properties.

Selected income statement data Year ended December 31, (in millions) 2020 2019 2018 Revenue Lending- and deposit-related fees (a) \$ 1,187 \$ 941 \$ 896 All other income (a) 1,880 1,769 1,724 Noninterest revenue 3,067 2,710 2,620 Net interest income 6,246 6,554 6,716 Total net revenue (b) 9,313 9,264 9,336 Provision for credit losses 2,113 296 129 Noninterest expense Compensation expense 1,854 1,785 1,694 Noncompensation expense 1,944 1,950 1,933 Total noninterest expense 3,798 3,735 3,627 Income before income tax expense 3,402 5,233 5,580 Income tax expense 824 1,275 1,316 Net income \$ 2,578 \$ 3,958 \$ 4,264 In the first quarter of 2020, the Merchant Services business was realigned from CCB to CIB as part of the Firm's Wholesale Payments business. In conjunction with this realignment, treasury services product revenue has been renamed wholesale payments. In the fourth quarter of 2020, payment processing-only clients along with the associated revenue and expenses were realigned to CIB's Wholesale Payments business from CCB and CB. Prior-period revenue and expense amounts have been revised to conform with the current presentation. (a) In the first quarter of 2020, the Firm reclassified certain fees from asset management, administration and commissions (which are included in all other income) to lending and deposit-related fees. Prior period amounts have been revised to conform with the current period presentation. (b) Total net revenue included tax-equivalent adjustments from income tax credits related to equity investments in designated community development entities and in entities established for rehabilitation of historic properties, as well as tax-exempt income related to municipal financing activities of \$351 million, \$460 million and \$444 million for the years ended December 31, 2020, 2019 and 2018, respectively. 2020 compared with 2019 Net income was \$2.6 billion, a decrease of 35%, driven by an increase in the provision for credit losses. Net revenue was \$9.3 billion, flat compared to the prior year. Net interest income was \$6.2 billion, a decrease of 5%, driven by deposit margin compression, predominantly offset by higher deposit balances and lending revenue. Noninterest revenue was \$3.1 billion, an increase of 13%, driven by higher deposit-related fees, particularly cash management fees, higher investment banking revenue, and a gain on a strategic investment. The increase was partially offset by a \$56 million markdown of a held-for-sale position and lower card income, primarily due to lower volumes as a result of the COVID-19 pandemic. Noninterest expense was \$3.8 billion, an increase of 2%, driven by higher compensation expense. The provision for credit losses was \$2.1 billion, compared to \$296 million in the prior year. The increase was driven by net additions to the allowance for credit losses as a result of the impact of the COVID-19 pandemic across multiple industries. JPMorgan Chase & Co./2020 Form 10-K 77 Management's discussion and analysis CB product revenue consists of the following: Lending includes a variety of financing alternatives, which are primarily provided on a secured basis; collateral includes receivables, inventory, equipment, real estate or other assets. Products include term loans, revolving lines of credit, bridge financing, asset-based structures, leases, and standby letters of credit. Wholesale payments includes revenue from a broad range of products and services that enable CB clients to manage payments and receipts, as well as invest and manage funds. Investment banking includes revenue from a range of products providing CB clients with sophisticated capital-raising alternatives, as well as balance sheet and risk management tools through advisory, equity underwriting, and loan syndications. Revenue from Fixed Income and Equity Markets products used by CB clients is also included. Other product revenue primarily includes tax-equivalent adjustments generated from Community Development Banking activities and certain income derived from principal transactions. Selected income statement data (continued) Year ended December 31, (in millions, except ratios) 2020 2019 2018 Revenue by product Lending \$ 4,396 \$ 4,057 \$ 4,049 Wholesale payments 3,715 4,200 4,351 Investment banking (a) 1,069 919 852 Other 133 88 84 Total Commercial Banking net revenue \$ 9,313 \$ 9,264 \$ 9,336 Investment banking revenue, gross (b) \$ 3,348 \$ 2,744 \$ 2,491 Revenue by client segment Middle Market Banking \$ 3,640 \$ 3,805 \$ 3,797 Corporate Client Banking 3,203 3,119 3,119 Commercial Real Estate Banking 2,313 2,169 2,251 Other 157 171 169 Total Commercial Banking net revenue \$ 9,313 \$ 9,264 \$ 9,336 Financial ratios Return on equity 11 % 17 % 20 % Overhead ratio 41 % 40 % 39 In the first quarter of 2020, the Merchant Services business was realigned from CCB to CIB as part of the Firm's Wholesale Payments business. Management’s discussion and analysis ASSET & WEALTH MANAGEMENT Asset & Wealth Management, with client assets of \$3.7 trillion, is a global leader in investment and wealth management. Asset Management Offers multi-asset investment management solutions across equities, fixed income, alternatives and money market funds to institutional and retail investors providing for a broad range of clients’ investment needs. Wealth Management Provides retirement products and services, brokerage, custody, trusts and estates, loans, mortgages, deposits and investment management to high net worth clients. The majority of AWM’s client assets are in actively managed portfolios. Selected income statement data Year ended December 31, (in millions, except ratios and headcount) 2020 2019 2018 Revenue Asset management, administration and commissions \$ 10,610 \$ 9,818 \$ 9,808 All other income 212 418 244 Noninterest revenue 10,822 10,236 10,052 Net interest income 3,418 3,355 3,375 Total net revenue 14,240 13,591 13,427 Provision for credit losses 263 59 52 Noninterest expense Compensation expense 4,959 5,028 4,888 Noncompensation expense 4,998 4,719 4,687 Total noninterest expense 9,957 9,747 9,575 Income before income tax expense 4,020 3,785 3,800 Income tax expense 1,028 918 855 Net income \$ 2,992 \$ 2,867 \$ 2,945 Revenue by line of business Asset Management \$ 7,654 \$ 7,254 \$ 7,163 Wealth Management 6,586 6,337 6,264 Total net revenue \$ 14,240 \$ 13,591 \$ 13,427 Financial ratios Return on common equity 28 % 26 % 32 % Overhead ratio 70 72 71 Pre-tax margin ratio: Asset Management 29 26 26 Wealth Management 27 30 30 Asset & Wealth Management 28 28 28 In the fourth quarter of 2020, the Firm realigned certain wealth management clients from AWM to CCB. Prior-period amounts have been revised to conform with the current presentation, including a decrease to net revenue of \$725 million and \$649 million for the years ended December 31, 2019 and 2018, respectively. Effective in the first quarter of 2021, the Wealth Management business was renamed Global Private Bank. 2020 compared with 2019 Net income was \$3.0 billion, an increase of 4%. Net revenue was \$14.2 billion, an increase of 5%. Net interest income was \$3.4 billion, up 2%, driven by higher deposit and loan balances as well as loan margin expansion, offset by deposit margin compression. Noninterest revenue was \$10.8 billion, up 6%, predominantly driven by higher asset management fees as a result of net inflows into liquidity and long term products,

higher performance fees and increased brokerage commissions on higher client-driven volume, partially offset by lower net investment valuation gains. Revenue from Asset Management was \$7.7 billion, up 6%, predominantly driven by higher asset management fees as a result of net inflows into liquidity products as well as higher performance fees, partially offset by lower net investment valuation gains. Revenue from Wealth Management was \$6.6 billion, up 4%, predominantly driven by higher deposit and loan balances, increased brokerage commissions and asset management fees, largely offset by deposit margin compression. The provision for credit losses was \$263 million, driven by additions to the allowance for credit losses, predominantly as a result of the impact of the COVID-19 pandemic. Noninterest expense was \$10.0 billion, an increase of 2%, driven by legal expense, volume- and revenue-related expense as well as investments in the business, partially offset by lower structural expense.

80 JPMorgan Chase & Co./2020 Form 10-K AWM's client segments consist of the following: Private Banking clients include high- and ultra-high-net-worth individuals, families, money managers and business owners. Institutional clients include both corporate and public institutions, endowments, foundations, nonprofit organizations and governments worldwide. Retail clients include financial intermediaries and individual investors. Asset Management has two high-level measures of its overall fund performance.

- **Percentage of mutual fund assets under management in funds rated 4- or 5-star:** Mutual fund rating services rank funds based on their risk-adjusted performance over various periods. A 5-star rating is the best rating and represents the top 10% of industry-wide ranked funds. A 4-star rating represents the next 22.5% of industry-wide ranked funds. A 3-star rating represents the next 35% of industry-wide ranked funds. A 2-star rating represents the next 22.5% of industry-wide ranked funds. A 1-star rating is the worst rating and represents the bottom 10% of industry-wide ranked funds. The overall Morningstar rating is derived from a weighted average of the performance associated with a fund's three-, five- and ten-year (if applicable) Morningstar Rating metrics. For U.S. domiciled funds, separate star ratings are given at the individual share class level. The Nomura star rating is based on three-year risk-adjusted performance only. Funds with fewer than three years of history are not rated and hence excluded from this analysis. All ratings, the assigned peer categories and the asset values used to derive this analysis are sourced from these fund rating providers mentioned in footnote (a). The data providers re-denominate the asset values into U.S. dollars. This % of AUM is based on star ratings at the share class level for U.S. domiciled funds, and at a primary share class level to represent the star rating of all other funds except for Japan where Nomura provides ratings at the fund level. The primary share class, as defined by Morningstar, denotes the share class recommended as being the best proxy for the portfolio and in most cases will be the most retail version (based upon annual management charge, minimum investment, currency and other factors). The performance data could have been different if all funds/accounts would have been included. Past performance is not indicative of future results.
- **Percentage of mutual fund assets under management in funds ranked in the 1st or 2nd quartile (one, three and five years):** All quartile rankings, the assigned peer categories and the asset values used to derive this analysis are sourced from the fund ranking providers mentioned in footnote (b). Quartile rankings are done on the net-of-fee absolute return of each fund. The data providers re-denominate the asset values into U.S. dollars. This % of AUM is based on fund performance and associated peer rankings at the share class level for U.S. domiciled funds and at the primary share class level or fund level for all other funds. The primary share class, as defined by Morningstar, denotes the share class recommended as being the best proxy for the portfolio and in most cases will be the most retail version (based upon annual management charge, minimum investment, currency and other factors). Where peer group rankings given for a fund are in more than one primary share class territory both rankings are included to reflect local market competitiveness. The performance data could have been different if all funds/accounts would have been included. Past performance is not indicative of future results.

(a) Regional revenue is based on the domicile of the client. (b) The prior period amounts have been revised to conform with the current period presentation. 82 JPMorgan Chase & Co./2020 Form 10-K

CORPORATE The Corporate segment consists of Treasury and Chief Investment Office and Other Corporate, which includes corporate staff functions and expense that is centrally managed. Treasury and CIO is predominantly responsible for measuring, monitoring, reporting and managing the Firm’s liquidity, funding, capital, structural interest rate and foreign exchange risks. The major Other Corporate functions include Real Estate, Technology, Legal, Corporate Finance, Human Resources, Internal Audit, Risk Management, Compliance, Control Management, Corporate Responsibility and various Other Corporate groups. Selected income statement and balance sheet data Year ended December 31, (in millions, except headcount) 2020 2019 2018 Revenue Principal transactions \$ 245; \$ (461); \$ (426) Investment securities gains/(losses) 795; 258; (395) All other income 159; 89; 558; Noninterest revenue 1,199; (114); (263) Net interest income (2,375); 1,325; 135; Total net revenue (a) (1,176); 1,211; (128) Provision for credit losses 66; (1); (4) Noninterest expense 1,373; 1,067; 902; Income/(loss) before income tax expense/(benefit) (2,615); 145; (1,026) Income tax expense/(benefit) (865); (966); 215; Net income/(loss) \$ (1,750); \$ 1,111; \$ (1,241) Total net revenue Treasury and CIO (1,368)

2,032; 510; Other Corporate 192; (821) (638) Total net revenue \$ (1,176) \$ 1,211; \$ (128) Net income/(loss) Treasury and CIO (1,403) 1,394; (69) Other Corporate (347) (283) (1,172) Total net income/(loss) \$ (1,750) \$ 1,111; \$ (1,241) Total assets (period-end) \$ 1,359,831; \$ 837,618; \$ 771,787; Loans (period-end) 1,657; 1,649; 1,597; Headcount 38,366; 38,033; 37,145; (a) Included tax-equivalent adjustments, driven by tax-exempt income from municipal bonds, of \$241 million, \$314 million and \$382 million for the years ended December 31, 2020, 2019 and 2018, respectively. 2020 compared with 2019 Net income was a loss of \$1.8 billion compared with income of \$1.1 billion in the prior year. Net revenue was a loss of \$1.2 billion, compared with revenue of \$1.2 billion in the prior year, driven by lower net interest income partially offset by higher noninterest revenue. The decrease in net interest income was predominantly driven by lower rates, including the impact of faster prepayments on mortgage-backed securities, as well as limited opportunities to deploy funds in response to significant deposit growth across the LOBs. Noninterest revenue increased reflecting higher net valuations on certain legacy equity investments and higher net investment securities gains due to the repositioning of the investment securities portfolio. Noninterest expense of \$1.4 billion was up \$305 million driven by an impairment on a legacy investment. The provision for credit losses relates to the HTM portfolio, which became subject to the CECL accounting guidance beginning on January 1, 2020. Refer to Note 10 and Note 13 for additional information on the investment securities portfolio and the allowance for credit losses. The current period income tax benefit was predominantly driven by a lower level of pre-tax income and changes in the level and mix of income and expenses subject to U.S. federal, and state and local taxes. The prior period included \$1.1 billion of tax benefits related to the resolution of certain tax audits. JPMorgan Chase & Co./2020 Form 10-K 83 Management's discussion and analysis Treasury and CIO overview Treasury and CIO is predominantly responsible for measuring, monitoring, reporting and managing the Firm's liquidity, funding, capital, structural interest rate and foreign exchange risks. The risks managed by Treasury and CIO arise from the activities undertaken by the Firm's four major reportable business segments to serve their respective client bases, which generate both on- and off-balance sheet assets and liabilities. Treasury and CIO seek to achieve the Firm's asset-liability management objectives generally by investing in high-quality securities that are managed for the longer-term as part of the Firm's investment securities portfolio. Treasury and CIO also use derivatives to meet the Firm's asset-liability management objectives. Refer to Note 5 for further information on derivatives. In addition, Treasury and CIO manage the Firm's cash position primarily through deposits at central banks and investments in short-term instruments. Refer to Liquidity Risk Management on pages 102;108 for further information on liquidity and funding risk. Refer to Market Risk Management on pages 135;142 for information on interest rate, foreign exchange and other risks. The investment securities portfolio primarily consists of U.S. GSE and government agency and nonagency mortgage-backed securities, U.S. and non-U.S. government securities, obligations of U.S. states and municipalities, other ABS and corporate debt securities. At December 31, 2020, the investment securities portfolio was \$587.9 billion, and the average credit rating of the securities comprising the portfolio was AA+ (based upon external ratings where available and, where not available, based primarily upon internal risk ratings). Refer to Note 10 for further information on the Firm's investment securities portfolio and internal risk ratings. Selected income statement and balance sheet data As of or for the year ended December 31, (in millions) 2020 2019 2018 Investment securities gains/(losses) \$ 795; \$ 258; \$ (395) Available-for-sale securities (average) \$ 413,367; \$ 283,205; \$ 203,449; Held-to-maturity securities (average) 94,569; 34,939; 31,747; Investment securities portfolio (average) \$ 507,936; \$ 318,144; \$ 235,196; Available-for-sale securities (period-end) \$ 386,065; \$ 348,876; \$ 228,681; Held-to-maturity securities, net of allowance for credit losses (period-end) (a)(b) 201,821; 47,540; 31,434; Investment securities portfolio, net of allowance for credit losses (period-end) (a) \$ 587,886; \$ 396,416; \$ 260,115; (a) At December 31, 2020, the allowance for credit losses on HTM securities was \$78 million. (b) During 2020, the Firm transferred \$164.2 billion of investment securities from AFS to HTM for capital management purposes. Refer to Note 10 for further information. 84 JPMorgan Chase & Co./2020 Form 10-K FIRMWIDE RISK MANAGEMENT Risk is an inherent part of JPMorgan Chase's business activities. When the Firm extends a consumer or wholesale loan, advises customers and clients on their investment decisions, makes markets in securities, or offers other products or services, the Firm takes on some degree of risk. The Firm's overall objective is to manage its businesses, and the associated risks, in a manner that balances serving the interests of its clients, customers and investors and protects the safety and soundness of the Firm. The Firm believes that effective risk management requires, among other things: Acceptance of responsibility, including identification and escalation of risks by all individuals within the Firm; Ownership of risk identification, assessment, data and management within each of the LOBs and Corporate; and Firmwide structures for risk governance. The Firm follows a disciplined and balanced compensation framework with strong internal governance and independent oversight by the Board of Directors (the Board). The impact of risk and control issues is carefully considered in the Firm's performance evaluation and incentive compensation processes. Risk governance and oversight framework The Firm's risk management governance and oversight framework involves understanding drivers of risks, types of

risks, and impacts of risks. Drivers of Risks are factors that cause a risk to exist. Drivers of risks include the economic environment, regulatory and government policy, competitor and market evolution, business decisions, process and judgment error, deliberate wrongdoing, dysfunctional markets, and natural disasters. Types of Risks are categories by which risks manifest themselves. Risks are generally categorized in the following four risk types: Strategic risk is the risk to earnings, capital, liquidity or reputation associated with poorly designed or failed business plans or inadequate response to changes in the operating environment; Credit and investment risk is the risk associated with the default or change in credit profile of a client, counterparty or customer; or loss of principal or a reduction in expected returns on investments, including consumer credit risk, wholesale credit risk, and investment portfolio risk; Market risk is the risk associated with the effect of changes in market factors, such as interest and foreign exchange rates, equity and commodity prices, credit spreads or implied volatilities, on the value of assets and liabilities held for both the short and long term; Operational risk is the risk associated with an adverse outcome resulting from inadequate or failed internal processes or systems; human factors; or external events impacting the Firm's processes or systems. It includes compliance, conduct, legal, and estimations and model risk. Impacts of Risks are consequences of risks, both quantitative and qualitative. There may be many consequences of risks manifesting, including quantitative impacts such as a reduction in earnings and capital, liquidity outflows, and fines or penalties, or qualitative impacts such as reputation damage, loss of clients and customers, and regulatory and enforcement actions. The Firm's risk governance and oversight framework is managed on a Firmwide basis. The Firm has an Independent Risk Management (IRM) function, which consists of the Risk Management and Compliance organizations. The Chief Executive Officer (CEO) appoints, subject to approval by the Risk Committee of the Board, the Firm's Chief Risk Officer (CRO) to lead the IRM organization and manage the risk governance structure of the Firm. The framework is subject to approval by the Board Risk Committee in the form of the Risk Governance and Oversight Policy. The Firm's CRO oversees and delegates authorities to LOB CROs, Firmwide Risk Executives (FREs), and the Firm's Chief Compliance Officer (CCO), who each establish Risk Management and Compliance organizations, set the Firm's risk governance policies and standards, and define and oversee the implementation of the Firm's risk governance. The LOB CROs are responsible for risks that arise in their LOBs, while FREs oversee risk areas that span across the individual LOBs, functions and regions. Three lines of defense The Firm relies upon each of its LOBs and Corporate areas giving rise to risk to operate within the parameters identified by the IRM function, and within its own management-identified risk and control standards. Each LOB and Treasury & CIO, including their aligned Operations, Technology and Control Management, are the Firm's first line of defense; and own the identification of risks, as well as the design and execution of controls to manage those risks. The first line of defense is responsible for adherence to applicable laws, rules and regulations and for the implementation of the risk management structure (which may include policy, standards, limits, thresholds and controls) established by IRM. JPMorgan Chase & Co./2020 Form 10-K 85 Management's discussion and analysis The IRM function is independent of the businesses and is the Firm's second line of defense. The IRM function independently assesses and challenges the first line of defense risk management practices. IRM is also responsible for its own adherence to applicable laws, rules and regulations and for the implementation of policies and standards established by IRM with respect to its own processes. Internal Audit is an independent function that provides objective assessment on the adequacy and effectiveness of Firmwide processes, controls, governance and risk management as the third line of defense. The Internal Audit Function is headed by the General Auditor, who reports to the Audit Committee and administratively to the CEO. In addition, there are other functions that contribute to the Firmwide control environment but are not considered part of a particular line of defense, including Finance, Human Resources and Legal. Risk identification and ownership Each LOB and Corporate area owns the ongoing identification of risks, as well as the design and execution of controls, inclusive of IRM-specified controls, to manage those risks. To support this activity, the Firm has a formal Risk Identification framework designed to facilitate their responsibility to identify material risks inherent to the Firm, catalog them in a central repository and review the most material risks on a regular basis. The IRM function reviews and challenges the LOB and Corporate's identified risks, maintains the central repository and provides the consolidated Firmwide results to the Firmwide Risk Committee (FRC) and Board Risk Committee. Risk appetite The Firm's overall appetite for risk is governed by a Risk Appetite framework. The framework and the Firm's risk appetite are set and approved by the Firm's CEO, Chief Financial Officer (CFO) and CRO. Quantitative parameters and qualitative factors are used to monitor and measure the Firm's capacity to take risk consistent with its stated risk appetite. Qualitative factors have been established to assess select operational risks, and impact to the Firm's reputation. Risk Appetite results are reported to the Board Risk Committee. 86 JPMorgan Chase & Co./2020 Form 10-K Risk governance and oversight structure The independent status of the IRM function is supported by a governance structure that provides for escalation of risk issues to senior management, the FRC, and the Board of Directors, as appropriate. The chart below illustrates the committees of the Board of Directors and key senior management-level committees in the Firm's risk governance structure. In

addition, there are other committees, forums and paths of escalation that support the oversight of risk which are not shown in the chart below or described in this Form 10-K. The Firm's Operating Committee, which consists of the Firm's CEO, CRO, CFO, General Counsel, CEOs of the LOBs and other senior executives, is accountable to and may refer matters to the Firm's Board of Directors. The Operating Committee is responsible for escalating to the Board the information necessary to facilitate the Board's exercise of its duties. Board oversight The Firm's Board of Directors provides oversight of risk. The Board Risk Committee is the principal committee that oversees risk matters. The Audit Committee oversees the control environment, and the Compensation & Management Development Committee oversees compensation and other management-related matters. Each committee of the Board oversees reputational risks and conduct risks within its scope of responsibility. The JPMorgan Chase Bank, N.A. Board of Directors is responsible for the oversight of management of the bank. The JPMorgan Chase Bank, N.A. Board accomplishes this function acting directly and through the principal standing committees of the Firm's Board of Directors. Risk and control oversight on behalf of JPMorgan Chase Bank N.A. is primarily the responsibility of the Risk Committee and the Audit Committee, respectively, and, with respect to compensation and other management-related matters, the Compensation & Management Development Committee. The Board Risk Committee assists the Board in its oversight of management's responsibility to implement a global risk management framework reasonably designed to identify, assess and manage the Firm's risks. The Board Risk Committee's responsibilities include approval of applicable primary risk policies and review of certain associated frameworks, analysis and reporting established by management. Breaches in risk appetite and parameters, issues that may have a material adverse impact on the Firm, including capital and liquidity issues, and other significant risk-related matters are escalated to the Board Risk Committee, as appropriate. The Audit Committee assists the Board in its oversight of management's responsibility to ensure that there is an effective system of controls reasonably designed to safeguard the Firm's assets and income, ensure the integrity of the Firm's financial statements, and maintain compliance with the Firm's ethical standards, policies, plans and procedures, and with laws and regulations. It also assists the Board in its oversight of the Firm's independent registered public accounting firm's qualifications, independence and performance, and of the performance of the Firm's Internal Audit function. JPMorgan Chase & Co./2020 Form 10-K 87 Management's discussion and analysis The Compensation & Management Development Committee (CMDC) assists the Board in its oversight of the Firm's compensation principles and practices. The CMDC reviews and approves the Firm's compensation and qualified benefits programs. The Committee reviews the performance of Operating Committee members against their goals, and approves their compensation awards. In addition, the CEO's award is subject to ratification by the independent directors of the Board. The CMDC also reviews the development of and succession for key executives, and provides oversight of the Firm's culture, including reviewing updates from management regarding significant conduct issues and any related employee actions, including compensation actions. The Public Responsibility Committee assists the Board in its oversight of the Firm's positions and practices on public responsibility matters such as community investment, fair lending, sustainability, consumer practices and other public policy issues that reflect the Firm's values and character and could impact the Firm's reputation among its stakeholders. The Committee also provides guidance on these matters to management and the Board, as appropriate. The Corporate Governance & Nominating Committee exercises general oversight with respect to the governance of the Board of Directors. It reviews the qualifications of and recommends to the Board of Directors proposed nominees for election to the Board. The Committee evaluates and recommends to the Board corporate governance practices applicable to the Firm. It also appraises the framework for assessing the Board's performance and self-evaluation. Management oversight The Firm's senior management-level committees that are primarily responsible for key risk-related functions include: The Firmwide Risk Committee (FRC) is the Firm's highest management-level risk committee. It provides oversight of the risks inherent in the Firm's businesses and serves as an escalation point for risk topics and issues raised by underlying committees and/or FRC members. The Firmwide Control Committee (FCC) is an escalation committee for senior management to review and discuss the Firmwide operational risk environment including identified issues, operational risk metrics and significant events that have been escalated. Line of Business and Regional Risk Committees are responsible for providing oversight of the governance, limits, and controls that are in place through the scope of their activities. These committees review the ways in which the particular LOB or the business operating in a particular region could be exposed to adverse outcomes with a focus on identifying, accepting, escalating and/or requiring remediation of matters brought to these committees. Line of Business and Corporate Function Control Committees oversee the operational risk and control environment of their respective business or function, inclusive of Operational Risk, Compliance and Conduct Risks. As part of that mandate, they are responsible for reviewing indicators of elevated or emerging risks and other data that may impact the level of operating risk in a business or function, addressing key operational risk issues, focusing on processes with control concerns and overseeing control remediation. The Asset and Liability Committee (ALCO) is responsible for overseeing the Firm's asset and liability management (ALM) activities and the management of liquidity risk, balance sheet, interest rate risk, and capital risk. The Firmwide Valuation Governance

Forum (VGF) is composed of senior finance and risk executives and is responsible for overseeing the management of risks arising from valuation activities conducted across the Firm. 88 JPMorgan Chase & Co./2020 Form 10-K Risk governance and oversight functions The Firm manages its risk through risk governance and oversight functions. The scope of a particular function may include one or more drivers, types and/or impacts of risk. For example, Country Risk Management oversees country risk which may be a driver of risk or an aggregation of exposures that could give rise to multiple risk types such as credit or market risk. The following sections discuss the risk governance and oversight functions in place to manage the risks inherent in the Firm's business activities. Risk governance and oversight functions Page Strategic Risk 90 Capital risk 91-101 Liquidity risk 102-108 Reputation risk 109 Consumer Credit Risk 114-120 Wholesale credit risk 121-131 Investment portfolio risk 134 Market risk 135-142 Country risk 143-144 Operational risk 145-151 Compliance Risk 148 Conduct risk 149 Legal risk 150 Estimations and Model risk 151 JPMorgan Chase & Co./2020 Form 10-K 89 Management's discussion and analysis STRATEGIC RISK MANAGEMENT Strategic risk is the risk to earnings, capital, liquidity or reputation associated with poorly designed or failed business plans or inadequate response to changes in the operating environment. Management and oversight The Operating Committee and the senior leadership of each LOB and Corporate are responsible for managing the Firm's most significant strategic risks. Strategic risks are overseen by IRM through participation in relevant business reviews, LOB and Corporate senior management meetings, risk and control committees and other relevant governance forums and ongoing discussions. The Board of Directors oversees management's strategic decisions, and the Board Risk Committee oversees IRM and the Firm's risk management framework. In the process of developing business plans and strategic initiatives, LOB and Corporate senior management identify the associated risks that are incorporated into the Firmwide Risk Identification process and monitored and assessed as part of the Firmwide Risk Appetite framework. In addition, IRM conducts a qualitative assessment of the LOB and Corporate strategic initiatives to assess their impact on the risk profile of the Firm. The Firm's strategic planning process, which includes the development and execution of strategic initiatives, is one component of managing the Firm's strategic risk. Guided by the Firm's How We Do Business Principles (the Principles), the Operating Committee and senior management teams in each LOB and Corporate review and update the strategic plan periodically. The process includes evaluating the high-level strategic framework and performance against prior-year initiatives, assessing the operating environment, refining existing strategies and developing new strategies. These strategic initiatives, along with IRM's assessment, are incorporated in the Firm's budget and provided to the Board for review. The Firm's balance sheet strategy, which focuses on risk-adjusted returns, strong capital and robust liquidity, is also a component in the management of strategic risk. Refer to Capital Risk Management on pages 91-101 for further information on capital risk. Refer to Liquidity Risk Management on pages 102-108 for further information on liquidity risk. Refer to Reputation Risk Management on page 109 for further information on reputation risk. 90 JPMorgan Chase & Co./2020 Form 10-K CAPITAL RISK MANAGEMENT Capital risk is the risk the Firm has an insufficient level or composition of capital to support the Firm's business activities and associated risks during normal economic environments and under stressed conditions. A strong capital position is essential to the Firm's business strategy and competitive position. Maintaining a strong balance sheet to manage through economic volatility is considered a strategic imperative of the Firm's Board of Directors, CEO and Operating Committee. The Firm's fortress balance sheet philosophy focuses on risk-adjusted returns, strong capital and robust liquidity. The Firm's capital risk management strategy focuses on maintaining long-term stability to enable the Firm to build and invest in market-leading businesses, including in highly stressed environments. Senior management considers the implications on the Firm's capital prior to making any significant decisions that could impact future business activities. In addition to considering the Firm's earnings outlook, senior management evaluates all sources and uses of capital with a view to ensuring the Firm's capital strength. Capital management oversight The Firm has a Capital Management Oversight function whose primary objective is to provide independent oversight of capital risk across the Firm. Capital Management Oversight's responsibilities include: Defining, monitoring and reporting capital risk metrics; Establishing, calibrating and monitoring capital risk limits and indicators, including capital risk appetite; Developing a process to classify, monitor and report capital limit breaches; and Performing an independent assessment of the Firm's capital management activities, including changes made to the Contingency Capital Plan described below. In addition, the Basel Independent Review function (BIR), which is a part of the IRM function, conducts independent assessments of the Firm's regulatory capital framework. These assessments are intended to ensure compliance with the applicable regulatory capital rules in support of senior management's responsibility for managing capital and for the Board Risk Committee's oversight of management in executing that responsibility. Capital management Treasury & CIO is responsible for capital management. The primary objectives of the Firm's capital management are to: Maintain sufficient capital in order to continue to build and invest in the Firm's businesses through the cycle and in stressed environments; Retain flexibility to take advantage of future investment opportunities; Promote the Firm's ability to serve as a source of strength to its subsidiaries; Ensure the Firm operates above the minimum regulatory capital ratios as well as maintain

well-capitalized; status for the Firm and its insured depository institution (IDI) subsidiaries at all times under applicable regulatory capital requirements; Meet capital distribution objectives; and Maintain sufficient capital resources to operate throughout a resolution period in accordance with the Firm's preferred resolution strategy. The Firm addresses these objectives through establishing internal minimum capital requirements and a strong capital governance framework. The internal minimum capital levels consider the Firm's regulatory capital requirements as well as an internal assessment of capital adequacy, in normal economic cycles and in stress events, when setting its minimum capital levels. Capital management is intended to be flexible in order to react to a range of potential events. The current capital governance framework requires regular monitoring of the Firm's capital position and follows prescribed escalation protocols, both at the Firm and material legal entity levels. Governance Committees responsible for overseeing the Firm's capital management include the Capital Governance Committee, the Treasurer Committee and the Firmwide ALCO. Oversight of capital management is governed through the CIO, Treasury and Corporate (CTC) Risk Committee. In addition, the Board Risk Committee periodically reviews the Firm's capital risk tolerance. Refer to Firmwide Risk Management on pages 85-89 for additional discussion on the Board Risk Committee and the ALCO. Capital planning and stress testing Comprehensive Capital Analysis and Review The Federal Reserve requires large BHCs, including the Firm, to submit at least annually a capital plan that has been reviewed and approved by the Board of Directors. The Federal Reserve uses CCAR and other stress testing processes to ensure that large BHCs have sufficient capital during periods of economic and financial stress, and have robust, forward-looking capital assessment and planning processes in place that address each BHC's unique risks to enable it to absorb losses under certain stress scenarios. Through CCAR, the Federal Reserve evaluates each BHC's capital adequacy and internal capital adequacy assessment processes (ICAAP), as well as its plans to make capital distributions, such as dividend payments or stock repurchases. The Federal Reserve uses results under the severely adverse scenario from its supervisory stress test to determine each firm's SCB requirement for the coming JPMorgan Chase & Co./2020 Form 10-K 91 Management's discussion and analysis year. Refer to Key Regulatory Developments on pages 93-94 for additional information. On June 29, 2020, the Firm announced that it had completed the 2020 CCAR stress test process. On August 10, 2020, the Federal Reserve affirmed the Firm's SCB requirement of 3.3% and the Firm's minimum Standardized CET1 capital ratio of 11.3% (up from 10.5%). The SCB requirement became effective on October 1, 2020. In June 2020, the Federal Reserve determined that changes in financial markets or the macroeconomic outlook due to the COVID-19 pandemic could have a material effect on a firm's risk profile and financial condition and therefore required all large bank holding companies, including the Firm, to update and resubmit their capital plans by November 2, 2020. On December 18, 2020, the Federal Reserve released its results from the 2020 CCAR Round 2 stress test, which showed that large banks had strong levels of capital and announced that it would allow all large banks, including the Firm, to resume share repurchases commencing in the first quarter of 2021, subject to certain restrictions for at least the first quarter of 2021 given considerable economic uncertainty remained. The Federal Reserve has stated that due to uncertainty about future economic conditions and the ultimate path of the current recovery, the SCB will not be reset at this time. The Federal Reserve will notify firms by March 31, 2021 whether a revised SCB requirement based on the 2020 CCAR Round 2 stress test will be recalculated ahead of the 2021 annual CCAR assessment. Refer to Capital actions on page 99 for information on actions taken by the Firm's Board of Directors following the 2020 CCAR results. Internal Capital Adequacy Assessment Process Annually, the Firm prepares the ICAAP, which informs the Board of Directors of the ongoing assessment of the Firm's processes for managing the sources and uses of capital as well as compliance with supervisory expectations for capital planning and capital adequacy. The Firm's ICAAP integrates stress testing protocols with capital planning. The CCAR and other stress testing processes assess the potential impact of alternative economic and business scenarios on the Firm's earnings and capital. Economic scenarios, and the parameters underlying those scenarios, are defined centrally and applied uniformly across the businesses. These scenarios are articulated in terms of macroeconomic factors, which are key drivers of business results; global market shocks, which generate short-term but severe trading losses; and idiosyncratic operational risk events. The scenarios are intended to capture and stress key vulnerabilities and idiosyncratic risks facing the Firm. However, when defining a broad range of scenarios, actual events can be worse. Accordingly, management considers additional stresses outside these scenarios, as necessary. These results are reviewed by management and the Board of Directors. Contingency capital plan The Firm's contingency capital plan establishes the capital management framework for the Firm and specifies the principles underlying the Firm's approach towards capital management in normal economic conditions and during stress. The contingency capital plan defines how the Firm calibrates its targeted capital levels and meets minimum capital requirements, monitors the ongoing appropriateness of planned capital distributions, and sets out the capital contingency actions that are expected to be taken or considered at various levels of capital depletion during a period of stress. Regulatory capital The Federal Reserve establishes capital requirements, including well-capitalized standards, for the consolidated financial holding company. The OCC establishes similar minimum capital requirements and standards for the Firm's IDI subsidiaries, including JPMorgan Chase Bank, N.A. The U.S. capital requirements generally follow the Capital Accord of

the Basel Committee, as amended from time to time. **Basel III Overview** The capital rules under Basel III establish minimum capital ratios and overall capital adequacy standards for large and internationally active U.S. BHCs and banks, including the Firm and its IDI subsidiaries, including JPMorgan Chase Bank, N.A. The minimum amount of regulatory capital that must be held by BHCs and banks is determined by calculating risk-weighted assets (“RWA”), which are on-balance sheet assets and off-balance sheet exposures, weighted according to risk. Two comprehensive approaches are prescribed for calculating RWA: a standardized approach (“Basel III Standardized”), and an advanced approach (“Basel III Advanced”). For each of the risk-based capital ratios, the capital adequacy of the Firm is evaluated against the lower of the Standardized or Advanced approaches compared to their respective minimum capital ratios. Basel III establishes capital requirements for calculating credit risk RWA and market risk RWA, and in the case of Basel III Advanced, operational risk RWA. Key differences in the calculation of credit risk RWA between the Standardized and Advanced approaches are that for Basel III Advanced, credit risk RWA is based on risk-sensitive approaches which largely rely on the use of internal credit models and parameters, whereas for Basel III Standardized, credit risk RWA is generally based on supervisory risk-weightings which vary primarily by counterparty type and asset class. Market risk RWA is calculated on a generally consistent basis between Basel III Standardized and Basel III Advanced. In addition to the RWA calculated under these approaches, the Firm may supplement such amounts to incorporate management judgment and feedback from its regulators. Basel III also includes a requirement for Advanced Approach banking organizations, including the Firm, to 92 JPMorgan Chase & Co./2020 Form 10-K calculate the SLR. Refer to SLR on page 98 for additional information.

COVID-19 Pandemic The Firm has been impacted by market events as a result of the COVID-19 pandemic, but remains well-capitalized. However, the continuation or further deterioration of the current macroeconomic environment could result in impacts to the Firm's capital and leverage. **Key Regulatory Developments**

Current Expected Credit Losses. Effective January 1, 2020, the Firm adopted the Financial Instruments – Credit Losses guidance under U.S. GAAP. As permitted under the U.S. capital rules issued by the federal banking agencies in 2019, the Firm initially elected to phase-in the January 1, 2020 (“day 1”) CECL adoption impact to retained earnings of \$2.7 billion to CET1 capital, at 25% per year in each of 2020 to 2023. As part of their response to the impact of the COVID-19 pandemic, on March 31, 2020, the federal banking agencies issued an interim final rule (issued as final on August 26, 2020) that provided the option to delay the effects of CECL on regulatory capital for two years, followed by a three-year transition period (“CECL capital transition provisions”). The final rule provides a uniform approach for estimating the effects of CECL compared to the legacy incurred loss model during the first two years of the transition period (the “day 2” transition amount), whereby the Firm may exclude from CET1 capital 25% of the change in the allowance for credit losses (excluding allowances on PCD loans). The cumulative day 2 transition amount as at December 31, 2021 that is not recognized in CET1 capital, as well as the \$2.7 billion day 1 impact, will be phased into CET1 capital at 25% per year beginning January 1, 2022. The Firm has elected to apply the CECL capital transition provisions, and accordingly, for the year ended December 31, 2020, the capital metrics of the Firm exclude \$5.7 billion, which is the \$2.7 billion day 1 impact to retained earnings and 25% of the \$12.2 billion increase in the allowance for credit losses (excluding allowances on PCD loans). The impacts of the CECL capital transition provisions have also been incorporated into Tier 2 capital, adjusted average assets, and total leverage exposure. Refer to Note 1 for further information on the CECL accounting guidance.

Money Market Mutual Fund Liquidity Facility ("MMLF") . The Federal Reserve established the MMLF facility on March 18, 2020, authorized through at least March 31, 2021, to enhance the liquidity and functioning of money markets. Under the MMLF, the Federal Reserve Bank of Boston (“FRBB”) makes nonrecourse advances to participating financial institutions to purchase certain types of assets from eligible money market mutual fund clients. These assets, which are reflected in other assets on the Firm's Consolidated balance sheets, are pledged to the FRBB as collateral. On March 23, 2020, the federal banking agencies issued an interim final rule (issued as final on September 29, 2020) to neutralize the effects of purchasing assets through the program on risk-based and leverage-based capital ratios. As of December 31, 2020, the Firm excluded assets purchased from money market mutual fund clients pursuant to nonrecourse advances provided under the MMLF in the amount of \$187 million from its RWA and \$358 million from adjusted three month average assets and total leverage exposure.

Supplementary leverage ratio temporary revision. On April 1, 2020, the Federal Reserve issued an interim final rule that requires, on a temporary basis, the calculation of total leverage exposure for purposes of calculating the SLR for bank holding companies, to exclude the on-balance sheet amounts of U.S. Treasury securities and deposits at Federal Reserve Banks. These exclusions became effective April 1, 2020, and will remain in effect through March 31, 2021. On June 1, 2020, the Federal Reserve, OCC and FDIC issued an interim final rule that provides IDI subsidiaries with an option to apply this temporary exclusion subject to certain restrictions. As of December 31, 2020, JPMorgan Chase Bank, N.A. has not elected to apply this exclusion.

Paycheck Protection Program. On April 13, 2020, the federal banking agencies issued an interim final rule (issued as final on September 29, 2020) to neutralize the regulatory capital effects of participating in the PPP on risk-based capital ratios by applying a zero percent risk weight to loans originated under the program. Given that PPP loans are guaranteed by the SBA, the Firm does not expect to realize material credit losses on these loans. As of December 31, 2020, the Firm had

approximately \$27 billion of loans under the program. The rule also provides that if a PPP loan is pledged as collateral for a non-recourse loan under the Federal Reserve's Paycheck Protection Program Lending (PPPL) Facility, the PPP loan can be excluded from leverage-based capital ratios. As of December 31, 2020, the Firm had not participated in the PPPL Facility. Refer to Regulatory Developments Relating to the COVID-19 Pandemic on pages 52-53 for additional information on regulatory actions and significant financing programs that the U.S. government and regulators have introduced to address the effects of the COVID-19 pandemic.

Stress Capital Buffer. On March 4, 2020, the Federal Reserve issued the final rule introducing the SCB framework for the Basel III Standardized approach that is designed to more closely integrate the results of the quantitative assessment in the annual CCAR with the ongoing minimum capital requirements for BHCs under the U.S. Basel III rules. The final rule replaces the fixed 2.5% CET1 capital conservation buffer in the Standardized approach with a dynamic institution-specific SCB. The final rule does not apply to the U.S. Basel III Advanced approach capital requirements. The SCB requirement for BHCs will be effective on October 1 of each year and is expected to remain in effect until September 30 of the following year. JPMorgan Chase & Co./2020 Form 10-K 93

Management's discussion and analysis

TLAC Holdings rule. On October 20, 2020, the federal banking agencies issued a final rule prescribing the regulatory capital treatment for holdings of TLAC debt instruments by certain large banking organizations, such as the Firm and JPMorgan Chase Bank, N.A. This rule expands the scope of the existing capital deductions rule around the holdings of capital instruments of financial institutions to also include TLAC debt instruments issued by systemically important banking organizations. The final rule will become effective on April 1, 2021 and is not expected to have a material impact on the Firm's risk-based capital metrics.

Risk-based Capital Regulatory Minimums

The following chart presents the Firm's Basel III minimum CET1 capital ratio under the Basel III rules currently in effect. The Firm's Basel III Standardized risk-based ratios are currently more binding than the Basel III Advanced risk-based ratios. All banking institutions are currently required to have a minimum CET1 capital ratio of 4.5% of risk-weighted assets. Certain banking organizations, including the Firm, are required to hold additional levels of capital to serve as a capital conservation buffer. The capital conservation buffer incorporates a global systemically important bank (GSIB) surcharge, a discretionary countercyclical capital buffer and a fixed capital conservation buffer of 2.5% for Advanced regulatory capital requirements and a variable SCB requirement, floored at 2.5%, for Standardized regulatory capital requirements. Under the Federal Reserve's GSIB rule, the Firm is required to assess its GSIB surcharge on an annual basis under two separately prescribed methods based on data for the previous fiscal year-end, and is subject to the higher of the two. The first (Method 1), reflects the GSIB surcharge as prescribed by the Basel Committee's assessment methodology, and is calculated across five criteria: size, cross-jurisdictional activity, interconnectedness, complexity and substitutability. The second (Method 2), modifies the Method 1 requirements to include a measure of short-term wholesale funding in place of substitutability, and introduces a GSIB score multiplication factor.

94 JPMorgan Chase & Co./2020 Form 10-K

The following table presents the Firm's effective GSIB surcharge for the years ended December 31, 2020 and 2019.

Year	Method 1	Method 2	Firm's effective regulatory minimum GSIB surcharge
2020	2.50%	3.50%	3.50%
2019	2.50%	3.50%	3.50%

The Firm's effective regulatory minimum GSIB surcharge calculated under Method 2 remains unchanged at 3.5% for 2021. On November 11, 2020, the Financial Stability Board (FSB) released its annual GSIB list, which published the Firm's Method 1 GSIB surcharge of 2.0% (down from 2.5%) effective January 1, 2021, based upon data as of December 31, 2019. The Firm's estimated Method 2 surcharge calculated using data as of December 31, 2020 is 4.0%. Accordingly, based on the GSIB rule currently in effect, the Firm's effective regulatory minimum GSIB surcharge is expected to increase to 4.0% on January 1, 2023 unless the Firm's Method 2 GSIB surcharge calculation based upon data as of December 31, 2021 is lower.

The U.S. federal regulatory capital standards include a framework for setting a discretionary countercyclical capital buffer taking into account the macro financial environment in which large, internationally active banks function. As of December 31, 2020, the U.S. countercyclical capital buffer remained at 0%. The Federal Reserve will continue to review the buffer at least annually. The buffer can be increased if the Federal Reserve, FDIC and OCC determine that systemic risks are meaningfully above normal and can be calibrated up to an additional 2.5% of RWA subject to a 12-month implementation period. Failure to maintain regulatory capital equal to or in excess of the risk-based regulatory capital minimum plus the capital conservation buffer (inclusive of the GSIB surcharge) and any countercyclical buffer will result in limitations to the amount of capital that the Firm may distribute, such as through dividends and common share repurchases, as well as certain executive discretionary bonus payments. The Firm has a target Basel III CET1 capital ratio of 12%. However, the Firm may remain above that level in order to satisfy leverage-based capital requirements if deposits continue to grow due to actions taken by the Federal Reserve and the U.S. government in response to the COVID-19 pandemic.

Total Loss-Absorbing Capacity

The Federal Reserve's TLAC rule requires the U.S. GSIB top-tier holding companies, including the Firm, to maintain minimum levels of external TLAC and eligible long-term debt (eligible LTD). Refer to TLAC on page 100 for additional information.

Leverage-based Capital Regulatory Minimums

Supplementary leverage ratio Banking organizations subject to the Basel III Advanced approach are currently required to have a minimum SLR of 3.0%. Certain banking organizations, including the Firm, are also required to hold an additional

2.0% leverage buffer. The SLR is defined as Tier 1 capital under Basel III divided by the Firm's total leverage exposure. Total leverage exposure is calculated by taking the Firm's total average on-balance sheet assets, less amounts permitted to be deducted for Tier 1 capital, and adding certain off-balance sheet exposures, such as undrawn commitments and derivatives potential future exposure. Failure to maintain an SLR equal to or greater than the regulatory minimum will result in limitations on the amount of capital that the Firm may distribute such as through dividends and common share repurchases. Other regulatory capital In addition to meeting the capital ratio requirements of Basel III, the Firm and its IDI subsidiaries also must maintain minimum capital and leverage ratios in order to be well-capitalized; under the regulations issued by the Federal Reserve and the Prompt Corrective Action (PCA) requirements of the FDIC Improvement Act (FDICIA), respectively. Refer to Note 27 for additional information. Additional information regarding the Firm's capital ratios, as well as the U.S. federal regulatory capital standards to which the Firm is subject, is presented in Note 27. Refer to the Firm's Pillar 3 Regulatory Capital Disclosures reports, which are available on the Firm's website, for further information on the Firm's Basel III measures. JPMorgan Chase & Co./2020 Form 10-K 95 Management's discussion and analysis The following table presents the Firm's risk-based and leverage-based capital metrics under both the Basel III Standardized and Advanced approaches. Standardized Advanced (in millions, except ratios) December 31, 2020 (c)(d) December 31, 2019 Minimum capital ratios (e) December 31, 2020 (c)(d) December 31, 2019 Minimum capital ratios (e) Risk-based capital metrics: CET1 capital \$ 205,078; \$ 187,753; \$ 205,078; \$ 187,753; Tier 1 capital 234,844; 214,432; 234,844; 214,432; Total capital 269,923; 242,589; 257,228; 232,112; Risk-weighted assets 1,560,609; 1,515,869; 1,484,431; 1,397,878; CET1 capital ratio 13.1; % 12.4; % 11.3; % 13.8; % 13.4; % 10.5; % Tier 1 capital ratio 15.0; 14.1; 12.8; 15.8; 15.3; 12.0; Total capital ratio 17.3; 16.0; 14.8; 17.3; 16.6; 14.0; Leverage-based capital metrics: Adjusted average assets (a) \$ 3,353,319; \$ 2,730,239; \$ 3,353,319; \$ 2,730,239; Tier 1 leverage ratio 7.0; % 7.9; % 4.0; % 7.0; % 7.9; % 4.0; % Total leverage exposure (b) NA NA \$ 3,401,542; \$ 3,423,431; SLR (b) NA NA NA 6.9; % 6.3; % 5.0; % (a) Adjusted average assets, for purposes of calculating the leverage ratios, includes total quarterly average assets adjusted for on-balance sheet assets that are subject to deduction from Tier 1 capital, predominantly goodwill and other intangible assets. (b) As of December 31, 2020, total leverage exposure for purposes of calculating the SLR excludes U.S. Treasury securities and deposits at Federal Reserve Banks, as provided by the interim final rule issued by the Federal Reserve on April 1, 2020. (c) As of December 31, 2020, the capital metrics reflect the CECL capital transition provisions. (d) As of December 31, 2020, the capital metrics reflect the exclusion of assets purchased from money market mutual fund clients pursuant to nonrecourse advances provided under the MMLF. Additionally, loans originated under the PPP receive a zero percent risk weight. (e) Represents minimum requirements and regulatory buffers applicable to the Firm. For the period ended December 31, 2019, the CET1, Tier 1, Total, Tier 1 leverage and SLR minimum capital ratios applicable to the Firm were 10.5%, 12.0%, 14.0%, 4.0% and 5.0%, respectively. Refer to Note 27 for additional information. 96 JPMorgan Chase & Co./2020 Form 10-K Capital components The following table presents reconciliations of total stockholders' equity to Basel III CET1 capital, Tier 1 capital and Total capital as of December 31, 2020 and 2019. (in millions) December 31, 2020 December 31, 2019 Total stockholders' equity \$ 279,354; \$ 261,330; Less: Preferred stock 30,063; 26,993; Common stockholders' equity 249,291; 234,337; Add: Certain deferred tax liabilities (a) 2,453; 2,381; Less: Goodwill 49,248; 47,823; Other intangible assets 904; 819; Other CET1 capital adjustments (b) (3,486) 323; Standardized/Advanced CET1 capital 205,078; 187,753; Preferred stock 30,063; 26,993; Less: Other Tier 1 adjustments 297; 314; Standardized/Advanced Tier 1 capital \$ 234,844; \$ 214,432; Long-term debt and other instruments qualifying as Tier 2 capital \$ 16,645; \$ 13,733; Qualifying allowance for credit losses (c) 18,372; 14,314; Other 62; 110; Standardized Tier 2 capital \$ 35,079; \$ 28,157; Standardized Total capital \$ 269,923; \$ 242,589; Adjustment in qualifying allowance for credit losses for Advanced Tier 2 capital (d) (12,695) (10,477) Advanced Tier 2 capital \$ 22,384; \$ 17,680; Advanced Total capital \$ 257,228; \$ 232,112; (a) Represents deferred tax liabilities related to tax-deductible goodwill and to identifiable intangibles created in nontaxable transactions, which are netted against goodwill and other intangibles when calculating CET1 capital. (b) As of December 31, 2020, the impact of the CECL capital transition provision was an increase in CET1 capital of \$5.7 billion. (c) Represents the allowance for credit losses eligible for inclusion in Tier 2 capital up to 1.25% of credit risk RWA, including the impact of the CECL capital transition provision with any excess deducted from RWA. (d) Represents an adjustment to qualifying allowance for credit losses for the excess of eligible credit reserves over expected credit losses up to 0.6% of credit risk RWA, including the impact of the CECL capital transition provision with any excess deducted from RWA. Capital rollforward The following table presents the changes in Basel III CET1 capital, Tier 1 capital and Tier 2 capital for the year ended December 31, 2020. Year Ended December 31, (in millions)

2020 Standardized/Advanced CET1 capital at December 31, 2019 \$ 187,753; Net income applicable to common equity 27,548; Dividends declared on common stock (11,119) Net purchase of treasury stock (5,135) Changes in additional paid-in capital (128) Changes related to AOCI 6,417; Adjustment related to AOCI (a) (1,829) Changes related to other CET1 capital adjustments (b) 1,571; Change in Standardized/Advanced CET1 capital 17,325; Standardized/Advanced CET1 capital at December 31, 2020 \$ 205,078; Standardized/Advanced Tier 1 capital at December 31, 2019 \$ 214,432; Change in CET1 capital (b) 17,325; Net issuance of noncumulative perpetual preferred stock 3,070; Other 17; Change in Standardized/Advanced Tier 1 capital 20,412; Standardized/Advanced Tier 1 capital at December 31, 2020 \$ 234,844; Standardized Tier 2 capital at December 31, 2019 \$ 28,157; Change in long-term debt and other instruments qualifying as Tier 2 2,912; Change in qualifying allowance for credit losses (b) 4,058; Other (48) Change in Standardized Tier 2 capital 6,922; Standardized Tier 2 capital at December 31, 2020 \$ 35,079; Standardized Total capital at December 31, 2020 \$ 269,923; Advanced Tier 2 capital at December 31, 2019 \$ 17,680; Change in long-term debt and other instruments qualifying as Tier 2 2,912; Change in qualifying allowance for credit losses (b) 1,840; Other (48) Change in Advanced Tier 2 capital 4,704; Advanced Tier 2 capital at December 31, 2020 \$ 22,384; Advanced Total capital at December 31, 2020 \$ 257,228; (a) Includes cash flow hedges and DVA related to structured notes recorded in AOCI. (b) Includes the impact of the CECL capital transition provisions. JPMorgan Chase & Co./2020 Form 10-K 97 Management's discussion and analysis RWA rollforward The following table presents changes in the components of RWA under Basel III Standardized and Advanced approaches for the year ended December 31, 2020. The amounts in the rollforward categories are estimates, based on the predominant driver of the change. Standardized Advanced Year ended December 31, 2020 (in millions) Credit risk RWA Market risk RWA Total RWA Credit risk RWA Market risk RWA Operational risk RWA Total RWA December 31, 2019 \$ 1,440,220; \$ 75,649; \$ 1,515,869; \$ 932,948; \$ 75,652; \$ 389,278; \$ 1,397,878; Model & data changes (a) (800) (16,320) (17,120) (6,100) (16,320) (22,420) Portfolio runoff (b) (4,450) (4,450) (4,000) Movement in portfolio levels (c) 29,249; 37,061; 66,310; 79,482; 37,578; (4,087) 112,973; Changes in RWA 23,999; 20,741; 44,740; 69,382; 21,258; (4,087) 86,553; December 31, 2020 \$ 1,464,219; \$ 96,390; \$ 1,560,609; \$ 1,002,330; \$ 96,910; \$ 385,191; \$ 1,484,431; (a) Model & data changes refer to material movements in levels of RWA as a result of revised methodologies and/or treatment per regulatory guidance (exclusive of rule changes). (b) Portfolio runoff for credit risk RWA primarily reflects reduced risk from position rollofs in legacy portfolios in Home Lending. (c) Movement in portfolio levels (inclusive of rule changes) refers to: changes in book size, composition, credit quality, and market movements for credit risk RWA; changes in position and market movements for market risk RWA; updates to cumulative losses for operational risk RWA; and deductions to credit risk RWA for excess eligible credit reserves not eligible for inclusion in Tier 2 capital. Supplementary leverage ratio The following table presents the components of the Firm's SLR. Three months ended (in millions, except ratio) December 31, 2020 December 31, 2019 Tier 1 capital \$ 234,844; 214,432; Total average assets 3,399,818; 2,777,270; Less: Regulatory capital adjustments (a) 46,499; 47,031; Total adjusted average assets (b) 3,353,319; 2,730,239; Add: Off-balance sheet exposures (c) 729,978; 693,192; Less: Exclusion for U.S. Treasuries and Federal Reserve Bank deposits 681,755; Total leverage exposure \$ 3,401,542; \$ 3,423,431; SLR 6.9; % 6.3; % (a) For purposes of calculating the SLR, includes total quarterly average assets adjusted for on-balance sheet assets that are subject to deduction from Tier 1 capital, predominantly goodwill and other intangible assets. As of December 31, 2020, includes adjustments for the CECL capital transition provisions and the exclusion of average assets purchased from money market mutual fund clients pursuant to nonrecourse advances provided under the MMLF. (b) Adjusted average assets used for the calculation of Tier 1 leverage ratio. (c) Off-balance sheet exposures are calculated as the average of the three month-end spot balances during the reporting quarter. Refer to Note 27 for JPMorgan Chase Bank, N.A.'s SLR. Line of business equity Each business segment is allocated capital by taking into consideration a variety of factors including capital levels of similarly rated peers and applicable regulatory capital requirements. ROE is measured and internal targets for expected returns are established as key measures of a business segment's performance. The Firm's allocation methodology incorporates Basel III Standardized RWA, Basel III Advanced RWA, the GSIB surcharge, and a simulation of capital in a severe stress environment. As of January 1, 2021, the Firm has changed its line of business capital allocations primarily as a result of changes in exposures for each LOB and an increase in the relative risk weighting toward Standardized RWA. The assumptions and methodologies used to allocate capital are periodically assessed and as a result, the capital allocated to the LOBs may change from time to time. The following table presents the capital allocated to each business segment. Line of business equity (Allocated capital) December 31, (in billions) January 1, 2021 2020 2019 Consumer & Community Banking \$ 50.0; \$ 52.0; \$ 52.0; Corporate & Investment Bank 83.0; 80.0; 80.0; Commercial Banking 24.0; 22.0; 22.0; Asset & Wealth Management 14.0; 10.5; 10.5; Corporate 78.3; 78.3; 78.3;

84.8%; 69.8%; Total common stockholders' equity \$ 249.3; \$ 249.3; \$ 234.3; 98

JPMorgan Chase & Co./2020 Form 10-K Capital actions Common stock dividends The Firm's common stock dividends are planned as part of the Capital Management governance framework in line with the Firm's capital management objectives. The Firm's quarterly common stock dividend is currently \$0.90 per share. The Firm's dividends are subject to the Board of Directors' approval on a quarterly basis. Refer to Note 21 and Note 26 for information regarding dividend restrictions. The following table shows the common dividend payout ratio based on net income applicable to common equity. Year ended December 31, 2020 2019 2018 Common dividend payout ratio 40%; 31%; 30%; Common stock On March 15, 2020, in response to the economic disruptions caused by the COVID-19 pandemic, the Firm temporarily suspended repurchases of its common stock. Subsequently, the Federal Reserve directed all large banks, including the Firm, to discontinue net share repurchases through the end of 2020. On December 18, 2020, the Federal Reserve announced that all large banks, including the Firm, could resume share repurchases commencing in the first quarter of 2021. As directed by the Federal Reserve, total net repurchases and common stock dividends in the first quarter of 2021 are restricted and cannot exceed the average of the Firm's net income for the four preceding calendar quarters. The Firm's Board of Directors has authorized a new common share repurchase program for up to \$30 billion. The following table sets forth the Firm's repurchases of common stock for the years ended December 31, 2020, 2019 and 2018. Year ended December 31, (in millions) 2020 2019 2018 Total number of shares of common stock repurchased 50.0; 213.0; 181.5; Aggregate purchase price of common stock repurchases \$ 6,397; \$ 24,121; \$ 19,983; The authorization to repurchase common shares is utilized at management's discretion, and the timing of purchases and the exact amount of common shares that may be repurchased is subject to various factors, including market conditions; legal and regulatory considerations affecting the amount and timing of repurchase activity; the Firm's capital position (taking into account goodwill and intangibles); internal capital generation; and alternative investment opportunities. The repurchase program does not include specific price targets or timetables; may be suspended by management at any time; and may be executed through open market purchases or privately negotiated transactions, or utilizing Rule 10b5-1 plans, which are written trading plans that the Firm may enter into from time to time under Rule 10b5-1 of the Securities Exchange Act of 1934 and which allow the Firm to repurchase its common shares during periods when it may otherwise not be repurchasing common shares; for example, during internal trading blackout periods. Refer to Part II, Item 5: Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities on page 34 of the 2020 Form 10-K for additional information regarding repurchases of the Firm's equity securities. Preferred stock Preferred stock dividends declared were \$1.6 billion for the year ended December 31, 2020. The Firm has not issued or redeemed any preferred stock since the first quarter of 2020. Refer to Note 21 for additional information on the Firm's preferred stock, including the issuance and redemption of preferred stock. Subordinated Debt On May 13, 2020, the Firm issued \$3.0 billion of fixed-to-floating rate subordinated notes due 2031. Refer to Long-term funding and issuance on page 107 and Note 20 for additional information. JPMorgan Chase & Co./2020 Form 10-K 99 Management's discussion and analysis Other capital requirements Total Loss-Absorbing Capacity The Federal Reserve's TLAC rule requires the U.S. GSIB top-tier holding companies, including the Firm, to maintain minimum levels of external TLAC and eligible long-term debt. The minimum external TLAC and the minimum level of eligible long-term debt requirements are shown below: (a) RWA is the greater of Standardized and Advanced compared to their respective minimum capital ratios. Failure to maintain TLAC equal to or in excess of the regulatory minimum plus applicable buffers will result in limitations to the amount of capital that the Firm may distribute, such as through dividends and common share repurchases. The following table presents the TLAC and external long-term debt minimum requirements including applicable regulatory buffers, as of December 31, 2020 and 2019. Minimum Requirements TLAC to RWA 23.0%; TLAC to leverage exposure 9.5%; External long-term debt to RWA 9.5%; External long-term debt to leverage 4.5%; Effective January 1, 2021, Method 1 GSIB surcharge is 2.0% (down from 2.5%). As a result, the Firm's TLAC to RWA requirement will become 22.5%. Refer to Risk-based Capital Regulatory Minimums on pages 94-95 for further information on the GSIB surcharge. The following table presents the eligible external TLAC and eligible LTD amounts, as well as a representation of the amounts as a percentage of the Firm's total RWA and total leverage exposure applying the impact of the CECL capital transition provisions as of December 31, 2020 and 2019. December 31, 2020 December 31, 2019 (in billions, except ratio) External TLAC LTD External TLAC LTD Total eligible amount \$ 421.0; \$ 181.4; \$ 386.4; \$ 161.8; % of RWA 27.0%; % 11.6%; % 25.5%; % 10.7%; % Surplus/(shortfall) \$ 62.1; \$ 33.1; \$ 37.7; \$ 17.8; % of total leverage exposure 12.4%; % 5.3%; % 11.3%; % 4.7%; % Surplus/(shortfall) \$ 97.9; \$ 28.3; \$ 61.2; \$ 7.8; Refer to Part I, Item 1A: Risk Factors on pages 8-32 of the 2020 Form 10-K for information on the financial consequences to holders of the Firm's debt and equity securities in a resolution scenario. 100

JPMorgan Chase & Co./2020 Form 10-K Broker-dealer regulatory capital J.P. Morgan Securities JPMorgan Chase's principal U.S. broker-dealer subsidiary is J.P. Morgan Securities. J.P. Morgan Securities is subject to Rule 15c3-1 under the Securities Exchange Act of 1934 (the "Net Capital Rule"). J.P. Morgan Securities is

also registered as a futures commission merchant and is subject to regulatory capital requirements, including those imposed by the SEC, Commodity Futures Trading Commission (“CFTC”), Financial Industry Regulatory Authority (“FINRA”) and the National Futures Association (“NFA”). J.P. Morgan Securities has elected to compute its minimum net capital requirements in accordance with the “Alternative Net Capital Requirements” of the Net Capital Rule. The following table presents J.P. Morgan Securities’ net capital: December 31, 2020 (in millions) Actual (a) Minimum Net Capital \$ 27,651 \$ 5,024 (a) Net capital reflects the exclusion of assets purchased from money market mutual fund clients pursuant to nonrecourse advances provided under the MMLF. In addition to its alternative minimum net capital requirements, J.P. Morgan Securities is required to hold “tentative net capital” in excess of \$1.0 billion and is also required to notify the SEC in the event that its tentative net capital is less than \$5.0 billion. Tentative net capital is net capital before deducting market and credit risk charges as defined by the Net Capital Rule. As of December 31, 2020, J.P. Morgan Securities maintained tentative net capital in excess of the minimum and notification requirements. J.P. Morgan Securities plc J.P. Morgan Securities plc is a wholly-owned subsidiary of JPMorgan Chase Bank, N.A. and has authority to engage in banking, investment banking and broker-dealer activities. J.P. Morgan Securities plc is jointly regulated by the U.K. Prudential Regulation Authority (“PRA”) and the Financial Conduct Authority (“FCA”). J.P. Morgan Securities plc is subject to the European Union Capital Requirements Regulation and the PRA capital rules, each of which implement Basel III and thereby subject J.P. Morgan Securities plc to its requirements. Effective January 1, 2021, J.P. Morgan Securities plc is subject to the amended EU Capital Requirement Regulation, as adopted in the U.K. The Bank of England requires, on a transitional basis, that U.K. banks, including U.K. regulated subsidiaries of overseas groups, maintain a minimum requirement for own funds and eligible liabilities (“MREL”). As of December 31, 2020, J.P. Morgan Securities plc was compliant with the requirements of the MREL rule. The following table presents J.P. Morgan Securities plc’s capital metrics: December 31, 2020 (in millions, except ratios) Estimated Minimum ratios Total capital \$ 55,156 CET1 ratio 17.9 % 4.5 % Total capital ratio 22.8 % 8.0 % JPMorgan Chase & Co./2020 Form 10-K 101

Management’s discussion and analysis LIQUIDITY RISK MANAGEMENT Liquidity risk is the risk that the Firm will be unable to meet its contractual and contingent financial obligations as they arise or that it does not have the appropriate amount, composition and tenor of funding and liquidity to support its assets and liabilities. Liquidity risk oversight The Firm has a Liquidity Risk Oversight function whose primary objective is to provide oversight of liquidity risk across the Firm. Liquidity Risk Oversight’s responsibilities include: • Defining, monitoring and reporting liquidity risk metrics; • Establishing and monitoring limits and indicators, including liquidity risk appetite; • Developing a process to classify, monitor and report limit breaches; • Performing an independent review of liquidity risk management processes; • Monitoring and reporting internal Firmwide and legal entity liquidity stress tests as well as regulatory defined liquidity stress tests; • Approving or escalating for review new or updated liquidity stress assumptions; and • Monitoring liquidity positions, balance sheet variances and funding activities; Liquidity management The primary objectives of the Firm’s liquidity management are to: • Ensure that the Firm’s core businesses and material legal entities are able to operate in support of client needs and meet contractual and contingent financial obligations through normal economic cycles as well as during stress events, and • Manage an optimal funding mix and availability of liquidity sources. As part of the Firm’s overall liquidity management strategy, the Firm manages liquidity and funding using a centralized, global approach in order to: • Optimize liquidity sources and uses; • Monitor exposures; • Identify constraints on the transfer of liquidity between the Firm’s legal entities; and • Maintain the appropriate amount of surplus liquidity at a Firmwide and legal entity level, where relevant. In the context of the Firm’s liquidity management, Treasury and CIO is responsible for: • Analyzing and understanding the liquidity characteristics of the assets and liabilities of the Firm, LOBs and legal entities, taking into account legal, regulatory, and operational restrictions; • Developing internal liquidity stress testing assumptions; • Defining and monitoring Firmwide and legal entity-specific liquidity strategies, policies, reporting and contingency funding plans; • Managing liquidity within the Firm’s approved liquidity risk appetite tolerances and limits; • Managing compliance with regulatory requirements related to funding and liquidity risk; and • Setting transfer pricing in accordance with underlying liquidity characteristics of balance sheet assets and liabilities as well as certain off-balance sheet items. Governance Committees responsible for liquidity governance include the Firmwide ALCO as well as LOB and regional ALCOs, the Treasurer Committee, and the CTC Risk Committee. In addition, the Board Risk Committee reviews and recommends to the Board of Directors, for formal approval, the Firm’s liquidity risk tolerances, liquidity strategy, and liquidity policy. Refer to Firmwide Risk Management on pages 85-89 for further discussion of ALCO and other risk-related committees. Internal stress testing Liquidity stress tests are intended to ensure that the Firm has sufficient liquidity under a variety of adverse scenarios, including scenarios analyzed as part of the Firm’s resolution and recovery planning. Stress scenarios are produced for JPMorgan Chase & Co. (“Parent Company”) and the Firm’s material legal entities on a regular basis, and other stress tests are performed in response to specific market events or concerns. Liquidity stress tests assume all of the

Firm's contractual financial obligations are met and take into consideration: Varying levels of access to unsecured and secured funding markets; Estimated non-contractual and contingent cash outflows, and Potential impediments to the availability and transferability of liquidity between jurisdictions and material legal entities such as regulatory, legal or other restrictions. Liquidity outflow assumptions are modeled across a range of time horizons and currency dimensions and contemplate both market and idiosyncratic stresses. Results of stress tests are considered in the formulation of the Firm's funding plan and assessment of its liquidity position. The Parent Company acts as a source of funding for the Firm through equity and long-term debt issuances, and its intermediate holding company, JPMorgan Chase Holdings LLC (the IHC) provides funding support to the ongoing operations of the Parent Company and its subsidiaries. The Firm maintains liquidity at the Parent Company, IHC, and operating subsidiaries at levels sufficient to comply with liquidity risk tolerances and minimum liquidity requirements, and to manage through periods of 102 JPMorgan Chase & Co./2020 Form 10-K stress when access to normal funding sources may be disrupted. Contingency funding plan The Firm's Contingency Funding Plan (CFP) sets out the strategies for addressing and managing liquidity resource needs during a liquidity stress event and incorporates liquidity risk limits, indicators and risk appetite tolerances that make up Liquidity Escalation Points. The CFP also identifies the alternative contingent funding and liquidity resources available to the Firm and its legal entities in a period of stress.

Liquidity Coverage Ratio The LCR rule requires that the Firm and JPMorgan Chase Bank, N.A. maintain an amount of eligible HQLA that is sufficient to meet its estimated total net cash outflows over a prospective 30 calendar-day period of significant stress. Eligible HQLA, for purposes of calculating the LCR, is the amount of unencumbered HQLA that satisfy certain operational considerations as defined in the LCR rule. HQLA primarily consist of cash and certain high-quality liquid securities as defined in the LCR rule. Under the LCR rule, the amount of eligible HQLA held by JPMorgan Chase Bank, N.A. that is in excess of its stand-alone 100% minimum LCR requirement, and that is not transferable to non-bank affiliates, must be excluded from the Firm's reported eligible HQLA. Estimated net cash outflows are based on standardized stress outflow and inflow rates prescribed in the LCR rule, which are applied to the balances of the Firm's assets, sources of funds, and obligations. The LCR for both the Firm and JPMorgan Chase Bank, N.A. is required to be a minimum of 100%. The following table summarizes the Firm and JPMorgan Chase Bank, N.A.'s average LCR for the three months ended December 31, 2020, September 30, 2020 and December 31, 2019 based on the Firm's interpretation of the LCR framework.

Three months ended	Average amount (in millions)			
December 31, 2020	September 30, 2020	December 31, 2019		
JPMorgan Chase & Co.:				
Eligible HQLA	Eligible cash (a)	\$ 455,612	\$ 458,336	\$ 203,296
Eligible securities (b)(c)	241,447	211,841	341,990	
Total eligible HQLA (d)	\$ 697,059	\$ 670,177	\$ 545,286	
Net cash outflows	\$ 634,037	\$ 587,811	\$ 469,402	
LCR	110	114	116	
% Net excess eligible HQLA (d)	\$ 63,022	\$ 82,366	\$ 75,884	
JPMorgan Chase Bank, N.A.:				
LCR	160	157	116	
% Net excess eligible HQLA	\$ 401,903	\$ 366,096	\$ 79,483	

(a) Represents cash on deposit at central banks, primarily the Federal Reserve Banks. (b) Predominantly U.S. Treasuries, U.S. GSE and government agency MBS, and sovereign bonds net of applicable haircuts under the LCR rule. (c) Eligible HQLA securities may be reported in securities borrowed or purchased under resale agreements, trading assets, or investment securities on the Firm's Consolidated balance sheets. (d) Excludes average excess eligible HQLA at JPMorgan Chase Bank, N.A. that are not transferable to non-bank affiliates. The Firm's average LCR decreased during the three months ended December 31, 2020, compared with the three-month period ended September 30, 2020, predominantly driven by a decrease in cash from long-term debt maturities, including the early termination of certain of the Firm's debt at the end of the third quarter 2020. The Firm's average LCR decreased during the three months ended December 31, 2020, compared with the prior year period primarily due to the relative impact on net cash outflows from the significant increase in deposits as well as elevated market activities in the CIB. JPMorgan Chase Bank, N.A.'s average LCR increased during the three months ended December 31, 2020, compared with both the three month periods ended September 30, 2020 and December 31, 2019 primarily due to growth in deposits. Deposits continued to increase in the fourth quarter primarily driven by the COVID-19 pandemic and the related effect of certain government actions. The increase in excess liquidity in JPMorgan Chase Bank, N.A. is excluded from the Firm's reported LCR under the LCR rule. The Firm's average LCR fluctuates from period to period, due to changes in its eligible HQLA and estimated net cash outflows as a result of ongoing business activity. Refer to the Firm's U.S. LCR Disclosure reports, which are available on the Firm's website for a further discussion of the Firm's LCR. JPMorgan Chase & Co./2020 Form 10-K 103 Management's discussion and analysis Other liquidity sources In addition to the assets reported in the Firm's eligible HQLA above, the Firm had unencumbered marketable securities, such as equity and debt securities, that the Firm believes would be available to raise liquidity. This includes securities included as part of the excess eligible HQLA at JPMorgan Chase Bank, N.A. that are not transferable to non-bank affiliates. The fair value of these securities was approximately \$740 billion and \$315 billion as of December 31, 2020 and 2019, respectively, although the amount of liquidity that could be raised would be dependent on prevailing market conditions. The fair value increased compared to December 31, 2019, due to an increase in excess eligible HQLA at JPMorgan Chase Bank, N.A.

which was primarily a result of increased deposits. The Firm also had available borrowing capacity at FHLBs and the discount window at the Federal Reserve Bank as a result of collateral pledged by the Firm to such banks of approximately \$307 billion and \$322 billion as of December 31, 2020 and 2019, respectively. This borrowing capacity excludes the benefit of cash and securities reported in the Firm's eligible HQLA or other unencumbered securities that are currently pledged at the Federal Reserve Bank discount window and other central banks. Available borrowing capacity decreased from December 31, 2019 primarily due to lower pledged credit card receivable balances driven by the COVID-19 pandemic and a decrease in pledged mortgage collateral as a result of paydown and maturity activity. Although available, the Firm does not view this borrowing capacity at the Federal Reserve Bank discount window and the other central banks as a primary source of liquidity.

NSFR The net stable funding ratio (NSFR) is a liquidity requirement for large banking organizations that is intended to measure the adequacy of available and required amounts of stable funding over a one-year horizon. On October 20, 2020, the federal banking agencies issued a final NSFR rule under which large banking organizations such as the Firm will be required to maintain an NSFR of at least 100% on an ongoing basis. The final NSFR rule will become effective on July 1, 2021, and the Firm will be required to publicly disclose its quarterly average NSFR semi-annually beginning in 2023. As of December 31, 2020 the Firm estimates that it was compliant with the 100% minimum NSFR based on its current understanding of the final rule.

104 JPMorgan Chase & Co./2020 Form 10-K Funding Sources of funds Management believes that the Firm's unsecured and secured funding capacity is sufficient to meet its on- and off-balance sheet obligations. The Firm funds its global balance sheet through diverse sources of funding including stable deposits, secured and unsecured funding in the capital markets and stockholders' equity. Deposits are the primary funding source for JPMorgan Chase Bank, N.A. Additionally, JPMorgan Chase Bank, N.A. may also access funding through short- or long-term secured borrowings, through the issuance of unsecured long-term debt, or from borrowings from the Parent Company or the IHC. The Firm's non-bank subsidiaries are primarily funded from long-term unsecured borrowings and short-term secured borrowings, primarily securities loaned or sold under repurchase agreements. Excess funding is invested by Treasury and CIO in the Firm's investment securities portfolio or deployed in cash or other short-term liquid investments based on their interest rate and liquidity risk characteristics.

Deposits The table below summarizes, by LOB and Corporate, the period-end and average deposit balances as of and for the years ended December 31, 2020 and 2019. As of or for the year ended December 31, Average (in millions) 2020 2019

	2020	2019
Consumer & Community Banking	\$ 958,706	\$ 723,418
(a)	\$ 851,390	\$ 698,378
Corporate & Investment Bank	702,215	511,905
(a)	655,095	515,938
Commercial Banking	284,263	184,115
	237,645	172,666
Asset & Wealth Management	198,755	142,740
(a)	161,955	135,265
Corporate	318	253
	666	820
Total Firm	\$ 2,144,257	\$ 1,562,431
	\$ 1,906,751	\$ 1,523,067

(a) In the fourth quarter of 2020, the Firm realigned certain wealth management clients from AWM to the J.P. Morgan Wealth Management business unit within CCB. In the first quarter of 2020, the Merchant Services business was realigned from CCB to CIB as part of the Firm's Wholesale Payments business. Prior-period amounts have been revised to conform with the current presentation.

Deposits provide a stable source of funding and reduce the Firm's reliance on the wholesale funding markets. A significant portion of the Firm's deposits are consumer deposits and wholesale operating deposits, which are both considered to be stable sources of liquidity. Wholesale operating deposits are considered to be stable sources of liquidity because they are generated from customers that maintain operating service relationships with the Firm. The table below shows the loan and deposit balances, the loans-to-deposits ratios, and deposits as a percentage of total liabilities, as of December 31, 2020 and 2019. As of December 31, (in billions except ratios) 2020 2019

	2020	2019
Deposits	\$ 2,144.3	\$ 1,562.4
Deposits as a % of total liabilities	69 %	64 %
Loans	1,012.9	997.6
Loans-to-deposits ratio	47 %	64 %

The Firm believes that average deposit balances are generally more representative of deposit trends than period-end deposit balances, over time. However, during periods of market disruption those trends could be affected. Average deposits increased for the year ended December 31, 2020, reflecting significant inflows across the LOBs primarily driven by the impact of the COVID-19 pandemic and the related effect of certain government actions. In the wholesale businesses, while the inflows principally occurred in March as clients sought to remain liquid as a result of market conditions, balances continued to increase through the end of 2020. In CCB, the increase was driven by lower spending and higher cash balances across both consumer and small business customers, as well as growth from existing and new accounts. Refer to the discussion of the Firm's Business Segment Results and the Consolidated Balance Sheets Analysis on pages 65-84 and pages 57-58, respectively, for further information on deposit and liability balance trends.

JPMorgan Chase & Co./2020 Form 10-K 105 Management's discussion and analysis The following table summarizes short-term and long-term funding, excluding deposits, as of December 31, 2020 and 2019, and average balances for the years ended December 31, 2020 and 2019. Refer to the Consolidated Balance Sheets Analysis on pages 57-58 and Note 20 for additional information.

Sources of funds (excluding deposits) As of or for the year ended December 31, Average (in millions) 2020 2019

	2020	2019
Commercial paper	\$ 12,031	\$ 14,754
	\$ 12,129	\$ 22,977

Other borrowed funds 8,510; 7,544; 9,198; 10,369; Total short-term unsecured funding \$ 20,541; \$ 22,298; \$ 21,327; \$ 33,346; Securities sold under agreements to repurchase (a) \$ 207,877; \$ 175,709; \$ 246,354; \$ 217,807; Securities loaned (a) 4,886; 5,983; 6,536; 8,816; Other borrowed funds (b) 24,667; 18,622; 23,812; 26,050; Obligations of Firm-administered multi-seller conduits (c) 10,523; 9,223; 11,430; 10,929; Total short-term secured funding \$ 247,953; \$ 209,537; \$ 288,132; \$ 263,602; Senior notes \$ 166,089; \$ 166,185; \$ 171,509; \$ 168,546; Subordinated debt 21,608; 17,591; 20,789; 17,387; Structured notes (d) 75,325; 74,724; 73,056; 65,487; Total long-term unsecured funding \$ 263,022; \$ 258,500; \$ 265,354; \$ 251,420; Credit card securitization (c) \$ 4,943; \$ 6,461; \$ 5,520; \$ 9,707; FHLB advances 14,123; 28,635; 27,076; 34,143; Other long-term secured funding (e) 4,540; 4,363; 4,460; 4,643; Total long-term secured funding \$ 23,606; \$ 39,459; \$ 37,056; \$ 48,493; Preferred stock (f) \$ 30,063; \$ 26,993; \$ 29,899; \$ 27,511; Common stockholders' equity (f) \$ 249,291; \$ 234,337; \$ 236,865; \$ 232,907; (a) Primarily consists of short-term securities loaned or sold under agreements to repurchase. (b) Effective March 2020, includes nonrecourse advances provided under the MMLF. (c) Included in beneficial interests issued by consolidated variable interest entities on the Firm's Consolidated balance sheets. (d) Includes certain TLAC-eligible long-term unsecured debt issued by the Parent Company. (e) Includes long-term structured notes which are secured. (f) Refer to Capital Risk Management on pages 91-101, Consolidated statements of changes in stockholders' equity on page 165, Note 21 and Note 22 for additional information on preferred stock and common stockholders' equity. Short-term funding The Firm's sources of short-term secured funding primarily consist of securities loaned or sold under agreements to repurchase. These instruments are secured predominantly by high-quality securities collateral, including government-issued debt and U.S. GSE and government agency MBS. Securities sold under agreements to repurchase increased at December 31, 2020, compared with December 31, 2019, reflecting higher secured financing of AFS investment securities in Treasury and CIO, as well as trading assets in CIB, partially offset by a decline in client-driven market-making activities in CIB, including the Firm's non-participation in the Federal Reserve's open market operations. The balances associated with securities loaned or sold under agreements to repurchase fluctuate over time due to investment and financing activities of clients, the Firm's demand for financing, the ongoing management of the mix of the Firm's liabilities, including its secured and unsecured financing (for both the investment securities and market-making portfolios), and other market and portfolio factors. As of December 31, 2020, the Firm participated in the MMLF government facility. The secured nonrecourse advances under the MMLF are included in other borrowed funds. Refer to Capital Risk Management on pages 91-101 for additional information on the MMLF. The Primary Dealer Credit Facility ("PDCF") was established by the Federal Reserve on March 20, 2020. Under the PDCF, the Federal Reserve Bank of New York (FRBNY) provides collateralized financing on a term basis to primary dealers. These financing transactions were reported as securities sold under agreements to repurchase. The Firm participated in the PDCF in the first quarter of 2020, and ceased its participation in May 2020 as the secured financing market normalized. The Firm's sources of short-term unsecured funding consist of other borrowed funds and issuance of wholesale commercial paper. The decrease in short-term unsecured funding at December 31, 2020, from December 31, 2019 and for the average year ended December 31, 2020 compared to the prior year period, was due to lower net commercial paper issuance primarily for short-term liquidity management. 106 JPMorgan Chase & Co./2020 Form 10-K Long-term funding and issuance Long-term funding provides an additional source of stable funding and liquidity for the Firm. The Firm's long-term funding plan is driven primarily by expected client activity, liquidity considerations, and regulatory requirements, including TLAC. Long-term funding objectives include maintaining diversification, maximizing market access and optimizing funding costs. The Firm evaluates various funding markets, tenors and currencies in creating its optimal long-term funding plan. The significant majority of the Firm's long-term unsecured funding is issued by the Parent Company to provide flexibility in support of both bank and non-bank subsidiary funding needs. The Parent Company advances substantially all net funding proceeds to its subsidiary, the IHC. The IHC does not issue debt to external counterparties. The following table summarizes long-term unsecured issuance and maturities or redemptions for the years ended December 31, 2020 and 2019. Refer to Note 20 for additional information on long-term debt.

Long-term unsecured funding	Year ended December 31, 2020	2019	2020	2019
(Notional in millions)	Parent Company	Subsidiaries	Issuance	
Senior notes issued in the U.S. market	\$ 25,500	\$ 14,000	\$ 60	\$ 1,750
Senior notes issued in non-U.S. markets	1,355	5,867		
Total senior notes	26,855	19,867	60	1,750
Subordinated debt	3,000			
Structured notes (a)	7,596	5,844	24,185	33,563
Total long-term unsecured funding	37,451	25,711	24,245	35,313
Maturities/redemptions	Senior notes	\$ 28,719	\$ 18,098	\$ 7,701
Subordinated debt	135	183		
Structured notes	5,340	2,944		

30,002; 19,271; Total long-term unsecured funding maturities/redemptions \$ 34,194; \$ 21,225; \$ 37,703; \$ 24,638; (a) Includes certain TLAC-eligible long-term unsecured debt issued by the Parent Company. The Firm can also raise secured long-term funding through securitization of consumer credit card loans and through FHLB advances. The following table summarizes the securitization issuance and FHLB advances and their respective maturities or redemptions for the years ended December 31, 2020 and 2019.

	2020	2019
Long-term secured funding	Year ended December 31, Issuance Maturities/Redemptions (in millions)	2020 2019
Credit card securitization	\$ 1,000; \$ 2,525; \$ 6,975; FHLB advances 15,000; 29,509; 15,817; Other long-term secured funding (a) 1,130; 204; 1,048; 927; Total long-term secured funding \$ 17,130; \$ 204; \$ 33,082; \$ 23,719; (a) Includes long-term structured notes which are secured. The Firm's wholesale businesses also securitize loans for client-driven transactions; those client-driven loan securitizations are not considered to be a source of funding for the Firm and are not included in the table above. Refer to Note 14 for a further description of client-driven loan securitizations.	

JPMorgan Chase & Co./2020 Form 10-K 107 Management's discussion and analysis Credit ratings The cost and availability of financing are influenced by credit ratings. Reductions in these ratings could have an adverse effect on the Firm's access to liquidity sources, increase the cost of funds, trigger additional collateral or funding requirements and decrease the number of investors and counterparties willing to lend to the Firm. The nature and magnitude of the impact of ratings downgrades depends on numerous contractual and behavioral factors, which the Firm believes are incorporated in its liquidity risk and stress testing metrics. The Firm believes that it maintains sufficient liquidity to withstand a potential decrease in funding capacity due to ratings downgrades. Additionally, the Firm's funding requirements for VIEs and other third-party commitments may be adversely affected by a decline in credit ratings. The credit ratings of the Parent Company and the Firm's principal bank and non-bank subsidiaries as of December 31, 2020 were as follows:

	Long-term issuer	Short-term issuer	Outlook
JPMorgan Chase & Co.	J.P. Morgan Securities LLC	J.P. Morgan Securities plc	December 31, 2020
Long-term issuer	Short-term issuer	Outlook	Moody's Investors Service
Aa2	P-1	Stable	Aa2
P-1	Stable	Aa3	P-1
Stable	Standard & Poor's	A-	A-2
Stable	A+	A-1	Stable
A+	A-1	Stable	Fitch Ratings
(a)	AA-	F1+	Negative
AA	F1+	Negative	AA
F1+	Negative	AA	F1+
Negative	(a)	On April 18, 2020, Fitch affirmed the credit ratings of the Parent Company and the Firm's principal bank and non-bank subsidiaries but revised the outlook on the credit ratings from stable to negative given expectations that credit fundamentals will deteriorate as a result of the COVID-19 pandemic.	

JPMorgan Chase's unsecured debt does not contain requirements that would call for an acceleration of payments, maturities or changes in the structure of the existing debt, provide any limitations on future borrowings or require additional collateral, based on unfavorable changes in the Firm's credit ratings, financial ratios, earnings, or stock price. Critical factors in maintaining high credit ratings include a stable and diverse earnings stream, strong capital and liquidity ratios, strong credit quality and risk management controls, and diverse funding sources. Rating agencies continue to evaluate economic and geopolitical trends, regulatory developments, future profitability, risk management practices, and litigation matters, as well as their broader ratings methodologies. Changes in any of these factors could lead to changes in the Firm's credit ratings.

108 JPMorgan Chase & Co./2020 Form 10-K REPUTATION RISK MANAGEMENT Reputation risk is the risk that an action or inaction may negatively impact perception of the Firm's integrity and reduce confidence in the Firm's competence by various constituents, including clients, counterparties, customers, investors, regulators, employees, communities or the broader public. Organization and management Reputation Risk Management establishes the governance framework for managing reputation risk across the Firm. As reputation risk is inherently challenging to identify, manage, and quantify, a reputation risk management function is critical. The Firm's reputation risk management function includes the following activities:

- Maintaining a Firmwide Reputation Risk Governance policy and standards consistent with the reputation risk framework
- Managing the governance infrastructure and processes that support consistent identification, escalation, management and monitoring of reputation risk issues Firmwide
- Providing guidance to LOB Reputation Risk Offices (RROs), as appropriate

The types of events that give rise to reputation risk are wide-ranging and could be introduced in various ways, including by the Firm's employees and the clients, customers and counterparties the Firm does business with. These events could result in financial losses, litigation and regulatory fines, as well as other damages to the Firm. Governance and oversight The Reputation Risk Governance policy establishes the principles for managing reputation risk for the Firm. It is the responsibility of employees in each LOB and Corporate to consider the reputation of the Firm when deciding whether to offer a new product, engage in a transaction or client relationship, enter a new jurisdiction, initiate a business process or other matters. Sustainability, social responsibility and environmental impacts are important considerations in assessing the Firm's reputation risk, and are a component of the Firm's reputation risk governance. Reputation risk issues deemed material are escalated as appropriate.

JPMorgan Chase & Co./2020 Form 10-K 109 Management's discussion and analysis CREDIT AND INVESTMENT RISK MANAGEMENT Credit and investment risk is the risk associated with the default or change in credit profile of a client, counterparty or customer; or loss of principal or a reduction in expected returns on investments,

including consumer credit risk, wholesale credit risk, and investment portfolio risk. Credit risk management Credit risk is the risk associated with the default or change in credit profile of a client, counterparty or customer. The Firm provides credit to a variety of customers, ranging from large corporate and institutional clients to individual consumers and small businesses. In its consumer businesses, the Firm is exposed to credit risk primarily through its home lending, credit card, auto, and business banking businesses. In its wholesale businesses, the Firm is exposed to credit risk through its underwriting, lending, market-making, and hedging activities with and for clients and counterparties, as well as through its operating services activities (such as cash management and clearing activities), and securities financing activities. The Firm is also exposed to credit risk through its investment securities portfolio and cash placed with banks. Credit Risk Management monitors, measures and manages credit risk throughout the Firm and defines credit risk policies and procedures. The Firm's credit risk management governance includes the following activities: Maintaining a credit risk policy framework Monitoring, measuring and managing credit risk across all portfolio segments, including transaction and exposure approval Setting industry and geographic concentration limits, as appropriate, and establishing underwriting guidelines Assigning and managing credit authorities in connection with the approval of credit exposure Managing criticized exposures and delinquent loans and Estimating credit losses and ensuring appropriate credit risk-based capital management Risk identification and measurement The Credit Risk Management function monitors, measures, manages and limits credit risk across the Firm's businesses. To measure credit risk, the Firm employs several methodologies for estimating the likelihood of obligor or counterparty default. Methodologies for measuring credit risk vary depending on several factors, including type of asset (e.g., consumer versus wholesale), risk measurement parameters (e.g., delinquency status and borrower's credit score versus wholesale risk-rating) and risk management and collection processes (e.g., retail collection center versus centrally managed workout groups). Credit risk measurement is based on the probability of default of an obligor or counterparty, the loss severity given a default event and the exposure at default. Based on these factors and the methodology and estimates described in Note 13 and Note 10, the Firm estimates credit losses for its exposures. The allowance for loan losses reflects credit losses related to the consumer and wholesale held-for-investment loan portfolios, the allowance for lending-related commitments reflects credit losses related to the Firm's lending-related commitments and the allowance for investment securities reflects the credit losses related to the Firm's HTM and AFS securities. Refer to Note 13, Note 10 and Critical Accounting Estimates used by the Firm on pages 152-155 for further information. In addition, potential and unexpected credit losses are reflected in the allocation of credit risk capital and represent the potential volatility of actual losses relative to the established allowances for loan losses and lending-related commitments. The analyses for these losses include stress testing that considers alternative economic scenarios as described in the Stress testing section below. Stress testing Stress testing is important in measuring and managing credit risk in the Firm's credit portfolio. The stress testing process assesses the potential impact of alternative economic and business scenarios on estimated credit losses for the Firm. Economic scenarios and the underlying parameters are defined centrally, articulated in terms of macroeconomic factors and applied across the businesses. The stress test results may indicate credit migration, changes in delinquency trends and potential losses in the credit portfolio. In addition to the periodic stress testing processes, management also considers additional stresses outside these scenarios, including industry and country-specific stress scenarios, as necessary. The Firm uses stress testing to inform decisions on setting risk appetite both at a Firm and LOB level, as well as to assess the impact of stress on individual counterparties.

110 JPMorgan Chase & Co./2020 Form 10-K Risk monitoring and management The Firm has developed policies and practices that are designed to preserve the independence and integrity of the approval and decision-making process of extending credit to ensure credit risks are assessed accurately, approved properly, monitored regularly and managed actively at both the transaction and portfolio levels. The policy framework establishes credit approval authorities, concentration limits, risk-rating methodologies, portfolio review parameters and guidelines for management of distressed exposures. In addition, certain models, assumptions and inputs used in evaluating and monitoring credit risk are independently validated by groups that are separate from the LOBs. Consumer credit risk is monitored for delinquency and other trends, including any concentrations at the portfolio level, as certain of these trends can be modified through changes in underwriting policies and portfolio guidelines. Consumer Risk Management evaluates delinquency and other trends against business expectations, current and forecasted economic conditions, and industry benchmarks. Historical and forecasted economic performance and trends are incorporated into the modeling of estimated consumer credit losses and are part of the monitoring of the credit risk profile of the portfolio. Wholesale credit risk is monitored regularly at an aggregate portfolio, industry, and individual client and counterparty level with established concentration limits that are reviewed and revised periodically as deemed appropriate by management. Industry and counterparty limits, as measured in terms of exposure and economic risk appetite, are subject to stress-based loss constraints. Wrong-way risk is the risk that exposure to a counterparty is positively correlated with the impact of a default by the same counterparty, which could cause exposure to increase at the same time as the counterparty's capacity to meet its obligations is decreasing. Management of the Firm's wholesale credit risk exposure is accomplished through a number of means, including: Loan underwriting and credit approval process

Loan syndications and participations; Loan sales and securitizations; Credit derivatives; Master netting agreements, and; Collateral and other risk-reduction techniques In addition to Credit Risk Management, an independent Credit Review function is responsible for: Independently validating or changing the risk grades assigned to exposures in the Firm's wholesale credit portfolio, and assessing the timeliness of risk grade changes initiated by responsible business units; and; Evaluating the effectiveness of business units' credit management processes, including the adequacy of credit analyses and risk grading/LGD rationales, proper monitoring and management of credit exposures, and compliance with applicable grading policies and underwriting guidelines. Refer to Note 12 for further discussion of consumer and wholesale loans. Risk reporting To enable monitoring of credit risk and effective decision-making, aggregate credit exposure, credit quality forecasts, concentration levels and risk profile changes are reported regularly to senior members of Credit Risk Management. Detailed portfolio reporting of industry, clients, counterparties and customers, product and geography are prepared, and the appropriateness of the allowance for credit losses is reviewed by senior management at least on a quarterly basis. Through the risk reporting and governance structure, credit risk trends and limit exceptions are provided regularly to, and discussed with, risk committees, senior management and the Board of Directors. JPMorgan Chase & Co./2020 Form 10-K 111 Management's discussion and analysis CREDIT PORTFOLIO Effective January 1, 2020, the Firm adopted the CECL accounting guidance. The adoption resulted in a change in the accounting for PCI loans, which are considered PCD loans under CECL. In conjunction with the adoption of CECL, the Firm reclassified risk-rated loans and lending-related commitments from the consumer, excluding credit card portfolio segment to the wholesale portfolio segment, to align with the methodology applied when determining the allowance. Prior-period amounts have been revised to conform with the current presentation. Refer to Note 1 for further information. The Firm has provided various forms of assistance to customers and clients impacted by the COVID-19 pandemic, including payment deferrals and covenant modifications. The majority of the Firm's COVID-19 related loan modifications have not been considered troubled debt restructurings (TDRs) because: they represent short-term or other insignificant modifications, whether under the Firm's regular loan modification assessments or the IA Statement guidance, or; the Firm has elected to apply the option to suspend the application of accounting guidance for TDRs provided by the CARES Act and extended by the Consolidated Appropriations Act. To the extent that certain modifications do not meet any of the above criteria, the Firm accounts for them as TDRs. The Firm considers expected losses of principal and accrued interest associated with all COVID-19 related loan modifications in its allowance for credit losses. Refer to Business Developments on pages 50-51 for more information on customer and client assistance granted. Refer to Notes 12 and 13 for further information on the Firm's accounting policies on loan modifications and the allowance for credit losses. The effectiveness of the Firm's actions in helping borrowers recover and in mitigating the Firm's credit losses remains uncertain in light of the unpredictable nature and duration of the COVID-19 pandemic. Assistance provided in response to the COVID-19 pandemic could delay the recognition of delinquencies, nonaccrual status, and net charge-offs for those customers and clients who would have otherwise moved into past due or nonaccrual status. Refer to Consumer Credit Portfolio on pages 114-120 and Wholesale Credit Portfolio on pages 121-131 for information on loan modifications as of December 31, 2020. In the following tables, reported loans include loans retained (i.e., held-for-investment); loans held-for-sale; and certain loans accounted for at fair value. The following tables do not include loans which the Firm accounts for at fair value and classifies as trading assets; refer to Notes 2 and 3 for further information regarding these loans. Refer to Notes 12, 28, and 5 for additional information on the Firm's loans, lending-related commitments and derivative receivables, including the Firm's accounting policies. Refer to Note 10 for information regarding the credit risk inherent in the Firm's investment securities portfolio; and refer to Note 11 for information regarding credit risk inherent in the securities financing portfolio. Refer to Consumer Credit Portfolio on pages 114-120 and Note 12 for further discussions of the consumer credit environment and consumer loans. Refer to Wholesale Credit Portfolio on pages 121-131 and Note 12 for further discussions of the wholesale credit environment and wholesale loans.

Average retained loans	958,303	941,919
Net charge-off rates	0.55	

Year ended December 31, (in millions, except ratios) 2020 2019

% 0.60; (a) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans, which resulted in a corresponding reclassification of certain off-balance sheet commitments. Prior-period amounts have been revised to conform with the current presentation.

(b) Receivables from customers reflect held-for-investment margin loans to brokerage clients in CIB, CCB and AWM; these are reported within accrued interest and accounts receivable on the Consolidated balance sheets. (c) Represents the net notional amount of protection purchased and sold through credit derivatives used to manage both performing and nonperforming wholesale credit exposures; these derivatives do not qualify for hedge accounting under U.S. GAAP. Refer to Credit derivatives on page 131 and Note 5 for additional information. (d) Prior-period amount has been revised to conform with the current presentation.

(e) In the fourth quarter of 2020, the Firm refined its approach for disclosing additional collateral held by the Firm that may be used as security when the fair value of the client's exposure is in the Firm's favor. Prior-period amounts have been revised to conform with the current presentation.

(f) At December 31, 2020 and 2019, nonperforming assets excluded mortgage loans 90 or more days past due and insured by U.S. government agencies of \$874 million and \$1.1 billion, respectively, and real estate owned (REO) insured by U.S. government agencies of \$9 million and \$41 million, respectively. Prior-period amount of mortgage loans 90 or more days past due and insured by U.S. government agencies excluded from nonperforming assets has been revised to conform with the current presentation; refer to footnote (a) for additional information. These amounts have been excluded based upon the government guarantee. In addition, the Firm's policy is generally to exempt credit card loans from being placed on nonaccrual status as permitted by regulatory guidance. (g) At December 31, 2020, nonperforming loans included \$ 1.6 billion of PCD loans on nonaccrual status.

Prior to the adoption of CECL, nonaccrual loans excluded PCI loans as the Firm recognized interest income on each pool of PCI loans as each of the pools was performing. Paycheck Protection Program The PPP, established by the CARES Act and implemented by the SBA, provided the Firm with delegated authority to process and originate PPP loans. When certain criteria are met, PPP loans are subject to forgiveness and the Firm will receive payment of the forgiveness amount from the SBA. PPP loans have a contractual term of two or five years and provide borrowers with an automatic payment deferral of principal and interest. Given that PPP loans are guaranteed by the SBA, the Firm does not expect to realize material credit losses on these loans. PPP processing fees are deferred and accreted into interest income over the contractual life of the loans, but may be accelerated upon forgiveness or prepayment. The impact on interest income related to PPP loans was not material for the year ended December 31, 2020. The Firm was in the early stages of the PPP loan forgiveness process at December 31, 2020. At December 31, 2020, the Firm had approximately \$27 billion of loans under the PPP, of which \$19 billion are in the consumer portfolio and \$8 billion are in the wholesale portfolio.

JPMorgan Chase & Co./2020 Form 10-K 113 Management's discussion and analysis CONSUMER CREDIT PORTFOLIO The Firm's retained consumer portfolio consists primarily of residential real estate loans, credit card loans, scored auto and business banking loans, as well as associated lending-related commitments. The Firm's focus is on serving primarily the prime segment of the consumer credit market. Originated mortgage loans are retained in the residential real estate portfolio, securitized or sold to U.S. government agencies and U.S. government-sponsored enterprises; other types of consumer loans are typically retained on the balance sheet. Refer to Note 12 for further information on the consumer loan portfolio. Refer to Note 28 for further information on lending-related commitments. In 2020, the allowance for credit losses increased, reflecting the deterioration in and uncertainty around the future macroeconomic environment as a result of the impact of the COVID-19 pandemic. Net charge-offs for the year ended December 31, 2020 decreased when compared to December 31, 2019, benefiting from payment assistance and government stimulus. The potential for increased infection rates and related lock downs, as well as the duration and effectiveness of government and other consumer relief measures remains uncertain which could have a longer term impact on delinquency rates and net charge-offs.

114 JPMorgan Chase & Co./2020 Form 10-K The following table presents consumer credit-related information with respect to the scored credit portfolio held in CCB, AWM, CIB and Corporate. Consumer credit portfolio As of or for the year ended December 31, (in millions, except ratios) Credit exposure Nonaccrual loans (j)(k)(l) Net charge-offs/(recoveries) Net charge-off/ (recovery) rate (m) 2020 2019 2020 2019 2020 2019 Consumer, excluding credit card Residential real estate (a) \$ 225,302 \$ 243,317 \$ 5,313 \$ 2,780 \$ (164) \$ (92) (0.07) % (0.04) % Auto and other (b)(c)(d) 76,825 51,682 151 \$ 146 338 \$ 456 0.51 (d) 0.88 Total loans - retained 302,127 294,999 5,464 2,926 174 364 0.06 0.12 Loans held-for-sale 1,305 3,002 2 NA NA NA NA Loans at fair value (e)(f) 15,147 19,816 1,003 438 NA NA NA NA Total consumer, excluding credit card loans 318,579 317,817 6,467 3,366 174 364 0.06 0.12 Lending-related commitments (g) 57,319 40,169 Total consumer exposure, excluding credit card 375,898 357,986 Credit Card Loans retained (h) 143,432 168,924 NA NA 4,286 4,848 2.93 3.10 Loans held-for-sale 784 822 NA NA NA NA NA Total credit card loans 144,216 168,924

NA NA 4,286 4,848 2.93 3.10 Lending-related commitments (g)(i) 658,506 650,720 Total credit card exposure (i) 802,722 819,644 Total consumer credit portfolio (i) \$ 1,178,620 \$ 1,177,630 \$ 6,467 \$ 3,366 \$ 4,460 \$ 5,212 0.99 % 1.11 % (a) Includes scored mortgage and home equity loans held in CCB and AWM, and scored mortgage loans held in Corporate . (b) At December 31, 2020 and 2019, excluded operating lease assets of \$20.6 billion and \$22.8 billion, respectively. These operating lease assets are included in other assets on the Firm’s Consolidated balance sheets. Refer to Note 18 for further information. (c) Includes scored auto and business banking loans and overdrafts. (d) At December 31, 2020, included \$19.2 billion of loans in Business Banking under the PPP. Given that PPP loans are guaranteed by the SBA, the Firm does not expect to realize material credit losses on these loans. Refer to Credit Portfolio on pages 112-113 for a further discussion of the PPP. (e) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans. Prior-period amounts have been revised to conform with the current presentation. (f) Includes scored mortgage loans held in CCB and CIB. (g) Credit card, home equity and certain business banking lending-related commitments represent the total available lines of credit for these products. The Firm has not experienced, and does not anticipate, that all available lines of credit would be used at the same time. For credit card commitments, and if certain conditions are met, home equity commitments and certain business banking commitments, the Firm can reduce or cancel these lines of credit by providing the borrower notice or, in some cases as permitted by law, without notice. Refer to Note 28 for further information. (h) Includes billed interest and fees. (i) Also includes commercial card lending-related commitments primarily in CB and CIB. (j) At December 31, 2020 and 2019, nonaccrual loans excluded mortgage loans 90 or more days past due and insured by U.S. government agencies of \$874 million and \$1.1 billion, respectively. Prior-period amount of mortgage loans 90 or more days past due and insured by U.S. government agencies excluded from nonaccrual loans has been revised to conform with the current presentation; refer to footnote (e) for additional information. These amounts have been excluded from nonaccrual loans based upon the government guarantee. In addition, the Firm’s policy is generally to exempt credit card loans from being placed on nonaccrual status, as permitted by regulatory guidance. (k) At December 31, 2020, nonaccrual loans included \$ 1.6 billion of PCD loans. Prior to the adoption of CECL, nonaccrual loans excluded PCI loans as the Firm recognized interest income on each pool of PCI loans as each of the pools was performing . (l) Generally excludes loans under payment deferral programs offered in response to the COVID-19 pandemic. Includes loans to customers that have exited COVID-19 payment deferral programs and are 90 or more days past due, predominantly all of which were also at least 150 days past due and therefore considered collateral-dependent. Collateral-dependent loans are charged down to the lower of amortized cost or fair value of the underlying collateral less costs to sell. (m) Average consumer loans held-for-sale and loans at fair value were \$18.3 billion and \$20.4 billion for the years ended December 31, 2020 and 2019, respectively. Prior-period amounts have been revised to conform with the current presentation; refer to footnote (e) for additional information. These amounts were excluded when calculating net charge-off/(recovery) rates. JPMorgan Chase & Co./2020 Form 10-K 115 Management’s discussion and analysis Consumer assistance In March 2020, the Firm began providing assistance to customers in response to the COVID-19 pandemic, predominantly in the form of payment deferrals. As of December 31, 2020, the Firm had \$10.7 billion of retained loans under payment deferral programs, which represented a decrease of approximately \$1.5 billion from September 30, 2020 and \$17.5 billion from June 30, 2020. During the fourth quarter of 2020, there were approximately \$1.4 billion of new enrollments in payment deferral programs predominantly in residential real estate and credit card. Predominantly all borrowers that exited payment deferral programs are current. The Firm continues to monitor the credit risk associated with loans subject to payment deferrals throughout the deferral period and on an ongoing basis after the borrowers are required to resume making regularly scheduled payments and considers expected losses of principal and accrued interest on these loans in its allowance for credit losses. December 31, 2020 September 30, 2020 June 30, 2020 (in millions, except ratios) Loan balance Percent of loan class balance (e) Percent of accounts who exited payment deferral and are current Loan balance Loan balance Type of assistance Residential real estate (a)(b) \$ 10,106 4.5 % 95 % \$ 11,458 \$ 20,548 Rolling three month payment deferral up to one year ; in most cases, deferred payments will be due at the end of the loan term Auto and other (c) 377 0.5 94 457 3,357 • Auto: Currently offering one month payment deferral (initially offered three month payment deferral). Maturity date is extended by number of months deferred • Business Banking: Three month deferral with automatic deferment to either maturity (loan) or one year forward (line) Credit card 264 0.2 90 (f) 368 4,384 Currently offering deferral of one month minimum payment (initially offered three month minimum payment deferral). Interest continues to accrue during the deferral period and is added to the principal balance Total consumer (d) \$ 10,747 2.4 % 91 % \$ 12,283 \$ 28,289 (a) Excludes \$13.4 billion, \$17.1 billion and \$34.0 billion of third-party mortgage loans serviced at December 31, 2020, September 30, 2020 and June 30, 2020, respectively. (b) The weighted average LTV ratio of residential real estate loans under payment deferral at December 31, 2020 was 57%. (c) Excludes risk-rated business banking and auto dealer loans held in CCB and auto operating lease assets that were still under payment deferral programs as of December 31, 2020, September 30, 2020 and June 30, 2020. Auto operating lease asset

payment assistance is currently offering one month payment deferral (initially offered three month payment deferral). Deferrals do not extend the term of the lease and all deferred payments are due at the end of the lease term. (d) Includes \$3.8 billion, \$3.8 billion and \$5.7 billion of loans that were accounted for as TDRs prior to payment deferral as of December 31, 2020, September 30, 2020 and June 30, 2020, respectively. (e) Represents the unpaid principal balance of retained loans which were still under payment deferral programs, divided by the total unpaid principal balance of the respective loan classes retained loans. (f) 85% of the balance that exited deferral were current at December 31, 2020. Of the \$10.7 billion of loans still under payment deferral programs as of December 31, 2020, approximately \$4.0 billion were accounted for as TDRs, either because they were accounted for as TDRs prior to payment deferral, or because they did not qualify for or the Firm did not elect the option to suspend TDR accounting guidance provided by the CARES Act and extended by the Consolidated Appropriations Act. A portion of the remaining \$6.7 billion of loans could become TDRs in future periods, depending on the nature and timing of further modifications or payment arrangements offered to these borrowers. If the remaining \$6.7 billion of loans were considered TDRs, the Firm estimates that it would result in an increase in standardized RWA of as much as \$2.5 billion. Predominantly all borrowers, including those accounted for as TDRs, were current upon enrollment in payment deferral programs and are expected to exit payment deferral programs in a current status, either because no payments are contractually due during the deferral period or because payments originally contractually due during the deferral period will be due at maturity upon exit. For those borrowers that are unable to resume making payments in accordance with the original or modified contractual terms of their agreements upon exit from deferral programs, they will be placed on nonaccrual status in line with the Firm's nonaccrual policy, except for credit cards as permitted by regulatory guidance, and charged off or down in accordance with the Firm's charge-off policies. Refer to Note 12 for additional information on the Firm's nonaccrual and charge-off policies.

116 JPMorgan Chase & Co./2020 Form 10-K Consumer, excluding credit card Portfolio analysis Loan balances were flat from December 31, 2019 as PPP loan originations in Business Banking were offset by lower residential real estate loans, reflecting paydowns. The following discussions provide information concerning individual loan products. Refer to Note 12 for further information about this portfolio, including information about delinquencies, loan modifications and other credit quality indicators. Residential real estate: The residential real estate portfolio, including loans held-for-sale and loans at fair value, predominantly consists of prime mortgage loans and home equity lines of credit. The portfolio decreased from December 31, 2019 driven by paydowns largely offset by originations of prime mortgage loans that have been retained on the balance sheet. The 30+ delinquency rate decreased to 0.98% at December 31, 2020, from 1.35% at December 31, 2019, primarily due to payment assistance and government stimulus. Nonaccrual loans increased from December 31, 2019 due primarily to loans placed on nonaccrual status related to the impact of the COVID-19 pandemic as well as the adoption of CECL, as PCD loans became subject to nonaccrual treatment. Net recoveries for the year ended December 31, 2020 were higher when compared with the prior year as the current year benefited from a recovery on a loan sale. The carrying value of home equity lines of credit outstanding was \$23.7 billion at December 31, 2020. This amount included \$8.6 billion of HELOCs that have recast from interest-only to fully amortizing payments or have been modified and \$7.7 billion of interest-only balloon HELOCs, which primarily mature after 2030. The Firm manages the risk of HELOCs during their revolving period by closing or reducing the undrawn line to the extent permitted by law when borrowers are exhibiting a material deterioration in their credit risk profile. At December 31, 2020 and 2019, the carrying value of interest-only residential mortgage loans were \$25.6 billion and \$22.5 billion, respectively. These loans have an interest-only payment period generally followed by an adjustable-rate or fixed-rate fully amortizing payment period to maturity and are typically originated as higher-balance loans to higher-income borrowers, predominantly in AWM. The net charge-off rate for the year ended December 31, 2020 was consistent with the rate of the broader residential mortgage portfolio as the performance of this portfolio is generally in line with the performance of the broader residential mortgage portfolio. The following table provides a summary of the Firm's residential mortgage portfolio insured and/or guaranteed by U.S. government agencies, predominantly loans held-for-sale and loans at fair value. The Firm monitors its exposure to certain potential unrecoverable claim payments related to government-insured loans and considers this exposure in estimating the allowance for loan losses.

(in millions)	December 31, 2020	December 31, 2019
Current	\$ 669	\$ 1,432
30-89 days past due	235	704
90 or more days past due	874	1,090
Total government guaranteed loans (a)	\$ 1,778	\$ 3,226

(a) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans. Prior-period amounts have been revised to conform with the current presentation. Geographic composition and current estimated loan-to-value ratio of residential real estate loans At December 31, 2020, \$146.6 billion, or 65% of the total retained residential real estate loan portfolio, excluding mortgage loans insured by U.S. government agencies, were concentrated in California, New York, Florida, Texas and Illinois, compared with \$157.9 billion, or 65%, at December 31, 2019. Average current estimated loan-to-value (ÜLTVÝ) ratios have declined consistent with recent improvements in home prices, customer pay-downs, and charge-offs or liquidations of higher LTV loans. Refer to Note 12 for information on the geographic composition and current estimated LTVs of the Firm's residential real estate loans. JPMorgan Chase & Co./2020 Form 10-K 117

Management's discussion and analysis Modified residential real estate loans The following table presents information relating to modified retained residential real estate loans for which concessions have been granted to borrowers experiencing financial difficulty, which include both TDRs and modified loans accounted for as PCI loans prior to the adoption of CECL. The following table does not include loans with short-term or other insignificant modifications that are not considered concessions and, therefore, are not TDRs, or loans for which the Firm has elected to apply the option to suspend the application of accounting guidance for TDRs as provided by the CARES Act and extended by the Consolidated Appropriations Act. Refer to Note 12 for further information on modifications for the years ended December 31, 2020 and 2019. (in millions) December 31, 2020 December 31, 2019 Retained loans (a) \$ 15,406 & 5,926; PCI loans NA 12,372 & 12,372; (d) Nonaccrual retained loans (b)(c) \$ 3,899 & 2,332; (a) At December 31, 2020 and 2019, \$7 million and \$14 million, respectively, of loans modified subsequent to repurchase from Ginnie Mae in accordance with the standards of the appropriate government agency (i.e., Federal Housing Administration (FHA), U.S. Department of Veterans Affairs (VA), Rural Housing Service of the U.S. Department of Agriculture (RHS)) are not included in the table above. When such loans perform subsequent to modification in accordance with Ginnie Mae guidelines, they are generally sold back into Ginnie Mae loan pools. Modified loans that do not re-perform become subject to foreclosure. Refer to Note 14 for additional information about sales of loans in securitization transactions with Ginnie Mae. (b) At December 31, 2020 and 2019, nonaccrual loans included \$3.0 billion and \$1.9 billion, respectively, of TDRs for which the borrowers were less than 90 days past due. Refer to Note 12 for additional information about loans modified in a TDR that are on nonaccrual status. (c) At December 31, 2020, nonaccrual loans included \$1.3 billion of PCD loans. Prior to the adoption of CECL, nonaccrual loans excluded PCI loans as the Firm recognized interest income on each pool of PCI loans as each of the pools was performing. (d) Amount represents the unpaid principal balance of modified PCI loans at December 31, 2019, which were moved to retained loans upon the adoption of CECL. Auto and other : The auto and other loan portfolio predominantly consists of prime-quality scored auto and business banking loans, as well as overdrafts. The portfolio increased when compared with December 31, 2019, predominantly due to PPP loan originations of \$21.9 billion in Business Banking of which \$19.2 billion remained outstanding at December 31, 2020 as well as from growth in the auto portfolio from loan originations, partially offset by paydowns and charge-offs or liquidation of delinquent loans. The 30+ delinquency rate decreased to 0.60% at December 31, 2020, from 1.31% at December 31, 2019, primarily due to payment assistance and government stimulus, as well as PPP loan originations as these loans are all considered current. The scored auto portfolio net charge-off rates were 0.25% and 0.44% for the years ended December 31, 2020 and 2019, respectively. Auto charge-offs for the year ended December 31, 2020 benefited from payment assistance programs and high vehicle collateral values. Nonperforming assets The following table presents information as of December 31, 2020 and 2019, about consumer, excluding credit card, nonperforming assets. Nonperforming assets (a) December 31, (in millions) 2020 2019 Nonaccrual loans Residential real estate (b)(c)(d) \$ 6,316 & \$ 3,220; Auto and other 151 & 146; Total nonaccrual loans 6,467 & 3,366; Assets acquired in loan satisfactions Real estate owned (e) 131 & 229; Other 21 & 24; Total assets acquired in loan satisfactions 152 & 253; Total nonperforming assets \$ 6,619 & \$ 3,619; (a) At December 31, 2020 and 2019, nonperforming assets excluded mortgage loans 90 or more days past due and insured by U.S. government agencies of \$874 million and \$1.1 billion, respectively, and REO insured by U.S. government agencies of \$9 million and \$41 million, respectively. Prior-period amount of mortgage loans 90 or more days past due and insured by U.S. government agencies excluded from nonperforming assets has been revised to conform with the current presentation; refer to footnote (b) for additional information. These amounts have been excluded based upon the government guarantee. (b) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans. Prior-period amounts have been revised to conform with the current presentation. (c) Generally excludes loans under payment deferral programs offered in response to the COVID-19 pandemic. Includes loans to customers that have exited COVID-19 payment deferral programs and are 90 or more days past due, predominantly all of which were also at least 150 days past due and therefore considered collateral-dependent. Collateral-dependent loans are charged down to the lower of amortized cost or fair value of the underlying collateral less costs to sell. (d) At December 31, 2020, nonaccrual loans included \$ 1.6 billion of PCD loans. Prior to the adoption of CECL, nonaccrual loans excluded PCI loans as the Firm recognized interest income on each pool of PCI loans as each of the pools was performing. (e) Prior-period amount has been revised to conform with the current presentation. 118 JPMorgan Chase & Co./2020 Form 10-K Nonaccrual loans The following table presents changes in consumer, excluding credit card, nonaccrual loans for the years ended December 31, 2020 and 2019. Nonaccrual loan activity (a) Year ended December 31, (in millions) 2020 2019 Beginning balance \$ 3,366 & \$ 3,853; Additions: PCD loans, upon adoption of CECL 708 & NA Other additions 5,184 & 2,174; Total additions 5,892 & 2,174 & 2,174; Reductions: Principal payments and other (b) 983 & 1,167; Charge-offs 390 & 371; Returned to performing status 1,024 & 751; Foreclosures and other liquidations 394 & 372; Total reductions 2,791 & 2,661; Net changes 3,101 & (487) Ending balance \$ 6,467 & \$ 3,366;

(a) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans. Prior-period amounts have been revised to conform with the current presentation. (b) Other reductions includes loan sales. (c) Includes loans to customers that have exited COVID-19 payment deferral programs and are 90 or more days past due, predominantly all of which were also at least 150 days past due and therefore considered collateral-dependent. Collateral-dependent loans are charged down to the lower of amortized cost or fair value of the underlying collateral less costs to sell. Active and suspended foreclosure: Refer to Note 12 for information on loans that were in the process of active or suspended foreclosure. Refer to Note 12 for further information about the consumer credit portfolio, including information about delinquencies, loan modifications and other credit quality indicators. Purchased credit deteriorated (“PCD”) loans The following tables provide credit-related information for PCD loans, which were accounted for as PCI loans prior to the adoption of CECL. PCI loans are considered PCD loans under CECL and are subject to the Firm’s nonaccrual and charge-off policies. PCD loans are now reported in the consumer, excluding credit card portfolio’s residential real estate class. Refer to Note 1 for further information. (in millions, except ratios) December 31, 2020 December 31, 2019 Loan delinquency (a) Current \$ 16,036 \$ 18,571 30-149 days past due 432 970 150 or more days past due (b) 573 822 Total PCD loans \$ 17,041 \$ 20,363 % of 30+ days past due to total retained PCD loans 5.90 % 8.80 % Nonaccrual loans (c) \$ 1,609 NA (in millions, except ratios) Twelve months ended December 31, 2020 Net charge-offs \$ 74 Net charge-off rate 0.39 % (a) At December 31, 2020, loans under payment deferral programs offered in response to the COVID-19 pandemic which are still within their deferral period and performing according to their modified terms are generally not considered delinquent. (b) Includes loans to customers that have exited COVID-19 payment deferral programs and are 150 or more days past due and therefore considered collateral-dependent. Collateral dependent loans are charged down to the lower of amortized cost or fair value of the underlying collateral less costs to sell. (c) Includes loans to customers that have exited COVID-19 payment deferral programs and are 90 or more days past due, predominantly all of which were also at least 150 days past due and therefore considered collateral-dependent. JPMorgan Chase & Co./2020 Form 10-K 119 Management’s discussion and analysis Credit card Total credit card loans decreased from December 31, 2019 reflecting a decline in sales volume that began in March as a result of the impact of the COVID-19 pandemic. The December 31, 2020 30+ and 90+ day delinquency rates of 1.68% and 0.92%, respectively, decreased compared to the December 31, 2019 30+ and 90+ day delinquency rates of 1.87% and 0.95%, respectively. The delinquency rates were positively impacted by borrowers who received payment assistance and government stimulus. Net charge-offs decreased for the year ended December 31, 2020 compared with the prior year reflecting lower charge-offs and higher recoveries primarily benefiting from payment assistance and government stimulus. Consistent with the Firm’s policy, all credit card loans typically remain on accrual status until charged off. However, the Firm’s allowance for loan losses includes the estimated uncollectible portion of accrued and billed interest and fee income. Refer to Note 12 for further information about this portfolio, including information about delinquencies. Geographic and FICO composition of credit card loans At December 31, 2020, \$65.0 billion, or 45% of the total retained credit card loan portfolio, was concentrated in California, Texas, New York, Florida and Illinois, compared with \$77.5 billion, or 46%, at December 31, 2019. Refer to Note 12 for additional information on the geographic and FICO composition of the Firm’s credit card loans. Modifications of credit card loans At December 31, 2020, the Firm had \$1.4 billion of credit card loans outstanding that have been modified in TDRs, which does not include loans with short-term or other insignificant modifications that are not considered TDRs, compared to \$1.5 billion at December 31, 2019. Refer to Note 12 for additional information about loan modification programs for borrowers. 120 JPMorgan Chase & Co./2020 Form 10-K WHOLESALE CREDIT PORTFOLIO In its wholesale businesses, the Firm is exposed to credit risk primarily through its underwriting, lending, market-making, and hedging activities with and for clients and counterparties, as well as through various operating services (such as cash management and clearing activities), securities financing activities and cash placed with banks. A portion of the loans originated or acquired by the Firm’s wholesale businesses is generally retained on the balance sheet. The Firm distributes a significant percentage of the loans that it originates into the market as part of its syndicated loan business and to manage portfolio concentrations and credit risk. The wholesale portfolio is actively managed, in part by conducting ongoing, in-depth reviews of client credit quality and transaction structure inclusive of collateral where applicable, and of industry, product and client concentrations. Refer to the industry discussion on pages 123-127 for further information. The Firm’s wholesale credit portfolio includes exposure held in CIB, CB, AWM and Corporate, as well as risk-rated business banking and auto dealer exposures held in CCB for which the wholesale methodology is applied when determining the allowance for credit losses. In 2020, the impacts of the COVID-19 pandemic resulted in broad-based credit deterioration and an increase in the allowance for credit losses. As of December 31, 2020, the investment-grade percentage of the portfolio decreased from 74% to 71%, and criticized exposure increased \$26.5 billion from \$15.1 billion to \$41.6 billion. The increase in criticized exposure was largely driven by downgrades in Consumer & Retail, Oil & Gas and Real Estate, and to a lesser extent, net portfolio activity in Technology, Media & Telecommunications. The continuation or worsening of the

effects of the COVID-19 pandemic on the macroeconomic environment could result in further impacts to credit quality metrics, including investment-grade percentages, as well as to criticized and nonperforming exposures and charge-offs. As of December 31, 2020 retained loans were up \$33.3 billion predominantly driven by AWM and CIB, and lending-related commitments were up \$32.4 billion, predominantly driven by CIB and CB. Wholesale credit portfolio December 31, (in millions) Credit exposure Nonperforming (f) 2020 2019 2020 2019 Loans retained \$ 514,947 \$ 481,678 \$ 3,318 \$ 1,057 Loans held-for-sale 5,784 4,062 284 5 Loans at fair value (a) 29,327 25,139 504 209 Loans – reported 550,058 510,879 4,106 1,271 Derivative receivables 79,630 49,766 56 30 Receivables from customers (b) 47,710 33,706 — — Total wholesale credit-related assets 677,398 594,351 4,162 1,301 Assets acquired in loan satisfactions Real estate owned (c) NA NA 125 115 Other NA NA — 19 Total assets acquired in loan satisfactions NA NA 125 134 Lending-related commitments (a) 449,863 417,510 577 474 Total wholesale credit portfolio \$ 1,127,261 \$ 1,011,861 \$ 4,864 \$ 1,909 Credit derivatives used in credit portfolio management activities (c)(d) \$ (22,239) \$ (18,530) \$ — \$ — Liquid securities and other cash collateral held against derivatives (e) (14,806) (13,052) NA NA (a) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans, which resulted in a corresponding reclassification of certain off-balance sheet commitments. Prior-period amounts have been revised to conform with the current presentation . (b) Receivables from customers reflect held-for-investment margin loans to brokerage clients in CIB, CCB and AWM; these are reported within accrued interest and accounts receivable on the Consolidated balance sheets. (c) Prior-period amounts have been revised to conform with the current presentation . (d) Represents the net notional amount of protection purchased and sold through credit derivatives used to manage both performing and nonperforming wholesale credit exposures; these derivatives do not qualify for hedge accounting under U.S. GAAP. Refer to Credit derivatives on page 131 and Note 5 for additional information. (e) In the fourth quarter of 2020, the Firm refined its approach for disclosing additional collateral held by the Firm that may be used as security when the fair value of the client’s exposure is in the Firm’s favor. Prior-period amounts have been revised to conform with the current presentation. (f) Loans that were modified in response to the COVID-19 pandemic continue to be risk-rated in accordance with the Firm’s overall credit risk management framework. As of December 31, 2020, predominantly all of these loans were considered performing. JPMorgan Chase & Co./2020 Form 10-K 121 Management’s discussion and analysis Wholesale assistance In March 2020, the Firm began providing assistance to clients in response to the COVID-19 pandemic, predominantly in the form of payment deferrals and covenant modifications. As of December 31, 2020, the Firm had approximately \$1.6 billion of retained loans still under payment deferral, which has decreased approximately \$4.6 billion from the third quarter, and \$15.1 billion from the second quarter. Predominantly all clients that exited deferral are current or have paid down their loans, and the Firm has not experienced significant new payment deferral requests. The Firm continues to monitor the credit risk associated with loans subject to deferrals throughout the deferral period and on an ongoing basis after the borrowers are required to resume making regularly scheduled payments and considers expected losses of principal and accrued interest on these loans in its allowance for credit losses. (in millions, except ratios) December 31, 2020 September 30, 2020 June 30, 2020 Industry Loan balance Percent of total industry loan balance (a) IG percentage of loan balance in payment deferral Loan balance Loan balance Real Estate \$ 550 0.46 % 36 % \$ 4,385 \$ 5,211 Individuals and Individual Entities 402 0.37 4 691 809 Transportation 394 5.99 92 346 294 Consumer & Retail 82 0.21 2 413 690 Automotive 22 0.13 — 15 8,827 Industrials 19 0.09 — 91 335 Healthcare 7 0.04 — 100 300 All Other industries 147 0.08 99 233 309 Total wholesale \$ 1,623 0.32 % 45 % \$ 6,274 \$ 16,775 (a) Represents the balance of the retained loans which were still under payment deferral, divided by the respective industry total retained loans balance. In addition, the Firm granted assistance in the form of covenant modifications. These types of assistance, both payment deferrals and covenant modifications, are generally not reported as TDRs, either because the modifications were insignificant or they qualified for the option to suspend the application of accounting guidance for TDRs as provided by the CARES Act and extended by the Consolidated Appropriations Act. A portion of the \$1.6 billion of loans under payment deferral as December 31, 2020 could become TDRs in future periods, depending on the nature and timing of further modifications or payment arrangements offered to these borrowers. If the \$1.6 billion of loans under payment deferral were considered TDRs, the Firm estimates that it would result in an increase in standardized RWA of as much as \$500 million. Loans under assistance continue to be risk-rated in accordance with the Firm’s overall credit risk management framework. As of December 31, 2020, predominantly all of these loans were considered performing. Wholesale credit exposure – maturity and ratings profile The following tables present the maturity and internal risk ratings profiles of the wholesale credit portfolio as of December 31, 2020 and 2019. The Firm generally considers internal ratings with qualitative characteristics

equivalent to BBB-/Baa3 or higher as investment grade, and takes into consideration collateral and structural support when determining the internal risk rating for each credit facility. Refer to Note 12 for further information on internal risk ratings.

(a) Prior-period amounts have been revised to conform with the current presentation. (b) In the fourth quarter of 2020, the Firm refined its approach for disclosing additional collateral held by the Firm that may be used as security when the fair value of the client's exposure is in the Firm's favor. Prior-period amounts have been revised to conform with the current presentation. (c) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans, which resulted in a corresponding reclassification of certain off-balance sheet commitments. Prior-period amounts have been revised to conform with the current presentation. (d) Represents loans held-for-sale, primarily related to syndicated loans and loans transferred from the retained portfolio, and loans at fair value. (e) These derivatives do not qualify for hedge accounting under U.S. GAAP. (f) The notional amounts are presented on a net basis by underlying reference entity and the ratings profile shown is based on the ratings of the reference entity on which protection has been purchased. Predominantly all of the credit derivatives entered into by the Firm where it has purchased protection used in credit portfolio management activities are executed with investment-grade counterparties. (g) The maturity profile of retained loans, lending-related commitments and derivative receivables is generally based on remaining contractual maturity.

Derivative contracts that are in a receivable position at December 31, 2020, may become payable prior to maturity based on their cash flow profile or changes in market conditions.

Wholesale credit exposure

The Firm focuses on the management and diversification of its industry exposures, and pays particular attention to industries with actual or potential credit concerns. Exposures deemed criticized align with the U.S. banking regulators' definition of criticized exposures, which consist of the special mention, substandard and doubtful categories. Total criticized exposure excluding loans held-for-sale and loans at fair value, was \$41.6 billion at December 31, 2020, compared with \$15.1 billion at December 31, 2019, representing approximately 4.0% and 1.5% of total wholesale credit exposure, respectively. The increase in total criticized exposure was largely driven by downgrades in Consumer & Retail, Oil & Gas and Real Estate due to impacts from the COVID-19 pandemic, and to a lesser extent, net portfolio activity in Technology, Media & Telecommunications. Predominantly all of the \$41.6 billion was performing and largely undrawn.

JPMorgan Chase & Co./2020 Form 10-K 123 Management's discussion and analysis

The table below summarizes by industry the Firm's exposures as of December 31, 2020 and 2019. The industry of risk category is generally based on the client or counterparty's primary business activity. Refer to Note 4 for additional information on industry concentrations.

 December 31, 2019, are based on the industry rankings of the corresponding exposures at December 31,
 2020, not actual rankings of such exposures at December 31, 2019. (b) Individuals and Individual Entities
 predominantly consists of Wealth Management clients within AWM and includes exposure to personal investment
 companies and personal and testamentary trusts. (c) In addition to the credit risk exposure to states and municipal
 governments (both U.S. and non-U.S.) at December 31, 2020 and 2019, noted above, the Firm held:
 \$7.2 billion and \$6.5 billion, respectively, of trading assets; \$20.4 billion and \$29.8 billion, respectively, of AFS

securities; and \$12.8 billion and \$4.8 billion, respectively, of HTM securities, issued by U.S. state and municipal governments. Refer to Note 2 and Note 10 for further information. (d) All other includes: SPEs and Private education and civic organizations, representing approximately 92% and 8%, respectively, at December 31, 2020 and 90% and 10%, respectively, at December 31, 2019. (e) Excludes cash placed with banks of \$516.9 billion and \$254.0 billion, at December 31, 2020 and 2019, respectively, which is predominantly placed with various central banks, primarily Federal Reserve Banks. (f) Credit exposure is net of risk participations and excludes the benefit of credit derivatives used in credit portfolio management activities held against derivative receivables or loans and liquid securities and other cash collateral held against derivative receivables. (g) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans, which resulted in a corresponding reclassification of certain off-balance sheet commitments. Prior-period amounts have been revised to conform with the current presentation. (h) Generally excludes loans under payment deferral programs offered in response to the COVID-19 pandemic. (i) Represents the net notional amounts of protection purchased and sold through credit derivatives used to manage the credit exposures; these derivatives do not qualify for hedge accounting under U.S. GAAP. The All other category includes purchased credit protection on certain credit indices. (j) Prior-period amount has been revised to conform with the current presentation. (k) In the fourth quarter of 2020, the Firm refined its approach for disclosing additional collateral held by the Firm that may be used as security when the fair value of the client's exposure is in the Firm's favor. Prior-period amounts have been revised to conform with the current presentation. JPMorgan Chase & Co./2020 Form 10-K 125 Management's discussion and analysis Presented below is additional detail on certain of the Firm's largest industry exposures and/or certain industries which present potential heightened credit concerns.

Real Estate Real Estate exposure was \$148.5 billion as of December 31, 2020, of which \$85.6 billion was multifamily lending as shown in the table below. During the year ended December 31, 2020, the following changes were primarily driven by impacts from the COVID-19 pandemic: the investment-grade portion of the Real Estate portfolio decreased from 81% to 78%; the drawn percentage of this portfolio increased from 78% to 80%; criticized exposure increased by \$3.3 billion from \$1.5 billion to \$4.8 billion December 31, 2020 (in millions, except ratios) Loans and Lending-related Commitments (d) Derivative Receivables Credit exposure % Investment-grade % Drawn (e) Multifamily (a) \$ 85,368; \$ 183; \$ 85,551; 85; % 92; % Office 16,372; 475; 16,847; 76; 70; Other Income Producing Properties (b) 13,435; 421; 13,856; 76; 55; Retail 10,573; 199; 10,772; 60; 69; Services and Non Income Producing 9,242; 22; 9,264; 62; 47; Industrial 9,039; 69; 9,108; 76; 73; Lodging 3,084; 16; 3,100; 24; 57; Total Real Estate Exposure (c) 147,113; 1,385; 148,498; 78; 80; December 31, 2019 (in millions, except ratios) Loans and Lending-related Commitments (d) Derivative Receivables Credit exposure % Investment-grade % Drawn (e) Multifamily (a) \$ 86,381; \$ 58; \$ 86,439; 91; % 92; % Office 15,734; 231; 15,965; 80; 70; Other Income Producing Properties (b) 14,372; 181; 14,553; 48; 45; Retail 11,347; 87; 11,434; 83; 68; Services and Non Income Producing 9,922; 19; 9,941; 57; 47; Industrial 8,842; 24; 8,866; 74; 75; Lodging 3,702; 19; 3,721; 51; 38; Total Real Estate Exposure 150,300; 619; 150,919; 81; 78; (a) Multifamily exposure is largely in California. (b) Other Income Producing Properties consists of clients with diversified property types or other property types outside of multifamily, office, retail, industrial and lodging with less material exposures. (c) Real Estate exposure is approximately 80% secured; unsecured exposure is approximately 78% investment-grade. (d) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans, which resulted in a corresponding reclassification of certain off-balance sheet commitments. Prior-period amounts have been revised to conform with the current presentation. (e) Represents drawn exposure as a percentage of credit exposure. 126 JPMorgan Chase & Co./2020 Form 10-K Consumer & Retail Consumer & Retail exposure was \$108.4 billion as of December 31, 2020, and predominantly included Retail, Food and Beverage, and Business and Consumer Services as shown in the table below. During the year ended December 31, 2020, the following changes were primarily driven by impacts from the COVID-19 pandemic: the investment-grade portion of the Consumer & Retail portfolio decreased from 55% to 53%; the drawn percentage of this portfolio increased from 35% to 36%; criticized exposure increased by \$6.7 billion from \$2.5 billion to \$9.2 billion December 31, 2020 (in millions, except ratios) Loans and Lending-related Commitments Derivative Receivables Credit exposure % Investment-grade % Drawn (d) Retail (a) \$ 32,486; \$ 887; \$ 33,373; 52; % 33; % Food and Beverage 28,012; 897; 28,909; 62; 33; Business and Consumer Services 24,760; 599; 25,359; 52; 41; Consumer Hard Goods 12,937; 178; 13,115; 59; 36; Leisure (b) 7,440; 241; 7,681; 18; 43; Total Consumer & Retail (c) 105,635; 2,802; 108,437; 53; 36; December 31, 2019 (in millions, except ratios) Loans and Lending-related Commitments Derivative Receivables Credit exposure % Investment-grade % Drawn (d) Retail (a) \$

29,290; \$ 294; \$ 29,584; 54; % 37; % Food and Beverage 27,956; 625; 28,581; 67; 36; Business and Consumer Services 24,242; 249; 24,491; 51; 37; Consumer Hard Goods 13,144; 109; 13,253; 65; 35; Leisure (b) 10,930; 147; 11,077; 21; 19; Total Consumer & Retail 105,562; 1,424; 106,986; 55; 35; (a) Retail consists of Home Improvement & Specialty Retailers, Restaurants, Supermarkets, Discount & Drug Stores, Specialty Apparel and Department Stores. (b) Leisure consists of Gaming, Arts & Culture, Travel Services and Sports & Recreation. As of December 31, 2020 approximately 75% of the noninvestment-grade Leisure portfolio is secured. (c) Approximately 80% of the noninvestment-grade portfolio is secured. (d) Represents drawn exposure as a percent of credit exposure. Oil & Gas Oil & Gas exposure was \$39.2 billion as of December 31, 2020, including \$19.3 billion of Exploration & Production and Oil field Services as shown in the table below. During the year ended December 31, 2020, the following changes were driven by lower oil prices and impacts from the COVID-19 pandemic: the investment-grade portion of the Oil & Gas portfolio decreased from 53% to 47%; criticized exposure increased by \$4.1 billion from \$1.6 billion to \$5.7 billion December 31, 2020 (in millions, except ratios) Loans and Lending-related Commitments Derivative Receivables Credit exposure % Investment-grade % Drawn (c) Exploration & Production ("E&P") and Oil field Services \$ 18,228; \$ 1,048; \$ 19,276; 32; % 37; % Other Oil & Gas (a) 19,288; 595; 19,883; 62; 21; Total Oil & Gas (b) 37,516; 1,643; 39,159; 47; 29; December 31, 2019 (in millions, except ratios) Loans and Lending-related Commitments Derivative Receivables Credit exposure % Investment-grade % Drawn (c) Exploration & Production ("E&P") and Oil field Services \$ 22,543; \$ 646; \$ 23,189; 38; % 38; % Other Oil & Gas (a) 18,246; 206; 18,452; 73; 23; Total Oil & Gas (b) 40,789; 852; 41,641; 53; 31; (a) Other Oil & Gas includes Integrated Oil & Gas companies, Midstream/Oil Pipeline companies and refineries. (b) Secured lending was \$13.2 billion and \$15.7 billion at December 31, 2020 and 2019, respectively, approximately half of which is reserve-based lending to the Exploration & Production sub-sector; unsecured exposure is largely investment-grade. (c) Represents drawn exposure as a percent of credit exposure. JPMorgan Chase & Co./2020 Form 10-K 127 Management's discussion and analysis Loans In its wholesale businesses, the Firm provides loans to a variety of clients, ranging from large corporate and institutional clients to high-net-worth individuals. Refer to Note 12 for a further discussion on loans, including information about delinquencies, loan modifications and other credit quality indicators. The following table presents the change in the nonaccrual loan portfolio for the years ended December 31, 2020 and 2019. The increase was driven by downgrades across multiple industries on client credit deterioration, with the largest concentration in Real Estate, predominantly within retail and lodging. Wholesale nonaccrual loan activity Year ended December 31, (in millions) 2020 2019 Beginning balance \$ 1,271; \$ 1,587; Additions (a) 6,753; 2,552; Reductions: Paydowns and other 2,290; 1,585; Gross charge-offs 922; 425; Returned to performing status 569; 652; Sales 137; 206; Total reductions 3,918; 2,868; Net changes 2,835; (316) Ending balance \$ 4,106; \$ 1,271; (a) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans. Prior-period amounts have been revised to conform with the current presentation. The following table presents net charge-offs/recoveries, which are defined as gross charge-offs less recoveries, for the years ended December 31, 2020 and 2019. The amounts in the table below do not include gains or losses from sales of nonaccrual loans. Wholesale net charge-offs/(recoveries) Year ended December 31, (in millions, except ratios) 2020 2019 Loans reported Average loans retained \$ 509,907; \$ 472,628; Gross charge-offs 954; 472; Gross recoveries collected (155) (57) Net charge-offs/(recoveries) 799; 415; Net charge-off/(recovery) rate 0.16; % 0.09; % 128 JPMorgan Chase & Co./2020 Form 10-K Lending-related commitments The Firm uses lending-related financial instruments, such as commitments (including revolving credit facilities) and guarantees, to address the financing needs of its clients. The contractual amounts of these financial instruments represent the maximum possible credit risk should the clients draw down on these commitments or when the Firm fulfills its obligations under these guarantees, and the clients subsequently fail to perform according to the terms of these contracts. Most of these commitments and guarantees have historically been refinanced, extended, cancelled, or expired without being drawn upon or a default occurring. As a result, the Firm does not believe that the total contractual amount of these wholesale lending-related commitments is representative of the Firm's expected future credit exposure or funding requirements. Refer to Note 28 for further information on wholesale lending-related commitments. Receivables from Customers Receivables from customers reflect held-for-investment margin loans to brokerage clients in CIB, CCB and AWM that are collateralized by assets maintained in the clients' brokerage accounts (e.g., cash on deposit, liquid and readily marketable debt or equity securities). Because of this collateralization, no allowance for credit losses is generally held against these receivables. To manage its credit risk the Firm establishes margin requirements and monitors the required margin levels on an ongoing basis, and requires clients to deposit additional cash or other collateral, or to reduce positions, when appropriate. These receivables are reported within accrued interest and accounts receivable on the Firm's Consolidated balance sheets. Clearing

services The Firm provides clearing services for clients entering into certain securities and derivative contracts. Through the provision of these services the Firm is exposed to the risk of non-performance by its clients and may be required to share in losses incurred by CCPs. Where possible, the Firm seeks to mitigate its credit risk to its clients through the collection of adequate margin at inception and throughout the life of the transactions and can also cease the provision of clearing services if clients do not adhere to their obligations under the clearing agreement. Refer to Note 28 for a further discussion of clearing services. Derivative contracts Derivatives enable clients and counterparties to manage risks including credit risk and risks arising from fluctuations in interest rates, foreign exchange, equities, and commodities. The Firm makes markets in derivatives in order to meet these needs and uses derivatives to manage certain risks associated with net open risk positions from its market-making activities, including the counterparty credit risk arising from derivative receivables. The Firm also uses derivative instruments to manage its own credit risk and other market risk exposure. The nature of the counterparty and the settlement mechanism of the derivative affect the credit risk to which the Firm is exposed. For OTC derivatives the Firm is exposed to the credit risk of the derivative counterparty. For exchange-traded derivatives (ETD), such as futures and options, and cleared over-the-counter (OTC-cleared) derivatives, the Firm can also be exposed to the credit risk of the relevant CCP. Where possible, the Firm seeks to mitigate its credit risk exposures arising from derivative contracts through the use of legally enforceable master netting arrangements and collateral agreements. The percentage of the Firm's over-the-counter derivative transactions subject to collateral agreements excluding foreign exchange spot trades, which are not typically covered by collateral agreements due to their short maturity and centrally cleared trades that are settled daily was approximately 88% and 90% at December 31, 2020 and 2019, respectively. Refer to Note 5 for additional information on the Firm's use of collateral agreements. Refer to Note 5 for a further discussion of derivative contracts, counterparties and settlement types. The fair value of derivative receivables reported on the Consolidated balance sheets were \$79.6 billion and \$49.8 billion at December 31, 2020 and 2019, respectively, with increases in CIB resulting from market movements. Derivative receivables represent the fair value of the derivative contracts after giving effect to legally enforceable master netting agreements and the related cash collateral held by the Firm. In addition, the Firm held liquid securities and other cash collateral that the Firm believes is legally enforceable and may be used as security when the fair value of the client's exposure is in the Firm's favor. Liquid securities represents high quality liquid assets as defined in the LCR rule. In management's view, the appropriate measure of current credit risk should also take into consideration other collateral, which generally represents securities that do not qualify as high quality liquid assets under the LCR rule, but that the Firm believes is legally enforceable. The collateral amounts for each counterparty are limited to the net derivative receivables for the counterparty. The following tables summarize the net derivative receivables and the internal ratings profile for the periods presented. Derivative receivables December 31, (in millions) 2020 2019 Total, net of cash collateral \$ 79,630; \$ 49,766; Liquid securities and other cash collateral held against derivative receivables (a) (14,806) (13,052) Total, net of liquid securities and other cash collateral \$ 64,824; \$ 36,714; Other collateral held against derivative receivables (a) (6,022) (1,837) Total, net of collateral \$ 58,802; \$ 34,877; (a) In the fourth quarter of 2020, the Firm refined its approach for disclosing additional collateral held by the Firm that may be used as security when the fair value of the client's exposure is in the Firm's favor. Prior-period amounts have been revised to conform with the current presentation. JPMorgan Chase & Co./2020 Form 10-K 129 Management's discussion and analysis Ratings profile of derivative receivables 2020 (a) 2019 (a) December 31, (in millions, except ratios) Exposure net of collateral % of exposure net of collateral Exposure net of collateral % of exposure net of collateral Investment-grade \$ 37,013; 63%; \$ 27,851; 80%; Noninvestment-grade 21,789; 37%; 7,026; 20%; Total \$ 58,802; 100%; \$ 34,877; 100%; (a) In the fourth quarter of 2020, the Firm refined its approach for disclosing additional collateral held by the Firm that may be used as security when the fair value of the client's exposure is in the Firm's favor. Prior-period amounts have been revised to conform with the current presentation. The Firm also holds additional collateral (primarily cash, G7 government securities, other liquid government agency and guaranteed securities, and corporate debt and equity securities) delivered by clients at the initiation of transactions, as well as collateral related to contracts that have a non-daily call frequency and collateral that the Firm has agreed to return but has not yet settled as of the reporting date. Although this collateral does not reduce the balances and is not included in the table above, it is available as security against potential exposure that could arise should the fair value of the client's derivative contracts move in the Firm's favor. Refer to Note 5 for additional information on the Firm's use of collateral agreements. While useful as a current view of credit exposure, the net fair value of the derivative receivables does not capture the potential future variability of that credit exposure. To capture the potential future variability of credit exposure, the Firm calculates, on a client-by-client basis, three measures of potential derivatives-related credit loss: Peak, Derivative Risk Equivalent (DRE), and Average exposure (AVG). These measures all incorporate netting and collateral benefits, where applicable. Peak represents a conservative measure of potential derivative exposure, including the benefit of collateral, to a counterparty calculated in a manner that is broadly equivalent to a 97.5% confidence level over the life of the

transaction. Peak is the primary measure used by the Firm for setting credit limits for derivative contracts, senior management reporting and derivatives exposure management. DRE exposure is a measure that expresses the risk of derivative exposure, including the benefit of collateral, on a basis intended to be equivalent to the risk of loan exposures. DRE is a less extreme measure of potential credit loss than Peak and is used as an input for aggregating derivative credit risk exposures with loans and other credit risk. Finally, AVG is a measure of the expected fair value of the Firm's derivative exposure, including the benefit of collateral, at future time periods. AVG over the total life of the derivative contract is used as the primary metric for pricing purposes and is used to calculate credit risk capital and CVA, as further described below. The fair value of the Firm's derivative receivables incorporates CVA to reflect the credit quality of counterparties. CVA is based on the Firm's AVG to a counterparty and the counterparty's credit spread in the credit derivatives market. The Firm believes that active risk management is essential to controlling the dynamic credit risk in the derivatives portfolio. In addition, the Firm's risk management process takes into consideration the potential impact of wrong-way risk, which is broadly defined as the risk that exposure to a counterparty is positively correlated with the impact of a default by the same counterparty, which could cause exposure to increase at the same time as the counterparty's capacity to meet its obligations is decreasing. Many factors may influence the nature and magnitude of these correlations over time. To the extent that these correlations are identified, the Firm may adjust the CVA associated with a particular counterparty's AVG. The Firm risk manages exposure to changes in CVA by entering into credit derivative contracts, as well as interest rate, foreign exchange, equity and commodity derivative contracts. The below graph shows exposure profiles to the Firm's current derivatives portfolio over the next 10 years as calculated by the Peak, DRE and AVG metrics. The three measures generally show that exposure will decline after the first year, if no new trades are added to the portfolio. Exposure profile of derivatives measures

December 31, 2020 (in billions) 130 JPMorgan Chase & Co./2020 Form 10-K Credit derivatives The Firm uses credit derivatives for two primary purposes: first, in its capacity as a market-maker, and second, as an end-user, to manage the Firm's own credit risk associated with various exposures. Credit portfolio management activities included in the Firm's end-user activities are credit derivatives used to mitigate the credit risk associated with traditional lending activities (loans and lending-related commitments) and derivatives counterparty exposure in the Firm's wholesale businesses (collectively, credit portfolio management activities). Information on credit portfolio management activities is provided in the table below. The Firm also uses credit derivatives as an end-user to manage other exposures, including credit risk arising from certain securities held in the Firm's market-making businesses. These credit derivatives are not included in credit portfolio management activities. Credit derivatives used in credit portfolio management activities

	2020	2019
Credit derivatives used to manage: Loans and lending-related commitments	\$ 3,877	\$ 2,047
Derivative receivables (a)	18,362	16,483
Credit derivatives used in credit portfolio management activities	\$ 22,239	\$ 18,530

(a) Prior-period amount has been revised to conform with the current presentation. (b) Amounts are presented net, considering the Firm's net protection purchased or sold with respect to each underlying reference entity or index. The credit derivatives used in credit portfolio management activities do not qualify for hedge accounting under U.S. GAAP; these derivatives are reported at fair value, with gains and losses recognized in principal transactions revenue. In contrast, the loans and lending-related commitments being risk-managed are accounted for on an accrual basis. This asymmetry in accounting treatment, between loans and lending-related commitments and the credit derivatives used in credit portfolio management activities, causes earnings volatility that is not representative, in the Firm's view, of the true changes in value of the Firm's overall credit exposure. The effectiveness of credit default swaps (CDS) as a hedge against the Firm's exposures may vary depending on a number of factors, including the named reference entity (i.e., the Firm may experience losses on specific exposures that are different than the named reference entities in the purchased CDS); the contractual terms of the CDS (which may have a defined credit event that does not align with an actual loss realized by the Firm); and the maturity of the Firm's CDS protection (which in some cases may be shorter than the Firm's exposures). However, the Firm generally seeks to purchase credit protection with a maturity date that is the same or similar to the maturity date of the exposure for which the protection was purchased, and remaining differences in maturity are actively monitored and managed by the Firm. Refer to Credit derivatives in Note 5 for a detailed description of credit derivatives. JPMorgan Chase & Co./2020 Form 10-K 131 Management's discussion and analysis ALLOWANCE FOR CREDIT LOSSES Effective January 1, 2020, the Firm adopted the CECL accounting guidance. The adoption of this guidance established a single allowance framework for all financial assets measured at amortized cost and certain off-balance sheet credit exposures. This framework requires that management's estimate reflects credit losses over the instrument's remaining expected life and considers expected future changes in macroeconomic conditions. Refer to Note 1 for further information. The Firm's allowance for credit losses comprises: the allowance for loan losses, which covers the Firm's retained loan portfolios (scored and risk-rated) and is presented separately on the Consolidated balance sheets; the allowance for lending-related commitments, which is presented on the Consolidated balance sheets in accounts payable and other liabilities, and the allowance for credit losses on investment securities, which

covers the Firm's HTM and AFS securities and is recognized within Investment Securities on the Consolidated balance sheets. The allowance for credit losses increased compared with December 31, 2019, primarily reflecting the deterioration and uncertainty in the macroeconomic environment, in particular in the first half of 2020, as a result of the impact of the COVID-19 pandemic, consisting of: a net \$7.4 billion addition in consumer, predominantly in the credit card portfolio, and a net \$4.7 billion addition in wholesale, across the LOBs, impacting multiple industries. The adoption of CECL on January 1, 2020, resulted in a \$4.3 billion addition to the allowance for credit losses. Discussion of changes in the allowance during 2020 The increase in the allowance for loan losses and lending-related commitments was primarily driven by an increase in the provision for credit losses, reflecting the deterioration in and uncertainty around the future macroeconomic environment as a result of the impact of the COVID-19 pandemic. As of December 31, 2020, the Firm's central case reflected U.S. unemployment rates of approximately 7% through the second quarter of 2021 and remaining above 5% until the second half of 2022. This compared with relatively low levels of unemployment of approximately 4% throughout 2020 and 2021 in the Firm's January 1, 2020 central case. Further, while the Firm's January 1, 2020 central case U.S. GDP forecast reflected a 1.7% expansion in 2020, actual U.S. GDP contracted approximately 2.5% in 2020. As of December 31, 2020, the Firm's central case assumptions reflect a return to pre-pandemic GDP levels in the fourth quarter of 2021. Due to elevated uncertainty in the near term outlook, driven by the potential for increased infection rates and related lock downs resulting from the pandemic, as well as the prospect that government and other consumer relief measures set to expire may not be extended, the Firm has placed significant weighting on its adverse scenarios. These scenarios incorporate more punitive macroeconomic factors than the central case assumptions, resulting in weighted average U.S. unemployment rates remaining elevated throughout 2021 and 2022, ending the fourth quarter of 2022 at approximately 6%, and in U.S. GDP ending 2022 approximately 0.9% higher than fourth quarter 2019 actual pre-pandemic levels. The Firm's central case assumptions reflected U.S. unemployment rates and U.S. real GDP as follows: Assumptions at January 1, 2020 2Q20 4Q20 (b) 2Q21 U.S. unemployment rate (a) 3.7%; 3.8%; 4.0%; % Cumulative change in U.S. real GDP from 12/31/2019 0.9%; 1.7%; 2.4%; % Assumptions at December 31, 2020 2Q21 4Q21 2Q22 U.S. unemployment rate (a) 6.8%; 5.7%; 5.1%; % Cumulative change in U.S. real GDP from 12/31/2019 (1.9) % 0.6%; 2.0%; % (a) Reflects quarterly average of forecasted U.S. unemployment rate. (b) 4Q20 actual U.S. unemployment rate (quarterly average) was 6.8%. 4Q20 actual cumulative change in U.S. real GDP from 4Q19 was (2.5%). Subsequent changes to this forecast and related estimates will be reflected in the provision for credit losses in future periods. Refer to Note 13 and Note 10 for a description of the policies, methodologies and judgments used to determine the Firm's allowances for credit losses on loans, lending-related commitments, and investment securities. Refer to Critical Accounting Estimates Used by the Firm on pages 152-155 for further information on the allowance for credit losses and related management judgments. Refer to Consumer Credit Portfolio on pages 114-120, Wholesale Credit Portfolio on pages 121-131 and Note 12 for additional information on the consumer and wholesale credit portfolios. 132 JPMorgan Chase & Co./2020 Form 10-K The adoption of the CECL accounting guidance resulted in a change in the accounting for PCI loans, which are considered PCD loans under CECL. In conjunction with the adoption of CECL, the Firm reclassified risk-rated loans and lending-related commitments from the consumer, excluding credit card portfolio segment to the wholesale portfolio segment, to align with the methodology applied when determining the allowance. Prior-period amounts have been revised to conform with the current presentation. Refer to Note 1 for further information. Allowance for credit losses and related information 2020 (d) 2019 Year ended December 31, Consumer, excluding credit card Credit card Wholesale Total Consumer, excluding credit card Credit card Wholesale Total (in millions, except ratios) Allowance for loan losses Beginning balance at January 1, \$ 2,538; \$ 5,683; \$ 4,902; \$ 13,123; \$ 3,434; \$ 5,184; \$ 4,827; \$ 13,445; Cumulative effect of a change in accounting principle 297; 5,517; (1,642) 4,172; NA NA NA NA Gross charge-offs 805; 5,077; 954; 6,836; 902; 5,436; 472; 6,810; Gross recoveries collected (631) (791) (155) (1,577) (536) (588) (57) (1,181) Net charge-offs 174; 4,286; 799; 5,259; 366; 4,848; 415; 5,629; Write-offs of PCI loans (a) NA NA NA NA 151; 151; 151; Provision for loan losses 974; 10,886; 4,431; 16,291; (378) 5,348; 479; 5,449; Other 1; 1; 1; (1) 11; 9; Ending balance at December 31, \$ 3,636; \$ 17,800; \$ 6,892; \$ 28,328; \$ 2,538; \$ 5,683; \$ 4,902; \$ 13,123; Allowance for lending-related commitments Beginning balance at January 1, \$ 12; \$ 1,179; \$ 1,191; \$ 12; \$ 1,043; \$ 1,055; Cumulative effect of a change in accounting principle 133; 133; (35) 98; NA NA NA Provision for lending-related commitments 42; 1,079; 1,121; 136; 136; Other 1; 1; 1; (1) 11; 9; Ending balance at December 31, \$ 187; \$ 2,222; \$ 2,409; \$ 12; \$ 1,179; \$ 1,191; Impairment methodology Asset-specific (b) \$ (7) \$ 633; \$ 682; \$ 1,308; \$ 75; \$ 477; \$ 295; \$ 847; Portfolio-based 3,643; 17,167

A write-off of a PCI loan was recognized when the underlying loan was removed from a pool. (b) Includes modified PCD loans and loans that have been modified or are reasonably expected to be modified in a TDR. Also includes risk-rated loans that have been placed on nonaccrual status for the wholesale portfolio segment. The asset-specific credit card allowance for loan losses modified or reasonably expected to be modified in a TDR is calculated based on the loans; original contractual interest rates and does not consider any incremental penalty rates. (c) The Firm's policy is generally to exempt credit card loans from being placed on nonaccrual status as permitted by regulatory guidance. (d) Excludes HTM securities, which had an allowance for credit losses of \$ 78 million and a provision for credit losses of \$ 68 million as of and for the year ended December 31, 2020. JPMorgan Chase & Co./2020 Form 10-K 133 Management's discussion and analysis INVESTMENT PORTFOLIO RISK MANAGEMENT Investment portfolio risk is the risk associated with the loss of principal or a reduction in expected returns on investments arising from the investment securities portfolio or from principal investments. The investment securities portfolio is predominantly held by Treasury and CIO in connection with the Firm's balance sheet or asset-liability management objectives. Principal investments are predominantly privately-held non-traded financial instruments and are managed in the LOBs and Corporate. Investments are typically intended to be held over extended periods and, accordingly, the Firm has no expectation for short-term realized gains with respect to these investments. Investment securities risk Investment securities risk includes the exposure associated with a default in the payment of principal and interest. This risk is mitigated given that the investment securities portfolio held by Treasury and CIO is predominantly invested in high-quality securities. At December 31, 2020, the Treasury and CIO investment securities portfolio, net of allowance for credit losses, was \$587.9 billion, and the average credit rating of the securities comprising the portfolio was AA+ (based upon external ratings where available and where not available, based primarily upon internal risk ratings). Refer to Corporate segment results on pages 83;84 and Note 10 for further information on the investment securities portfolio and internal risk ratings. Refer to Market Risk Management on pages 135;142 for further information on the market risk inherent in the portfolio. Refer to Liquidity Risk Management on pages 102;108 for further information on related liquidity risk. Governance and oversight Investment securities risks are governed by the Firm's Risk Appetite framework, and reviewed at the CTC Risk Committee with regular updates to the Board Risk Committee. The Firm's independent control functions are responsible for reviewing the appropriateness of the carrying value of investment securities in accordance with relevant policies. Approved levels for investment securities are established for each risk category, including capital and credit risks. Principal investment risk Principal investments are typically privately held non-traded financial instruments representing ownership or other forms of junior capital and span multiple asset classes. These investments are made by dedicated investing businesses or as part of a broader business strategy. In general, principal investments include tax-oriented investments and investments made to enhance or accelerate the Firm's business strategies. The Firm's investments will continue to evolve in line with its strategies, including the Firm's commitment to support underserved communities and minority-owned businesses. The Firm's principal investments are managed by the LOBs and Corporate and are reflected within their respective financial results. The aggregate carrying values of the principal investment portfolios have not been significantly affected by recent market events as a result of the COVID-19 pandemic. However, the duration and severity of adverse macroeconomic conditions could subject certain principal investments to impairments, write-downs, or other negative impacts. As of December 31, 2020 and 2019, the aggregate carrying values of the principal investment portfolios were \$27.5 billion and \$24.2 billion, respectively, which included tax-oriented investments (e.g., alternative

energy and affordable housing investments) of \$21.3 billion and \$18.2 billion, respectively, and private equity, various debt and equity instruments, and real assets of \$6.2 billion and \$6.0 billion, respectively. Governance and oversight The Firm's approach to managing principal risk is consistent with the Firm's risk governance structure. A Firmwide risk policy framework exists for all principal investing activities and includes approval by executives who are independent from the investing businesses, as appropriate. The Firm's independent control functions are responsible for reviewing the appropriateness of the carrying value of investments in accordance with relevant policies. As part of the risk governance structure, approved levels for investments are established and monitored for each relevant business or segment in order to manage the overall size of the portfolios. The Firm also conducts stress testing on these portfolios using specific scenarios that estimate losses based on significant market moves and/or other risk events.

134 JPMorgan Chase & Co./2020 Form 10-K MARKET RISK MANAGEMENT Market risk is the risk associated with the effect of changes in market factors, such as interest and foreign exchange rates, equity and commodity prices, credit spreads or implied volatilities, on the value of assets and liabilities held for both the short and long term. Market Risk Management Market Risk Management monitors market risks throughout the Firm and defines market risk policies and procedures. Market Risk Management seeks to manage risk, facilitate efficient risk/return decisions, reduce volatility in operating performance and provide transparency into the Firm's market risk profile for senior management, the Board of Directors and regulators. Market Risk Management is responsible for the following functions:

- Maintaining a market risk policy framework
- Independently measuring, monitoring and controlling LOB, Corporate, and Firmwide market risk
- Defining, approving and monitoring of limits
- Performing stress testing and qualitative risk assessments

Risk measurement Measures used to capture market risk There is no single measure to capture market risk and therefore Market Risk Management uses various metrics, both statistical and nonstatistical, to assess risk including:

- Value-at-risk (VaR)
- Stress testing
- Profit and loss drawdowns
- Earnings-at-risk
- Other sensitivity-based measures

Risk monitoring and control Market risk exposure is managed primarily through a series of limits set in the context of the market environment and business strategy. In setting limits, Market Risk Management takes into consideration factors such as market volatility, product liquidity, accommodation of client business, and management experience. Market Risk Management maintains different levels of limits. Firm level limits include VaR and stress limits. Similarly, LOB and Corporate limits include VaR and stress limits and may be supplemented by certain nonstatistical risk measures such as profit and loss drawdowns. Limits may also be set within the LOBs and Corporate, as well as at the legal entity level. Market Risk Management sets limits and regularly reviews and updates them as appropriate. Senior management is responsible for reviewing and approving certain of these risk limits on an ongoing basis. Limits that have not been reviewed within specified time periods by Market Risk Management are reported to senior management. The LOBs and Corporate are responsible for adhering to established limits against which exposures are monitored and reported. Limit breaches are required to be reported in a timely manner to limit approvers, which include Market Risk Management and senior management. In the event of a breach, Market Risk Management consults with appropriate members of the Firm to determine the suitable course of action required to return the applicable positions to compliance, which may include a reduction in risk in order to remedy the breach or granting a temporary increase in limits to accommodate an expected increase in client activity and/or market volatility. Certain Firm, Corporate or LOB-level limit breaches are escalated as appropriate. COVID-19 Pandemic Market Risk Management continues to actively monitor the impact of the COVID-19 pandemic on market risk exposures by leveraging existing risk measures and controls. Models used to measure market risk are inherently imprecise and are limited in their ability to measure certain risks or to predict losses. This imprecision may be heightened when sudden or severe shifts in market conditions occur, such as those observed at the onset of the COVID-19 pandemic. For additional discussion on model uncertainty refer to Estimations and Model Risk Management on page 151. Market Risk Management periodically reviews the Firm's existing market risk measures to identify opportunities for enhancement, and to the extent appropriate, will calibrate those measures accordingly over time. This is increasingly important in periods of sustained, heightened market volatility.

JPMorgan Chase & Co./2020 Form 10-K 135 Management's discussion and analysis The following table summarizes the predominant business activities and related market risks, as well as positions which give rise to market risk and certain measures used to capture those risks, for each LOB and Corporate. In addition to the predominant business activities, each LOB and Corporate may engage in principal investing activities. To the extent principal investments are deemed market risk sensitive, they are reflected in relevant risk measures and captured in the table below. Refer to Investment Portfolio Risk Management on page 134 for additional discussion on principal investments.

LOBs and Corporate	Predominant business activities	Related market risks	Positions included in Risk Management VaR	Positions included in earnings-at-risk	Positions included in other sensitivity-based measures
CCB	Services mortgage loans	Originates loans and takes deposits	Risk from changes in the probability of newly originated mortgage commitments closing	Interest rate risk and prepayment risk	Mortgage commitments, classified as derivatives
Warehouse	Warehouse loans that are fair value option elected, classified as loans	debt instruments	MSRs	Hedges of mortgage commitments, warehouse loans and MSRs, classified as derivatives	Interest-only and mortgage-backed securities, classified as trading assets

instruments, and related hedges, classified as derivatives; Fair value option elected liabilities (a); Retained loan portfolio; Deposits; Fair value option elected liabilities DVA (a) CIB; Makes markets and services clients across fixed income, foreign exchange, equities and commodities; Originates loans and takes deposits; Risk of loss from adverse movements in market prices and implied volatilities across interest rate, foreign exchange, credit, commodity and equity instruments; Basis and correlation risk from changes in the way asset values move relative to one another; Interest rate risk and prepayment risk; Trading assets/liabilities; debt and marketable equity instruments, and derivatives, including hedges of the retained loan portfolio; Certain securities purchased, loaned or sold under resale agreements and securities borrowed; Fair value option elected liabilities (a); Derivative CVA and associated hedges; Marketable equity investments; Retained loan portfolio; Deposits; Privately held equity and other investments measured at fair value; and certain asset-backed fair value option elected loans; Derivatives FVA and fair value option elected liabilities DVA (a) CB; Originates loans and takes deposits; Interest rate risk and prepayment risk; Marketable equity investments (b); Retained loan portfolio; Deposits AWM; Provides initial capital investments in products such as mutual funds and capital invested alongside third-party investors; Originates loans and takes deposits; Risk from adverse movements in market factors (e.g., market prices, rates and credit spreads); Interest rate risk and prepayment risk; Debt securities held in advance of distribution to clients, classified as trading assets - debt instruments (b); Retained loan portfolio; Deposits; Initial seed capital investments and related hedges, classified as derivatives; Capital invested alongside third-party investors, typically in privately distributed collective vehicles managed by AWM (i.e., co-investments) Corporate; Manages the Firm's liquidity, funding, capital, structural interest rate and foreign exchange risks; Structural interest rate risk from the Firm's traditional banking activities; Structural non-USD foreign exchange risks; Derivative positions measured at fair value through noninterest revenue in earnings; Marketable equity investments; Deposits with banks; Investment securities portfolio and related interest rate hedges; Long-term debt and related interest rate hedges; Privately held equity and other investments measured at fair value; Foreign exchange exposure related to Firm-issued non-USD long-term debt (<D;) and related hedges (a) Reflects structured notes in Risk Management VaR and the DVA on structured notes in other sensitivity-based measures. (b) The AWM and CB contributions to Firmwide average VaR were not material for the year ended December 31, 2020 and 2019. 136 JPMorgan Chase & Co./2020 Form 10-K Value-at-risk JPMorgan Chase utilizes VaR, a statistical risk measure, to estimate the potential loss from adverse market moves in the current market environment. The Firm has a single VaR framework used as a basis for calculating Risk Management VaR and Regulatory VaR. The framework is employed across the Firm using historical simulation based on data for the previous 12 months. The framework's approach assumes that historical changes in market values are representative of the distribution of potential outcomes in the immediate future. The Firm believes the use of Risk Management VaR provides a daily measure of risk that is closely aligned to risk management decisions made by the LOBs and Corporate and, along with other market risk measures, provides the appropriate information needed to respond to risk events. The Firm's Risk Management VaR is calculated assuming a one-day holding period and an expected tail-loss methodology which approximates a 95% confidence level. Risk Management VaR provides a consistent framework to measure risk profiles and levels of diversification across product types and is used for aggregating risks and monitoring limits across businesses. VaR results are reported to senior management, the Board of Directors and regulators. Under the Firm's Risk Management VaR methodology, assuming current changes in market values are consistent with the historical changes used in the simulation, the Firm would expect to incur VaR backtesting exceptions, defined as losses greater than that predicted by VaR estimates, an average of five times every 100 trading days. The number of VaR backtesting exceptions observed can differ from the statistically expected number of backtesting exceptions if the current level of market volatility is materially different from the level of market volatility during the 12 months of historical data used in the VaR calculation. Underlying the overall VaR model framework are individual VaR models that simulate historical market returns for individual risk factors and/or product types. To capture material market risks as part of the Firm's risk management framework, comprehensive VaR model calculations are performed daily for businesses whose activities give rise to market risk. These VaR models are granular and incorporate numerous risk factors and inputs to simulate daily changes in market values over the historical period; inputs are selected based on the risk profile of each portfolio, as sensitivities and historical time series used to generate daily market values may be different across product types or risk management systems. The VaR model results across all portfolios are aggregated at the Firm level. As VaR is based on historical data, it is an imperfect measure of market risk exposure and potential future losses. In addition, based on their reliance on available historical data, limited time horizons, and other factors, VaR measures are inherently limited in their ability to measure certain risks and to predict losses, particularly those associated with market illiquidity and sudden or severe shifts in market conditions. For certain products, specific risk parameters are not captured in VaR due to the lack of liquidity and availability of appropriate historical data. The Firm

uses proxies to estimate the VaR for these and other products when daily time series are not available. It is likely that using an actual price-based time series for these products, if available, would affect the VaR results presented. The Firm therefore considers other nonstatistical measures such as stress testing, in addition to VaR, to capture and manage its market risk positions. The daily market data used in VaR models may be different than the independent third-party data collected for VCG price testing in its monthly valuation process. For example, in cases where market prices are not observable, or where proxies are used in VaR historical time series, the data sources may differ. Refer to Valuation process in Note 2 for further information on the Firm's valuation process. As VaR model calculations require daily data and a consistent source for valuation, it may not be practical to use the data collected in the VCG monthly valuation process for VaR model calculations. The Firm's VaR model calculations are periodically evaluated and enhanced in response to changes in the composition of the Firm's portfolios, changes in market conditions, improvements in the Firm's modeling techniques and measurements, and other factors. Such changes may affect historical comparisons of VaR results. Refer to Estimations and Model Risk Management on page 151 for information regarding model reviews and approvals. The Firm calculates separately a daily aggregated VaR in accordance with regulatory rules (Regulatory VaR), which is used to derive the Firm's regulatory VaR-based capital requirements under Basel III. This Regulatory VaR model framework currently assumes a ten business-day holding period and an expected tail loss methodology which approximates a 99% confidence level. Regulatory VaR is applied to covered positions as defined by Basel III, which may be different than the positions included in the Firm's Risk Management VaR. For example, credit derivative hedges of accrual loans are included in the Firm's Risk Management VaR, while Regulatory VaR excludes these credit derivative hedges. In addition, in contrast to the Firm's Risk Management VaR, Regulatory VaR currently excludes the diversification benefit for certain VaR models. JPMorgan Chase & Co./2020 Form 10-K 137 Management's discussion and analysis Refer to JPMorgan Chase's Basel III Pillar 3 Regulatory Capital Disclosures reports, which are available on the Firm's website, for additional information on Regulatory VaR and the other components of market risk regulatory capital for the Firm (e.g., VaR-based measure, stressed VaR-based measure and the respective backtesting). The table below shows the results of the Firm's Risk Management VaR measure using a 95% confidence level. VaR can vary significantly as positions change, market volatility fluctuates, and diversification benefits change. Total VaR As of or for the year ended December 31, 2020 2019 (in millions) Avg. Min Max Avg. Min Max CIB trading VaR by risk type Fixed income \$ 98 \$ 35 \$ 156 \$ 40 \$ 31 \$ 50; Foreign exchange 10 \$ 4 \$ 18 \$ 7 \$ 4 \$ 15; Equities 24 \$ 13 \$ 41 \$ 20 \$ 13 \$ 31; Commodities and other 28 \$ 7 \$ 47 \$ 8 \$ 6 \$ 12; Diversification benefit to CIB trading VaR (67) (a) NM (b) NM (b) (33) (a) NM (b) NM (b) CIB trading VaR 93 \$ 32 (b) 160 (b) 42 \$ 29 (b) 61 (b) Credit portfolio VaR 16 \$ 3 \$ 28 \$ 5 \$ 3 \$ 7; Diversification benefit to CIB VaR (17) (a) NM (b) NM (b) (5) (a) NM (b) NM (b) CIB VaR 92 \$ 31 (b) 162 (b) 42 \$ 29 (b) 63 (b) CCB VaR 5 \$ 1 \$ 12 \$ 5 \$ 1 \$ 11; Corporate and other LOB VaR 19 \$ 9 \$ 82 (c) 10 \$ 9 \$ 13 \$ 13; Diversification benefit to other VaR (4) (a) NM (b) NM (b) (4) (a) NM (b) NM (b) Other VaR 20 \$ 10 (b) 82 (b) 11 \$ 8 (b) 17 (b) Diversification benefit to CIB and other VaR (17) (a) NM (b) NM (b) (10) (a) NM (b) NM (b) Total VaR \$ 95 \$ 32 (b) \$ 164 (b) \$ 43 \$ 30 (b) \$ 65 (b) (a) Diversification benefit represents the difference between the portfolio VaR and the sum of its individual components. This reflects the non-additive nature of VaR due to imperfect correlation across LOBs, Corporate, and risk types. (b) The maximum and minimum VaR for each portfolio may have occurred on different trading days than the components and consequently diversification benefit is not meaningful. (c) Maximum Corporate and other LOB VaR was higher than the prior year, due to increases in the fourth quarter of 2020 driven by a private equity position that became publicly traded at the end of the third quarter of 2020. Generally, average VaR and maximum VaR across risk types and LOBs were higher due to increased volatility that occurred at the onset of the COVID-19 pandemic, which remains in the one-year historical look-back period. As a result average total VaR increased by \$52 million for the year-ended December 31, 2020 when compared with the prior year driven by the fixed income and commodities risk types. Effective January 1, 2020, the Firm refined the scope of VaR to exclude positions related to the risk management of interest rate exposure from changes in the Firm's own credit spread on fair value option elected liabilities, and included these positions in other sensitivity-based measures. Additionally, effective July 1, 2020, the Firm refined the scope of VaR to exclude certain asset-backed fair value option elected loans, and included them in other sensitivity-based measures to more effectively measure the risk from these loans. In the absence of these refinements, the average Total VaR and each of the components would have been higher by the amounts reported in the following table: (in millions) Amount by which reported average VaR would have been higher for the year ended December 31, 2020 CIB fixed income VaR \$ 9; CIB trading VaR 7; CIB VaR 9; Total VaR 8; 138 JPMorgan Chase & Co./2020 Form 10-K VaR backtesting The Firm performs daily VaR model backtesting, which compares the daily Risk Management VaR results with the daily gains and losses that are utilized for VaR backtesting purposes. The gains

and losses in the chart below do not reflect the Firm's revenue results as they exclude select components of total net revenue, such as those associated with the execution of new transactions (i.e., intraday client-driven trading and intraday risk management activities), fees, commissions, certain valuation adjustments and net interest income. These excluded components of total net revenue may more than offset backtesting gains and losses on a particular day. The definition of backtesting gains and losses above is consistent with the requirements for backtesting under Basel III capital rules. The following chart compares Firmwide daily backtesting gains and losses with the Firm's Risk Management VaR for the year ended December 31, 2020. The results in the chart below differ from the results of backtesting disclosed in the Market Risk section of the Firm's Basel III Pillar 3 Regulatory Capital Disclosures reports, which are based on Regulatory VaR applied to the Firm's covered positions. For the year ended December 31, 2020, the Firm posted backtesting gains on 162 of the 260 days, and observed 10 VaR backtesting exceptions, which were predominantly driven by volatility at the onset of the COVID-19 pandemic that was materially higher than the levels realized in the historical data used for the VaR calculation. Firmwide backtesting loss days can differ from the loss days for which Fixed Income Markets and Equity Markets posted losses, as disclosed in CIB Markets revenue, as the population of positions which compose each metric are different and due to the exclusion of select components of total net revenue in backtesting gains and losses as described above. For more information on CIB Markets revenue, refer to pages 74-75. Daily Risk Management VaR Backtesting Results Year ended December 31, 2020 Backtesting Gains and Losses Risk Management VaR (1-day, 95% Confidence level) First Quarter 2020 Second Quarter 2020 Third Quarter 2020 Fourth Quarter 2020 JPMorgan Chase & Co./2020 Form 10-K 139 Management's discussion and analysis Other risk measures Stress testing Along with VaR, stress testing is an important tool used to assess risk. While VaR reflects the risk of loss due to adverse changes in markets using recent historical market behavior, stress testing reflects the risk of loss from hypothetical changes in the value of market risk sensitive positions applied simultaneously. Stress testing measures the Firm's vulnerability to losses under a range of stressed but possible economic and market scenarios. The results are used to understand the exposures responsible for those potential losses and are measured against limits. The Firm's stress framework covers market risk sensitive positions in the LOBs and Corporate. The framework is used to calculate multiple magnitudes of potential stress for both market rallies and market sell-offs, assuming significant changes in market factors such as credit spreads, equity prices, interest rates, currency rates and commodity prices, and combines them in multiple ways to capture an array of hypothetical economic and market scenarios. The Firm generates a number of scenarios that focus on tail events in specific asset classes and geographies, including how the event may impact multiple market factors simultaneously. Scenarios also incorporate specific idiosyncratic risks and stress basis risk between different products. The flexibility in the stress framework allows the Firm to construct new scenarios that can test the outcomes against possible future stress events. Stress testing results are reported on a regular basis to senior management of the Firm, as appropriate. Stress scenarios are governed by an overall stress framework and are subject to the standards outlined in the Firm's policies related to model risk management. Significant changes to the framework are reviewed as appropriate. The Firm's stress testing framework is utilized in calculating the Firm's CCAR and other stress test results, which are reported to the Board of Directors. In addition, stress testing results are incorporated into the Firm's Risk Appetite framework, and are reported periodically to the Board Risk Committee. Profit and loss drawdowns Profit and loss drawdowns are used to highlight trading losses above certain levels of risk tolerance. A profit and loss drawdown is a decline in revenue from its year-to-date peak level. Earnings-at-risk The effect of interest rate exposure on the Firm's reported net income is important as interest rate risk represents one of the Firm's significant market risks. Interest rate risk arises not only from trading activities but also from the Firm's traditional banking activities, which include extension of loans and credit facilities, taking deposits and issuing debt as well as from the investment securities portfolio. Refer to the table on page 136 for a summary by LOB and Corporate, identifying positions included in earnings-at-risk. The CTC Risk Committee establishes the Firm's structural interest rate risk policy and related limits, which are subject to approval by the Board Risk Committee. Treasury and CIO, working in partnership with the LOBs, calculates the Firm's structural interest rate risk profile and reviews it with senior management, including the CTC Risk Committee. In addition, oversight of structural interest rate risk is managed through a dedicated risk function reporting to the CTC CRO. This risk function is responsible for providing independent oversight and governance around assumptions and establishing and monitoring limits for structural interest rate risk. The Firm manages structural interest rate risk generally through its investment securities portfolio and interest rate derivatives. Structural interest rate risk can occur due to a variety of factors, including:

- Differences in timing among the maturity or repricing of assets, liabilities and off-balance sheet instruments
- Differences in the amounts of assets, liabilities and off-balance sheet instruments that are maturing or repricing at the same time
- Differences in the amounts by which short-term and long-term market interest rates change (for example, changes in the slope of the yield curve)
- The impact of changes in the maturity of various assets, liabilities or off-balance sheet instruments as interest rates change

The Firm manages interest rate exposure related to its assets and liabilities on a consolidated, Firmwide basis. Business units transfer their interest rate risk to Treasury and CIO through funds transfer pricing, which

takes into account the elements of interest rate exposure that can be risk-managed in financial markets. These elements include asset and liability balances and contractual rates of interest, contractual principal payment schedules, expected prepayment experience, interest rate reset dates and maturities, rate indices used for repricing, and any interest rate ceilings or floors for adjustable rate products. One way the Firm evaluates its structural interest rate risk is through earnings-at-risk. Earnings-at-risk estimates the Firm's interest rate exposure for a given interest rate scenario. It is presented as a sensitivity to a baseline, which includes net interest income and certain interest rate sensitive fees. The baseline uses market interest rates and in the case of deposits, pricing assumptions. The Firm conducts simulations of changes to this baseline for interest rate-sensitive assets and liabilities denominated in U.S. dollars and other currencies (“non-U.S. dollar” currencies). These simulations primarily include retained loans, deposits, deposits with banks, investment securities, long-term debt and any related interest rate hedges, and funds transfer pricing of positions in risk management VaR and other sensitivity-based measures as described on page 136. 140 JPMorgan Chase & Co./2020 Form 10-K Earnings-at-risk scenarios estimate the potential change to a net interest income baseline, over the following 12 months utilizing multiple assumptions. These scenarios include a parallel shift involving changes to both short-term and long-term rates by an equal amount; a steeper yield curve involving holding short-term rates constant and increasing long-term rates; and a flatter yield curve involving increasing short-term rates and holding long-term rates constant. These scenarios consider many different factors, including: • The impact on exposures as a result of instantaneous changes in interest rates from baseline rates. • Forecasted balance sheet, as well as modeled prepayment and reinvestment behavior, but do not include assumptions about actions that could be taken by the Firm or its clients and customers in response to any such instantaneous rate changes. Mortgage prepayment assumptions are based on the interest rates used in the scenarios compared with underlying contractual rates, the time since origination, and other factors which are updated periodically based on historical experience. • The pricing sensitivity of deposits, known as deposit betas, represent the amount by which deposit rates paid could change upon a given change in market interest rates over the cycle. The deposit rates paid in these scenarios may differ from actual deposit rates paid, due to repricing lags and other factors. The Firm's earnings-at-risk scenarios are periodically evaluated and enhanced in response to changes in the composition of the Firm's balance sheet, changes in market conditions, improvements in the Firm's simulation and other factors. While a relevant measure of the Firm's interest rate exposure, the earnings at risk analysis does not represent a forecast of the Firm's net interest income (Refer to Outlook on page 49 for additional information) . The Firm's U.S. dollar sensitivities are presented in the table below. December 31, (in billions) 2020 2019 Parallel shift: +100 bps shift in rates \$ 6.9 \$ 0.3 Steeper yield curve: +100 bps shift in long-term rates 2.4 1.2 Flatter yield curve: +100 bps shift in short-term rates 4.5 (0.9) The change in the Firm's U.S. dollar sensitivities as of December 31, 2020 compared to December 31, 2019 reflected updates to the Firm's baseline for lower short-term and long-term rates as well as the impact of changes in the Firm's balance sheet. In addition, during the fourth quarter of 2020 as part of the Firm's continuous evaluation and periodic enhancement to its earnings-at-risk calculations, the Firm updated the deposit rates paid betas for consumer deposit products based upon observed pricing during the most recent economic cycle. In the absence of this update, the Firm's U.S. dollar sensitivities as of December 31, 2020 would have been lower by \$2.0 billion to the +100bps shift in short-term and parallel rate scenarios. The Firm's sensitivity to rates is primarily a result of assets repricing at a faster pace than deposits. Based upon current and implied market rates as of December 31, 2020, scenarios reflecting lower rates could result in negative interest rates. The U.S. has never experienced an interest rate environment where the Federal Reserve has a negative interest rate policy. While the impact of negative interest rates on the Firm's earnings-at-risk would vary by scenario, a parallel shift downward of up to 100bps would negatively impact net interest income. In a negative interest rate environment, the modeling assumptions used for certain assets and liabilities require additional management judgment and therefore, the actual outcomes may differ from these assumptions. The Firm's non-U.S. dollar sensitivities are presented in the table below. December 31, (in billions) 2020 2019 Parallel shift: +100 bps shift in rates \$ 0.9 \$ 0.5 Flatter yield curve: +100 bps shift in short-term rates 0.8 0.5 The results of the non-U.S. dollar interest rate scenario involving a steeper yield curve with long-term rates rising by 100 basis points and short-term rates staying at current levels were not material to the Firm's earnings-at-risk at December 31, 2020 and 2019. JPMorgan Chase & Co./2020 Form 10-K 141 Management’s discussion and analysis Non-U.S. dollar foreign exchange risk Non-U.S. dollar FX risk is the risk that changes in foreign exchange rates affect the value of the Firm's assets or liabilities or future results. The Firm has structural non-U.S. dollar FX exposures arising from capital investments, forecasted expense and revenue, the investment securities portfolio and non-U.S. dollar-denominated debt issuance. Treasury and CIO, working in partnership with the LOBs, primarily manage these risks on behalf of the Firm. Treasury and CIO may hedge certain of these risks using derivatives. Other sensitivity-based measures The Firm quantifies the market risk of certain debt and equity and funding activities by assessing the potential impact on net revenue, other comprehensive income (“OCI”) and noninterest expense due to changes in relevant market variables. Refer to the table Predominant business activities that give rise to market risk on page 136 for additional information on the positions

captured in other sensitivity-based measures. The table below represents the potential impact to net revenue, OCI or noninterest expense for market risk sensitive instruments that are not included in VaR or earnings-at-risk. Where appropriate, instruments used for hedging purposes are reported net of the positions being hedged. The sensitivities disclosed in the table below may not be representative of the actual gain or loss that would have been realized at December 31, 2020 and 2019, as the movement in market parameters across maturities may vary and are not intended to imply management's expectation of future changes in these sensitivities.

Gain/(loss) (in millions)	Activity Description	Sensitivity measure	2020	2019
Debt and equity	(a) Asset Management activities Consists of seed capital and related hedges; fund co-investments (b) ; and certain deferred compensation and related hedges (c) 10% decline in market value	\$ (48)	\$ (68)	
Other debt and equity	Consists of certain asset-backed fair value option elected loans, privately held equity and other investments held at fair value (b) 10% decline in market value	(919)	(867)	
Funding activities	Non-USD LTD cross-currency basis Represents the basis risk on derivatives used to hedge the foreign exchange risk on the non-USD LTD (d) 1 basis point parallel tightening of cross currency basis	(16)	(17)	
Non-USD LTD hedges	foreign currency (“FX”) exposure Primarily represents the foreign exchange revaluation on the fair value of the derivative hedges (d) 10% depreciation of currency	13	15	
Derivatives	– funding spread risk Impact of changes in the spread related to derivatives FVA (b) 1 basis point parallel increase in spread	(4)	(5)	
Fair value option elected liabilities	– funding spread risk Impact of changes in the spread related to fair value option elected liabilities DVA (d) 1 basis point parallel increase in spread	33	29	
Fair value option elected liabilities	– interest rate sensitivity Interest rate sensitivity on fair value option liabilities resulting from a change in the Firm's own credit spread (d) 1 basis point parallel increase in spread	(3)	(2)	
Interest rate sensitivity	related to risk management of changes in the Firm's own credit spread on fair value option liabilities (b) 1 basis point parallel increase in spread	3	2	

(a) Excludes equity securities without readily determinable fair values that are measured under the measurement alternative. Refer to Note 2 for additional information. (b) Impact recognized through net revenue. (c) In the second quarter of 2020, the Firm refined the approach for risk management of certain deferred compensation, which is recognized through noninterest expense. As a result, certain deferred compensation and related hedges are now included in other sensitivity-based measures. (d) Impact recognized through OCI. (e) Prior-period amount has been revised to conform with the current presentation. In the absence of the scope refinement, Other debt and equity would have been \$(203) million and \$(192) million for the periods ending December 31, 2020 and 2019, respectively. Refer to Total VaR on page 138 for additional information.

142 JPMorgan Chase & Co./2020 Form 10-K COUNTRY RISK MANAGEMENT The Firm, through its LOBs and Corporate, may be exposed to country risk resulting from financial, economic, political or other significant developments which adversely affect the value of the Firm's exposures related to a particular country or set of countries. The Country Risk Management group actively monitors the various portfolios which may be impacted by these developments and measures the extent to which the Firm's exposures are diversified given the Firm's strategy and risk tolerance relative to a country.

Organization and management Country Risk Management is an independent risk management function that assesses, manages and monitors country risk originated across the Firm. The Firm's country risk management function includes the following activities: • Maintaining policies, procedures and standards consistent with a comprehensive country risk framework • Assigning sovereign ratings, assessing country risks and establishing risk tolerance relative to a country • Measuring and monitoring country risk exposure and stress across the Firm • Managing and approving country limits and reporting trends and limit breaches to senior management • Developing surveillance tools, such as signaling models and ratings indicators, for early identification of potential country risk concerns • Providing country risk scenario analysis

Sources and measurement The Firm is exposed to country risk through its lending and deposits, investing, and market-making activities, whether cross-border or locally funded. Country exposure includes activity with both government and private-sector entities in a country. Under the Firm's internal country risk management approach, attribution of exposure to an individual country is based on the country where the largest proportion of the assets of the counterparty, issuer, obligor or guarantor are located or where the largest proportion of its revenue is derived, which may be different than the domicile (i.e. legal residence) or country of incorporation. Individual country exposures reflect an aggregation of the Firm's risk to an immediate default, with zero recovery, of the counterparties, issuers, obligors or guarantors attributed to that country. Activities which result in contingent or indirect exposure to a country are not included in the country exposure measure (for example, providing clearing services or secondary exposure to collateral on securities financing receivables). Assumptions are sometimes required in determining the measurement and allocation of country exposure, particularly in the case of certain non-linear or index products, or where the nature of the counterparty, issuer, obligor or guarantor is not suitable for attribution to an individual country. The use of different measurement approaches or assumptions could affect the amount of reported country exposure. Under the Firm's internal country risk measurement framework: • Lending exposures are measured at the total committed amount (funded and unfunded), net of the allowance for credit losses and eligible cash and marketable securities collateral received • Deposits are measured as the cash balances placed with central and commercial banks • Securities financing exposures are measured at their receivable balance, net of

eligible collateral received; Debt and equity securities are measured at the fair value of all positions, including both long and short positions; Counterparty exposure on derivative receivables is measured at the derivative's fair value, net of the fair value of the eligible collateral received; Credit derivatives protection purchased and sold is reported based on the underlying reference entity and is measured at the notional amount of protection purchased or sold, net of the fair value of the recognized derivative receivable or payable. Credit derivatives protection purchased and sold in the Firm's market-making activities is measured on a net basis, as such activities often result in selling and purchasing protection related to the same underlying reference entity; this reflects the manner in which the Firm manages these exposures. The Firm's internal country risk reporting differs from the reporting provided under the FFIEC bank regulatory requirements. Refer to Cross-border outstandings on page 318 of the 2020 Form 10-K for further information on the FFIEC's reporting methodology. JPMorgan Chase & Co./2020 Form 10-K 143 Management's discussion and analysis Stress testing Stress testing is an important component of the Firm's country risk management framework, which aims to estimate and limit losses arising from a country crisis by measuring the impact of adverse asset price movements to a country based on market shocks combined with counterparty specific assumptions. Country Risk Management periodically designs and runs tailored stress scenarios to test vulnerabilities to individual countries or sets of countries in response to specific or potential market events, sector performance concerns, sovereign actions and geopolitical risks. These tailored stress results are used to inform potential risk reduction across the Firm, as necessary. COVID-19 Pandemic Country Risk Management continues to monitor the impact of the COVID-19 pandemic, leveraging existing stress testing, exposure reporting and controls, as well as tailored analysis, to assess the extent to which individual countries may be adversely impacted. Risk reporting Country exposure and stress are measured and reported regularly, and used by Country Risk Management to identify trends, and monitor high usages and breaches against limits. For country risk management purposes, the Firm may report exposure to jurisdictions that are not fully autonomous, including Special Administrative Regions (SARs) and dependent territories, separately from the independent sovereign states with which they are associated. The following table presents the Firm's top 20 exposures by country (excluding the U.S.) as of December 31, 2020, and their comparative exposures as of December 31, 2019. The selection of countries represents the Firm's largest total exposures by individual country, based on the Firm's internal country risk management approach, and does not represent the Firm's view of any actual or potentially adverse credit conditions. Country exposures may fluctuate from period to period due to client activity and market flows. The overall increase in top 20 exposures was largely driven by client activity and growth in client deposits, relative to the period ending December 31, 2019. This resulted in an increase in cash placements with the central banks of Germany and the United Kingdom. Top 20 country exposures (excluding the U.S.) (a) December 31, (in billions) 2020 2019 (f) Lending and deposits (c) Trading and investing (d) Other (e) Total exposure

Country	2020	2019
Germany	\$ 120.8	\$ 5.8
United Kingdom	\$ 51.6	\$ 0.6
Japan	\$ 127.2	\$ 8.6
France	\$ 45.6	\$ 0.3
China	\$ 43.8	\$ 9.9
Switzerland	\$ 14.7	\$ 0.5
Australia	\$ 9.9	\$ 5.7
Canada	\$ 13.4	\$ 0.9
Luxembourg	\$ 11.1	\$ 1.3
India	\$ 3.9	\$ 5.1
South Korea	\$ 5.4	\$ 4.3
Italy	\$ 4.7	\$ 4.7
Singapore	\$ 4.0	\$ 2.7
Hong Kong SAR	\$ 3.7	\$ 1.9
Spain	\$ 4.1	\$ 1.6
Saudi Arabia	\$ 4.9	\$ 0.9
Mexico	\$ 3.9	\$ 1.0
Sweden	\$ 5.4	\$ 1.1

(a) Country exposures presented in the table reflect 90% and 87% of total Firmwide non-U.S. exposure, where exposure is attributed to an individual country, at December 31, 2020 and 2019, respectively. (b) In the fourth quarter of 2020, Country Risk Management determined that the exposure for certain commodities contracts corresponds to an EU-wide risk and should not be attributed to the individual country of registration, previously the Netherlands. As such, the exposure is no longer included and the prior-period amount has been revised to conform with the current presentation. (c) Lending and deposits includes loans and accrued interest receivable, lending-related commitments (net of eligible collateral and the allowance for credit losses), deposits with banks (including central banks), acceptances, other monetary assets, and issued letters of credit net of participations. Excludes intra-day and operating exposures, such as those from settlement and clearing activities. (d) Includes market-making inventory, Investment securities, and counterparty exposure on derivative and securities financings net of eligible collateral and hedging. Includes exposure from single reference entity (single-name), index and other multiple reference entity transactions for which one or more of the underlying reference entities is in a country listed in the above table. (e) Predominantly includes physical commodity inventory. (f) The country rankings presented in the table as of December 31, 2019, are based on the country rankings of the corresponding exposures at December 31,

2020 , not actual rankings of such exposures at December 31, 2019. 144 JPMorgan Chase & Co./2020 Form 10-K

OPERATIONAL RISK MANAGEMENT Operational risk is the risk of an adverse outcome resulting from inadequate or failed internal processes or systems; human factors; or external events impacting the Firm's processes or systems; Operational Risk includes compliance, conduct, legal, and estimations and model risk. Operational risk is inherent in the Firm's activities and can manifest itself in various ways, including fraudulent acts, business interruptions, cyber attacks, inappropriate employee behavior, failure to comply with applicable laws and regulations or failure of vendors to perform in accordance with their agreements. Operational Risk Management attempts to manage operational risk at appropriate levels in light of the Firm's financial position, the characteristics of its businesses, and the markets and regulatory environments in which it operates. Operational Risk Management Framework The Firm's Compliance, Conduct, and Operational Risk (CCOR) Management Framework is designed to enable the Firm to govern, identify, measure, monitor and test, manage and report on the Firm's operational risk. Operational Risk Governance The LOBs and Corporate are responsible for the management of operational risk. The Control Management Organization, which consists of control managers within each LOB and Corporate, is responsible for the day-to-day execution of the CCOR Framework and the evaluation of the effectiveness of their control environments to determine where targeted remediation efforts may be required. The Firm's Global Chief Compliance Officer (CCO) and FRE for Operational Risk is responsible for defining the CCOR Management Framework and establishing minimum standards for its execution. Operational Risk Officers (OROs) report to both the LOB CROs and to the FRE for Operational Risk, and are independent of the respective businesses or functions they oversee. The Firm's CCOR Management policy establishes the CCOR Management Framework for the Firm. The CCOR Management Framework is articulated in the Risk Governance and Oversight Policy which is reviewed and approved by the Board Risk Committee periodically. Operational Risk identification The Firm utilizes a structured risk and control self-assessment process that is executed by the LOBs and Corporate. As part of this process, the LOBs and Corporate evaluate the effectiveness of their control environment to assess where controls have failed, and to determine where remediation efforts may be required. The Firm's Operational Risk and Compliance organization (Operational Risk and Compliance) provides oversight of these activities and may also perform independent assessments of significant operational risk events and areas of concentrated or emerging risk. Operational Risk Measurement Operational Risk and Compliance performs independent risk assessments of the Firm's operational risks, which includes assessing the effectiveness of the control environment and reporting the results to senior management. In addition, operational risk measurement includes operational risk-based capital and operational risk loss projections under both baseline and stressed conditions. The primary component of the operational risk capital estimate is the Loss Distribution Approach (LDA) statistical model, which simulates the frequency and severity of future operational risk loss projections based on historical data. The LDA model is used to estimate an aggregate operational risk loss over a one-year time horizon, at a 99.9% confidence level. The LDA model incorporates actual internal operational risk losses in the quarter following the period in which those losses were realized, and the calculation generally continues to reflect such losses even after the issues or business activities giving rise to the losses have been remediated or reduced. As required under the Basel III capital framework, the Firm's operational risk-based capital methodology, which uses the Advanced Measurement Approach (AMA), incorporates internal and external losses as well as management's view of tail risk captured through operational risk scenario analysis, and evaluation of key business environment and internal control metrics. The Firm does not reflect the impact of insurance in its AMA estimate of operational risk capital. The Firm considers the impact of stressed economic conditions on operational risk losses and develops a forward looking view of material operational risk events that may occur in a stressed environment. The Firm's operational risk stress testing framework is utilized in calculating results for the Firm's CCAR and other stress testing processes. Refer to Capital Risk Management section, on pages 91-101 for information related to operational risk RWA, and CCAR.

Operational Risk Monitoring and testing The results of risk assessments performed by Operational Risk and Compliance are leveraged as one of the key criteria in the independent monitoring and testing of the LOBs and Corporate's compliance with laws and regulation. Through monitoring and testing, Operational Risk and Compliance independently identify areas of operational risk and tests the effectiveness of controls within the LOBs and Corporate. Management of Operational Risk The operational risk areas or issues identified through monitoring and testing are escalated to the LOBs and Corporate to be remediated through action plans, as needed, to mitigate operational risk. Operational Risk and JPMorgan Chase & Co./2020 Form 10-K 145 Management's discussion and analysis Compliance may advise the LOBs and Corporate in the development and implementation of action plans. Operational Risk Reporting Escalation of risks is a fundamental expectation for employees at the Firm. Risks identified by Operational Risk and Compliance are escalated to the appropriate LOB and Corporate Control Committees, as needed. Operational Risk and Compliance has established standards to ensure that consistent operational risk reporting and operational risk reports are produced on a Firmwide basis as well as by the LOBs and Corporate. Reporting includes the evaluation of key risk indicators and key performance indicators against established thresholds as well as the assessment of different types of operational risk

against stated risk appetite. The standards reinforce escalation protocols to senior management and to the Board of Directors. COVID-19 Pandemic Under the CCOR Management Framework, Operational Risk and Compliance monitors and assesses COVID-19 related legal and regulatory developments associated with the Firm's financial products and services offered to clients and customers as part of the existing change management process. The Firm will continue to review and assess the impact of the pandemic on operational risk and implement adequate measures as needed.

Subcategories and examples of operational risks Operational risk can manifest itself in various ways. Operational risk subcategories such as Compliance risk, Conduct risk, Legal risk, and Estimations and Model risk as well as other operational risks, can lead to losses which are captured through the Firm's operational risk measurement processes. Refer to pages 148, 149, 150 and 151, respectively for more information on Compliance, Conduct, Legal, and Estimations and Model risk. Details on other select examples of operational risks are provided below.

Cybersecurity risk Cybersecurity risk is the risk of the Firm's exposure to harm or loss resulting from misuse or abuse of technology by malicious actors. Cybersecurity risk is an important and continuously evolving focus for the Firm. Significant resources are devoted to protecting and enhancing the security of computer systems, software, networks and other technology assets. The Firm's security efforts are designed to protect against, among other things, cybersecurity attacks by unauthorized parties attempting to obtain access to confidential information, destroy data, disrupt or degrade service, sabotage systems or cause other damage. Ongoing business expansions may expose the Firm to potential new threats as well as expanded regulatory scrutiny including the introduction of new cybersecurity requirements. The Firm continues to make significant investments in enhancing its cyber defense capabilities and to strengthen its partnerships with the appropriate government and law enforcement agencies and other businesses in order to understand the full spectrum of cybersecurity risks in the operating environment, enhance defenses and improve resiliency against cybersecurity threats. The Firm actively participates in discussions of cybersecurity risks with law enforcement, government officials, peer and industry groups, and has significantly increased efforts to educate employees and certain clients on the topic of cybersecurity risks. Third parties with which the Firm does business or that facilitate the Firm's business activities (e.g., vendors, supply chain, exchanges, clearing houses, central depositories, and financial intermediaries) are also sources of cybersecurity risk to the Firm. Third party cybersecurity incidents such as system breakdowns or failures, misconduct by the employees of such parties, or cyberattacks could affect their ability to deliver a product or service to the Firm or result in lost or compromised information of the Firm or its clients. Clients are also sources of cybersecurity risk to the Firm, particularly when their activities and systems are beyond the Firm's own security and control systems. As a result, the Firm engages in regular and ongoing discussions with certain vendors and clients regarding cybersecurity risks and opportunities to improve security. However, where cybersecurity incidents occur as a result of client failures to maintain the security of their own systems and processes, clients are responsible for losses incurred. To protect the confidentiality, integrity and availability of the Firm's infrastructure, resources and information, the Firm maintains a cybersecurity program designed to prevent, detect, and respond to cyberattacks.

The Audit Committee is updated periodically on the Firm's Information Security Program, recommended changes, cybersecurity policies and practices, ongoing efforts to improve security, as well as its efforts regarding significant cybersecurity events. In addition, the Firm has a cybersecurity incident response plan (IRP) designed to enable the Firm to respond to attempted cybersecurity incidents, coordinate such responses with law enforcement and other government agencies, and notify clients and customers, as applicable. Among other key focus areas, the IRP is designed to mitigate the risk of insider trading connected to a cybersecurity incident, and includes various escalation points. Due to the impact of COVID-19, the Firm increased the use of remote access and also video conferencing solutions provided by third parties to facilitate remote work. As a result the Firm took additional precautionary measures to mitigate cybersecurity risks. The Cybersecurity and Technology Control functions are responsible for governance and oversight of the Firm's Information Security Program. In partnership with the Firm's LOBs and Corporate, the Cybersecurity and Technology Control organization identifies information security risk issues and oversees programs for the technological protection of the Firm's information resources including applications, infrastructure as well as confidential and personal information related to the Firm's customers. The Cybersecurity and Technology organization consists of business aligned information security managers that are supported within the organization by the following products that execute the Information Security Program for the Firm: Cyber Defense & Fraud 146 JPMorgan Chase & Co./2020 Form 10-K; Data Management, Protection & Privacy; Identity & Access Management; Governance & Controls; Production Management & Resiliency; Software & Platform Enablement

The Global Cybersecurity and Technology Control governance structure is designed to identify, escalate, and mitigate information security risks. This structure uses key governance forums to disseminate information and monitor technology efforts. These forums are established at multiple levels throughout the Firm and include representatives from each LOB and Corporate. Reports containing overviews of key technology risks and efforts to enhance related controls are produced for these forums, and are reviewed by management at multiple levels. The forums are used to escalate information security risks or other matters as appropriate. The IRM function provides oversight of the activities designed to identify, assess, measure, and mitigate cybersecurity risk. The Firm's Security Awareness Program includes training that

reinforces the Firm's Information Technology Risk and Security Management policies, standards and practices, as well as the expectation that employees comply with these policies. The Security Awareness Program engages personnel through training on how to identify potential cybersecurity risks and protect the Firm's resources and information. This training is mandatory for all employees globally on a periodic basis, and it is supplemented by Firmwide testing initiatives, including periodic phishing tests. Finally, the Firm's Global Privacy Program requires all employees to take periodic awareness training on data privacy. This privacy-focused training includes information about confidentiality and security, as well as responding to unauthorized access to or use of information.

Business and technology resiliency risk Business disruptions can occur due to forces beyond the Firm's control such as the spread of infectious diseases or pandemics, severe weather, power or telecommunications loss, accidents, failure of a third party to provide expected services, cyberattack, flooding, transit strikes, terrorism, health emergencies. The safety of the Firm's employees and customers is of the highest priority. The Firmwide resiliency program is intended to enable the Firm to recover its critical business functions and supporting assets (i.e., staff, technology and facilities) in the event of a business interruption. The program includes governance, awareness training, and testing of recovery strategies, as well as strategic and tactical initiatives to identify, assess, and manage business interruption and public safety risks. The strength and proficiency of the Firmwide resiliency program has played an integral role in maintaining the Firm's business operations during and after various events.

Payment fraud risk Payment fraud risk is the risk of external and internal parties unlawfully obtaining personal monetary benefit through misdirected or otherwise improper payment. The risk of payment fraud remains at a heightened level across the industry, particularly during the current COVID-19 pandemic due to the use of contingent forms of payment authentication methods, scams involving the pandemic being perpetrated including an increase in the level of fraud attempts against consumers. The complexities of these incidents and the strategies used by perpetrators continue to evolve. The Firm employs various controls for managing payment fraud risk as well as providing employee and client education and awareness trainings. The Firm's monitoring of customer behavior to detect new fraud strategies is periodically evaluated and enhanced in an effort to mitigate these fraud risks.

Third-party outsourcing risk The Firm's Third-Party Oversight (TPO) and Inter-affiliates Oversight (IAO) framework assist the LOBs and Corporate in selecting, documenting, onboarding, monitoring and managing their supplier relationships including services provided by affiliates. The objectives of the TPO framework are to hold suppliers to a high level of operational performance and to mitigate key risks including data loss and business disruption. The Corporate Third-Party Oversight group is responsible for Firmwide training, monitoring, reporting and standards.

Insurance One of the ways in which operational risk may be mitigated is through insurance maintained by the Firm. The Firm purchases insurance from commercial insurers and maintains a wholly-owned captive insurer, Park Assurance Company. Insurance may also be required by third parties with whom the Firm does business.

JPMorgan Chase & Co./2020 Form 10-K 147 Management's discussion and analysis

COMPLIANCE RISK

MANAGEMENT Compliance risk, a subcategory of operational risk, is the risk of failing to comply with laws, rules, regulations or codes of conduct and standards of self-regulatory organizations.

Overview Each LOB and Corporate hold primary ownership of and accountability for managing compliance risk. The Firm's Operational Risk and Compliance Organization (Operational Risk and Compliance), which is independent of the LOBs and Corporate, provides independent review, monitoring and oversight of business operations with a focus on compliance with the laws, rules, and regulations applicable to the delivery of the Firm's products and services to clients and customers. These compliance risks relate to a wide variety of laws, rules and regulations depending on the LOB and the jurisdiction, and include risks related to financial products and services, relationships and interactions with clients and customers, and employee activities. For example, compliance risks include those associated with anti-money laundering compliance, trading activities, market conduct, and complying with the laws, rules, and regulations related to the offering of products and services across jurisdictional borders. Compliance risk is also inherent in the Firm's fiduciary activities, including the failure to exercise the applicable standard of care (such as the duties of loyalty or care), to act in the best interest of clients and customers or to treat clients and customers fairly. Other functions provide oversight of significant regulatory obligations that are specific to their respective areas of responsibility. Operational Risk and Compliance implements policies and standards designed to govern, identify, measure, monitor and test, manage, and report on compliance risk.

Governance and oversight Operational Risk and Compliance is led by the Firm's Global CCO and FRE for Operational Risk. The Firm maintains oversight and coordination of its compliance risk through the implementation of the CCOR Risk Management Framework. The Firm's CCO also provides regular updates to the Audit Committee and the Board Risk Committee. In certain Special Purpose Committees of the Board have previously been established to oversee the Firm's compliance with regulatory Consent Orders.

Code of Conduct The Firm has a Code of Conduct (the Code) that sets forth the Firm's expectation that employees will conduct themselves with integrity at all times and provides the principles that govern employee conduct with clients, customers, shareholders and one another, as well as with the markets and communities in which the Firm does business. The Code requires employees to promptly report any potential or actual violation of the Code, any internal Firm policy, or any law or regulation applicable to the Firm's business. It also requires employees to report any illegal conduct, or

conduct that violates the underlying principles of the Code, by any of the Firm's employees, clients, customers, suppliers, contract workers, business partners, or agents. All newly hired employees are assigned Code training and current employees are periodically assigned Code training on an ongoing basis. Employees are required to affirm their compliance with the Code periodically. Employees can report any potential or actual violations of the Code through the JPMC Conduct Hotline by phone or the internet. The Hotline is anonymous, except in certain non-U.S. jurisdictions where laws prohibit anonymous reporting, and is available at all times globally, with translation services. It is administered by an outside service provider. The Code prohibits retaliation against anyone who raises an issue or concern in good faith. Periodically, the Audit Committee receives reports on the Code of Conduct program.

148 JPMorgan Chase & Co./2020 Form 10-K CONDUCT RISK MANAGEMENT Conduct risk, a subcategory of operational risk, is the risk that any action or inaction by an employee or employees could lead to unfair client or customer outcomes, impact the integrity of the markets in which the Firm operates, or compromise the Firm's reputation. Overview Each LOB and Corporate is accountable for identifying and managing its conduct risk to provide appropriate engagement, ownership and sustainability of a culture consistent with the Firm's How We Do Business Principles (the "Principles"). The Principles serve as a guide for how employees are expected to conduct themselves. With the Principles serving as a guide, the Firm's Code sets out the Firm's expectations for each employee and provides information and resources to help employees conduct business ethically and in compliance with the laws everywhere the Firm operates. Refer to Compliance Risk Management on page 148 for further discussion of the Code.

Governance and oversight The Conduct Risk Program is governed by the CCOR Management policy, which establishes the framework for governance, identification, measurement, monitoring and testing, management and reporting conduct risk in the Firm. The Firm has a senior committee that provides oversight of the Firm's conduct initiatives to develop a more holistic view of conduct risks and to connect key programs across the Firm in order to identify opportunities and emerging areas of focus. This committee is responsible for setting overall program direction for strategic enhancements to the Firm's employee conduct framework and review the consolidated Firmwide Conduct Risk Appetite Assessment. Conduct risk management encompasses various aspects of people management practices throughout the employee life cycle, including recruiting, onboarding, training and development, performance management, promotion and compensation processes. Each LOB, Treasury and CIO, and designated corporate functions completes an assessment of conduct risk periodically, reviews metrics and issues which may involve conduct risk, and provides business conduct training as appropriate.

149 JPMorgan Chase & Co./2020 Form 10-K MANAGEMENT OF LEGAL RISK MANAGEMENT Legal risk, a subcategory of operational risk, is the risk of loss primarily caused by the actual or alleged failure to meet legal obligations that arise from the rule of law in jurisdictions in which the Firm operates, agreements with clients and customers, and products and services offered by the Firm. Overview The global Legal function ("Legal") provides legal services and advice to the Firm. Legal is responsible for managing the Firm's exposure to legal risk by: managing actual and potential litigation and enforcement matters, including internal reviews and investigations related to such matters; advising on products and services, including contract negotiation and documentation; advising on offering and marketing documents and new business initiatives; managing dispute resolution; interpreting existing laws, rules and regulations, and advising on changes to them; advising on advocacy in connection with contemplated and proposed laws, rules and regulations, and providing legal advice to the LOBs, Corporate, functions and the Board. Legal selects, engages and manages outside counsel for the Firm on all matters in which outside counsel is engaged. In addition, Legal advises the Firm's Conflicts Office which reviews the Firm's wholesale transactions that may have the potential to create conflicts of interest for the Firm.

Governance and oversight The Firm's General Counsel reports to the CEO and is a member of the Operating Committee, the Firmwide Risk Committee and the Firmwide Control Committee. The Firm's General Counsel and other members of Legal report on significant legal matters to the Firm's Board of Directors and to the Audit Committee. Legal serves on and advises various committees and advises the Firm's LOBs and Corporate on potential reputation risk issues.

150 JPMorgan Chase & Co./2020 Form 10-K ESTIMATIONS AND MODEL RISK MANAGEMENT Estimations and Model risk, a subcategory of operational risk, is the potential for adverse consequences from decisions based on incorrect or misused estimation outputs. The Firm uses models and other analytical and judgment-based estimations across various businesses and functions. The estimation methods are of varying levels of sophistication and are used for many purposes, such as the valuation of positions and measurement of risk, assessing regulatory capital requirements, conducting stress testing, and making business decisions. A dedicated independent function, Model Risk Governance and Review ("MRGR"), defines and governs the Firm's policies relating to the management of model risk and risks associated with certain analytical and judgment-based estimations, such as those used in risk management, budget forecasting and capital planning and analysis. The governance of analytical and judgment-based estimations within MRGR's scope follows a consistent approach to the approach used for models, which is described in detail below. Model risks are owned by the users of the models within the Firm based on the specific purposes of such models. Users and developers of models are responsible for developing, implementing and testing their models, as well as

referring models to the MRGR for review and approval. Once models have been approved, model users and developers are responsible for maintaining a robust operating environment, and must monitor and evaluate the performance of the models on an ongoing basis. Model users and developers may seek to enhance models in response to changes in the portfolios and in product and market developments, as well as to capture improvements in available modeling techniques and systems capabilities. Models are tiered based on an internal standard according to their complexity, the exposure associated with the model and the Firm's reliance on the model. This tiering is subject to the approval of the MRGR. In its review of a model, the MRGR considers whether the model is suitable for the specific purposes for which it will be used. When reviewing a model, the MRGR analyzes and challenges the model methodology and the reasonableness of model assumptions, and may perform or require additional testing, including back-testing of model outcomes. Model reviews are approved by the appropriate level of management within the MRGR based on the relevant model tier. Under the Firm's Estimations and Model Risk Management Policy, the MRGR reviews and approves new models, as well as material changes to existing models, prior to implementation in the operating environment. In certain circumstances exceptions may be granted to the Firm's policy to allow a model to be used prior to review or approval. The MRGR may also require the user to take appropriate actions to mitigate the model risk if it is to be used in the interim. These actions will depend on the model and may include, for example, limitation of trading activity. While models are inherently imprecise, the degree of imprecision or uncertainty can be heightened by the market or economic environment. This is particularly true when the current and forecasted environment is significantly different from the historical macroeconomic environments upon which the models were trained, as the Firm has experienced during the COVID-19 pandemic. This uncertainty may necessitate a greater degree of judgment and analytics to inform adjustments to model outputs than in typical periods. Refer to Critical Accounting Estimates Used by the Firm on pages 152-155 and Note 2 for a summary of model-based valuations and other valuation techniques. JPMorgan Chase & Co./2020 Form 10-K 151 Management's discussion and analysis CRITICAL ACCOUNTING ESTIMATES USED BY THE FIRM JPMorgan Chase's accounting policies and use of estimates are integral to understanding its reported results. The Firm's most complex accounting estimates require management's judgment to ascertain the appropriate carrying value of assets and liabilities. The Firm has established policies and control procedures intended to ensure that estimation methods, including any judgments made as part of such methods, are well-controlled, independently reviewed and applied consistently from period to period. The methods used and judgments made reflect, among other factors, the nature of the assets or liabilities and the related business and risk management strategies, which may vary across the Firm's businesses and portfolios. In addition, the policies and procedures are intended to ensure that the process for changing methodologies occurs in an appropriate manner. The Firm believes its estimates for determining the carrying value of its assets and liabilities are appropriate. The following is a brief description of the Firm's critical accounting estimates involving significant judgments.

Allowance for credit losses The Firm's allowance for credit losses represents management's estimate of expected credit losses over the remaining expected life of the Firm's financial assets measured at amortized cost and certain off-balance sheet lending-related commitments. The allowance for credit losses comprises:

- The allowance for loan losses, which covers the Firm's retained loan portfolios (scored and risk-rated),
- The allowance for lending-related commitments, and
- The allowance for credit losses on investment securities, which covers the Firm's HTM and AFS securities.

The allowance for credit losses involves significant judgment on a number of matters including development and weighting of macroeconomic forecasts, incorporation of historical loss experience, assessment of risk characteristics, assignment of risk ratings, valuation of collateral, and the determination of remaining expected life. Refer to Note 10 and Note 13 for further information on these judgments as well as the Firm's policies and methodologies used to determine the Firm's allowance for credit losses. One of the most significant judgments involved in estimating the Firm's allowance for credit losses relates to the macroeconomic forecasts used to estimate credit losses over the eight-quarter forecast period within the Firm's methodology. The eight-quarter forecast incorporates hundreds of macroeconomic variables (MEVs) that are relevant for exposures across the Firm, with modeled credit losses being driven primarily by a subset of less than twenty variables. The specific variables that have the greatest effect on the modeled losses of each portfolio vary by portfolio and geography.

- Key MEVs for the consumer portfolio include U.S. unemployment, house price index (HPI) and U.S. real gross domestic product (GDP).
- Key MEVs for the wholesale portfolio include U.S. real GDP, U.S. unemployment, U.S. equity prices, corporate credit spreads, oil prices, commercial real estate prices and HPI.

Changes in the Firm's assumptions and forecasts of economic conditions could significantly affect its estimate of expected credit losses in the portfolio at the balance sheet date or lead to significant changes in the estimate from one reporting period to the next. The COVID-19 pandemic has resulted in a weak labor market and weak overall economic conditions that will continue to affect borrowers across the Firm's consumer and wholesale lending portfolios. Significant judgment is required to estimate the severity and duration of the current economic downturn, as well as its potential impact on borrower defaults and loss severities. In particular, macroeconomic conditions and forecasts regarding the duration and severity of the economic downturn caused by the COVID-19 pandemic have been rapidly changing and remain highly uncertain. It is

difficult to predict exactly how borrower behavior will be impacted by these changes in economic conditions. The effectiveness of government support, customer assistance and enhanced unemployment benefits should act as mitigants to credit losses, but the extent of the mitigation impact remains uncertain. It is difficult to estimate how potential changes in any one factor or input might affect the overall allowance for credit losses because management considers a wide variety of factors and inputs in estimating the allowance for credit losses. Changes in the factors and inputs considered may not occur at the same rate and may not be consistent across all geographies or product types, and changes in factors and inputs may be directionally inconsistent, such that improvement in one factor or input may offset deterioration in others. To consider the impact of a hypothetical alternate macroeconomic forecast, the Firm compared the modeled credit losses determined using its central and relative adverse macroeconomic scenarios, which are two of the five scenarios considered in estimating the allowances for loan losses and lending-related commitments. The central and relative adverse scenarios each included a full suite of MEVs, but differed in the levels, paths and peaks/troughs of those variables over the eight-quarter forecast period. For example, compared to the Firm's central scenario described on page 132 and in Note 13, the Firm's relative adverse scenario assumes a significantly elevated U.S. unemployment rate throughout 2021, averaging 3.0% higher over the eight-quarter forecast, with a peak difference of approximately 4.0% in the second quarter of 2021; lower U.S. real GDP with a slower recovery, 152 JPMorgan Chase & Co./2020 Form 10-K remaining nearly 2.6% lower at the end of the eight-quarter forecast, with a peak difference of nearly 4.1% in the third quarter of 2021; and a 10.1% further deterioration in the national HPI with a trough in the first quarter of 2022. This analysis is not intended to estimate expected future changes in the allowance for credit losses, for a number of reasons, including: the Firm has placed significant weight on its adverse scenarios in estimating its allowance for credit losses as of December 31, 2020, and accordingly, the existing allowance already reflects credit losses beyond those estimated under the central scenario; the impacts of changes in many MEVs are both interrelated and nonlinear, so the results of this analysis cannot be simply extrapolated for more severe changes in macroeconomic variables; the COVID-19 pandemic has stressed many MEVs at a speed and to degrees not seen in recent history, adding significantly higher degrees of uncertainty around modeled credit loss estimations; significant changes in the expected severity and duration of the economic downturn caused by the COVID-19 pandemic, the effects of government support and customer assistance, and the speed of the subsequent recovery could significantly affect the Firm's estimate of expected credit losses irrespective of the estimated sensitivities described below. Without considering the additional weight the Firm has placed on its adverse scenarios or any other offsetting or correlated effects in other qualitative components of the Firm's allowance for credit losses for the lending exposures noted below, the difference between the modeled estimates under the Firm's relative adverse and central scenarios at December 31, 2020 would result in the following: An increase of approximately \$700 million for residential real estate loans and lending-related commitments; An increase of approximately \$5.1 billion for credit card loans; An increase of approximately \$2.8 billion for wholesale loans and lending-related commitments. This analysis relates only to the modeled credit loss estimates and is not intended to estimate changes in the overall allowance for credit losses as it does not reflect any potential changes in other adjustments to the quantitative calculation, which would also be influenced by the judgment management applies to the modeled lifetime loss estimates to reflect the uncertainty and imprecision of these modeled lifetime loss estimates based on then-current circumstances and conditions. Recognizing that forecasts of macroeconomic conditions are inherently uncertain, particularly in light of the recent economic conditions, the Firm believes that its process to consider the available information and associated risks and uncertainties is appropriately governed and that its estimates of expected credit losses were reasonable and appropriate for the period ended December 31, 2020. Fair value JPMorgan Chase carries a portion of its assets and liabilities at fair value. The majority of such assets and liabilities are measured at fair value on a recurring basis, including, derivatives and structured note products. Certain assets and liabilities are measured at fair value on a nonrecurring basis, including certain mortgage, home equity and other loans, where the carrying value is based on the fair value of the underlying collateral. Assets measured at fair value The following table includes the Firm's assets measured at fair value and the portion of such assets that are classified within level 3 of the valuation hierarchy. Refer to Note 2 for further information. December 31, 2020 (in billions, except ratios)

	Total assets at fair value	Total level 3 assets
Federal Funds sold and securities purchased under resale agreements	\$ 238.0	\$ -
Securities borrowed	\$ 53.0	\$ -
Trading assets:		
Trading debt and equity instruments	\$ 423.5	\$ 2.6
Derivative receivables (a)	\$ 79.6	\$ 7.7
Total trading assets	\$ 503.1	\$ 10.3
AFS securities	\$ 388.2	\$ -
Loans	\$ 44.5	\$ 2.3
MSRs	\$ 3.3	\$ 3.3
Other	\$ 304.1	\$ 0.5
Total assets measured at fair value on a recurring basis	\$ 1,243.2	\$ 16.4
Total assets measured at fair value on a nonrecurring basis	\$ 3.6	\$ 2.0
Total assets measured at fair value	\$ 1,246.8	\$ 18.4
Total Firm assets	\$ 3,386.1	
Level 3 assets at fair value as a percentage of total Firm assets (a)	0.5%	
Level 3 assets at fair value as a percentage of total Firm assets at fair value (a)	1.5%	

(a) For purposes of the table above, the derivative receivables total reflects the impact of netting adjustments; however, the \$7.7 billion of derivative receivables classified as level 3 does not reflect the netting

adjustment; as such netting is not relevant to a presentation based on the transparency of inputs to the valuation of an asset. The level 3 balances would be reduced if netting were applied, including the netting benefit associated with cash collateral. Valuation Details of the Firm's processes for determining fair value are set out in Note 2. Estimating fair value requires the application of judgment. The type and level of judgment required is largely dependent on the amount of observable market information available to the Firm. For instruments valued using internally developed valuation models and other valuation techniques that use significant unobservable inputs and are therefore classified within level 3 of the valuation hierarchy, judgments used to estimate fair value are more significant than those required when estimating the fair value of instruments classified within levels 1 and 2. JPMorgan Chase & Co./2020 Form 10-K 153

Management's discussion and analysis In arriving at an estimate of fair value for an instrument within level 3, management must first determine the appropriate valuation model or other valuation technique to use. Second, the lack of observability of certain significant inputs requires management to assess all relevant empirical data in deriving valuation inputs including, for example, transaction details, yield curves, interest rates, prepayment speed, default rates, volatilities, correlations, prices (such as commodity, equity or debt prices), valuations of comparable instruments, foreign exchange rates and credit curves. Refer to Note 2 for a further discussion of the valuation of level 3 instruments, including unobservable inputs used. For instruments classified in levels 2 and 3, management judgment must be applied to assess the appropriate level of valuation adjustments to reflect counterparty credit quality, the Firm's creditworthiness, market funding rates, liquidity considerations, unobservable parameters, and for portfolios that meet specified criteria, the size of the net open risk position. The judgments made are typically affected by the type of product and its specific contractual terms, and the level of liquidity for the product or within the market as a whole. In periods of heightened market volatility and uncertainty judgments are further affected by the wider variation of reasonable valuation estimates, particularly for positions that are less liquid. Refer to Note 2 for a further discussion of valuation adjustments applied by the Firm. Imprecision in estimating unobservable market inputs or other factors can affect the amount of gain or loss recorded for a particular position. Furthermore, while the Firm believes its valuation methods are appropriate and consistent with those of other market participants, the methods and assumptions used reflect management judgment and may vary across the Firm's businesses and portfolios. The Firm uses various methodologies and assumptions in the determination of fair value. The use of methodologies or assumptions different than those used by the Firm could result in a different estimate of fair value at the reporting date. Refer to Note 2 for a detailed discussion of the Firm's valuation process and hierarchy, and its determination of fair value for individual financial instruments.

Goodwill impairment Under U.S. GAAP, goodwill must be allocated to reporting units and tested for impairment at least annually. The Firm's process and methodology used to conduct goodwill impairment testing is described in Note 15. Management applies significant judgment when testing goodwill for impairment. The goodwill associated with each business combination is allocated to the related reporting units for goodwill impairment testing. For the year ended December 31, 2020, the Firm reviewed current economic conditions, including the potential impacts of the COVID-19 pandemic on business performance, estimated market cost of equity, as well as actual business results and projections of business performance for all its reporting units. The Firm has concluded that the goodwill allocated to its reporting units was not impaired as of December 31, 2020. The fair values of these reporting units exceeded their carrying values by at least 15% and did not indicate a significant risk of goodwill impairment based on current projections and valuations. The projections for all of the Firm's reporting units are consistent with management's current business outlook assumptions in the short term, and the Firm's best estimates of long-term growth and return on equity in the longer term. Where possible, the Firm uses third-party and peer data to benchmark its assumptions and estimates. Refer to Note 15 for additional information on goodwill, including the goodwill impairment assessment as of December 31, 2020.

Credit card rewards liability JPMorgan Chase offers credit cards with various rewards programs which allow cardholders to earn rewards points based on their account activity and the terms and conditions of the rewards program. Generally, there are no limits on the points that an eligible cardholder can earn, nor do the points expire, and the points can be redeemed for a variety of rewards, including cash (predominantly in the form of account credits), gift cards and travel. The Firm maintains a rewards liability which represents the estimated cost of rewards points earned and expected to be redeemed by cardholders. The liability is accrued as the cardholder earns the benefit and is reduced when the cardholder redeems points. This liability was \$7.7 billion and \$6.4 billion at December 31, 2020 and 2019, respectively, and is recorded in accounts payable and other liabilities on the Consolidated balance sheets. The rewards liability is sensitive to redemption rate (RR) and cost per point (CPP) assumptions. The RR assumption is used to estimate the number of points earned by customers that will be redeemed over the life of the account. The CPP assumption is used to estimate the cost of future point redemptions. These assumptions are evaluated periodically considering historical actuals and cardholder redemption behavior and updates to them will impact the rewards liability. As of December 31, 2020, a combined increase of 25 basis points in RR and 1 basis point in CPP would increase the rewards liability by approximately \$215 million.

Income taxes JPMorgan Chase is subject to the income tax laws of the various jurisdictions in which it operates, including U.S. federal, state and local, and non-U.S. jurisdictions. These laws are often complex and may be subject to different interpretations. To determine the

financial statement impact of accounting for income taxes, including the provision for income tax expense and unrecognized tax benefits, JPMorgan Chase must make assumptions and judgments about how to interpret and apply these complex tax laws to numerous transactions and business events, as well as make judgments regarding the timing of when 154 JPMorgan Chase & Co./2020 Form 10-K certain items may affect taxable income in the U.S. and non-U.S. tax jurisdictions. JPMorgan Chase's interpretations of tax laws around the world are subject to review and examination by the various taxing authorities in the jurisdictions where the Firm operates, and disputes may occur regarding its view on a tax position. These disputes over interpretations with the various taxing authorities may be settled by audit, administrative appeals or adjudication in the court systems of the tax jurisdictions in which the Firm operates. JPMorgan Chase regularly reviews whether it may be assessed additional income taxes as a result of the resolution of these matters, and the Firm records additional reserves as appropriate. In addition, the Firm may revise its estimate of income taxes due to changes in income tax laws, legal interpretations, and business strategies. It is possible that revisions in the Firm's estimate of income taxes may materially affect the Firm's results of operations in any reporting period. The Firm's provision for income taxes is composed of current and deferred taxes. Deferred taxes arise from differences between assets and liabilities measured for financial reporting versus income tax return purposes. Deferred tax assets are recognized if, in management's judgment, their realizability is determined to be more likely than not. The Firm has also recognized deferred tax assets in connection with certain tax attributes, including net operating loss (“NOL”) carryforwards and foreign tax credit (“FTC”) carryforwards. The Firm performs regular reviews to ascertain whether its deferred tax assets are realizable. These reviews include management's estimates and assumptions regarding future taxable income, which also incorporates various tax planning strategies, including strategies that may be available to utilize NOLs before they expire. In connection with these reviews, if it is determined that a deferred tax asset is not realizable, a valuation allowance is established. The valuation allowance may be reversed in a subsequent reporting period if the Firm determines that, based on revised estimates of future taxable income or changes in tax planning strategies, it is more likely than not that all or part of the deferred tax asset will become realizable. As of December 31, 2020, management has determined it is more likely than not that the Firm will realize its deferred tax assets, net of the existing valuation allowance. The Firm adjusts its unrecognized tax benefits as necessary when additional information becomes available. Uncertain tax positions that meet the more-likely-than-not recognition threshold are measured to determine the amount of benefit to recognize. An uncertain tax position is measured at the largest amount of benefit that management believes is more likely than not to be realized upon settlement. It is possible that the reassessment of JPMorgan Chase's unrecognized tax benefits may have a material impact on its effective income tax rate in the period in which the reassessment occurs. Refer to Note 25 for additional information on income taxes. Litigation reserves Refer to Note 30 for a description of the significant estimates and judgments associated with establishing litigation reserves. JPMorgan Chase & Co./2020 Form 10-K 155

Management's discussion and analysis ACCOUNTING AND REPORTING DEVELOPMENTS Financial Accounting Standards Board (“FASB”) Standards Adopted since January 1, 2020 Standard Summary of guidance Effects on financial statements Financial Instruments - Credit Losses (“CECL”) Issued June 2016 • Establishes a single allowance framework for all financial assets measured at amortized cost and certain off-balance sheet credit exposures. This framework requires that management's estimate reflects credit losses over the instrument's remaining expected life and considers expected future changes in macroeconomic conditions. • Eliminates existing guidance for PCI loans, and requires recognition of the nonaccretable difference as an increase to the allowance for expected credit losses on financial assets purchased with more than insignificant credit deterioration since origination, with a corresponding increase in the amortized cost of the related loans. • Requires inclusion of expected recoveries, limited to the cumulative amount of prior writeoffs, when estimating the allowance for credit losses for in scope financial assets (including collateral-dependent assets). • Amends existing impairment guidance for AFS securities to incorporate an allowance, which will allow for reversals of credit impairments in the event that the credit of an issuer improves. • Requires a cumulative-effect adjustment to retained earnings as of the beginning of the reporting period of adoption. • Adopted January 1, 2020. • Refer to Note 1 for further information. Goodwill Issued January 2017 • Requires recognition of an impairment loss when the estimated fair value of a reporting unit falls below its carrying value. • Eliminates the requirement that an impairment loss be recognized only if the estimated implied fair value of the goodwill is below its carrying value. • Adopted January 1, 2020. • No impact upon adoption as the guidance was applied prospectively. • Refer to Note 15 for further information. Reference Rate Reform Issued March 2020 and updated January 2021 • Provides optional expedients and exceptions to current accounting guidance when financial instruments, hedge accounting relationships, and other transactions are amended due to reference rate reform. • Provides an election to account for certain contract amendments related to reference rate reform as modifications rather than extinguishments without the requirement to assess the significance of the amendments. • Allows for changes in critical terms of a hedge accounting relationship without automatic termination of that relationship. Provides various practical expedients and elections designed to allow hedge accounting to continue uninterrupted during the transition period. • Provides a

one-time election to transfer securities out of the held-to-maturity classification if certain criteria are met. The January 2021 update provides an election to account for derivatives modified to change the rate used for discounting, margining, or contract price alignment (collectively the discounting transition) as modifications. Issued and effective March 12, 2020. The January 7, 2021 update was effective when issued. The Firm elected to apply certain of the practical expedients related to contract modifications and hedge accounting relationships, and discounting transition beginning in the third quarter of 2020. The discounting transition election was applied retrospectively. The main purpose of the practical expedients is to ease the administrative burden of accounting for contracts impacted by reference rate reform, and these elections did not have a material impact on the Consolidated Financial Statements.

156 JPMorgan Chase & Co./2020 Form 10-K FORWARD-LOOKING STATEMENTS From time to time, the Firm has made and will make forward-looking statements. These statements can be identified by the fact that they do not relate strictly to historical or current facts. Forward-looking statements often use words such as anticipate, target, expect, estimate, intend, plan, goal, believe, or other words of similar meaning. Forward-looking statements provide JPMorgan Chase's current expectations or forecasts of future events, circumstances, results or aspirations. JPMorgan Chase's disclosures in this 2020 Form 10-K contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. The Firm also may make forward-looking statements in its other documents filed or furnished with the SEC. In addition, the Firm's senior management may make forward-looking statements orally to investors, analysts, representatives of the media and others. All forward-looking statements are, by their nature, subject to risks and uncertainties, many of which are beyond the Firm's control. JPMorgan Chase's actual future results may differ materially from those set forth in its forward-looking statements. While there is no assurance that any list of risks and uncertainties or risk factors is complete, below are certain factors which could cause actual results to differ from those in the forward-looking statements:

- Economic, financial, reputational and other impacts of the COVID-19 pandemic;
- Local, regional and global business, economic and political conditions and geopolitical events;
- Changes in laws and regulatory requirements, including capital and liquidity requirements affecting the Firm's businesses, and the ability of the Firm to address those requirements;
- Heightened regulatory and governmental oversight and scrutiny of JPMorgan Chase's business practices, including dealings with retail customers;
- Changes in trade, monetary and fiscal policies and laws;
- Changes in income tax laws and regulations;
- Securities and capital markets behavior, including changes in market liquidity and volatility;
- Changes in investor sentiment or consumer spending or savings behavior;
- Ability of the Firm to manage effectively its capital and liquidity;
- Changes in credit ratings assigned to the Firm or its subsidiaries;
- Damage to the Firm's reputation;
- Ability of the Firm to appropriately address social, environmental and sustainability concerns that may arise, including from its business activities;
- Ability of the Firm to deal effectively with an economic slowdown or other economic or market disruption, including, but not limited to, in the interest rate environment;
- Technology changes instituted by the Firm, its counterparties or competitors;
- The effectiveness of the Firm's control agenda;
- Ability of the Firm to develop or discontinue products and services, and the extent to which products or services previously sold by the Firm require the Firm to incur liabilities or absorb losses not contemplated at their initiation or origination;
- Acceptance of the Firm's new and existing products and services by the marketplace and the ability of the Firm to innovate and to increase market share;
- Ability of the Firm to attract and retain qualified and diverse employees;
- Ability of the Firm to control expenses;
- Competitive pressures;
- Changes in the credit quality of the Firm's clients, customers and counterparties;
- Adequacy of the Firm's risk management framework, disclosure controls and procedures and internal control over financial reporting;
- Adverse judicial or regulatory proceedings;
- Changes in applicable accounting policies, including the introduction of new accounting standards;
- Ability of the Firm to determine accurate values of certain assets and liabilities;
- Occurrence of natural or man-made disasters or calamities, including health emergencies, the spread of infectious diseases, pandemics or outbreaks of hostilities, or the effects of climate change, and the Firm's ability to deal effectively with disruptions caused by the foregoing;
- Ability of the Firm to maintain the security of its financial, accounting, technology, data processing and other operational systems and facilities;
- Ability of the Firm to withstand disruptions that may be caused by any failure of its operational systems or those of third parties;
- Ability of the Firm to effectively defend itself against cyber attacks and other attempts by unauthorized parties to access information of the Firm or its customers or to disrupt the Firm's systems; and
- The other risks and uncertainties detailed in Part I, Item 1A: Risk Factors in JPMorgan Chase's 2020 Form 10-K.

Any forward-looking statements made by or on behalf of the Firm speak only as of the date they are made, and JPMorgan Chase does not undertake to update any forward-looking statements. The reader should, however, consult any further disclosures of a forward-looking nature the Firm may make in any subsequent Form 10-Ks, Quarterly Reports on Form 10-Qs, or Current Reports on Form 8-K. JPMorgan Chase & Co./2020 Form 10-K 157 Management's report on internal control over financial reporting Management of JPMorgan Chase & Co. (JPMorgan Chase; or the

JPMorgan Chase & Co. is responsible for establishing and maintaining adequate internal control over financial reporting. Internal control over financial reporting is a process designed by, or under the supervision of, the Firm's principal executive and principal financial officers, or persons performing similar functions, and effected by JPMorgan Chase's Board of Directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). JPMorgan Chase's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records, that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the Firm's assets; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. GAAP, and that receipts and expenditures of the Firm are being made only in accordance with authorizations of JPMorgan Chase's management and directors; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Firm's assets that could have a material effect on the financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Management has completed an assessment of the effectiveness of the Firm's internal control over financial reporting as of December 31, 2020. In making the assessment, management used the Internal Control - Integrated Framework (COSO 2013) promulgated by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based upon the assessment performed, management concluded that as of December 31, 2020, JPMorgan Chase's internal control over financial reporting was effective based upon the COSO 2013 framework. Additionally, based upon management's assessment, the Firm determined that there were no material weaknesses in its internal control over financial reporting as of December 31, 2020. The effectiveness of the Firm's internal control over financial reporting as of December 31, 2020, has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which appears herein. James Dimon Chairman and Chief Executive Officer Jennifer Piepszak Executive Vice President and Chief Financial Officer February 23, 2021 158 JPMorgan Chase & Co./2020 Form 10-K Report of Independent Registered Public Accounting Firm To the Board of Directors and Shareholders of JPMorgan Chase & Co.: Opinions on the Financial Statements and Internal Control over Financial Reporting We have audited the accompanying consolidated balance sheets of JPMorgan Chase & Co. and its subsidiaries (the Firm) as of December 31, 2020 and 2019, and the related consolidated statements of income, comprehensive income, changes in stockholders' equity and cash flows for each of the three years in the period ended December 31, 2020, including the related notes (collectively referred to as the consolidated financial statements). We also have audited the Firm's internal control over financial reporting as of December 31, 2020, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Firm as of December 31, 2020 and 2019, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2020 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Firm maintained, in all material respects, effective internal control over financial reporting as of December 31, 2020, based on criteria established in Internal Control - Integrated Framework (2013) issued by the COSO. Change in Accounting Principle As discussed in Note 1 and Note 13 to the consolidated financial statements, the Firm changed the manner in which it accounts for credit losses on certain financial instruments in 2020. Basis for Opinions The Firm's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's report on internal control over financial reporting. Our responsibility is to express opinions on the Firm's consolidated financial statements and on the Firm's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Firm in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting

principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

PricewaterhouseCoopers LLP 300 Madison Avenue New York, NY 10017 JPMorgan Chase & Co./2020 Form 10-K 159 Report of Independent Registered Public Accounting Firm Critical Audit Matters

The critical audit matters communicated below are matters arising from the current period audit of the consolidated financial statements that were communicated or required to be communicated to the audit committee and that: (i) relate to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Allowance for Loan Losses

Portfolio-based component of Wholesale Loan and Credit Card Loan Portfolios

As described in Note 13 to the consolidated financial statements, the allowance for loan losses for the portfolio-based component of the wholesale and credit card loan portfolios was \$23.4 billion on total portfolio-based retained loans of \$653.4 billion at December 31, 2020. The Firm's allowance for loan losses represents management's estimate of expected credit losses over the remaining expected life of the Firm's loan portfolios and considers expected future changes in macroeconomic conditions. The portfolio-based component of the Firm's allowance for loan losses for the wholesale and credit card retained loan portfolios begins with a quantitative calculation of expected credit losses over the expected life of the loan by applying credit loss factors to the estimated exposure at default. The credit loss factors applied are determined based on the weighted average of five internally developed macroeconomic scenarios that take into consideration the Firm's economic outlook as derived through forecast macroeconomic variables, the most significant of which are U.S. unemployment and U.S. real gross domestic product. This quantitative calculation is further adjusted to take into consideration model imprecision, emerging risk assessments, trends and other subjective factors that are not yet otherwise reflected in the credit loss estimate. The principal considerations for our determination that performing procedures relating to the allowance for loan losses for the portfolio-based component of the wholesale and credit card loan portfolios is a critical audit matter are (i) the significant judgment and estimation by management in the forecast of macroeconomic variables, specifically U.S. unemployment and U.S. real gross domestic product, as the Firm's forecasts of economic conditions significantly affect its estimate of expected credit losses at the balance sheet date, (ii) the significant judgment and estimation by management in determining the quantitative calculation utilized in their credit loss estimates and the adjustments to take into consideration model imprecision, emerging risk assessments, trends and other subjective factors that are not yet otherwise reflected in the credit loss estimate, which both in turn led to a high degree of auditor judgment, subjectivity and effort in performing procedures and in evaluating audit evidence obtained relating to the credit loss estimates and the appropriateness of the adjustments to the credit loss estimates, and (iii) the audit effort involved professionals with specialized skill and knowledge to assist in evaluating the audit evidence. Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the Firm's allowance for loan losses, including controls over model validation and generation of macroeconomic scenarios. These procedures also included, among others, testing management's process for estimating the allowance for loan losses, which involved (i) evaluating the appropriateness of the models and methodologies used in quantitative calculations; (ii) evaluating the reasonableness of forecasts of U.S. unemployment and U.S. real gross domestic product; (iii) testing the completeness and accuracy of data used in the estimate; and (iv) evaluating the reasonableness of

management's adjustments to the quantitative output for the impacts of model imprecision, emerging risk assessments, trends and other subjective factors that are not yet otherwise reflected in the credit loss estimate. These procedures also included the use of professionals with specialized skill and knowledge to assist in evaluating the appropriateness of certain models, methodologies and macroeconomic variables. Fair Value of Certain Level 3 Financial Instruments As described in Notes 2 and 3 to the consolidated financial statements, the Firm carries \$1.2 trillion of its assets and \$437.6 billion of its liabilities at fair value on a recurring basis. Included in these balances are \$10.3 billion of trading assets and \$41.5 billion of liabilities measured at fair value on a recurring basis, collectively financial instruments, which are classified as level 3 as they contain one or more inputs to valuation which are unobservable and significant to their fair value measurement. The Firm utilized internally developed valuation models and unobservable inputs to estimate fair value of the level 3 financial instruments. The unobservable inputs used by management to estimate the fair value of certain of these financial instruments include forward equity prices, volatility relating to interest rates and equity prices and correlation relating to interest rates, equity prices, credit and foreign exchange rates. The principal considerations for our determination that performing procedures relating to the fair value of certain level 3 financial instruments is a critical audit matter are (i) the significant judgment and estimation by management in determining the inputs to estimate fair value, which in turn led to a high degree of auditor judgment, subjectivity, and effort in performing procedures related to the fair value of these financial instruments, and (ii) the audit effort involved professionals with specialized skill and knowledge to assist in evaluating the audit evidence obtained from these procedures. 160 JPMorgan Chase & Co./2020 Form 10-K Report of Independent Registered Public Accounting Firm Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the Firm's processes for determining fair value which include controls over models, inputs, and data. These procedures also included, among others, the involvement of professionals with specialized skill and knowledge to assist in developing an independent estimate of fair value for a sample of these financial instruments. Developing the independent estimate involved testing the completeness and accuracy of data provided by management, developing independent inputs and, as appropriate, evaluating and utilizing management's aforementioned unobservable inputs; and comparing management's estimate to the independently developed estimate of fair value. February 23, 2021 We have served as the Firm's auditor since 1965. JPMorgan Chase & Co./2020 Form 10-K 161 Consolidated statements of income Year ended December 31, (in millions, except per share data) 2020 2019 2018 Revenue Investment banking fees \$ 9,486; \$ 7,501; \$ 7,550; Principal transactions 18,021; 14,018; 12,059; Lending- and deposit-related fees (a) 6,511; 6,626; 6,377; Asset management, administration and commissions (a) 18,177; 16,908; 16,793; Investment securities gains/(losses) 802; 258; (395) Mortgage fees and related income 3,091; 2,036; 1,254; Card income (b) 4,435; 5,076; 4,743; Other income 4,457; 5,731; 5,343; Noninterest revenue 64,980; 58,154; 53,724; Interest income 64,523; 84,040; 76,100; Interest expense 9,960; 26,795; 21,041; Net interest income 54,563; 57,245; 55,059; Total net revenue 119,543; 115,399; 108,783; Provision for credit losses 17,480; 5,585; 4,871; Noninterest expense Compensation expense 34,988; 34,155; 33,117; Occupancy expense 4,449; 4,322; 3,952; Technology, communications and equipment expense 10,338; 9,821; 8,802; Professional and outside services 8,464; 8,533; 8,502; Marketing (b) 2,476; 3,351; 3,044; Other expense 5,941; 5,087; 5,731; Total noninterest expense 66,656; 65,269; 63,148; Income before income tax expense 35,407; 44,545; 40,764; Income tax expense 6,276; 8,114; 8,290; Net income \$ 29,131; \$ 36,431; \$ 32,474; Net income applicable to common stockholders \$ 27,410; \$ 34,642; \$ 30,709; Net income per common share data Basic earnings per share \$ 8.89; \$ 10.75; \$ 9.04; Diluted earnings per share 8.88; 10.72; 9.00; Weighted-average basic shares 3,082.4; 3,221.5; 3,396.4; Weighted-average diluted shares 3,087.4; 3,230.4; 3,414.0; (a) In the first quarter of 2020, the Firm reclassified certain fees from asset management, administration and commissions to lending- and deposit-related fees. Prior-period amounts have been revised to conform with the current presentation. (b) In the second quarter of 2020, the Firm reclassified certain spend-based credit card reward costs from marketing expense to be a reduction of card income, with no effect on net income. Prior-period amounts have been revised to conform with the current presentation. (a) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans and other assets. Prior-period amounts have been revised to conform with the current presentation. The Notes to Consolidated Financial Statements are an integral part of these statements. 166 JPMorgan Chase & Co./2020 Form 10-K Notes to consolidated financial statements Note 1 Basis of presentation JPMorgan Chase & Co. (JPMorgan Chase; or the Firm), a financial holding company incorporated under Delaware law in 1968, is a leading global financial services firm in the U.S., with operations worldwide. The Firm is a leader in investment banking, financial services for consumers and small businesses, commercial banking, financial transaction processing and asset management. Refer to Note 32 for a further discussion of the Firm's business segments. The accounting and financial reporting policies of JPMorgan Chase and its subsidiaries conform to U.S. GAAP. Additionally, where applicable, the policies conform to the accounting and reporting guidelines prescribed by regulatory authorities. Certain amounts reported in prior periods have been reclassified to conform with the current presentation. Consolidation The Consolidated Financial Statements include the accounts of JPMorgan Chase and other entities in which the Firm has a controlling financial interest. All material intercompany balances and transactions have been eliminated. Assets held for clients in an agency or fiduciary capacity by the Firm are not assets of JPMorgan Chase and are not included on the Consolidated balance sheets. The Firm determines whether it has a controlling financial interest in an entity by first evaluating whether the entity is a voting interest entity or a variable interest entity. Voting interest entities are entities that have sufficient equity and provide the equity investors voting rights that enable them to make significant decisions relating to the entity's operations. For these types of entities, the Firm's determination of whether it has a controlling interest is primarily based on the amount of voting equity interests held. Entities in which the Firm has a controlling financial interest, through ownership of the majority of the entities' voting equity interests, or through other contractual rights that give the Firm control, are consolidated by the Firm. Investments in companies in which the

Firm has significant influence over operating and financing decisions (but does not own a majority of the voting equity interests) are accounted for (i) in accordance with the equity method of accounting (which requires the Firm to recognize its proportionate share of the entity's net earnings), or (ii) at fair value if the fair value option was elected. These investments are generally included in other assets, with income or loss included in noninterest revenue. Certain Firm-sponsored asset management funds are structured as limited partnerships or limited liability companies. For many of these entities, the Firm is the general partner or managing member, but the non-affiliated partners or members have the ability to remove the Firm as the general partner or managing member without cause (i.e., kick-out rights), based on a simple majority vote, or the non-affiliated partners or members have rights to participate in important decisions. Accordingly, the Firm does not consolidate these voting interest entities. However, in the limited cases where the non-managing partners or members do not have substantive kick-out or participating rights, the Firm evaluates the funds as VIEs and consolidates the funds if the Firm is the general partner or managing member and has a potentially significant interest. The Firm's investment companies and asset management funds have investments in both publicly-held and privately-held entities, including investments in buyouts, growth equity and venture opportunities. These investments are accounted for under investment company guidelines and, accordingly, irrespective of the percentage of equity ownership interests held, are carried on the Consolidated balance sheets at fair value, and are recorded in other assets, with income or loss included in noninterest revenue. If consolidated, the Firm retains the accounting under such specialized investment company guidelines. Variable interest entities VIEs are entities that, by design, either (1) lack sufficient equity to permit the entity to finance its activities without additional subordinated financial support from other parties, or (2) have equity investors that do not have the ability to make significant decisions relating to the entity's operations through voting rights, or do not have the obligation to absorb the expected losses, or do not have the right to receive the residual returns of the entity. The most common type of VIE is an SPE. SPEs are commonly used in securitization transactions in order to isolate certain assets and distribute the cash flows from those assets to investors. The basic SPE structure involves a company selling assets to the SPE; the SPE funds the purchase of those assets by issuing securities to investors. The legal documents that govern the transaction specify how the cash earned on the assets must be allocated to the SPE's investors and other parties that have rights to those cash flows. SPEs are generally structured to insulate investors from claims on the SPE's assets by creditors of other entities, including the creditors of the seller of the assets. The primary beneficiary of a VIE (i.e., the party that has a controlling financial interest) is required to consolidate the assets and liabilities of the VIE. The primary beneficiary is the party that has both (1) the power to direct the activities of the VIE that most significantly impact the VIE's economic performance; and (2) through its interests in the VIE, the obligation to absorb losses or the right to receive benefits from the VIE that could potentially be significant to the VIE. To assess whether the Firm has the power to direct the activities of a VIE that most significantly impact the VIE's economic performance, the Firm considers all the facts and JPMorgan Chase & Co./2020 Form 10-K 167 Notes to consolidated financial statements circumstances, including its role in establishing the VIE and its ongoing rights and responsibilities. This assessment includes, first, identifying the activities that most significantly impact the VIE's economic performance; and second, identifying which party, if any, has power over those activities. In general, the parties that make the most significant decisions affecting the VIE (such as asset managers, collateral managers, servicers, or owners of call options or liquidation rights over the VIE's assets) or have the right to unilaterally remove those decision-makers are deemed to have the power to direct the activities of a VIE. To assess whether the Firm has the obligation to absorb losses of the VIE or the right to receive benefits from the VIE that could potentially be significant to the VIE, the Firm considers all of its economic interests, including debt and equity investments, servicing fees, and derivatives or other arrangements deemed to be variable interests in the VIE. This assessment requires that the Firm apply judgment in determining whether these interests, in the aggregate, are considered potentially significant to the VIE. Factors considered in assessing significance include: the design of the VIE, including its capitalization structure; subordination of interests; payment priority; relative share of interests held across various classes within the VIE's capital structure; and the reasons why the interests are held by the Firm. The Firm performs on-going reassessments of: (1) whether entities previously evaluated under the majority voting-interest framework have become VIEs, based on certain events, and are therefore subject to the VIE consolidation framework; and (2) whether changes in the facts and circumstances regarding the Firm's involvement with a VIE cause the Firm's consolidation conclusion to change. Refer to Note 14 for further discussion of the Firm's VIEs.

Revenue recognition Interest income The Firm recognizes interest income on loans, debt securities, and other debt instruments, generally on a level-yield basis, based on the underlying contractual rate. Refer to Note 7 for further discussion of interest income. Revenue from contracts with customers JPMorgan Chase recognizes noninterest revenue from certain contracts with customers, in investment banking fees, deposit-related fees, asset management administration and commissions, and components of card income, when the Firm's related performance obligations are satisfied. Refer to Note 6 for further discussion of the Firm's revenue from contracts with customers. Principal transactions revenue JPMorgan Chase carries a portion of its assets and liabilities at fair value. Changes in fair value are reported primarily in principal transactions revenue. Refer to Notes 2 and 3 for further discussion

of fair value measurement. Refer to Note 6 for further discussion of principal transactions revenue. Use of estimates in the preparation of consolidated financial statements The preparation of the Consolidated Financial Statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, revenue and expense, and disclosures of contingent assets and liabilities. Actual results could be different from these estimates.

Foreign currency translation JPMorgan Chase revalues assets, liabilities, revenue and expense denominated in non-U.S. currencies into U.S. dollars using applicable exchange rates. Gains and losses relating to translating functional currency financial statements for U.S. reporting are included in the Consolidated statements of comprehensive income. Gains and losses relating to nonfunctional currency transactions, including non-U.S. operations where the functional currency is the U.S. dollar, are reported in the Consolidated statements of income. Offsetting assets and liabilities U.S. GAAP permits entities to present derivative receivables and derivative payables with the same counterparty and the related cash collateral receivables and payables on a net basis on the Consolidated balance sheets when a legally enforceable master netting agreement exists. U.S. GAAP also permits securities sold and purchased under repurchase agreements and securities borrowed or loaned under securities loan agreements to be presented net when specified conditions are met, including the existence of a legally enforceable master netting agreement. The Firm has elected to net such balances when the specified conditions are met. The Firm uses master netting agreements to mitigate counterparty credit risk in certain transactions, including derivative contracts, resale, repurchase, securities borrowed and securities loaned agreements. A master netting agreement is a single agreement with a counterparty that permits multiple transactions governed by that agreement to be terminated or accelerated and settled through a single payment in a single currency in the event of a default (e.g., bankruptcy, failure to make a required payment or securities transfer or deliver collateral or margin when due). Upon the exercise of derivatives termination rights by the non-defaulting party (i) all transactions are terminated, (ii) all transactions are valued and the positive values of $\&\#8220$ in the money $\&\#8221$; transactions are netted against the negative values of $\&\#8220$ out of the money $\&\#8221$; transactions and (iii) the only remaining payment obligation is of one of the parties to pay the netted termination amount. Upon exercise of default rights under repurchase agreements and securities loan agreements in general (i) all transactions are terminated and accelerated, (ii) all values of securities or cash held or to be delivered are calculated, and all such sums are netted against each other and (iii) the only remaining payment obligation is of one of the parties to pay the netted termination amount. 168 JPMorgan Chase & Co./2020 Form 10-K Typical master netting agreements for these types of transactions also often contain a collateral/margin agreement that provides for a security interest in, or title transfer of, securities or cash collateral/margin to the party that has the right to demand margin (the $\&\#8220$ demanding party $\&\#8221$;). The collateral/margin agreement typically requires a party to transfer collateral/margin to the demanding party with a value equal to the amount of the margin deficit on a net basis across all transactions governed by the master netting agreement, less any threshold. The collateral/margin agreement grants to the demanding party, upon default by the counterparty, the right to set-off any amounts payable by the counterparty against any posted collateral or the cash equivalent of any posted collateral/margin. It also grants to the demanding party the right to liquidate collateral/margin and to apply the proceeds to an amount payable by the counterparty. Refer to Note 5 for further discussion of the Firm's derivative instruments. Refer to Note 11 for further discussion of the Firm's securities financing agreements. Statements of cash flows For JPMorgan Chase's Consolidated statements of cash flows, cash is defined as those amounts included in cash and due from banks and deposits with banks. Accounting standard adopted January 1, 2020 Financial Instruments $\&\#8211$; Credit Losses ($\&\#8220$ CECL $\&\#8221$;) The adoption of this guidance established a single allowance framework for all financial assets measured at amortized cost and certain off-balance sheet credit exposures. This framework requires that management's estimate reflects credit losses over the instrument's remaining expected life and considers expected future changes in macroeconomic conditions. Refer to Note 13 for further information. Prior to the adoption of the CECL accounting guidance, the Firm's allowance for credit losses represented management's estimate of probable credit losses inherent in the Firm's retained loan portfolios and certain lending-related commitments. The following table presents the impacts to the allowance for credit losses and retained earnings upon adoption of this guidance on January 1, 2020: (in billions) December 31, 2019 CECL adoption impact January 1, 2020 Allowance for credit losses Consumer, excluding credit card (a) \$ 2.6 $\&\#160$; \$ 0.4 $\&\#160$; \$ 3.0 $\&\#160$; Credit card 5.7 $\&\#160$; 5.5 $\&\#160$; 11.2 $\&\#160$; Wholesale (a) 6.0 $\&\#160$; (1.6) 4.4 $\&\#160$; Firmwide \$ 14.3 $\&\#160$; \$ 4.3 $\&\#160$; \$ 18.6 $\&\#160$; Retained earnings Firmwide allowance increase \$ 4.3 $\&\#160$; Balance sheet reclassification (b) (0.8) Total pre-tax impact 3.5 $\&\#160$; Tax effect (0.8) Decrease to retained earnings \$ 2.7 $\&\#160$; (a) In conjunction with the adoption of CECL, the Firm reclassified risk-rated business banking and auto dealer loans and lending-related commitments held in CCB from the consumer, excluding credit card portfolio segment to the wholesale portfolio segment, to align with the methodology applied when determining the allowance. Prior-period amounts have been revised to conform with the current presentation. Accordingly, \$ 0.6 $\&\#160$;billion of the allowance for credit losses at December 31, 2019 and \$(0.2) $\&\#160$;billion of the CECL adoption impact were reclassified. (b) Represents the recognition of the nonaccretable difference on purchased credit deteriorated loans and the Firm's election to recognize the reserve for uncollectible accrued interest on credit card loans in the allowance, both of which resulted in a corresponding increase to

loans. Securities Financing Agreements As permitted by the guidance, the Firm elected the fair value option for certain securities financing agreements. The difference between their carrying amount and fair value was immaterial and was recorded as part of the Firm's cumulative-effect adjustment. Refer to Note 11 for further information. Investment securities Upon adoption, HTM securities are presented net of an allowance for credit losses. The guidance also amended the previous other-than-temporary impairment (OTTI) model for AFS securities to incorporate an allowance. Refer to Note 10 for further information. Credit quality disclosures As a result of the adoption of this guidance, the Firm expanded credit quality disclosures for financial assets measured at amortized cost particularly within the retained loan portfolios. Refer to Note 12 for further information. PCD loans The adoption resulted in a change in the accounting for PCI loans, which are considered purchased credit deteriorated (PCD) loans under CECL. Upon adoption, the Firm recognized the nonaccretable difference on PCD loans in the allowance, which resulted in a corresponding increase to loans. PCD loans are subject to the Firm's nonaccrual and charge-off policies and are now reported in the consumer, excluding credit card portfolio's residential real estate loan JPMorgan Chase & Co./2020 Form 10-K 169 Notes to consolidated financial statements class. Refer to Note 12 for further information.

Changes in credit portfolio segments and classes In conjunction with the adoption of CECL, the Firm reclassified risk-rated loans and lending-related commitments from the consumer excluding credit card portfolio segment to the wholesale portfolio segment, to align with the methodology applied when determining the allowance. The Firm also revised its loan classes. Prior- period amounts have been revised to conform with the current presentation. Refer to Note 12 for further information. Accrued interest receivables As permitted by the guidance, the Firm elected to continue classifying accrued interest on loans, including accrued but unbilled interest on credit card loans, and investment securities in accrued interest and accounts receivables on the Consolidated balance sheets. For credit card loans, accrued interest once billed is then recognized in the loan balances, with the related allowance recorded in the allowance for credit losses. Changes in the allowance for credit losses on accrued interest on credit card loans are recognized in the provision for credit losses and charge-offs are recognized by reversing interest income. For other loans and securities, the Firm generally does not recognize an allowance for credit losses on accrued interest receivables, consistent with its policy to write them off no later than 90 days past due by reversing interest income. Capital transition provisions As permitted under the U.S. capital rules issued by the federal banking agencies in 2019, the Firm initially elected to phase-in the January 1, 2020 (day 1) CECL adoption impact to retained earnings of \$2.7 billion to CET1 capital, at 25% per year in each of 2020 to 2023. As part of their response to the impact of the COVID-19 pandemic, on March 31, 2020, the federal banking agencies issued an interim final rule (issued as final on August 26, 2020) that provided the option to delay the effects of CECL on regulatory capital for two years, followed by a three-year transition period (CECL capital transition provisions). Refer to Note 27 for further information. Accounting standards adopted January 1, 2018 Effective January 1, 2018, the Firm adopted several accounting standards resulting in a net decrease of \$ 183 million to retained earnings and a net increase of \$ 88 million to AOCI. The adoption of the recognition and measurement guidance resulted in \$ 505 million of fair value gains in the first quarter of 2018, recorded in total net revenue, on certain equity investments that were previously held at cost. Significant accounting policies The following table identifies JPMorgan Chase's other significant accounting policies and the Note and page where a detailed description of each policy can be found. Fair value measurement Note 2 page 171 Fair value option Note 3 page 192 Derivative instruments Note 5 page 198 Noninterest revenue and noninterest expense Note 6 page 212 Interest income and Interest expense Note 7 page 215 Pension and other postretirement employee benefit plans Note 8 page 216 Employee share-based incentives Note 9 page 221 Investment securities Note 10 page 223 Securities financing activities Note 11 page 229 Loans Note 12 page 232 Allowance for credit losses Note 13 page 248 Variable interest entities Note 14 page 253 Goodwill and Mortgage servicing rights Note 15 page 261 Premises and equipment Note 16 page 265 Leases Note 18 page 266 Long-term debt Note 20 page 269 Earnings per share Note 23 page 274 Income taxes Note 25 page 277 Off-balance sheet lending-related financial instruments, guarantees and other commitments Note 28 page 283 Litigation Note 30 page 290 170 JPMorgan Chase & Co./2020 Form 10-K Note 2

Fair value measurement JPMorgan Chase carries a portion of its assets and liabilities at fair value. These assets and liabilities are predominantly carried at fair value on a recurring basis (i.e., assets and liabilities that are measured and reported at fair value on the Firm's Consolidated balance sheets). Certain assets, liabilities and unfunded lending-related commitments are measured at fair value on a nonrecurring basis; that is, they are not measured at fair value on an ongoing basis but are subject to fair value adjustments only in certain circumstances (for example, when there is evidence of impairment). Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is based on quoted market prices or inputs, where available. If prices or quotes are not available, fair value is based on valuation models and other valuation techniques that consider relevant transaction characteristics (such as maturity) and use, as inputs, observable or unobservable market parameters, including yield curves, interest rates, volatilities, prices (such as commodity, equity or debt prices), correlations, foreign exchange rates and credit curves. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value, as described below. The level of precision in

estimating unobservable market inputs or other factors can affect the amount of gain or loss recorded for a particular position. Furthermore, while the Firm believes its valuation methods are appropriate and consistent with those of other market participants, the methods and assumptions used reflect management judgment and may vary across the Firm's businesses and portfolios. The Firm uses various methodologies and assumptions in the determination of fair value. The use of different methodologies or assumptions by other market participants compared with those used by the Firm could result in the Firm deriving a different estimate of fair value at the reporting date. Valuation process

Risk-taking functions are responsible for providing fair value estimates for assets and liabilities carried on the Consolidated balance sheets at fair value. The Firm's VCG, which is part of the Firm's Finance function and independent of the risk-taking functions, is responsible for verifying these estimates and determining any fair value adjustments that may be required to ensure that the Firm's positions are recorded at fair value. The VGF is composed of senior finance and risk executives and is responsible for overseeing the management of risks arising from valuation activities conducted across the Firm. The Firmwide VGF is chaired by the Firmwide head of the VCG (under the direction of the Firm's Controller), and includes sub-forums covering the CIB, CCB, CB, AWM and certain corporate functions including Treasury and CIO. Price verification process The VCG verifies fair value estimates provided by the risk-taking functions by leveraging independently derived prices, valuation inputs and other market data, where available. Where independent prices or inputs are not available, the VCG performs additional review to ensure the reasonableness of the estimates. The additional review may include evaluating the limited market activity including client unwinds, benchmarking valuation inputs to those used for similar instruments, decomposing the valuation of structured instruments into individual components, comparing expected to actual cash flows, reviewing profit and loss trends, and reviewing trends in collateral valuation. There are also additional levels of management review for more significant or complex positions. The VCG determines any valuation adjustments that may be required to the estimates provided by the risk-taking functions. No adjustments to quoted prices are applied for instruments classified within level 1 of the fair value hierarchy (refer to the discussion below for further information on the fair value hierarchy). For other positions, judgment is required to assess the need for valuation adjustments to appropriately reflect liquidity considerations, unobservable parameters, and, for certain portfolios that meet specified criteria, the size of the net open risk position. The determination of such adjustments follows a consistent framework across the Firm:

- Liquidity valuation adjustments are considered where an observable external price or valuation parameter exists but is of lower reliability, potentially due to lower market activity. Liquidity valuation adjustments are made based on current market conditions. Factors that may be considered in determining the liquidity adjustment include analysis of: (1) the estimated bid-offer spread for the instrument being traded; (2) alternative pricing points for similar instruments in active markets; and (3) the range of reasonable values that the price or parameter could take.
- The Firm manages certain portfolios of financial instruments on the basis of net open risk exposure and, as permitted by U.S. GAAP, has elected to estimate the fair value of such portfolios on the basis of a transfer of the entire net open risk position in an orderly transaction. Where this is the case, valuation adjustments may be necessary to reflect the cost of exiting a larger-than-normal market-size net open risk position. Where applied, such adjustments are based on factors that a relevant market participant would consider in the transfer of the net open risk position, including the size of the adverse market move that is likely to occur during the period required to reduce the net open risk position to a normal market-size.
- Uncertainty adjustments related to unobservable parameters may be made when positions are valued using prices or input parameters to valuation models

JPMorgan Chase & Co./2020 Form 10-K 171 Notes to consolidated financial statements that are unobservable due to a lack of market activity or because they cannot be implied from observable market data. Such prices or parameters must be estimated and are, therefore, subject to management judgment. Adjustments are made to reflect the uncertainty inherent in the resulting valuation estimate.

- Where appropriate, the Firm also applies adjustments to its estimates of fair value in order to appropriately reflect counterparty credit quality (CVA), the Firm's own creditworthiness (DVA) and the impact of funding (FVA), using a consistent framework across the Firm. Refer to Credit and funding adjustments on page 188 of this Note for more information on such adjustments.

Valuation model review and approval If prices or quotes are not available for an instrument or a similar instrument, fair value is generally determined using valuation models that consider relevant transaction terms such as maturity and use as inputs market-based or independently sourced parameters. Where this is the case the price verification process described above is applied to the inputs in those models. Under the Firm's Estimations and Model Risk Management Policy, the MRGR reviews and approves new models, as well as material changes to existing models, prior to implementation in the operating environment. In certain circumstances exceptions may be granted to the Firm's policy to allow a model to be used prior to review or approval. The MRGR may also require the user to take appropriate actions to mitigate the model risk if it is to be used in the interim. These actions will depend on the model and may include, for example, limitation of trading activity.

Valuation hierarchy A three-level valuation hierarchy has been established under U.S. GAAP for disclosure of fair value measurements. The valuation hierarchy is based on the observability of inputs to the valuation of an asset or liability as of the measurement date. The three levels are defined as follows:

- Level 1 inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets.
- Level 2

inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument. Level 3; one or more inputs to the valuation methodology are unobservable and significant to the fair value measurement. A financial instrument's categorization within the valuation hierarchy is based on the lowest level of input that is significant to the fair value measurement. 172 JPMorgan Chase & Co./2020 Form 10-K The following table describes the valuation methodologies generally used by the Firm to measure its significant products/instruments at fair value, including the general classification of such instruments pursuant to the valuation hierarchy. Product/instrument; Valuation methodology

Product/instrument	Valuation methodology
Securities financing agreements	Valuations are based on discounted cash flows, which consider: Predominantly level 2; Derivative features: refer to the discussion of derivatives below for further information.
Market rates for the respective maturity	Market rates for the respective maturity
Collateral characteristics Loans and lending-related commitments	wholesale Loans carried at fair value (trading loans and non-trading loans) and associated lending-related commitments Where observable market data is available, valuations are based on: Level 2 or 3; Observed market prices (circumstances are infrequent); Relevant broker quotes; Observed market prices for similar instruments Where observable market data is unavailable or limited, valuations are based on discounted cash flows, which consider the following: Credit spreads derived from the cost of CDS; or benchmark credit curves developed by the Firm, by industry and credit rating; Prepayment speed; Collateral characteristics Loans; consumer Loans carried at fair value; conforming residential mortgage loans expected to be sold Fair value is based on observable prices for mortgage-backed securities with similar collateral and incorporates adjustments to these prices to account for differences between the securities and the value of the underlying loans, which include credit characteristics, portfolio composition, and liquidity. Predominantly level 2
Investment and trading securities	Quoted market prices Level 1 In the absence of quoted market prices, securities are valued based on: Level 2 or 3; Observable market prices for similar securities; Relevant broker quotes; Discounted cash flows In addition, the following inputs to discounted cash flows are used for the following products: Mortgage- and asset-backed securities specific inputs: Collateral characteristics; Deal-specific payment and loss allocations; Current market assumptions related to yield, prepayment speed, conditional default rates and loss severity Collateralized loan obligations (CLOs); specific inputs: Collateral characteristics; Deal-specific payment and loss allocations; Expected prepayment speed, conditional default rates, loss severity; Credit spreads; Credit rating data Physical commodities Valued using observable market prices or data. Level 1 or 2
JPMorgan Chase & Co./2020 Form 10-K 173 Notes to consolidated financial statements	Product/instrument Valuation methodology
Classifications in the valuation hierarchy	Derivatives
Exchange-traded derivatives that are actively traded and valued using the exchange price. Level 1	Derivatives that are valued using models such as the Black-Scholes option pricing model, simulation models, or a combination of models that may use observable or unobservable valuation inputs as well as considering the contractual terms. The key valuation inputs used will depend on the type of derivative and the nature of the underlying instruments and may include equity prices, commodity prices, interest rate yield curves, foreign exchange rates, volatilities, correlations, CDS spreads and recovery rates. Additionally, the credit quality of the counterparty and of the Firm as well as market funding levels may also be considered. Level 2 or 3 In addition, specific inputs used for derivatives that are valued based on models with significant unobservable inputs are as follows: Structured credit derivatives specific inputs include: CDS spreads and recovery rates; Credit correlation between the underlying debt instruments Equity option specific inputs include: Forward equity price; Equity volatility; Equity correlation; Equity-FX correlation; Equity-IR correlation Interest rate and FX exotic options specific inputs include: Interest rate volatility; Interest rate spread volatility; Interest rate correlation; Foreign exchange correlation; Interest rate-FX correlation Commodity derivatives specific inputs include: Commodity volatility; Forward commodity price; Commodity correlation Additionally, adjustments are made to reflect counterparty credit quality (CVA) and the impact of funding (FVA). Refer to page 188 of this Note.
Mortgage servicing rights Refer to Mortgage servicing rights in Note 15. Level 3	Private equity direct investments Fair value is estimated using all available information; the range of potential inputs include: Level 2 or 3; Transaction prices; Trading multiples of comparable public companies; Operating performance of the underlying portfolio company; Adjustments as required, since comparable public companies are not identical to the company being valued, and for company-specific issues and lack of liquidity. Additional available inputs relevant to the investment. Fund investments (e.g., mutual/collective investment funds, private equity funds, hedge funds, and real estate funds) Net asset value; NAV is supported by the ability to redeem and purchase at the NAV level. Level 1; Adjustments to the NAV as required, for restrictions on redemption (e.g., lock-up periods or withdrawal limitations) or where observable activity is limited. Level 2 or 3 (a) Beneficial interests issued by consolidated VIEs Valued

using observable market information, where available. Level 2 or 3 In the absence of observable market information, valuations are based on the fair value of the underlying assets held by the VIE. (a) Excludes certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient. 174 JPMorgan Chase & Co./2020 Form 10-K Product/Instrument Valuation methodology Classification in the valuation hierarchy

Structured notes (included in deposits, short-term borrowings and long-term debt) • Valuations are based on discounted cash flow analyses that consider the embedded derivative and the terms and payment structure of the note. • The embedded derivative features are considered using models such as the Black-Scholes option pricing model, simulation models, or a combination of models that may use observable or unobservable valuation inputs, depending on the embedded derivative. The specific inputs used vary according to the nature of the embedded derivative features, as described in the discussion above regarding derivatives valuation. Adjustments are then made to this base valuation to reflect the Firm's own credit risk (DVA). Refer to page 188 of this Note. Level 2 or 3 JPMorgan Chase & Co./2020 Form 10-K 175 Notes to consolidated financial statements The following table presents the assets and liabilities reported at fair value as of December 31, 2020 and 2019, by major product category and fair value hierarchy. Assets and liabilities measured at fair value on a recurring basis Fair value hierarchy December 31, 2020 (in millions) Level 1 Level 2 Level 3

(b) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans and other assets. Prior-period amounts have been revised to conform with the current presentation. (c) Physical commodities inventories are generally accounted for at the lower of cost or net realizable value. Net realizable value is a term defined in U.S. GAAP as not exceeding fair value less costs to sell (transaction costs). Transaction costs for the Firm's physical commodities inventories are either not applicable or immaterial to the value of the inventory. Therefore, net realizable value approximates fair value for the Firm's physical commodities inventories. When fair value hedging has been applied (or when net realizable value is below cost), the carrying value of physical commodities approximates fair value, because under fair value hedge accounting, the cost basis is adjusted for changes in fair value. Refer to Note 5 for a further JPMorgan Chase & Co./2020 Form 10-K 177 Notes to consolidated financial statements discussion of the Firm's hedge accounting relationships. To provide consistent fair value disclosure information, all physical commodities inventories have been included in each period presented. (d) Balances reflect the reduction of securities owned (long positions) by the amount of identical securities sold but not yet purchased (short positions). (e) Certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient are not required to be classified in the fair value hierarchy. At December 31, 2020 and 2019, the fair values of these investments, which include certain hedge funds, private equity funds, real estate and other funds, were \$ 670 million and \$ 684 million, respectively. Included in these balances at December 31, 2020 and 2019, were trading assets of \$ 52 million and \$ 54 million, respectively, and other assets of \$ 618 million and \$ 630 million, respectively. (f) At December 31, 2020 and 2019, included within loans were \$ 15.1 billion and \$ 19.8 billion, respectively, of residential first-lien mortgages, and \$ 6.3 billion and \$ 8.2 billion, respectively, of commercial first-lien mortgages. Residential mortgage loans include conforming mortgage loans originated with the intent to sell to U.S. GSEs and government agencies of \$ 8.4 billion and \$ 13.6 billion, respectively. (g) As permitted under U.S. GAAP, the Firm has elected to net derivative receivables and derivative payables and the related cash collateral received and paid when a legally enforceable master netting agreement exists. The level 3 balances would be reduced if netting were applied, including the netting benefit associated with cash collateral. 178 JPMorgan Chase & Co./2020 Form 10-K Level 3 valuations The Firm has established well-structured processes for determining fair value, including for instruments where fair value is estimated using significant unobservable inputs (level 3). Refer to pages 171-175 of this Note for further information on the Firm's valuation process and a detailed discussion of the determination of fair value for individual financial instruments. Estimating fair value requires the application of judgment. The type and level of judgment required is largely dependent on the amount of observable market information available to the Firm. For instruments valued using internally developed valuation models and other valuation techniques that use significant unobservable inputs and are therefore classified within level 3 of the fair value hierarchy, judgments used to estimate fair value are more significant than those required when estimating the fair value of instruments classified within levels 1 and 2. In arriving at an estimate of fair value for an instrument within level 3, management must first determine the appropriate valuation model or other valuation technique to use. Second, due to the lack of observability of significant inputs, management must assess relevant empirical data in deriving valuation inputs including transaction details, yield curves, interest rates, prepayment speed, default rates, volatilities, correlations, prices (such as commodity, equity or debt prices), valuations of comparable instruments, foreign exchange rates and credit curves. The following table presents the Firm's primary level 3 financial instruments, the valuation techniques used to measure the fair value of those financial instruments, the significant unobservable inputs, the range of values for those inputs and the weighted or arithmetic averages of such inputs. While the determination to classify an instrument within level 3 is based on the significance of the unobservable inputs to the overall fair value measurement, level 3 financial instruments typically include observable components (that is, components that are actively quoted and can be validated to external sources) in addition to the unobservable components. The level 1 and/or level 2 inputs are not included in the table. In addition, the Firm manages the risk of the observable components of level 3 financial instruments using securities and derivative positions that are classified within levels 1 or 2 of the fair value hierarchy. The range of values presented in the table is representative of the highest and lowest level input used to value the significant groups of instruments within a product/instrument classification. Where provided, the weighted averages of the input values presented in the table are calculated based on the fair value of the instruments that the input is being used to value. In the Firm's view, the input range, weighted and arithmetic average values do not reflect the degree of input uncertainty or an assessment of the reasonableness of

the Firm's estimates and assumptions. Rather, they reflect the characteristics of the various instruments held by the Firm and the relative distribution of instruments within the range of characteristics. For example, two option contracts may have similar levels of market risk exposure and valuation uncertainty, but may have significantly different implied volatility levels because the option contracts have different underlyings, tenors, or strike prices. The input range and weighted average values will therefore vary from period-to-period and parameter-to-parameter based on the characteristics of the instruments held by the Firm at each balance sheet date. JPMorgan Chase & Co./2020 Form 10-K 179 Notes to consolidated financial statements Level 3 inputs (a) December 31, 2020 Product/Instrument Fair value (in millions) Principal valuation technique Unobservable inputs (g) Range of input values Average (i) Residential mortgage-backed securities and loans (b) \$ 1,282; Discounted cash flows Yield 0 %; 18 % 6 % Prepayment speed 0 %; 46 % 10 % Conditional default rate 0 %; 30 % 14 % Loss severity 0 %; 107 % 7 % Commercial mortgage-backed securities and loans (c) 466; Market comparables Price \$ 0; \$ 101 \$ 84 Corporate debt securities 507; Market comparables Price \$ 2; \$ 116 \$ 85 Loans (d) 1,930; Market comparables Price \$ 10; \$ 104 \$ 72 Asset-backed securities 28; Market comparables Price \$ 1; \$ 97 \$ 57 Net interest rate derivatives 238; Option pricing Interest rate volatility 7 bps; 513 bps 101 bps Interest rate spread volatility 11 bps; 23 bps 15 bps Interest rate correlation (65)%; 99 % 35 % IR-FX correlation (35)%; 50 % 0 % 20 % Discounted cash flows Prepayment speed 0 %; 30 % 8 % Net credit derivatives (260) Discounted cash flows Credit correlation 34 %; 65 % 48 % Credit spread 3 bps; 1,302 bps 441 bps Recovery rate 0 %; 67 % 46 % Conditional default rate 2 %; 100 % 58 % Loss severity 100 % 100 % 36 %; Market comparables Price \$ 1; \$ 115 \$ 71 Net foreign exchange derivatives (298) Option pricing IR-FX correlation (40)%; 65 % 18 % (136) Discounted cash flows Prepayment speed 9 % 9 % Net equity derivatives (3,862) Option pricing Forward equity price (h) 61 %; 106 % 99 % Equity volatility 5 %; 138 % 35 % Equity correlation 18 %; 99 % 60 % Equity-FX correlation (79)%; 55 % (27)% Equity-IR correlation 20 %; 50 % 28 % Net commodity derivatives (731) Option pricing Oil Commodity Forward \$ 600 / MT; \$ 609 / MT \$ 605 / MT Forward power price \$ 12 / MWH; \$ 55 / MWH \$ 34 / MWH Commodity volatility 1 %; 58 % 29 % Commodity correlation (49)%; 95 % 23 % MSRs 3,276; Discounted cash flows Refer to Note 15 Other assets 299; Discounted cash flows Credit spread 45 bps 45 bps Yield 4 % 30 % 7 % 585; Market comparables Price \$ 29; \$ 29 \$ 29 Long-term debt, short-term borrowings, and deposits (e) 27,912; Option pricing Interest rate volatility 7 bps; 513 bps 101 bps Interest rate correlation (65)%; 99 % 35 % IR-FX correlation (35)%; 50 % 0 % Equity correlation 18 %; 99 % 60 % Equity-FX correlation (79)%; 55 % (27)% Equity-IR correlation 20 %; 50 % 28 % 818; Discounted cash flows Credit correlation 34 %; 65 % 48 % Other level 3 assets and liabilities, net (f) 250; (a) The categories presented in the table have been aggregated based upon the product type, which may differ from their classification on the Consolidated balance sheets. Furthermore, the inputs presented for each valuation technique in the table are, in some cases, not applicable to every instrument valued using the technique as the characteristics of the instruments can differ. (b) Comprises U.S. GSE and government agency securities of \$ 449 million, nonagency securities of \$ 28 million and non-trading loans of \$ 805 million. (c) Comprises nonagency securities of \$ 3 million, trading loans of \$ 43 million and non-trading loans of \$ 420 million. (d) Comprises trading loans of \$ 850 million and non-trading loans of \$ 1.1 billion. (e) Long-term debt, short-term borrowings and deposits include structured notes issued by the Firm that are financial instruments that typically contain embedded derivatives. The estimation of the fair value of structured notes includes the derivative features embedded within the instrument. The significant unobservable inputs are broadly consistent with those presented for derivative receivables. (f) Includes level 3 assets and liabilities that are insignificant both individually and in aggregate. (g) Price is a significant unobservable input for certain instruments. When quoted market prices are not readily available, reliance is generally placed on price-based internal valuation techniques. The price input is expressed assuming a par value of \$ 100 . (h) Forward equity price is expressed as a percentage of the current equity price. (i) Amounts represent weighted averages except for derivative related inputs where arithmetic averages are used. 180 JPMorgan Chase & Co./2020 Form 10-K Changes in and ranges of unobservable inputs The following discussion provides a description of the impact on a fair value measurement of a change in each unobservable input in isolation, and the interrelationship between unobservable inputs, where relevant and significant. The impact of changes in inputs may not be independent, as a change in one unobservable input may give rise to a change in another unobservable input. Where relationships do exist between two unobservable inputs, those relationships are discussed below. Relationships may also exist between observable and unobservable inputs (for example, as observable interest rates rise, unobservable prepayment rates decline); such relationships have not been included in the discussion below. In addition, for each of the individual relationships described below, the inverse relationship would also generally apply. The following discussion also provides a description of attributes of the underlying instruments and external market factors that affect the range of inputs used in the valuation of the Firm's positions. Yield; The yield of an asset is the interest rate used to discount future cash flows in a discounted cash flow calculation. An increase in the yield, in isolation, would result in a decrease in a fair value measurement. Credit spread; The

credit spread is the amount of additional annualized return over the market interest rate that a market participant would demand for taking exposure to the credit risk of an instrument. The credit spread for an instrument forms part of the discount rate used in a discounted cash flow calculation. Generally, an increase in the credit spread would result in a decrease in a fair value measurement. The yield and the credit spread of a particular mortgage-backed security primarily reflect the risk inherent in the instrument. The yield is also impacted by the absolute level of the coupon paid by the instrument (which may not correspond directly to the level of inherent risk). Therefore, the range of yield and credit spreads reflects the range of risk inherent in various instruments owned by the Firm. The risk inherent in mortgage-backed securities is driven by the subordination of the security being valued and the characteristics of the underlying mortgages within the collateralized pool, including borrower FICO scores, LTV ratios for residential mortgages and the nature of the property and/or any tenants for commercial mortgages. For corporate debt securities, obligations of U.S. states and municipalities and other similar instruments, credit spreads reflect the credit quality of the obligor and the tenor of the obligation.

Prepayment speed; The prepayment speed is a measure of the voluntary unscheduled principal repayments of a prepayable obligation in a collateralized pool. Prepayment speeds generally decline as borrower delinquencies rise. An increase in prepayment speeds, in isolation, would result in a decrease in a fair value measurement of assets valued at a premium to par and an increase in a fair value measurement of assets valued at a discount to par. Prepayment speeds may vary from collateral pool to collateral pool, and are driven by the type and location of the underlying borrower, and the remaining tenor of the obligation as well as the level and type (e.g., fixed or floating) of interest rate being paid by the borrower. Typically collateral pools with higher borrower credit quality have a higher prepayment rate than those with lower borrower credit quality, all other factors being equal.

Conditional default rate; The conditional default rate is a measure of the reduction in the outstanding collateral balance underlying a collateralized obligation as a result of defaults. While there is typically no direct relationship between conditional default rates and prepayment speeds, collateralized obligations for which the underlying collateral has high prepayment speeds will tend to have lower conditional default rates. An increase in conditional default rates would generally be accompanied by an increase in loss severity and an increase in credit spreads. An increase in the conditional default rate, in isolation, would result in a decrease in a fair value measurement. Conditional default rates reflect the quality of the collateral underlying a securitization and the structure of the securitization itself. Based on the types of securities owned in the Firm's market-making portfolios, conditional default rates are most typically at the lower end of the range presented.

Loss severity; The loss severity (the inverse concept is the recovery rate) is the expected amount of future realized losses resulting from the ultimate liquidation of a particular loan, expressed as the net amount of loss relative to the outstanding loan balance. An increase in loss severity is generally accompanied by an increase in conditional default rates. An increase in the loss severity, in isolation, would result in a decrease in a fair value measurement. The loss severity applied in valuing a mortgage-backed security investment depends on factors relating to the underlying mortgages, including the LTV ratio, the nature of the lender's lien on the property and other instrument-specific factors.

JPMorgan Chase & Co./2020 Form 10-K 181 Notes to consolidated financial statements

Correlation; Correlation is a measure of the relationship between the movements of two variables. Correlation is a pricing input for a derivative product where the payoff is driven by one or more underlying risks. Correlation inputs are related to the type of derivative (e.g., interest rate, credit, equity, foreign exchange and commodity) due to the nature of the underlying risks. When parameters are positively correlated, an increase in one parameter will result in an increase in the other parameter. When parameters are negatively correlated, an increase in one parameter will result in a decrease in the other parameter. An increase in correlation can result in an increase or a decrease in a fair value measurement. Given a short correlation position, an increase in correlation, in isolation, would generally result in a decrease in a fair value measurement. The level of correlation used in the valuation of derivatives with multiple underlying risks depends on a number of factors including the nature of those risks. For example, the correlation between two credit risk exposures would be different than that between two interest rate risk exposures. Similarly, the tenor of the transaction may also impact the correlation input, as the relationship between the underlying risks may be different over different time periods. Furthermore, correlation levels are very much dependent on market conditions and could have a relatively wide range of levels within or across asset classes over time, particularly in volatile market conditions.

Volatility; Volatility is a measure of the variability in possible returns for an instrument, parameter or market index given how much the particular instrument, parameter or index changes in value over time. Volatility is a pricing input for options, including equity options, commodity options, and interest rate options. Generally, the higher the volatility of the underlying, the riskier the instrument. Given a long position in an option, an increase in volatility, in isolation, would generally result in an increase in a fair value measurement. The level of volatility used in the valuation of a particular option-based derivative depends on a number of factors, including the nature of the risk underlying the option (e.g., the volatility of a particular equity security may be significantly different from that of a particular commodity index), the tenor of the derivative as well as the strike price of the option.

Forward price - Forward price is the price at which the buyer agrees to purchase the asset underlying a forward contract on the predetermined future delivery date, and is such that the value of the contract is zero at inception. The forward price is used as an input in the valuation of certain derivatives and depends on a number of factors including

interest rates, the current price of the underlying asset, and the expected income to be received and costs to be incurred by the seller as a result of holding that asset until the delivery date. An increase in the forward can result in an increase or a decrease in a fair value measurement. Changes in level 3 recurring fair value measurements

The following tables include a rollforward of the Consolidated balance sheets amounts (including changes in fair value) for financial instruments classified by the Firm within level 3 of the fair value hierarchy for the years ended December 31, 2020, 2019 and 2018. When a determination is made to classify a financial instrument within level 3, the determination is based on the significance of the unobservable inputs to the overall fair value measurement. However, level 3 financial instruments typically include, in addition to the unobservable or level 3 components, observable components (that is, components that are actively quoted and can be validated to external sources); accordingly, the gains and losses in the table below include changes in fair value due in part to observable factors that are part of the valuation methodology. Also, the Firm risk-manages the observable components of level 3 financial instruments using securities and derivative positions that are classified within level 1 or 2 of the fair value hierarchy; as these level 1 and level 2 risk management instruments are not included below, the gains or losses in the following tables do not reflect the effect of the Firm's risk management activities related to such level 3 instruments.

Level 3 liabilities at fair value as a percentage of total Firm liabilities at fair value (including liabilities measured at fair value on a nonrecurring basis) were 9 %, 16 % and 15 % at December 31, 2020, 2019 and 2018, respectively. (b) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans and other assets. Prior-period amounts have been revised to conform with the current presentation. (c) All level 3 derivatives are presented on a net basis, irrespective of underlying counterparty. (d) Predominantly reported in principal transactions revenue, except for changes in fair value for CCB mortgage loans, and lending-related commitments originated with the intent to sell, and mortgage loan purchase commitments, which are reported in mortgage fees and related income. (e) Changes in fair value for MSRs are reported in mortgage fees and related income. (f) Realized (gains)/losses due to DVA for fair value option elected liabilities are reported in principal transactions revenue, and they were not material for the years ended December 31, 2020, 2019 and 2018, respectively. Unrealized (gains)/losses are reported in OCI, and they were \$ 221 million, \$ 319 million and \$(277) million for the years ended December 31, 2020, 2019 and 2018, respectively. (g) Loan originations are included in purchases. (h) Includes financial assets and liabilities that have matured, been partially or fully repaid, impacts of modifications, deconsolidation associated with beneficial interests in VIEs and other items. (i) All transfers into and/or out of level 3 are based on changes in the observability and/or significance of the valuation inputs and are assumed to occur at the beginning of the quarterly reporting period in which they occur. (j) Realized gains/(losses) on AFS securities, as well as other-than-temporary impairment (OTTI) losses that are recorded in earnings, are reported in investment securities gains/(losses). Unrealized gains/(losses) are reported in OCI. There were no realized gains/(losses) and foreign exchange hedge accounting adjustments recorded in income on AFS securities for the years ended December 31, 2020 and 2019, respectively and \$ 1 million recorded for the year ended December 31, 2018. There were no material unrealized gains/(losses) recorded on AFS securities in OCI for the years ended December 31, 2020, 2019 and 2018 respectively. Level 3 analysis Consolidated balance sheets changes Level 3 assets at fair value including assets measured at fair value on a nonrecurring basis were 0.5 % of total Firm assets at December 31, 2020. The

following describes significant changes to level 3 assets since December 31, 2019, for those items measured at fair value on a recurring basis. Refer to Assets and liabilities measured at fair value on a nonrecurring basis on page 189 for further information on changes impacting items measured at fair value on a nonrecurring basis. For the year ended December 31, 2020 Level 3 assets were \$ 16.4 billion at December 31, 2020, reflecting an increase of \$ 2.9 billion from December 31, 2019. The increase for the year ended December 31, 2020 was driven by: \$ 907 million increase in gross interest rate derivative receivables and \$ 1.4 billion increase in gross equity derivative receivables largely due to gains net of settlements. \$ 1.8 billion increase in non-trading loans due to net transfers. partially offset by \$ 1.4 billion decrease in MSRs due to losses and settlements partially offset by purchases. Refer to the sections below for additional information. Transfers between levels for instruments carried at fair value on a recurring basis During the year ended December 31, 2020, significant transfers from level 2 into level 3 included the following: \$ 1.8 billion of total debt and equity instruments, predominantly equity securities and trading loans, driven by a decrease in observability. \$ 2.6 billion of gross equity derivative receivables and \$ 3.5 billion of gross equity derivative payables as a result of a decrease in observability and an increase in the significance of unobservable inputs. \$ 880 million of gross interest rate derivative payables as a result of a decrease in observability and an increase in the significance of unobservable inputs. \$ 2.6 billion of non-trading loans driven by a decrease in observability. \$ 1.2 billion of long-term debt driven by a decrease in observability and an increase in the significance of unobservable inputs for structured notes. During the year ended December 31, 2020, significant transfers from level 3 into level 2 included the following: \$ 2.0 billion of total debt and equity instruments, predominantly due to corporate debt and trading loans, driven by an increase in observability. \$ 2.4 billion of gross equity derivative receivables and \$ 2.4 billion of gross equity derivative payables as a result of an increase in observability and a decrease in the significance of unobservable inputs. \$ 943 million of deposits as a result of an increase in observability and a decrease in the significance of unobservable inputs. \$ 1.3 billion of long-term debt driven by an increase in observability and a decrease in the significance of unobservable inputs for structured notes. During the year ended December 31, 2019, significant transfers from level 2 into level 3 included the following: \$ 993 million of total debt and equity instruments, the majority of which were trading loans, driven by a decrease in observability. \$ 904 million of gross equity derivative payables as a result of a decrease in observability and an increase in the significance of unobservable inputs. 186 JPMorgan Chase & Co./2020 Form 10-K During the year ended December 31, 2019, significant transfers from level 3 into level 2 included the following: \$ 1.5 billion of total debt and equity instruments, the majority of which were obligations of U.S. states and municipalities and trading loans, driven by an increase in observability. \$ 1.1 billion of gross equity derivative receivables and \$ 1.3 billion of gross equity derivative payables as a result of an increase in observability and a decrease in the significance of unobservable inputs. \$ 962 million of gross commodities derivative payables as a result of an increase in observability. \$ 1.2 billion of deposits as a result of an increase in observability and a decrease in the significance of unobservable inputs. \$ 1.4 billion of long-term debt as a result of an increase in observability and a decrease in the significance of unobservable inputs. During the year ended December 31, 2018, significant transfers from level 2 into level 3 included the following: \$ 1.4 billion of total debt and equity instruments, the majority of which were trading loans, driven by a decrease in observability. \$ 1.0 billion of gross equity derivative receivables and \$ 1.6 billion of gross equity derivative payables as a result of a decrease in observability and an increase in the significance of unobservable inputs. \$ 1.1 billion of long-term debt driven by a decrease in observability and an increase in the significance of unobservable inputs for certain structured notes. During the year ended December 31, 2018, significant transfers from level 3 into level 2 included the following: \$ 1.5 billion of total debt and equity instruments, the majority of which were trading loans, driven by an increase in observability. \$ 1.2 billion of gross equity derivative receivables and \$ 1.5 billion of gross equity derivative payables as a result of an increase in observability and a decrease in the significance of unobservable inputs. All transfers are based on changes in the observability and/or significance of the valuation inputs and are assumed to occur at the beginning of the quarterly reporting period in which they occur. Gains and losses The following describes significant components of total realized/unrealized gains/(losses) for instruments measured at fair value on a recurring basis for the years ended December 31, 2020, 2019 and 2018. These amounts exclude any effects of the Firm's risk management activities where the financial instruments are classified as level 1 and 2 of the fair value hierarchy. Refer to Changes in level 3 recurring fair value measurements rollforward tables on pages 182-186 for further information on these instruments. 2020 \$ 10 million of net gains on assets driven by gains in net interest rate derivative receivables due to market movements largely offset by losses in MSRs reflecting faster prepayment speeds on lower rates. Refer to Note 15 for additional information on MSRs. \$ 102 million of net gains on liabilities driven by market movements in short-term borrowings. 2019 \$ 2.1 billion of net losses on assets largely due to MSRs reflecting faster prepayment speeds on lower rates. Refer to Note 15 for additional information on MSRs. \$ 3.3 billion of net losses on liabilities predominantly driven by market movements in

long-term debt. 2018 \$1.6 billion of net gains on liabilities largely driven by market movements in long-term debt. JPMorgan Chase & Co./2020 Form 10-K 187 Notes to consolidated financial statements Credit and funding adjustments; derivatives Derivatives are generally valued using models that use as their basis observable market parameters. These market parameters generally do not consider factors such as counterparty nonperformance risk, the Firm's own credit quality, and funding costs. Therefore, it is generally necessary to make adjustments to the base estimate of fair value to reflect these factors. CVA represents the adjustment, relative to the relevant benchmark interest rate, necessary to reflect counterparty nonperformance risk. The Firm estimates CVA using a scenario analysis to estimate the expected positive credit exposure across all of the Firm's existing positions with each counterparty, and then estimates losses based on the probability of default and estimated recovery rate as a result of a counterparty credit event considering contractual factors designed to mitigate the Firm's credit exposure, such as collateral and legal rights of offset. The key inputs to this methodology are (i) the probability of a default event occurring for each counterparty, as derived from observed or estimated CDS spreads; and (ii) estimated recovery rates implied by CDS spreads, adjusted to consider the differences in recovery rates as a derivative creditor relative to those reflected in CDS spreads, which generally reflect senior unsecured creditor risk. FVA represents the adjustment to reflect the impact of funding and is recognized where there is evidence that a market participant in the principal market would incorporate it in a transfer of the instrument. The Firm's FVA framework, applied to uncollateralized (including partially collateralized) over-the-counter (OTC) derivatives incorporates key inputs such as: (i) the expected funding requirements arising from the Firm's positions with each counterparty and collateral arrangements; and (ii) the estimated market funding cost in the principal market which, for derivative liabilities, considers the Firm's credit risk (DVA). For collateralized derivatives, the fair value is estimated by discounting expected future cash flows at the relevant overnight indexed swap rate given the underlying collateral agreement with the counterparty, and therefore a separate FVA is not necessary. The following table provides the impact of credit and funding adjustments on principal transactions revenue in the respective periods, excluding the effect of any associated hedging activities. The FVA presented below includes the impact of the Firm's own credit quality on the inception value of liabilities as well as the impact of changes in the Firm's own credit quality over time. Year ended December 31, (in millions) 2020 2019 2018 Credit and funding adjustments: Derivatives CVA \$ (337) \$ 241 \$ 193 ; Derivatives FVA (64) 199 ; (74) Valuation adjustments on fair value option elected liabilities The valuation of the Firm's liabilities for which the fair value option has been elected requires consideration of the Firm's own credit risk. DVA on fair value option elected liabilities reflects changes (subsequent to the issuance of the liability) in the Firm's probability of default and LGD, which are estimated based on changes in the Firm's credit spread observed in the bond market. Realized (gains)/losses due to DVA for fair value option elected liabilities are reported in principal transactions revenue. Unrealized (gains)/losses are reported in OCI. Refer to page 186 in this Note and Note 24 for further information.

188 JPMorgan Chase & Co./2020 Form 10-K Assets and liabilities measured at fair value on a nonrecurring basis The following tables present the assets and liabilities held as of December 31, 2020 and 2019, respectively, for which nonrecurring fair value adjustments were recorded during the years ended December 31, 2020 and 2019, respectively, by major product category and fair value hierarchy. Fair value hierarchy Total fair value December 31, 2020 (in millions)

Level 1	Level 2	Level 3	Loans	Other assets	Total
\$ 1,611	\$ 972	\$ 2,583	\$ 1,611	\$ 972	\$ 2,583
\$ 1,616	\$ 1,951	\$ 3,567	\$ 1,616	\$ 1,951	\$ 3,567
\$ 1,616	\$ 1,951	\$ 3,567	\$ 1,616	\$ 1,951	\$ 3,567

Accounts payable and other liabilities (b) \$ 12 ; Total liabilities measured at fair value on a nonrecurring basis \$ 12 ; Fair value hierarchy Total fair value December 31, 2019 (in millions)

Level 1	Level 2	Level 3	Loans	Other assets	Total
\$ 3,462	\$ 269	\$ 3,731	\$ 3,462	\$ 269	\$ 3,731
\$ 1,043	\$ 1,057	\$ 4,788	\$ 1,043	\$ 1,057	\$ 4,788
\$ 1,043	\$ 1,057	\$ 4,788	\$ 1,043	\$ 1,057	\$ 4,788

(a) Primarily includes equity securities without readily determinable fair values that were adjusted based on observable price changes in orderly transactions from an identical or similar investment of the same issuer (measurement alternative). Of the \$ 979 million in level 3 assets measured at fair value on a nonrecurring basis as of December 31, 2020, \$ 535 million related to equity securities adjusted based on the measurement alternative. These equity securities are classified as level 3 due to the infrequency of the observable prices and/or the restrictions on the shares. (b) There were no liabilities measured at fair value on a nonrecurring basis at December 31, 2019. (c) Primarily includes certain mortgage loans that were reclassified to held-for-sale. (d) Of the \$ 972 million in level 3 assets measured at fair value on a nonrecurring basis as of December 31, 2020, \$ 602 million related to residential real estate loans carried at the net realizable value of the underlying collateral (e.g., collateral-dependent loans). These amounts are classified as level 3 as they are valued using information from broker's price opinions, appraisals and automated valuation models and discounted based upon the Firm's experience with actual liquidation values. These discounts ranged from 13 % to 46 % with a weighted average of 27 %. (e) Prior-period amounts have been revised to conform with the current presentation. Nonrecurring fair value changes The following table presents the total change in value of assets and liabilities for which fair value

adjustments have been recognized for the years ended December 31, 2020, 2019 and 2018, related to assets and liabilities held at those dates. December 31, (in millions) 2020 2019 2018 Loans (a) \$ (393) \$ (274) \$ (68) Other assets (b) (529) 182 (c) 132 Accounts payable and other liabilities (11) Total nonrecurring fair value gains/(losses) \$ (933) \$ (92) \$ 64 (a) Includes the impact of certain mortgage loans that were reclassified to held-for-sale. (b) Included \$(134) million, \$ 201 million and \$ 149 million for the years ended December 31, 2020, 2019 and 2018, respectively, of net (losses)/gains as a result of the measurement alternative. (c) Prior-period amounts have been revised to conform with the current presentation. Refer to Note 12 for further information about the measurement of collateral-dependent loans. JPMorgan Chase & Co./2020 Form 10-K 189 Notes to consolidated financial statements Equity securities without readily determinable fair values The Firm measures certain equity securities without readily determinable fair values at cost less impairment (if any), plus or minus observable price changes from an identical or similar investment of the same issuer, with such changes recognized in other income. In its determination of the new carrying values upon observable price changes, the Firm may adjust the prices if deemed necessary to arrive at the Firm's estimated fair values. Such adjustments may include adjustments to reflect the different rights and obligations of similar securities, and other adjustments that are consistent with the Firm's valuation techniques for private equity direct investments. The following table presents the carrying value of equity securities without readily determinable fair values held as of December 31, 2020 and 2019, that are measured under the measurement alternative and the related adjustments recorded during the periods presented for those securities with observable price changes. These securities are included in the nonrecurring fair value tables when applicable price changes are observable. As of or for the year ended December 31, (in millions) 2020 2019 Other assets Carrying value (a) \$ 2,368 \$ 2,441 Upward carrying value changes (b) 167 243 (d) Downward carrying value changes/impairment (c) (301) (42) (a) The period-end carrying values reflect cumulative purchases and sales in addition to upward and downward carrying value changes. (b) The cumulative upward carrying value changes between January 1, 2018 and December 31, 2020 were \$ 708 million. (c) The cumulative downward carrying value changes/impairment between January 1, 2018 and December 31, 2020 were \$(430) million . (d) Prior-period amounts have been revised to conform with the current presentation. Included in other assets above is the Firm's interest in approximately 40 million Visa Class B common shares, recorded at a nominal carrying value. These shares are subject to certain transfer restrictions currently and will be convertible into Visa Class A common shares upon final resolution of certain litigation matters involving Visa. The conversion rate of Visa Class B common shares into Visa Class A common shares is 1.6228 at December 31, 2020, and may be adjusted by Visa depending on developments related to the litigation matters. Additional disclosures about the fair value of financial instruments that are not carried on the Consolidated balance sheets at fair value U.S. GAAP requires disclosure of the estimated fair value of certain financial instruments, which are included in the following table. However, this table does not include other items, such as nonfinancial assets, intangible assets, certain financial instruments, and customer relationships. In the opinion of management, these items, in the aggregate, add significant value to JPMorgan Chase, but their fair value is not disclosed in this table. Financial instruments for which carrying value approximates fair value Certain financial instruments that are not carried at fair value on the Consolidated balance sheets are carried at amounts that approximate fair value, due to their short-term nature and generally negligible credit risk. These instruments include cash and due from banks, deposits with banks, federal funds sold, securities purchased under resale agreements and securities borrowed, short-term receivables and accrued interest receivable, short-term borrowings, federal funds purchased, securities loaned and sold under repurchase agreements, accounts payable, and accrued liabilities. In addition, U.S. GAAP requires that the fair value of deposit liabilities with no stated maturity (i.e., demand, savings and certain money market deposits) be equal to their carrying value; recognition of the inherent funding value of these instruments is not permitted. 190 JPMorgan Chase & Co./2020 Form 10-K The following table presents by fair value hierarchy classification the carrying values and estimated fair values at December 31, 2020 and 2019, of financial assets and liabilities, excluding financial instruments that are carried at fair value on a recurring basis, and their classification within the fair value hierarchy. December 31, 2020 December 31, 2019 Estimated fair value hierarchy Estimated fair value hierarchy (in billions) Carrying value Level 1 Level 2 Level 3 Total estimated fair value Carrying value Level 1 Level 2 Level 3 Total estimated fair value Financial assets Cash and due from banks \$ 24.9 \$ 24.9 \$ \$ \$ \$ 24.9 \$ 21.7 \$ 21.7 \$ \$ \$ \$ 21.7 Deposits with banks 502.7 502.7 \$ \$ \$ 502.7 241.9 241.9 \$ \$ \$ 241.9 Accrued interest and accounts receivable 89.4 \$ \$ 89.3 0.1 89.4 \$ 71.3 \$ \$ 71.2 0.1 71.3 Federal funds sold and securities purchased under resale agreements 58.3 \$ \$ 58.3 \$ 58.3 234.6 \$ \$ 234.6 Securities borrowed 107.7 \$ \$ 107.7 133.5 \$ \$ 133.5 Investment securities, held-to-maturity 201.8 53.2 152.3 \$ \$ 205.5 47.5 0.1 \$ 48.8 \$ \$ 48.9 Loans, net of allowance for loan losses (a) 940.1 \$ \$

For certain loans, the fair value is measured based on the value of the underlying collateral. Carrying value of the loan takes into account the loan's allowance for loan losses, which represents the loan's expected credit losses over its remaining expected life. The difference between the estimated fair value and carrying value of a loan is generally attributable to changes in market interest rates, including credit spreads, market liquidity premiums and other factors that affect the fair value of a loan but do not affect its carrying value. The majority of the Firm's lending-related commitments are not carried at fair value on a recurring basis on the Consolidated balance sheets. The carrying value and the estimated fair value of these wholesale lending-related commitments were as follows for the periods indicated.

	December 31, 2020	December 31, 2019
Estimated fair value hierarchy	Estimated fair value hierarchy (in billions)	Carrying value (a)(b)
Level 1	Level 2	Level 3
Level 2	Level 3	Total estimated fair value
Wholesale lending-related commitments	\$ 2.2	\$ 2.1
	\$ 1.2	\$ 1.9
	\$ 1.9	\$ 1.9

(a) Excludes the current carrying values of the guarantee liability and the offsetting asset, each of which is recognized at fair value at the inception of the guarantees. (b) Includes the wholesale allowance for lending-related commitments. The Firm does not estimate the fair value of consumer off-balance sheet lending-related commitments. In many cases, the Firm can reduce or cancel these commitments by providing the borrower notice or, in some cases as permitted by law, without notice. Refer to page 173 of this Note for a further discussion of the valuation of lending-related commitments. JPMorgan Chase & Co./2020 Form 10-K 191 Notes to consolidated financial statements Note 3; Fair value option The fair value option provides an option to elect fair value as an alternative measurement for selected financial assets, financial liabilities, unrecognized firm commitments, and written loan commitments. The Firm has elected to measure certain instruments at fair value for several reasons including to mitigate income statement volatility caused by the differences between the measurement basis of elected instruments (e.g., certain instruments that otherwise would be accounted for on an accrual basis) and the associated risk management arrangements that are accounted for on a fair value basis, as well as to better reflect those instruments that are managed on a fair value basis. The Firm's election of fair value includes the following instruments:

- Loans purchased or originated as part of securitization warehousing activity, subject to bifurcation accounting, or managed on a fair value basis, including lending-related commitments
- Certain securities financing agreements
- Owned beneficial interests in securitized financial assets that contain embedded credit derivatives, which would otherwise be required to be separately accounted for as a derivative instrument
- Structured notes, which are predominantly financial instruments that contain embedded derivatives, that are issued as part of client-driven activities
- Certain long-term beneficial interests issued by CIB's consolidated securitization trusts where the underlying assets are carried at fair value

192 JPMorgan Chase & Co./2020 Form 10-K Changes in fair value under the fair value option election The following table presents the changes in fair value included in the Consolidated statements of income for the years ended December 31, 2020, 2019 and 2018, for items for which the fair value option was elected. The profit and loss information presented below only includes the financial instruments that were elected to be measured at fair value; related risk management instruments, which are required to be measured at fair value, are not included in the table.

	2020	2019	2018

Prior-period amounts have been revised to conform with the current presentation. (b) Unrealized gains/(losses) due to instrument-specific credit risk (DVA) for liabilities for which the fair value option has been elected are recorded in OCI and subsequently recorded in principal transactions revenue when realized. Realized gains/(losses) due to instrument-specific credit risk recorded in principal transactions revenue were \$ 20 million for the year ended December 31, 2020 and were not material for the years ended December 31, 2019 and 2018. (c) Long-term debt measured at fair value predominantly relates to structured notes. Although the risk associated with the structured notes is actively managed, the gains/(losses) reported in this table do not include the income statement impact of the risk management instruments used to manage such risk. (d) Reported in mortgage fees and related income. (e) Reported in other income. (f) Changes in fair value exclude contractual interest, which is included in interest income and interest expense for all instruments other than hybrid financial instruments. Refer to Note 7 for further information regarding interest income and interest expense. Determination of instrument-specific credit risk for items for which the fair value option was elected The following describes how the gains and losses that are attributable to changes in instrument-specific credit risk, were determined.

Loans and lending-related commitments: For floating-rate instruments, all changes in value are attributed to instrument-specific credit risk. For fixed-rate instruments, an allocation of the changes in value for the period is made between those changes in value that are interest rate-related and changes in value that are credit-related. Allocations are generally based on an analysis of borrower-specific credit spread and recovery information, where available, or benchmarking to similar entities or industries.

Long-term debt: Changes in value attributable to instrument-specific credit risk were derived principally from observable changes in the Firm's credit spread as observed in the bond market.

Securities financing agreements: Generally, for these types of agreements, there is a requirement that collateral be maintained with a market value equal to or in excess of the principal amount loaned; as a result, there would be no adjustment or an immaterial adjustment for instrument-specific credit risk related to these agreements.

JPMorgan Chase & Co./2020 Form 10-K 193 Notes to consolidated financial statements Difference between aggregate fair value and aggregate remaining contractual principal balance outstanding The following table reflects the difference between the aggregate fair value and the aggregate remaining contractual principal balance outstanding as of December 31, 2020 and 2019, for loans, long-term debt and long-term beneficial interests for which the fair value option has been elected.

(a) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans and other assets. Prior-period amounts have been revised to conform with the current presentation. (b) These balances are excluded from nonaccrual loans as the loans are insured and/or guaranteed by U.S. government agencies. (c) There were

no performing loans that were ninety days or more past due as of December 31, 2020 and 2019. (d) Remaining contractual principal is not applicable to nonprincipal-protected structured notes and long-term beneficial interests. Unlike principal-protected structured notes and long-term beneficial interests, for which the Firm is obligated to return a stated amount of principal at maturity, nonprincipal-protected structured notes and long-term beneficial interests do not obligate the Firm to return a stated amount of principal at maturity, but for structured notes to return an amount based on the performance of an underlying variable or derivative feature embedded in the note. However, investors are exposed to the credit risk of the Firm as issuer for both nonprincipal-protected and principal-protected notes. (e) Where the Firm issues principal-protected zero-coupon or discount notes, the balance reflects the contractual principal payment at maturity or, if applicable, the contractual principal payment at the Firm's next call date. At December 31, 2020 and 2019, the contractual amount of lending-related commitments for which the fair value option was elected was \$ 18.1 billion and \$ 8.6 billion, respectively, with a corresponding fair value of \$(39) million and \$(120) million, respectively. Refer to Note 28 for further information regarding off-balance sheet lending-related financial instruments. Prior-period amounts have been revised to conform with the current presentation.

194 JPMorgan Chase & Co./2020 Form 10-K Structured note products by balance sheet classification and risk component The following table presents the fair value of structured notes, by balance sheet classification and the primary risk type. December 31, 2020 December 31, 2019 (in millions)

195 JPMorgan Chase & Co./2020 Form 10-K Notes to consolidated financial statements Note 4 Credit risk concentrations Concentrations of credit risk arise when a number of clients, counterparties or customers are engaged in similar business activities or activities in the same geographic region, or when they have similar economic features that would cause their ability to meet contractual obligations to be similarly affected by changes in economic conditions. JPMorgan Chase regularly monitors various segments of its credit portfolios to assess potential credit risk concentrations and to obtain additional collateral when deemed necessary and permitted under the Firm's agreements. Senior management is significantly involved in the credit approval and review process, and risk levels are adjusted as needed to reflect the Firm's risk appetite. In the Firm's consumer portfolio, concentrations are managed primarily by product and by U.S. geographic region, with a key focus on trends and concentrations at the portfolio level, where potential credit risk concentrations can be remedied through changes in underwriting policies and portfolio guidelines. Refer to Note 12 for additional information on the geographic composition of the Firm's consumer loan portfolios. In the wholesale portfolio, credit risk concentrations are evaluated primarily by industry and monitored regularly on both an aggregate portfolio level and on an individual client or counterparty basis. The Firm's wholesale exposure is managed through loan syndications and participations, loan sales, securitizations, credit derivatives, master netting agreements, collateral and other risk-reduction techniques. Refer to Note 12 for additional information on loans. The Firm does not believe that its exposure to any particular loan product or industry segment (e.g., real estate), or its exposure to residential real estate loans with high LTV ratios, results in a significant concentration of credit risk. Terms of loan products and collateral coverage are included in the Firm's assessment when extending credit and establishing its allowance for loan losses.

196 JPMorgan Chase & Co./2020 Form 10-K The table below presents both on-balance sheet and off-balance sheet consumer and wholesale credit exposure by the Firm's three credit portfolio segments as of December 31, 2020 and 2019. The wholesale industry of risk category is generally based on the client or counterparty's primary business activity. In conjunction with the adoption of CECL, the Firm reclassified risk-rated loans and lending-related commitments from the consumer, excluding credit card portfolio segment to the wholesale portfolio segment, to align with the methodology applied when determining the allowance. Prior-period amounts have been revised to conform with the current presentation. Refer to Note 1 for further information.

(b) The industry rankings presented in the table as of December 31, 2019, are based on the industry rankings of the corresponding exposures at December 31, 2020, not actual rankings of such exposures at December 31, 2019. (c) Individuals and Individual Entities predominantly consists of Wealth Management clients within AWM and includes exposure to personal investment companies and personal and testamentary trusts. (d) In addition to the credit risk exposure to states and municipal governments (both U.S. and non-U.S.) at December 31, 2020 and 2019, noted above, the Firm held: \$ 7.2 billion and \$ 6.5 billion, respectively, of trading assets; \$ 20.4 billion and \$ 29.8 billion, respectively, of AFS securities; and \$ 12.8 billion and \$ 4.8 billion, respectively, of HTM securities, issued by U.S. state and municipal governments. Refer to Note 2 and Note 10 for further information. (e) All other includes: SPEs and Private education and civic organizations, representing approximately 92 % and 8 %, respectively, at December 31, 2020 and 90 % and 10 %, respectively, at December 31, 2019 . Refer to Note 14 for more information on exposures to SPEs. (f) Receivables from customers reflect held-for-investment margin loans to brokerage clients in CIB, CCB and AWM that are collateralized by assets maintained in the clients’ brokerage accounts (e.g., cash on deposit, liquid and readily marketable debt or equity securities). Because of this collateralization, no allowance for credit losses is generally held against these receivables. To manage its credit risk the Firm establishes margin requirements and monitors the required margin levels on an ongoing basis, and requires clients to deposit additional cash or other collateral, or to reduce positions, when appropriate. These receivables are reported within accrued interest and accounts receivable on the Firm’s Consolidated balance sheets. (g) Excludes cash placed with banks of \$ 516.9 billion and \$ 254.0 billion, at December 31, 2020 and 2019, respectively, which is predominantly placed with various central banks, primarily Federal Reserve Banks. (h) Credit exposure is net of risk participations and excludes the benefit of credit derivatives used in credit portfolio management activities held against derivative receivables or loans and liquid securities and other cash collateral held against derivative receivables. (i) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans, which resulted in a corresponding reclassification of certain off-balance sheet commitments. Prior-period amounts have been revised to conform with the current presentation. (j) At December 31, 2020, included \$ 19.2 billion of loans in Business Banking under the PPP. PPP loans are guaranteed by the SBA. Other than in certain limited circumstances, the Firm typically does not recognize charge-offs, classify as nonaccrual nor record an allowance for loan losses on these loans. (k) Represents lending-related financial instruments. JPMorgan Chase & Co./2020 Form 10-K 197 Notes to consolidated financial statements Note 5 – Derivative instruments Derivative contracts derive their value from underlying asset prices, indices, reference rates, other inputs or a combination of these factors and may expose counterparties to risks and rewards of an underlying asset or liability without having to initially

invest in, own or exchange the asset or liability. JPMorgan Chase makes markets in derivatives for clients and also uses derivatives to hedge or manage its own risk exposures. Predominantly all of the Firm's derivatives are entered into for market-making or risk management purposes. Market-making derivatives The majority of the Firm's derivatives are entered into for market-making purposes. Clients use derivatives to mitigate or modify interest rate, credit, foreign exchange, equity and commodity risks. The Firm actively manages the risks from its exposure to these derivatives by entering into other derivative contracts or by purchasing or selling other financial instruments that partially or fully offset the exposure from client derivatives. Risk management derivatives The Firm manages certain market and credit risk exposures using derivative instruments, including derivatives in hedge accounting relationships and other derivatives that are used to manage risks associated with specified assets and liabilities. The Firm generally uses interest rate derivatives to manage the risk associated with changes in interest rates. Fixed-rate assets and liabilities appreciate or depreciate in market value as interest rates change. Similarly, interest income and expense increase or decrease as a result of variable-rate assets and liabilities resetting to current market rates, and as a result of the repayment and subsequent origination or issuance of fixed-rate assets and liabilities at current market rates. Gains and losses on the derivative instruments related to these assets and liabilities are expected to substantially offset this variability. Foreign currency derivatives are used to manage the foreign exchange risk associated with certain foreign currency-denominated (i.e., non-U.S. dollar) assets and liabilities and forecasted transactions, as well as the Firm's net investments in certain non-U.S. subsidiaries or branches whose functional currencies are not the U.S. dollar. As a result of fluctuations in foreign currencies, the U.S. dollar-equivalent values of the foreign currency-denominated assets and liabilities or the forecasted revenues or expenses increase or decrease. Gains or losses on the derivative instruments related to these foreign currency-denominated assets or liabilities, or forecasted transactions, are expected to substantially offset this variability. Commodities derivatives are used to manage the price risk of certain commodities inventories. Gains or losses on these derivative instruments are expected to substantially offset the depreciation or appreciation of the related inventory. Credit derivatives are used to manage the counterparty credit risk associated with loans and lending-related commitments. Credit derivatives compensate the purchaser when the entity referenced in the contract experiences a credit event, such as bankruptcy or a failure to pay an obligation when due. Credit derivatives primarily consist of CDS. Refer to the Credit derivatives section on pages 209-211 of this Note for a further discussion of credit derivatives. Refer to the risk management derivatives gains and losses table on page 209 of this Note, and the hedge accounting gains and losses tables on pages 206-208 of this Note for more information about risk management derivatives. Derivative counterparties and settlement types The Firm enters into OTC derivatives, which are negotiated and settled bilaterally with the derivative counterparty. The Firm also enters into, as principal, certain ETD such as futures and options, and OTC-cleared derivative contracts with CCPs. ETD contracts are generally standardized contracts traded on an exchange and cleared by the CCP, which is the Firm's counterparty from the inception of the transactions. OTC-cleared derivatives are traded on a bilateral basis and then novated to the CCP for clearing. Derivative clearing services The Firm provides clearing services for clients in which the Firm acts as a clearing member at certain exchanges and clearing houses. The Firm does not reflect the clients' derivative contracts in its Consolidated Financial Statements. Refer to Note 28 for further information on the Firm's clearing services. Accounting for derivatives All free-standing derivatives that the Firm executes for its own account are required to be recorded on the Consolidated balance sheets at fair value. As permitted under U.S. GAAP, the Firm nets derivative assets and liabilities, and the related cash collateral receivables and payables, when a legally enforceable master netting agreement exists between the Firm and the derivative counterparty. Refer to Note 1 for further discussion of the offsetting of assets and liabilities. The accounting for changes in value of a derivative depends on whether or not the transaction has been designated and qualifies for hedge accounting. Derivatives that are not designated as hedges are reported and measured at fair value through earnings. The tabular disclosures on pages 202-209 of this Note provide additional information on the amount of, and reporting for, derivative assets, liabilities, gains and losses. Refer to Notes 2 and 3 for a further discussion of derivatives embedded in structured notes. 198 JPMorgan Chase & Co./2020 Form 10-K Derivatives designated as hedges The Firm applies hedge accounting to certain derivatives executed for risk management purposes generally interest rate, foreign exchange and commodity derivatives. However, JPMorgan Chase does not seek to apply hedge accounting to all of the derivatives involved in the Firm's risk management activities. For example, the Firm does not apply hedge accounting to purchased CDS used to manage the credit risk of loans and lending-related commitments, because of the difficulties in qualifying such contracts as hedges. For the same reason, the Firm does not apply hedge accounting to certain interest rate, foreign exchange, and commodity derivatives used for risk management purposes. To qualify for hedge accounting, a derivative must be highly effective at reducing the risk associated with the exposure being hedged. In addition, for a derivative to be designated as a hedge, the risk management objective and strategy must be documented. Hedge documentation must identify the derivative hedging instrument, the asset or liability or forecasted transaction and type of risk to be hedged, and how the effectiveness of the derivative is assessed prospectively and retrospectively. To assess effectiveness, the Firm uses statistical methods such as regression analysis, nonstatistical methods such as dollar-value comparisons of the change in the fair value of the derivative to the change in

the fair value or cash flows of the hedged item, and qualitative comparisons of critical terms and the evaluation of any changes in those terms. The extent to which a derivative has been, and is expected to continue to be, highly effective at offsetting changes in the fair value or cash flows of the hedged item must be assessed and documented at least quarterly. If it is determined that a derivative is not highly effective at hedging the designated exposure, hedge accounting is discontinued. There are three types of hedge accounting designations: fair value hedges, cash flow hedges and net investment hedges. JPMorgan Chase uses fair value hedges primarily to hedge fixed-rate long-term debt, AFS securities and certain commodities inventories. For qualifying fair value hedges, the changes in the fair value of the derivative, and in the value of the hedged item for the risk being hedged, are recognized in earnings. Certain amounts excluded from the assessment of effectiveness are recorded in OCI and recognized in earnings over the life of the derivative. If the hedge relationship is terminated, then the adjustment to the hedged item continues to be reported as part of the basis of the hedged item, and for benchmark interest rate hedges, is amortized to earnings as a yield adjustment. Derivative amounts affecting earnings are recognized consistent with the classification of the hedged item; primarily net interest income and principal transactions revenue. JPMorgan Chase uses cash flow hedges primarily to hedge the exposure to variability in forecasted cash flows from floating-rate assets and liabilities and foreign currency-denominated revenue and expense. For qualifying cash flow hedges, changes in the fair value of the derivative are recorded in OCI and recognized in earnings as the hedged item affects earnings. Derivative amounts affecting earnings are recognized consistent with the classification of the hedged item; primarily noninterest revenue, net interest income and compensation expense. If the hedge relationship is terminated, then the change in value of the derivative recorded in AOCI is recognized in earnings when the cash flows that were hedged affect earnings. For hedge relationships that are discontinued because a forecasted transaction is expected to not occur according to the original hedge forecast, any related derivative values recorded in AOCI are immediately recognized in earnings. JPMorgan Chase uses net investment hedges to protect the value of the Firm's net investments in certain non-U.S. subsidiaries or branches whose functional currencies are not the U.S. dollar. For qualifying net investment hedges, changes in the fair value of the derivatives due to changes in spot foreign exchange rates are recorded in OCI as translation adjustments. Amounts excluded from the assessment of effectiveness are recorded directly in earnings. JPMorgan Chase & Co./2020 Form 10-K

199 Notes to consolidated financial statements The following table outlines the Firm's primary uses of derivatives and the related hedge accounting designation or disclosure category. Type of Derivative Use of Derivative Designation and disclosure Affected segment or unit Page reference Manage specifically identified risk exposures in qualifying hedge accounting relationships:

Interest rate Hedge fixed rate assets and liabilities	Fair value hedge	Corporate	206-207
Interest rate Hedge floating-rate assets and liabilities	Cash flow hedge	Corporate	208
Foreign exchange Hedge foreign currency-denominated assets and liabilities	Fair value hedge	Corporate	206-207
Foreign exchange Hedge foreign currency-denominated forecasted revenue and expense	Cash flow hedge	Corporate	208
Foreign exchange Hedge the value of the Firm's investments in non-U.S. dollar functional currency entities	Net investment hedge	Corporate	208
Commodity Hedge commodity inventory	Fair value hedge	CIB	206-207
Manage specifically identified risk exposures not designated in qualifying hedge accounting relationships:

JPMorgan Chase & Co./2020 Form 10-K Notional amount of derivative contracts The following table summarizes the notional amount of derivative contracts outstanding as of December 31, 2020 and 2019. Notional amounts (b) December 31, (in billions) 2020 2019 Interest rate contracts Swaps \$ 20,986; \$ 21,228; Futures and forwards 3,057; 3,152; Written options 3,375; 3,938; Purchased options 3,675; 4,361; Total interest rate contracts 31,093; 32,679; Credit derivatives (a) 1,201; 1,242; Foreign exchange contracts Cross-currency swaps 3,924; 3,604; Spot, futures and forwards 6,871; 5,577; Written options 830; 700; Purchased options 825; 718; Total foreign exchange contracts 12,450; 10,599; Equity contracts Swaps 448; 406; Futures and forwards 140; 142; Written options 676; 646; Purchased options 621; 611; Total equity contracts 1,885; 1,805; Commodity contracts Swaps 138; 147; Spot, futures and forwards 198; 211; Written options 124; 135; Purchased options 105; 124; Total commodity contracts 565; 617; Total derivative notional amounts \$ 47,194; \$ 46,942; (a) Refer to the Credit derivatives discussion on pages 209-211 for more information on volumes and types of credit derivative contracts. (b) Represents the sum of gross long and gross short third-party notional derivative contracts. While the notional amounts disclosed above give an indication of the volume of the Firm's derivatives activity, the notional amounts significantly exceed, in the Firm's view, the possible losses that could arise from such

transactions. For most derivative contracts, the notional amount is not exchanged; it is simply a reference amount used to calculate payments. JPMorgan Chase & Co./2020 Form 10-K 201 Notes to consolidated financial statements Impact of derivatives on the Consolidated balance sheets The following table summarizes information on derivative receivables and payables (before and after netting adjustments) that are reflected on the Firm's Consolidated balance sheets as of December 31, 2020 and 2019, by accounting designation (e.g., whether the derivatives were designated in qualifying hedge accounting relationships or not) and contract type. Free-standing derivative receivables and payables (a) Gross derivative receivables Gross derivative payables December 31, 2020 (in millions) Not designated as hedges Designated as hedges Total derivative receivables Net derivative receivables (b) Not designated as hedges Designated as hedges Total derivative payables Net derivative payables (b) Trading assets and liabilities Interest rate \$ 390,659 \$ 831 \$ 391,490 \$ 35,725 \$ 353,627 \$ 353,627 \$ 13,012 \$ 13,012 Credit 13,503 \$ 8212 \$ 13,503 \$ 680 \$ 15,192 \$ 15,192 \$ 1,995 \$ 1,995 Foreign exchange 205,359 \$ 901 \$ 206,260 \$ 15,781 \$ 214,229 \$ 214,229 \$ 215,926 \$ 215,926 Equity 74,798 \$ 8212 \$ 74,798 \$ 20,673 \$ 81,413 \$ 81,413 \$ 25,898 \$ 25,898 Commodity 20,579 \$ 924 \$ 21,503 \$ 6,771 \$ 20,834 \$ 20,834 \$ 1,895 \$ 1,895 Total fair value of trading assets and liabilities \$ 704,898 \$ 2,656 \$ 707,554 \$ 79,630 \$ 685,295 \$ 3,592 \$ 688,887 \$ 70,623 Gross derivative receivables Gross derivative payables December 31, 2019 (in millions) Not designated as hedges Designated as hedges Total derivative receivables Net derivative receivables (b) Not designated as hedges Designated as hedges Total derivative payables Net derivative payables (b) Trading assets and liabilities Interest rate \$ 312,451 \$ 843 \$ 313,294 \$ 27,421 \$ 279,272 \$ 279,272 \$ 1 \$ 1 Credit 14,876 \$ 8212 \$ 14,876 \$ 701 \$ 15,121 \$ 15,121 \$ 1,652 \$ 1,652 Foreign exchange 138,179 \$ 308 \$ 138,487 \$ 9,005 \$ 144,125 \$ 144,125 \$ 983 \$ 983 Equity 45,727 \$ 8212 \$ 45,727 \$ 6,477 \$ 52,741 \$ 52,741 \$ 12,537 \$ 12,537 Commodity 16,914 \$ 328 \$ 17,242 \$ 6,162 \$ 19,736 \$ 19,736 \$ 149 \$ 149 Total fair value of trading assets and liabilities \$ 528,147 \$ 1,479 \$ 529,626 \$ 49,766 \$ 510,995 \$ 1,133 \$ 512,128 \$ 43,708 (a) Balances exclude structured notes for which the fair value option has been elected. Refer to Note 3 for further information. (b) As permitted under U.S. GAAP, the Firm has elected to net derivative receivables and derivative payables and the related cash collateral receivables and payables when a legally enforceable master netting agreement exists. 202 JPMorgan Chase & Co./2020 Form 10-K Derivatives netting The following tables present, as of December 31, 2020 and 2019, gross and net derivative receivables and payables by contract and settlement type. Derivative receivables and payables, as well as the related cash collateral from the same counterparty, have been netted on the Consolidated balance sheets where the Firm has obtained an appropriate legal opinion with respect to the master netting agreement. Where such a legal opinion has not been either sought or obtained, amounts are not eligible for netting on the Consolidated balance sheets, and those derivative receivables and payables are shown separately in the tables below. In addition to the cash collateral received and transferred that is presented on a net basis with derivative receivables and payables, the Firm receives and transfers additional collateral (financial instruments and cash). These amounts mitigate counterparty credit risk associated with the Firm's derivative instruments, but are not eligible for net presentation: collateral that consists of liquid securities and other cash collateral held at third-party custodians, which are shown separately as Collateral not nettable on the Consolidated balance sheets; in the tables below, up to the fair value exposure amount. Liquid securities represent high quality liquid assets as defined in the LCR rule; the amount of collateral held or transferred that exceeds the fair value exposure at the individual counterparty level, as of the date presented, which is excluded from the tables below; and collateral held or transferred that relates to derivative receivables or payables where an appropriate legal opinion has not been either sought or obtained with respect to the master netting agreement, which is excluded from the tables below. 2020 2019 December 31, (in millions) Gross derivative receivables Amounts netted on the Consolidated balance sheets Net derivative receivables Gross derivative receivables Amounts netted on the Consolidated balance sheets Net derivative receivables U.S. GAAP nettable derivative receivables Interest rate contracts: OTC \$ 367,056 \$ (337,451) \$ 29,605 \$ 299,205 \$ (276,255) \$ 22,950 OTC cleared 18,340 \$ (17,919) 421 \$ 9,442 \$ (9,360) 82 Exchange-traded (a) 554 \$ (395) 159 347 \$ (258) 89 Total interest rate contracts 385,950 \$ (355,765) 30,185 308,994 \$ (285,873) 23,121 Credit contracts: OTC 9,052 \$ (8,514) 538 10,743 \$ (10,317) 426 OTC cleared 4,326 \$ (4,309) 17 3,864 \$ (3,858) 6 Total credit contracts 13,378 \$ (12,823) 555 14,607 \$ (14,175) 432 Foreign exchange contracts: OTC 201,349 \$ (189,655) 11,694 136,252 \$ (129,324) 6,928 OTC cleared 834 \$ (819) 15 185 \$ (152) 33 Exchange-traded (a) 35 \$ (5) 30 10 \$ (6) 4 Total foreign exchange contracts 202,218 \$ (190,479) 11,739 136,447 \$ (129,482) 6,965 Equity

(b) Includes liquid securities and other cash collateral held at third-party custodians related to derivative instruments where an appropriate legal opinion has been obtained. For some counterparties, the collateral amounts of financial instruments may exceed the derivative receivables and derivative payables balances. Where this is the case, the total amount reported is limited to the net derivative receivables and net derivative payables balances with that counterparty. In the fourth quarter of 2020, the Firm refined its approach for disclosing additional collateral held by the Firm that may be used as security when the fair value of the client’s exposure is in the Firm’s favor. Prior-period amounts have been revised to conform with the current presentation. (c) Derivative collateral relates only to OTC and OTC-cleared derivative instruments. (d) Net derivatives receivable included cash collateral netted of \$ 88.0 billion and \$ 65.9 billion at December 31, 2020 and 2019, respectively. Net derivatives payable included cash collateral netted of \$ 78.4 billion and \$ 54.4 billion at December 31, 2020 and 2019, respectively. Derivative cash collateral relates to OTC and OTC-cleared derivative instruments. 204 JPMorgan Chase & Co./2020 Form 10-K Liquidity risk and credit-related contingent features In addition to the specific market risks introduced by each derivative contract type, derivatives expose JPMorgan Chase to credit risk — the risk that derivative counterparties may fail to meet their payment obligations under the derivative contracts and the collateral, if any, held by the Firm proves to be of insufficient value to cover the payment obligation. It is the policy of JPMorgan Chase to actively pursue, where possible, the use of legally enforceable master netting arrangements and collateral agreements to mitigate derivative counterparty credit risk inherent in derivative receivables. While derivative receivables expose the Firm to credit risk, derivative payables expose the Firm to liquidity risk, as the derivative contracts typically require the Firm to post cash or securities collateral with counterparties as the fair value of the contracts moves in the counterparties’ favor or upon specified downgrades in the Firm’s and its subsidiaries’ respective credit ratings. Certain derivative contracts also provide for termination of the contract, generally upon a downgrade of either the Firm or the counterparty, at the fair value of the derivative contracts. The following table shows the aggregate fair value of net derivative payables related to OTC and OTC-cleared derivatives that contain contingent

collateral or termination features that may be triggered upon a ratings downgrade, and the associated collateral the Firm has posted in the normal course of business, at December 31, 2020 and 2019. OTC and OTC-cleared derivative payables containing downgrade triggers December 31, (in millions) 2020 2019 Aggregate fair value of net derivative payables \$ 27,712; \$ 14,819; Collateral posted 26,289; 13,329; The following table shows the impact of a single-notch and two-notch downgrade of the long-term issuer ratings of JPMorgan Chase & Co. and its subsidiaries, predominantly JPMorgan Chase Bank, N.A., at December 31, 2020 and 2019, related to OTC and OTC-cleared derivative contracts with contingent collateral or termination features that may be triggered upon a ratings downgrade. Derivatives contracts generally require additional collateral to be posted or terminations to be triggered when the predefined threshold rating is breached. A downgrade by a single rating agency that does not result in a rating lower than a preexisting corresponding rating provided by another major rating agency will generally not result in additional collateral (except in certain instances in which additional initial margin may be required upon a ratings downgrade), nor in termination payments requirements. The liquidity impact in the table is calculated based upon a downgrade below the lowest current rating of the rating agencies referred to in the derivative contract. Liquidity impact of downgrade triggers on OTC and OTC-cleared derivatives 2020 2019 December 31, (in millions) Single-notch downgrade Two-notch downgrade Single-notch downgrade Two-notch downgrade Amount of additional collateral to be posted upon downgrade (a) \$ 119; \$ 1,243; \$ 189; \$ 1,467; Amount required to settle contracts with termination triggers upon downgrade (b) 153; 2,449; 104; 1,398; (a) Includes the additional collateral to be posted for initial margin. (b) Amounts represent fair values of derivative payables, and do not reflect collateral posted. Derivatives executed in contemplation of a sale of the underlying financial asset In certain instances the Firm enters into transactions in which it transfers financial assets but maintains the economic exposure to the transferred assets by entering into a derivative with the same counterparty in contemplation of the initial transfer. The Firm generally accounts for such transfers as collateralized financing transactions as described in Note 11, but in limited circumstances they may qualify to be accounted for as a sale and a derivative under U.S. GAAP. The amount of such transfers accounted for as a sale where the associated derivative was outstanding was not material at both December 31, 2020 and 2019. JPMorgan Chase & Co./2020 Form 10-K 205 Notes to consolidated financial statements Impact of derivatives on the Consolidated statements of income The following tables provide information related to gains and losses recorded on derivatives based on their hedge accounting designation or purpose. Fair value hedge gains and losses The following tables present derivative instruments, by contract type, used in fair value hedge accounting relationships, as well as pre-tax gains/(losses) recorded on such derivatives and the related hedged items for the years ended December 31, 2020, 2019 and 2018, respectively. The Firm includes gains/(losses) on the hedging derivative in the same line item in the Consolidated statements of income as the related hedged item. Gains/(losses) recorded in income Income statement impact of excluded components (e) OCI impact Year ended December 31, 2020 (in millions) Derivatives Hedged items Income statement impact Amortization approach Changes in fair value Derivatives - Gains/(losses) recorded in OCI (f) Contract type Interest rate (a)(b) \$ 2,962; \$ (1,889) \$ 1,073; \$ 8212; \$ 1,093; \$ 8212; \$ 1093; Foreign exchange (c) 793; (619) 174; (457) 174; 25; Commodity (d) (2,507) 2,650; 143; 8212; 137; 8212; Total \$ 1,248; \$ 142; \$ 1,390; \$ (457) \$ 1,404; \$ 25; Gains/(losses) recorded in income Income statement impact of excluded components (e) OCI impact Year ended December 31, 2019 (in millions) Derivatives Hedged items Income statement impact Amortization approach Changes in fair value Derivatives - Gains/(losses) recorded in OCI (f) Contract type Interest rate (a)(b) \$ 3,204; \$ (2,373) \$ 831; \$ 8212; \$ 828; \$ 8212; \$ 828; Foreign exchange (c) 154; 328; 482; (866) 482; 39; Commodity (d) (77) 148; 71; 8212; 63; 8212; Total \$ 3,281; \$ (1,897) \$ 1,384; \$ (866) \$ 1,373; \$ 39; Gains/(losses) recorded in income Income statement impact of excluded components (e) OCI impact Year ended December 31, 2018 (in millions) Derivatives Hedged items Income statement impact Amortization approach Changes in fair value Derivatives - Gains/(losses) recorded in OCI (f) Contract type Interest rate (a)(b) \$ (1,145) \$ 1,782; \$ 637; \$ 8212; \$ 623; \$ 8212; \$ 623; Foreign exchange (c) 1,092; (616) 476; (566) 476; (140) Commodity (d) 789; (754) 35; 8212; 26; 8212; Total \$ 736; \$ 412; \$ 1,148; \$ (566) \$ 1,125; \$ (140) (a) Primarily consists of hedges of the benchmark (e.g., London Interbank Offered Rate (LIBOR)) interest rate risk of fixed-rate long-term debt and AFS securities. Gains and losses were recorded in net interest income. (b) Excludes the amortization expense associated with the inception hedge accounting adjustment applied to the hedged item. This expense is recorded in net interest income and substantially offsets the income statement impact of the excluded components. Also excludes the accrual of interest on interest rate swaps and the related hedged items. (c) Primarily consists of hedges of the foreign currency risk of long-term debt and AFS securities for changes in spot foreign currency rates. Gains and losses related to the derivatives and the hedged items due to changes in foreign currency rates and the income statement impact of excluded components were recorded primarily in principal transactions revenue and net interest income. (d) Consists of overall fair value hedges of physical commodities inventories that are generally carried at the lower of cost or

net realizable value (net realizable value approximates fair value). Gains and losses were recorded in principal transactions revenue. (e) The assessment of hedge effectiveness excludes certain components of the changes in fair values of the derivatives and hedged items such as forward points on foreign exchange forward contracts, time values and cross-currency basis spreads. Excluded components may impact earnings either through amortization of the initial amount over the life of the derivative or through fair value changes recognized in the current period. (f) Represents the change in value of amounts excluded from the assessment of effectiveness under the amortization approach, predominantly cross-currency basis spreads. The amount excluded at inception of the hedge is recognized in earnings over the life of the derivative.

206 JPMorgan Chase & Co./2020 Form 10-K As of December 31, 2020 and 2019, the following amounts were recorded on the Consolidated balance sheets related to certain cumulative fair value hedge basis adjustments that are expected to reverse through the income statement in future periods as an adjustment to yield.

Carrying amount of the hedged items (a)(b) Cumulative amount of fair value hedging adjustments included in the carrying amount of hedged items: December 31, 2020 (in millions) Active hedging relationships Discontinued hedging relationships (d)(e) Total Assets Investment securities - AFS \$ 139,684; (c) \$ 3,572; \$ 847; \$ 4,419; Liabilities Long-term debt \$ 177,611; \$ 3,194; \$ 11,473; \$ 14,667; Beneficial interests issued by consolidated VIEs 746; (3) (3) Carrying amount of the hedged items (a)(b) Cumulative amount of fair value hedging adjustments included in the carrying amount of hedged items: December 31, 2019 (in millions) Active hedging relationships Discontinued hedging relationships (d)(e) Total Assets Investment securities - AFS \$ 125,860; (c) \$ 2,110; \$ 278; \$ 2,388; Liabilities Long-term debt \$ 157,545; \$ 6,719; \$ 161; \$ 6,880; Beneficial interests issued by consolidated VIEs 2,365; (8) (8) (a) Excludes physical commodities with a carrying value of \$ 11.5 billion and \$ 6.5 billion at December 31, 2020 and 2019, respectively, to which the Firm applies fair value hedge accounting. As a result of the application of hedge accounting, these inventories are carried at fair value, thus recognizing unrealized gains and losses in current periods. Since the Firm exits these positions at fair value, there is no incremental impact to net income in future periods. (b) Excludes hedged items where only foreign currency risk is the designated hedged risk, as basis adjustments related to foreign currency hedges will not reverse through the income statement in future periods. At December 31, 2020 and 2019, the carrying amount excluded for AFS securities is \$ 14.5 billion and \$ 14.9 billion, respectively, and for long-term debt is \$ 6.6 billion and \$ 2.8 billion, respectively. (c) Carrying amount represents the amortized cost, net of allowance if applicable. Refer to Note 10 for additional information. (d) Represents basis adjustments existing on the balance sheet date associated with hedged items that have been de-designated from qualifying fair value hedging relationships. (e) Positive amounts related to assets represent cumulative fair value hedge basis adjustments that will reduce net interest income in future periods. Positive (negative) amounts related to liabilities represent cumulative fair value hedge basis adjustments that will increase (reduce) net interest income in future periods.

JPMorgan Chase & Co./2020 Form 10-K 207 Notes to consolidated financial statements Cash flow hedge gains and losses The following tables present derivative instruments, by contract type, used in cash flow hedge accounting relationships, and the pre-tax gains/(losses) recorded on such derivatives, for the years ended December 31, 2020, 2019 and 2018, respectively. The Firm includes the gains/(losses) on the hedging derivative in the same line item in the Consolidated statements of income as the change in cash flows on the related hedged item. Derivatives gains/(losses) recorded in income and other comprehensive income/(loss) Year ended December 31, 2020 (in millions) Amounts reclassified from AOCI to income Amounts recorded in OCI Total change in OCI for period Contract type Interest rate (a) \$ 570; \$ 3,582; \$ 3,012; Foreign exchange (b) 41; 41; Total \$ 570; \$ 3,623; \$ 3,053; Derivatives gains/(losses) recorded in income and other comprehensive income/(loss) Year ended December 31, 2019 (in millions) Amounts reclassified from AOCI to income Amounts recorded in OCI Total change in OCI for period Contract type Interest rate (a) \$ (28); \$ (3); \$ 25; Foreign exchange (b) (75); 125; 200; Total \$ (103); \$ 122; \$ 225; Derivatives gains/(losses) recorded in income and other comprehensive income/(loss) Year ended December 31, 2018 (in millions) Amounts reclassified from AOCI to income Amounts recorded in OCI Total change in OCI for period Contract type Interest rate (a) \$ 44; \$ (44); \$ (88); Foreign exchange (b) (26); (201); (175); Total \$ 18; \$ (245); \$ (263); (a) Primarily consists of hedges of LIBOR-indexed floating-rate assets and floating-rate liabilities. Gains and losses were recorded in net interest income. (b) Primarily consists of hedges of the foreign currency risk of non-U.S. dollar-denominated revenue and expense. The income statement classification of gains and losses follows the hedged item; primarily noninterest revenue and compensation expense. The Firm did not experience any forecasted transactions that failed to occur for the years ended 2020, 2019 and 2018. Over the next 12 months, the Firm expects that approximately \$ 818 million (after-tax) of net gains recorded in AOCI at December 31, 2020, related to cash flow hedges will be recognized in income. For cash flow hedges that have been terminated, the maximum length of time over which the derivative results recorded in AOCI will be recognized in earnings is approximately nine years, corresponding to the timing of the originally hedged forecasted cash flows. For open cash flow hedges, the maximum length of time over which forecasted transactions are hedged is approximately seven years. The Firm's longer-dated forecasted transactions relate to core lending and borrowing activities. Net

investment hedge gains and losses The following table presents hedging instruments, by contract type, that were used in net investment hedge accounting relationships, and the pre-tax gains/(losses) recorded on such instruments for the years ended December 31, 2020, 2019 and 2018. 2020 2019 2018 Year ended December 31, (in millions) Amounts recorded in income (a)(b) Amounts recorded in OCI Amounts recorded in income (a)(b) Amounts recorded in OCI

	2020	2019	2018
Foreign exchange derivatives	\$(122)	\$(1,408)	\$ 72
Credit derivatives	\$ 64	\$ 11	\$ 1,219

(a) Certain components of hedging derivatives are permitted to be excluded from the assessment of hedge effectiveness, such as forward points on foreign exchange forward contracts. The Firm elects to record changes in fair value of these amounts directly in other income. (b) Excludes amounts reclassified from AOCI to income on the sale or liquidation of hedged entities. The Firm reclassified net pre-tax gains/(losses) of \$ 3 million and \$ 18 million to other income, and \$(17) million to other expense related to the liquidation of certain legal entities during the years ended December 31, 2020, 2019 and 2018, respectively. Refer to Note 24 for further information.

208 JPMorgan Chase & Co./2020 Form 10-K Gains and losses on derivatives used for specified risk management purposes The following table presents pre-tax gains/(losses) recorded on a limited number of derivatives, not designated in hedge accounting relationships, that are used to manage risks associated with certain specified assets and liabilities, including certain risks arising from mortgage commitments, warehouse loans, MSRs, wholesale lending exposures, and foreign currency denominated assets and liabilities. Derivatives gains/(losses) recorded in income Year ended December 31, (in millions) 2020 2019 2018 Contract type Interest rate (a) \$ 2,994 \$ 1,491 \$ 79 Credit (b) (176) (30) (21) Foreign exchange (c) 43 (5) 117 Total \$ 2,861 \$ 1,456 \$ 175 (a) Primarily represents interest rate derivatives used to hedge the interest rate risk inherent in mortgage commitments, warehouse loans and MSRs, as well as written commitments to originate warehouse loans. Gains and losses were recorded predominantly in mortgage fees and related income. (b) Relates to credit derivatives used to mitigate credit risk associated with lending exposures in the Firm's wholesale businesses. These derivatives do not include credit derivatives used to mitigate counterparty credit risk arising from derivative receivables, which is included in gains and losses on derivatives related to market-making activities and other derivatives. Gains and losses were recorded in principal transactions revenue. (c) Primarily relates to derivatives used to mitigate foreign exchange risk of specified foreign currency-denominated assets and liabilities. Gains and losses were recorded in principal transactions revenue. Gains and losses on derivatives related to market-making activities and other derivatives The Firm makes markets in derivatives in order to meet the needs of customers and uses derivatives to manage certain risks associated with net open risk positions from its market-making activities, including the counterparty credit risk arising from derivative receivables. All derivatives not included in the hedge accounting or specified risk management categories above are included in this category. Gains and losses on these derivatives are primarily recorded in principal transactions revenue. Refer to Note 6 for information on principal transactions revenue.

Credit derivatives Credit derivatives are financial instruments whose value is derived from the credit risk associated with the debt of a third-party issuer (the reference entity) and which allow one party (the protection purchaser) to transfer that risk to another party (the protection seller). Credit derivatives expose the protection purchaser to the creditworthiness of the protection seller, as the protection seller is required to make payments under the contract when the reference entity experiences a credit event, such as a bankruptcy, a failure to pay its obligation or a restructuring. The seller of credit protection receives a premium for providing protection but has the risk that the underlying instrument referenced in the contract will be subject to a credit event. The Firm is both a purchaser and seller of protection in the credit derivatives market and uses these derivatives for two primary purposes. First, in its capacity as a market-maker, the Firm actively manages a portfolio of credit derivatives by purchasing and selling credit protection, predominantly on corporate debt obligations, to meet the needs of customers. Second, as an end-user, the Firm uses credit derivatives to manage credit risk associated with lending exposures (loans and unfunded commitments) and derivatives counterparty exposures in the Firm's wholesale businesses, and to manage the credit risk arising from certain financial instruments in the Firm's market-making businesses. Following is a summary of various types of credit derivatives.

JPMorgan Chase & Co./2020 Form 10-K 209 Notes to consolidated financial statements Credit default swaps Credit derivatives may reference the credit of either a single reference entity (single-name) or a broad-based index. The Firm purchases and sells protection on both single-name and index-reference obligations. Single-name CDS and index CDS contracts are either OTC or OTC-cleared derivative contracts. Single-name CDS are used to manage the default risk of a single reference entity, while index CDS contracts are used to manage the credit risk associated with the broader credit markets or credit market segments. Like the S&P 500 and other market indices, a CDS index consists of a portfolio of CDS across many reference entities. New series of CDS indices are periodically established with a new underlying portfolio of reference entities to reflect changes in the credit markets. If one of the reference entities in the index experiences a credit event, then the reference entity that defaulted is removed from the index. CDS can also be referenced against specific portfolios of reference names or against customized exposure levels based on specific client demands: for example, to provide protection against the first \$ 1 million of realized credit losses in a \$ 10 million portfolio of exposure. Such structures are commonly known as tranche CDS. For both single-name CDS contracts and index CDS contracts, upon the occurrence of a credit event, under the

terms of a CDS contract neither party to the CDS contract has recourse to the reference entity. The protection purchaser has recourse to the protection seller for the difference between the face value of the CDS contract and the fair value of the reference obligation at settlement of the credit derivative contract, also known as the recovery value. The protection purchaser does not need to hold the debt instrument of the underlying reference entity in order to receive amounts due under the CDS contract when a credit event occurs. Credit-related notes A credit-related note is a funded credit derivative where the issuer of the credit-related note purchases from the note investor credit protection on a reference entity or an index. Under the contract, the investor pays the issuer the par value of the note at the inception of the transaction, and in return, the issuer pays periodic payments to the investor, based on the credit risk of the referenced entity. The issuer also repays the investor the par value of the note at maturity unless the reference entity (or one of the entities that makes up a reference index) experiences a specified credit event. If a credit event occurs, the issuer is not obligated to repay the par value of the note, but rather, the issuer pays the investor the difference between the par value of the note and the fair value of the defaulted reference obligation at the time of settlement. Neither party to the credit-related note has recourse to the defaulting reference entity. The following tables present a summary of the notional amounts of credit derivatives and credit-related notes the Firm sold and purchased as of December 31, 2020 and 2019. Upon a credit event, the Firm as a seller of protection would typically pay out only a percentage of the full notional amount of net protection sold, as the amount actually required to be paid on the contracts takes into account the recovery value of the reference obligation at the time of settlement. The Firm manages the credit risk on contracts to sell protection by purchasing protection with identical or similar underlying reference entities. Other purchased protection referenced in the following tables includes credit derivatives bought on related, but not identical, reference positions (including indices, portfolio coverage and other reference points) as well as protection purchased through credit-related notes.

210 JPMorgan Chase & Co./2020 Form 10-K The Firm does not use notional amounts of credit derivatives as the primary measure of risk management for such derivatives, because the notional amount does not take into account the probability of the occurrence of a credit event, the recovery value of the reference obligation, or related cash instruments and economic hedges, each of which reduces, in the Firm's view, the risks associated with such derivatives.

(a) Prior-period amounts have been revised to conform with the current presentation. The following tables summarize the notional amounts by the ratings, maturity profile, and total fair value, of credit derivatives and credit-related notes as of December 31, 2020 and 2019, where JPMorgan Chase is the seller of protection. The maturity profile is based on the remaining contractual maturity of the credit derivative contracts. The ratings profile is based on the rating of the reference entity on which the credit derivative contract is based. The ratings and maturity profile of credit derivatives and credit-related notes where JPMorgan Chase is the purchaser of protection are comparable to the profile reflected below.

(c) Prior-period amounts have been revised to conform with the current presentation. JPMorgan Chase & Co./2020 Form 10-K 211 Notes to consolidated financial statements Note 6 – Noninterest revenue and noninterest expense Noninterest revenue The Firm records noninterest revenue from certain contracts with customers in investment banking fees, deposit-related fees, asset management, administration, and commissions, and components of card income. The related contracts are often terminable on demand and the Firm has no remaining obligation to deliver future services. For arrangements with a fixed term, the Firm may commit to deliver services in the future. Revenue associated with these remaining performance obligations typically depends on the occurrence of future events or underlying asset values, and is not recognized until the outcome of those events or values are known. Investment banking fees This revenue category includes debt and equity underwriting and advisory fees. As an underwriter, the Firm helps clients raise capital via public offering and private placement of various types of debt and equity instruments. Underwriting fees are primarily based on the issuance price and quantity of the underlying instruments, and are recognized as revenue typically upon execution of the client’s transaction. The Firm also manages and syndicates loan arrangements. Credit arrangement and syndication fees, included within debt underwriting fees, are recorded as revenue after satisfying certain retention, timing and yield criteria. The Firm also provides advisory services, by assisting its clients with mergers and acquisitions, divestitures, restructuring and other complex transactions. Advisory fees are recognized as revenue typically upon execution of the client’s transaction. The following table presents the components of investment banking fees. Year ended December 31, (in millions) 2020 2019 2018

Underwriting Equity	\$ 2,759 	\$ 1,648 	\$ 1,684

Total underwriting	7,121 	5,161 	5,031
Advisory	2,365 	2,340 	2,519
Total investment banking fees	\$ 9,486 	\$ 7,501 	\$ 7,550

Investment banking fees are earned primarily by CIB. Refer to Note 32 for segment results. Principal transactions Principal transactions revenue is driven by many factors, including: • the bid-offer spread, which is the difference between the price at which a market participant is willing and able to sell an instrument to the Firm and the price at which another market participant is willing and able to buy it from the Firm, and vice versa; and • realized and unrealized gains and losses on financial instruments and commodities transactions, including those accounted for under the fair value option, primarily used in client-driven market-making activities, and on private equity investments. – Realized gains and losses result from the sale of instruments, closing out or termination of transactions, or interim cash payments. – Unrealized gains and losses result from changes in valuation. In connection with its client-driven market-making activities, the Firm transacts in debt and equity instruments, derivatives and commodities, including physical commodities inventories and financial instruments that reference commodities. Principal transactions revenue also includes realized and unrealized gains and losses related to: • derivatives designated in qualifying hedge accounting relationships, primarily fair value hedges of commodity and foreign exchange risk; • derivatives used for specific risk management purposes, primarily to mitigate credit risk and foreign exchange risk. Refer to Note 5 for further information on the income statement classification of gains and losses from derivatives activities. In the financial commodity markets, the Firm transacts in OTC derivatives (e.g., swaps, forwards, options) and ETD that reference a wide range of underlying commodities. In the physical commodity markets, the Firm primarily purchases and sells precious and base metals and may hold other commodities inventories under financing and other arrangements with clients. The following table presents all realized and unrealized gains and losses recorded in principal transactions revenue. This table excludes interest income and interest expense on trading assets and liabilities, which are an integral part of the overall performance of the Firm’s client-driven market-making activities in CIB and cash deployment activities in Treasury and CIO. Refer to Note 7 for further information on interest income and interest expense. Trading revenue is presented primarily by instrument type. The Firm’s client-driven market-making businesses generally utilize a variety of instrument types in connection with their market-making and related risk-management activities; accordingly, the trading revenue presented in the table below is not representative of the total revenue of any individual LOB. 212 JPMorgan Chase & Co./2020 Form 10-K Year ended December 31, (in millions) 2020 2019 2018 Trading revenue by instrument type Interest rate (a) \$ 2,575

(b) Includes the impact of changes in credit valuation adjustments on derivatives, net of the associated hedging activities. (c) The prior-period amounts have been revised to conform with the current presentation. Principal transactions revenue is earned primarily by CIB. Refer to Note 32 for segment results. Lending- and deposit-related fees Lending-related fees include fees earned from loan commitments, standby letters of credit, financial guarantees, and other loan-servicing activities. Deposit-related fees include fees earned from providing overdraft and other deposit account services, and from performing cash management	

activities. Lending- and deposit-related fees in this revenue category are recognized over the period in which the related service is provided. The following table presents the components of lending- and deposit-related fees. Year ended December 31, (in millions) 2020 2019 2018 Lending-related fees \$ 1,271 \$ 1,184 \$ 1,117 Deposit-related fees (a) 5,240 5,442 5,260 Total lending- and deposit-related fees \$ 6,511 \$ 6,626 \$ 6,377 (a) In the first quarter of 2020, the Firm reclassified certain fees from asset management, administration and commissions to lending- and deposit-related fees. Prior-period amounts have been revised to conform with the current presentation. Lending- and deposit-related fees are earned by CCB, CIB, CB, and AWM. Refer to Note 32 for segment results. Asset management, administration and commissions This revenue category includes fees from investment management and related services, custody, brokerage services and other products. The Firm manages assets on behalf of its clients, including investors in Firm-sponsored funds and owners of separately managed investment accounts. Management fees are typically based on the value of assets under management and are collected and recognized at the end of each period over which the management services are provided and the value of the managed assets is known. The Firm also receives performance-based management fees, which are earned based on exceeding certain benchmarks or other performance targets and are accrued and recognized when the probability of reversal is remote, typically at the end of the related billing period. The Firm has contractual arrangements with third parties to provide distribution and other services in connection with its asset management activities. Amounts paid to these third-party service providers are generally recorded in professional and outside services expense. The following table presents the components of Firmwide asset management, administration and commissions. Year ended December 31, (in millions) 2020 2019 2018 Asset management fees Investment management fees (a) \$ 11,694 \$ 10,865 \$ 10,768 All other asset management fees (b) 338 315 270 Total asset management fees 12,032 11,180 11,038 Total administration fees (c) 2,249 2,197 2,179 Commissions and other fees Brokerage commissions (d) 2,959 2,439 2,505 All other commissions and fees (e) 937 1,092 1,071 Total commissions and fees 3,896 3,531 3,576 Total asset management, administration and commissions \$ 18,177 \$ 16,908 \$ 16,793 (a) Represents fees earned from managing assets on behalf of the Firm's clients, including investors in Firm-sponsored funds and owners of separately managed investment accounts. (b) Represents fees for services that are ancillary to investment management services, such as commissions earned on the sales or distribution of mutual funds to clients. These fees are recorded as revenue at the time the service is rendered or, in the case of certain distribution fees based on the underlying fund's asset value and/or investor redemption, recorded over time as the investor remains in the fund or upon investor redemption. (c) Predominantly includes fees for custody, securities lending, funds services and securities clearance. These fees are recorded as revenue over the period in which the related service is provided. (d) Represents commissions earned when the Firm acts as a broker, by facilitating its clients' purchases and sales of securities and other financial instruments. Brokerage commissions are collected and recognized as revenue upon occurrence of the client transaction. The Firm reports certain costs paid to third-party clearing houses and exchanges net against commission revenue. (e) In the first quarter of 2020, the Firm reclassified certain fees from asset management, administration and commissions to lending- and deposit-related fees. Prior-period amounts have been revised to conform with the current presentation. Asset management, administration and commissions are earned primarily by AWM, CIB and CCB. Refer to Note 32 for segment results. Mortgage fees and related income This revenue category reflects CCB's Home Lending net production and net mortgage servicing revenue. Net production revenue includes fees and income recognized as earned on mortgage loans originated with the intent to sell, and the impact of risk management activities associated with the mortgage pipeline and warehouse loans. Net production revenue also includes gains and losses on sales and lower of cost or fair value adjustments on mortgage loans held-for-sale (excluding certain repurchased loans insured by U.S. government agencies), and changes in the fair value of financial instruments measured under the fair value option. Net mortgage JPMorgan Chase & Co./2020 Form 10-K 213 Notes to consolidated financial statements servicing revenue includes operating revenue earned from servicing third-party mortgage loans, which is recognized over the period in which the service is provided; changes in the fair value of MSRs; the impact of risk management activities associated with MSRs; and gains and losses on securitization of excess mortgage servicing. Net mortgage servicing revenue also includes gains and losses on sales and lower of cost or fair value adjustments of certain repurchased loans insured by U.S. government agencies. Refer to Note 15 for further information on risk management activities and MSRs. Net interest income from mortgage loans is recorded in interest income. Card income This revenue category includes interchange and other income from credit and debit card transactions; and fees earned from processing card transactions for merchants, both of which are recognized when purchases are made by a cardholder and presented net of certain transaction-related costs. Card income also includes account origination costs and annual fees, which are deferred and recognized on a straight-line basis over a 12 -month period. Certain credit card products offer the cardholder the ability to earn points based on account activity, which the cardholder can choose to redeem for cash and non-cash rewards. The cost to the Firm related to these proprietary rewards programs varies based on multiple factors including the terms and conditions of the rewards programs,

cardholder activity, cardholder reward redemption rates and cardholder reward selections. The Firm maintains a liability for its obligations under its rewards programs and reports the current-period cost as a reduction of card income. Credit card revenue sharing agreements The Firm has contractual agreements with numerous co-brand partners that grant the Firm exclusive rights to issue co-branded credit card products and market them to the customers of such partners. These partners endorse the co-brand credit card programs and provide their customer or member lists to the Firm. The partners may also conduct marketing activities and provide rewards redeemable under their own loyalty programs that the Firm will grant to co-brand credit cardholders based on account activity. The terms of these agreements generally range from five to ten years . The Firm typically makes payments to the co-brand credit card partners based on the cost of partners' marketing activities and loyalty program rewards provided to credit cardholders, new account originations and sales volumes. Payments to partners based on marketing efforts undertaken by the partners are expensed by the Firm as incurred and reported as marketing expense. Payments for partner loyalty program rewards are reported as a reduction of card income when incurred. Payments to partners based on new credit card account originations are accounted for as direct loan origination costs and are deferred and recognized as a reduction of card income on a straight-line basis over a 12 -month period. Payments to partners based on sales volumes are reported as a reduction of card income when the related interchange income is earned. The following table presents the components of card income: Year ended December 31, (in millions) 2020 2019 2018 Interchange and merchant processing income \$ 18,563 ; \$ 20,370 ; \$ 18,808 ; Reward costs and partner payments (a) (13,637) (14,540) (13,320) (c) Other card income (b) (491) (754) (745) Total card income \$ 4,435 ; \$ 5,076 ; \$ 4,743 ; (a) In the second quarter of 2020, the Firm reclassified certain spend-based credit card reward costs from marketing expense to be a reduction of card income, with no effect on net income. Prior-period amounts have been revised to conform with the current presentation. (b) Predominantly represents the amortization of account origination costs and annual fees, which are deferred and recognized on a straight-line basis over a 12 -month period. (c) Includes an adjustment to the credit card rewards liability of approximately \$ 330 million, recorded in the second quarter of 2018. Card income is earned primarily by CCB, CIB and CB. Refer to Note 32 for segment results. Refer to Note 18 for information on operating lease income included within other income. Noninterest expense Other expense Other expense on the Firm's Consolidated statements of income included the following: Year ended December 31, (in millions) 2020 2019 2018 Legal expense/(benefit) \$ 1,115 ; \$ 239 ; \$ 72 ; FDIC-related expense 717 ; 457 ; 1,239 ; 214 JPMorgan Chase & Co./2020 Form 10-K Note 7 ; Interest income and interest expense Interest income and interest expense are recorded in the Consolidated statements of income and classified based on the nature of the underlying asset or liability. The following table presents the components of interest income and interest expense: Year ended December 31, (in millions) 2020 2019 2018 Interest income Loans (a)(b) \$ 43,758 ; \$ 51,855 ; \$ 49,032 ; Taxable securities 7,843 ; 7,962 ; 5,653 ; Non-taxable securities (c) 1,184 ; 1,329 ; 1,595 ; Total investment securities (a) 9,027 ; 9,291 ; 7,248 ; Trading assets - debt instruments (b) 7,832 ; 9,141 ; 7,146 ; Federal funds sold and securities purchased under resale agreements 2,436 ; 6,146 ; 3,819 ; Securities borrowed (d) (302) 1,574 ; 913 ; Deposits with banks 749 ; 3,887 ; 5,907 ; All other interest-earning assets (b)(e) 1,023 ; 2,146 ; 2,035 ; Total interest income \$ 64,523 ; \$ 84,040 ; \$ 76,100 ; Interest expense Interest bearing deposits \$ 2,357 ; \$ 8,957 ; \$ 5,973 ; Federal funds purchased and securities loaned or sold under repurchase agreements 1,058 ; 4,630 ; 3,066 ; Short-term borrowings (f) 372 ; 1,248 ; 1,144 ; Trading liabilities - debt and all other interest-bearing liabilities (d)(g) 195 ; 2,585 ; 2,387 ; Long-term debt 5,764 ; 8,807 ; 7,978 ; Beneficial interest issued by consolidated VIEs 214 ; 568 ; 493 ; Total interest expense \$ 9,960 ; \$ 26,795 ; \$ 21,041 ; Net interest income \$ 54,563 ; \$ 57,245 ; \$ 55,059 ; Provision for credit losses 17,480 ; 5,585 ; 4,871 ; Net interest income after provision for credit losses \$ 37,083 ; \$ 51,660 ; \$ 50,188 ; (a) Includes the amortization/accretion of unearned income (e.g., purchase premiums/discounts, net deferred fees/costs, and others). (b) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans and other assets. Prior-period amounts have been revised to conform with the current presentation. (c) Represents securities that are tax-exempt for U.S. federal income tax purposes. (d) Negative interest income is related to the impact of current interest rates combined with the fees paid on client-driven securities borrowed balances. The negative interest expense related to prime brokerage customer payables is recognized in interest expense and reported within trading liabilities - debt and all other interest-bearing liabilities. (e) Includes interest earned on brokerage-related held-for-investment customer receivables, which are classified in accrued interest and accounts receivable, and all other interest-earning assets, which are classified in other assets on the Consolidated balance sheets. (f) Includes commercial paper. (g) All other interest-bearing liabilities includes interest expense on brokerage-related customer payables. Interest income and interest expense includes the current-period interest accruals for financial instruments measured at fair value, except for derivatives and financial instruments containing embedded derivatives that would be separately accounted for in accordance with U.S. GAAP, absent the fair value option election;

for those instruments, all changes in fair value including any interest elements, are reported in principal transactions revenue. For financial instruments that are not measured at fair value, the related interest is included within interest income or interest expense, as applicable. Refer to Notes 12, 10, 11 and 20, for further information on accounting for interest income and interest expense related to loans, investment securities, securities financing activities (i.e., securities purchased or sold under resale or repurchase agreements; securities borrowed; and securities loaned) and long-term debt, respectively. JPMorgan Chase & Co./2020 Form 10-K 215

Notes to consolidated financial statements Note 8

Pension and other postretirement employee benefit plans The Firm has various defined benefit pension plans and OPEB plans that provide benefits to its employees in the U.S. and certain non-U.S. locations. The Firm also provides a qualified defined contribution plan in the U.S. and maintains other similar arrangements in certain non-U.S. locations. The principal defined benefit pension plan in the U.S. is a qualified noncontributory plan that provides benefits to substantially all U.S. employees who were hired prior to December 2, 2017. The Firm has frozen the U.S. defined benefit pension plan (the Plan Freeze). Effective as of January 1, 2020 (and January 1, 2019 for new hires), new pay credits have been directed to the U.S. defined contribution plan. Interest credits will continue to accrue on the U.S. defined benefit pension plan. As a result of the Plan Freeze, a curtailment was triggered and a remeasurement of the U.S. defined benefit pension obligation and plan assets occurred as of November 30, 2018. The plan design change did not have a material impact on the U.S. defined benefit pension plan or the Firm's Consolidated Financial Statements. The Firm also has defined benefit pension plans that are offered in certain non-U.S. locations based on factors such as eligible compensation, age and/or years of service. It is the Firm's policy to fund the pension plans in amounts sufficient to meet the requirements under applicable laws. The Firm does not anticipate at this time making any contribution to the U.S. defined benefit pension plan in 2021. The 2021 contributions to the non-U.S. defined benefit pension plans are expected to be \$ 50 million, of which \$ 35 million are contractually required. The Firm also has a number of nonqualified noncontributory defined benefit pension plans that are unfunded. These plans provide supplemental defined pension benefits to certain employees. The Firm offers postretirement medical and life insurance benefits to certain U.S. retirees and postretirement medical benefits to certain qualifying U.S. and U.K. employees. The Firm partially defrays the cost of its U.S. OPEB obligation through corporate-owned life insurance (COLI) purchased on the lives of eligible employees and retirees. While the Firm owns the COLI policies, certain COLI proceeds (death benefits, withdrawals and other distributions) may be used only to reimburse the Firm for its net postretirement benefit claim payments and related administrative expense. The Firm has prefunded its U.S. postretirement benefit obligations. The U.K. OPEB plan is unfunded. Pension and OPEB accounting guidance generally requires that the difference between plan assets at fair value and the benefit obligation be measured and recorded on the balance sheet. Plans that are overfunded (excess of plan assets over benefit obligation) are recorded in other assets and plans that are underfunded (excess benefit obligation over plan assets) are recorded in other liabilities. Gains or losses resulting from changes in the benefit obligation and the fair value of plan assets are recorded in OCI and recognized as part of the net periodic benefit cost over subsequent periods as discussed in the Gains and losses section of this Note. Additionally, benefits earned during the year are reported in compensation expense; all other components of net periodic defined benefit costs are reported in other expense in the Consolidated statements of income.

216 JPMorgan Chase & Co./2020 Form 10-K The following table presents the pretax changes in benefit obligations, plan assets, the net funded status, and the amounts recorded in AOCI on the Consolidated balance sheets for the Firm's defined benefit pension and OPEB plans. As of or for the year ended December 31, Defined benefit pension and OPEB plans (in millions)

The following table presents the weighted-average actuarial assumptions used to value the benefit obligations for the U.S. defined benefit pension plans. U.S. defined benefit pension

plans As of December 31, 2020 2019 Discount rate 2.50 % 3.30 % Rate of compensation increase NA NA Interest crediting rate 4.65 4.65 Gains and losses For the Firm's defined benefit pension plans, fair value is used to determine the expected return on plan assets. Amortization of net gains and losses is included in annual net periodic benefit cost if, as of the beginning of the year, the net gain or loss exceeds 10 % of the greater of the projected benefit obligation or the fair value of the plan assets. Any excess is amortized over the average expected remaining lifetime of plan participants, which for the U.S. defined benefit pension plans is currently 37 years and for the non-U.S. defined benefit pension plans is the period appropriate for the affected plan. For the years ended December 31, 2020 and 2019, the net gain was primarily attributable to a market-driven increase in the fair value of plan assets, predominantly offset by a decrease in the discount rate. JPMorgan Chase & Co./2020 Form 10-K 217 Notes to consolidated financial statements The following table presents the components of net periodic benefit costs reported in the Consolidated statements of income for the Firm's defined benefit pension, defined contribution and OPEB plans, and in other comprehensive income for the defined benefit pension and OPEB plans. The following table presents the weighted-average actuarial assumptions used to determine the net periodic benefit costs for the U.S. defined benefit pension plans. U.S. defined benefit pension plans

Year ended December 31, (in millions)	2020	2019	2018
Discount rate	3.30 %	4.30 %	3.70 / 4.50 %
Expected long-term rate of return on plan assets	4.00	5.50	5.50
Rate of compensation increase	NA	2.30	2.30
Interest crediting rate	4.65	4.90	4.90

Plan assumptions The Firm's expected long-term rate of return for defined benefit pension plan assets is a blended weighted average, by asset allocation of the projected long-term returns for the various asset classes, taking into consideration local market conditions and the specific allocation of plan assets. Returns on asset classes are developed using a forward-looking approach and are not strictly based on historical returns. Consideration is also given to current market conditions and the portfolio mix of each plan. The discount rate used in determining the benefit obligation under the U.S. defined benefit pension plan was provided by the Firm's actuaries. This rate was selected by reference to the yields on portfolios of bonds with maturity dates and coupons that closely match each of the plan's projected cash flows. At December 31, 2020, the Firm decreased the discount rates used to determine its benefit obligations for the U.S. defined benefit pension plans in light of current market interest rates, which is expected to decrease expense by approximately \$ 64 million in 2021. The 2021 expected long-term rate of return on U.S. defined benefit pension plan assets is 3.00 %. The following table represents the effect of a 25-basis point decline in the expected long-term rate of return of 3.00 % and discount rate of 2.50 %. Effect on U.S. defined benefit pension plans (in millions)

	Pension expense	Benefit obligation	Expected long-term rate of return
\$ 43	NA	Discount rate (20)	404
218	JPMorgan Chase & Co./2020 Form 10-K	Investment strategy and asset allocation	

The assets of the Firm's defined benefit pension plans are held in various trusts and are invested in well-diversified portfolios of equity and fixed income securities, cash and cash equivalents, and alternative investments. The trust-owned assets of the Firm's U.S. OPEB plan are invested primarily in fixed income securities. COLI policies used to partially defray the cost of the Firm's U.S. OPEB plan are invested in separate accounts of an insurance company and are allocated to investments intended to replicate equity and fixed income indices. The investment policies for the assets of the Firm's defined benefit pension plans are to optimize the risk-return relationship as appropriate to the needs and goals of each plan. Assets are managed by a combination of internal and external investment managers. The Firm regularly reviews the asset allocations and asset managers, as well as other factors that could impact the portfolios, which are rebalanced when deemed necessary. Investments held by the Firm's defined benefit pension and OPEB plans include financial instruments which are exposed to various risks such as interest rate, market and credit risks. Exposure to a concentration of credit risk is mitigated by the broad diversification of both U.S. and non-U.S. investments. Additionally, the investments in each of the collective investment funds and/or registered investment companies are further diversified into various financial

instruments. As of December 31, 2020, assets held by the Firm's defined benefit pension and OPEB plans do not include securities issued by JPMorgan Chase or its affiliates, except through indirect exposures through investments in ETFs, mutual funds and collective investment funds managed by third-parties. The defined benefit pension and OPEB plans hold investments that are sponsored or managed by affiliates of JPMorgan Chase in the amount of \$ 2.7 billion and \$ 3.1 billion, as of December 31, 2020 and 2019, respectively. The following table presents the weighted-average asset allocation of the fair values of total plan assets at December 31 for the years indicated, as well as the respective approved asset allocation ranges by asset class. U.S. defined benefit pension plan (c) Asset % of plan assets December 31, Allocation 2020 2019 Asset class Debt securities (a) 42 - 100 % 77 % 74 % Equity securities 0 - 40 15 % 16 % Real estate 0 - 4 1 % 1 % Alternatives (b) 0 - 15 7 % 9 % Total 100 % 100 % 100 % (a) Debt securities primarily includes cash and cash equivalents, corporate debt, U.S. federal, state, local and non-U.S. government, asset-backed and mortgage-backed securities. (b) Alternatives primarily include limited partnerships. (c) Represents the U.S. defined benefit pension plan only as it is the most significant plan. The other U.S. defined benefit pension plans are unfunded. The weighted-average asset allocation for the U.S. OPEB plan was 59 % debt securities and 41 % equity securities and 60 % debt securities and 40 % equity securities at December 31, 2020 and 2019, respectively. JPMorgan Chase & Co./2020 Form 10-K 219 Notes to consolidated financial statements Fair value measurement of the plans' assets and liabilities Refer to Note 2 for information on fair value measurements, including descriptions of level 1, 2, and 3 of the fair value hierarchy and the valuation methods employed by the Firm. Pension plan assets and liabilities measured at fair value Defined benefit pension and OPEB plans 2020 2019 December 31, (in millions) Level 1 Level 2 Level 3 Total fair value Level 1 Level 2 Level 3 Total fair value Equity securities \$ 2,353 \$ 2,355 \$ 2,259 \$ 2,264 Corporate debt securities \$ 7,414 \$ 7,425 \$ 6,474 \$ 6,476 U.S. federal, state, local and non-U.S. government debt securities 1,395 1,395 360 360 Mortgage-backed securities 461 461 1,184 1,184 Other (a) 788 861 201 1,850 718 49 250 1,017 U.S. defined benefit pension plans (b) \$ 4,997 \$ 9,819 \$ 245 \$ 15,061 \$ 4,905 \$ 7,608 \$ 258 \$ 12,771 Other defined benefit pension and OPEB plans (c) 2,034 2,565 2,707 7,306 1,834 2,307 2,431 6,572 Total assets measured at fair value \$ 7,031 \$ 12,384 \$ 2,952 \$ 22,367 \$ 6,739 \$ 9,915 \$ 2,689 \$ 19,343 (a) Other consists primarily of mutual funds, money market funds and participating annuity contracts. (b) At December 31, 2020 and 2019, excludes \$ 3.2 billion and \$ 3.9 billion, respectively, of certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient, and \$ 606 million and \$ 343 million, respectively, of net defined benefit pension plan payables, primarily for investments sold and purchased, which are not required to be classified in the fair value hierarchy. Investments in level 3 of the valuation hierarchy include \$ 199 million and \$ 250 million of participating annuity contracts at December 31, 2020 and 2019, respectively. (c) At December 31, 2020 and 2019, excludes \$ 487 million and \$ 465 million, respectively, of certain investments that are measured at fair value using the net asset value per share (or its equivalent) as a practical expedient. Investments in level 3 of the valuation hierarchy include \$ 2.7 billion and \$ 2.4 billion of COLI policies at December 31, 2020 and 2019, respectively. Changes in level 3 fair value measurements using significant unobservable inputs Investments classified in level 3 of the valuation hierarchy increased \$ 263 million in 2020 from \$ 2.7 billion to \$ 3.0 billion, consisting of \$ 343 million in unrealized gains, partially offset by \$ 113 million in settlements. In addition, there were transfers into level 3 of \$ 33 million. In 2019, there was an increase of \$ 307 million from \$ 2.4 billion to \$ 2.7 billion, consisting of \$ 401 million in unrealized gains, partially offset by \$ 85 million in settlements. Estimated future benefit payments The following table presents benefit payments expected to be paid for the U.S. defined benefit pension plans for the years indicated. Year ended December 31, (in millions) U.S. defined benefit pension plans 2021 \$ 912 2022 918 2023 897 2024 847 2025 829 Years 2026-2030 3,843 220 JPMorgan Chase & Co./2020 Form 10-K Note 9 Employee share-based incentives Employee share-based awards In 2020, 2019 and 2018, JPMorgan Chase granted long-term share-based awards to certain employees under its LTIP, as amended and restated effective May 15, 2018. Under the terms of the LTIP, as of December 31, 2020, 67 million shares of common stock were available for issuance through May 2022. The LTIP is the only active plan under which the Firm is currently granting share-based incentive awards. In the following discussion, the LTIP, plus prior Firm plans and plans assumed as the result of acquisitions, are referred to collectively as the LTI Plans, and such plans constitute the Firm's share-based incentive plans. RSUs are awarded at no cost to the recipient upon their grant. Generally, RSUs are granted annually and vest at a rate of 50 % after two years and 50 % after three years and are converted into shares of common stock as of the vesting date. In addition, RSUs typically include full-career eligibility provisions, which allow employees to continue to vest upon voluntary termination based on age or service-related requirements, subject to post-employment

and other restrictions. All RSU awards are subject to forfeiture until vested and contain clawback provisions that may result in cancellation under certain specified circumstances. Predominantly all RSUs entitle the recipient to receive cash payments equivalent to any dividends paid on the underlying common stock during the period the RSUs are outstanding. Performance share units (PSUs) are granted annually, and approved by the Firm's Board of Directors, to members of the Firm's Operating Committee under the variable compensation program. PSUs are subject to the Firm's achievement of specified performance criteria over a three-year period. The number of awards that vest can range from zero to 150 % of the grant amount. In addition, dividends that accrue during the vesting period are reinvested in dividend equivalent share units. PSUs and the related dividend equivalent share units are converted into shares of common stock after vesting. Once the PSUs and dividend equivalent share units have vested, the shares of common stock that are delivered, after applicable tax withholding, must be held for an additional two-year period, for a total combined vesting and holding period of approximately five to eight years from the grant date depending on regulations in certain countries. Under the LTI Plans, stock appreciation rights (SARs) and stock options have generally been granted with an exercise price equal to the fair value of JPMorgan Chase's common stock on the grant date. SARs and stock options generally expire ten years after the grant date. There were no material grants of SARs or stock options in 2020, 2019 and 2018. The Firm separately recognizes compensation expense for each tranche of each award, net of estimated forfeitures, as if it were a separate award with its own vesting date. Generally, for each tranche granted, compensation expense is recognized on a straight-line basis from the grant date until the vesting date of the respective tranche, provided that the employees will not become full-career eligible during the vesting period. For awards with full-career eligibility provisions and awards granted with no future substantive service requirement, the Firm accrues the estimated value of awards expected to be awarded to employees as of the grant date without giving consideration to the impact of post-employment restrictions. For each tranche granted to employees who will become full-career eligible during the vesting period, compensation expense is recognized on a straight-line basis from the grant date until the earlier of the employee's full-career eligibility date or the vesting date of the respective tranche. The Firm's policy for issuing shares upon settlement of employee share-based incentive awards is to issue either new shares of common stock or treasury shares. During 2020, 2019 and 2018, the Firm settled all of its employee share-based awards by issuing treasury shares. Refer to Note 23 for further information on the classification of share-based awards for purposes of calculating earnings per share. JPMorgan Chase & Co./2020 Form 10-K 221 Notes to consolidated financial statements RSUs, PSUs, SARs and stock options activity Generally, compensation expense for RSUs and PSUs is measured based on the number of units granted multiplied by the stock price at the grant date, and for SARs and stock options, is measured at the grant date using the Black-Scholes valuation model. Compensation expense for these awards is recognized in net income as described previously. The following table summarizes JPMorgan Chase's RSUs, PSUs, SARs and stock options activity for 2020. RSUs/PSUs SARs/Options Year ended December 31, 2020 Number of units Weighted-average grant date fair value Number of awards Weighted-average exercise price Weighted-average remaining contractual life (in years) Aggregate intrinsic value (in thousands, except weighted-average data, and where otherwise stated) Outstanding, January 1 52,239 \$ 99.62; 5,527 \$ 41.36; Granted 17,891 \$ 132.17; 1 \$ 137.80; Exercised or vested (21,502) 96.64; (2,389) 41.40; Forfeited (1,118) 111.59; (4) 122.59; Canceled NA NA (11) 39.33; Outstanding, December 31 47,510 \$ 112.85; 3,124 \$ 41.25; 1.4 \$ 265,059; Exercisable, December 31 NA NA 3,124 \$ 41.25; 1.4 \$ 265,059; The total fair value of RSUs that vested during the years ended December 31, 2020, 2019 and 2018, was \$ 2.8 billion, \$ 2.9 billion and \$ 3.6 billion, respectively. The total intrinsic value of options exercised during the years ended December 31, 2020, 2019 and 2018, was \$ 182 million, \$ 503 million and \$ 370 million, respectively. Compensation expense The Firm recognized the following noncash compensation expense related to its various employee share-based incentive plans in its Consolidated statements of income. Year ended December 31, (in millions) 2020 2019 2018 Cost of prior grants of RSUs, PSUs, SARs and stock options that are amortized over their applicable vesting periods \$ 1,101; \$ 1,141; \$ 1,241; Accrual of estimated costs of share-based awards to be granted in future periods including those to full-career eligible employees 1,350; 1,115; 1,081; Total noncash compensation expense related to employee share-based incentive plans \$ 2,451; \$ 2,256; \$ 2,322; At December 31, 2020, approximately \$ 664 million (pretax) of compensation expense related to unvested awards had not yet been charged to net income. That cost is expected to be amortized into compensation expense over a weighted-average period of 1.6 years. The Firm does not capitalize any compensation expense related to share-based compensation awards to employees. Tax benefits Income tax benefits (including tax benefits from dividends or dividend equivalents) related to share-based incentive arrangements recognized in the Firm's Consolidated statements of income for the years ended December 31, 2020, 2019 and 2018, were \$ 837 million, \$ 895 million and \$ 1.1 billion, respectively. 222 JPMorgan Chase & Co./2020 Form 10-K Note 10 Investment securities Investment securities consist of debt securities that are classified as AFS or HTM. Debt securities classified as trading assets are discussed in Note 2. Predominantly all of the Firm's AFS and HTM securities are held by Treasury and CIO in connection with its asset-liability management activities. AFS

securities are carried at fair value on the Consolidated balance sheets. Unrealized gains and losses, after any applicable hedge accounting adjustments or allowance for credit losses, are reported in AOCI. The specific identification method is used to determine realized gains and losses on AFS securities, which are included in investment securities gains/(losses) on the Consolidated statements of income. HTM securities, which the Firm has the intent and ability to hold until maturity, are carried at amortized cost, net of allowance for credit losses, on the Consolidated balance sheets. For both AFS and HTM securities, purchase discounts or premiums are generally amortized into interest income on a level-yield basis over the contractual life of the security. However, premiums on certain callable debt securities are amortized to the earliest call date. Effective January 1, 2020, the Firm adopted the CECL accounting guidance, which also amended the AFS securities impairment guidance. Refer to Note 1 for further information. During 2020, the Firm transferred \$ 164.2 billion of investment securities from AFS to HTM for capital management purposes. AOCI included pretax unrealized gains of \$ 5.0 billion on the securities at the dates of transfer. Unrealized gains or losses at the date of transfer of these securities continue to be reported in AOCI and are amortized into interest income on a level-yield basis over the remaining life of the securities. This amortization will offset the effect on interest income of the amortization of the premium or discount resulting from the transfer recorded at fair value. Transfers of securities from AFS to HTM are non-cash transactions and are recorded at fair value. JPMorgan Chase & Co./2020 Form 10-K 223 Notes to consolidated financial statements The amortized costs and estimated fair values of the investment securities portfolio were as follows for the dates indicated.

	2020	2019	December 31, (in millions)	Amortized cost (e)	Gross unrealized gains	Gross unrealized losses	Fair value

As of December 31, 2020, mortgage-backed securities issued by Fannie Mae and Freddie Mac each exceeded 10% of JPMorgan Chase’s total stockholders’ equity; the amortized cost and fair value of such securities were \$ 95.7 billion and \$ 98.8 billion, and \$ 54.7 billion and \$ 55.8 billion, respectively. (b) There was no allowance for credit losses on AFS securities at December 31, 2020. (c) The Firm purchased \$ 12.4 billion, \$ 13.4 billion and \$ 9.4 billion of HTM securities for the years ended December 31, 2020, 2019 and 2018, respectively. (d) HTM securities measured at amortized cost are reported net of allowance for credit losses of \$ 78 million at December 31, 2020. (e) Excludes \$ 2.1 billion and \$ 1.9 billion of accrued interest receivables at December 31, 2020 and 2019, respectively. The Firm did no t reverse through interest income any accrued interest receivables for the years ended December 31, 2020 and 2019. At December 31, 2020 , the investment

securities portfolio consisted of debt securities with an average credit rating of AA+ (based upon external ratings where available, and where not available, based primarily upon internal risk ratings). Risk ratings are used to identify the credit quality of securities and differentiate risk within the portfolio. The Firm's internal risk ratings generally align with the qualitative characteristics (e.g., borrower capacity to meet financial commitments and vulnerability to changes in the economic environment) defined by S&P and Moody's, however the quantitative characteristics (e.g., probability of default (PD) and loss given default (LGD)) may differ as they reflect internal historical experiences and assumptions. Risk ratings are assigned at acquisition, are reviewed on a regular and ongoing basis by Credit Risk Management and are adjusted as necessary over the life of the investment for updated information affecting the issuer's ability to fulfill its obligations.

224 JPMorgan Chase & Co./2020 Form 10-K AFS securities impairment

The following tables present the fair value and gross unrealized losses by aging category for AFS securities at December 31, 2020 and 2019. The tables exclude U.S. Treasury and government agency securities and U.S. GSE and government agency MBS with unrealized losses of \$ 150 million and \$ 264 million, at December 31, 2020 and 2019, respectively; changes in the value of these securities are generally driven by changes in interest rates rather than changes in their credit profile given the explicit or implicit guarantees provided by the U.S. government. JPMorgan Chase & Co./2020 Form 10-K 225 Notes to consolidated financial statements As a result of the adoption of the amended AFS securities impairment guidance, an allowance for credit losses on AFS securities is required for impaired securities if a credit loss exists. AFS securities are considered impaired if the fair value is less than the amortized cost. The Firm recognizes impairment losses in earnings if the Firm has the intent to sell the debt security, or if it is more likely than not that the Firm will be required to sell the debt security before recovery of its amortized cost. In these circumstances the impairment loss recognized in investment securities gains/(losses) is equal to the full difference between the amortized cost (net of allowance if applicable) and the fair value of the securities. For impaired debt securities that the Firm has the intent and ability to hold, the securities are evaluated to determine if a credit loss exists. If it is determined that a credit loss exists, that loss is recognized as an allowance for credit losses through the provision for credit losses in the Consolidated Statements of Income, limited by the amount of impairment. Any impairment not due to credit losses is recorded in OCI. Factors considered in evaluating credit losses include adverse conditions specifically related to the industry, geographic area or financial condition of the issuer or underlying collateral of a security; and payment structure of the security. When assessing securities issued in a securitization for credit losses, the Firm estimates cash flows considering relevant market and economic data, underlying loan-level data, and structural features of the securitization, such as subordination, excess spread, overcollateralization or other forms of credit enhancement, and compares the losses projected for the underlying collateral (pool losses) against the level of credit enhancement in the securitization structure to determine whether these features are sufficient to absorb the pool losses, or whether a credit loss exists. For beneficial interests in securitizations that are rated below AA at their acquisition, or that

can be contractually prepaid or otherwise settled in such a way that the Firm would not recover substantially all of its recorded investment, the Firm evaluates impairment for credit losses when there is an adverse change in expected cash flows. Allowance for credit losses Based on its assessment, the Firm did not recognize an allowance for credit losses on impaired AFS securities as of January 1, 2020 or December 31, 2020.

226 JPMorgan Chase & Co./2020 Form 10-K

HTM securities credit risk The adoption of the CECL accounting guidance requires management to estimate expected credit losses on HTM securities over the remaining expected life and recognize this estimate as an allowance for credit losses. As a result of the adoption of this guidance, the Firm recognized an allowance for credit losses on HTM obligations of U.S. states and municipalities of \$ 10 million as a cumulative-effect adjustment to retained earnings as of January 1, 2020.

Credit quality indicator The primary credit quality indicator for HTM securities is the risk rating assigned to each security. At December 31, 2020, all HTM securities were rated investment grade and were current and accruing, with approximately 98 % rated at least AA+.

Allowance for credit losses The allowance for credit losses on HTM obligations of U.S. states and municipalities and commercial mortgage-backed securities is calculated by applying statistical credit loss factors (estimated PD and LGD) to the amortized cost. The credit loss factors are derived using a weighted average of five internally developed eight-quarter macroeconomic scenarios, followed by a single year straight-line interpolation to revert to long run historical information for periods beyond the forecast period. Refer to Note 13 for further information on the eight-quarter macroeconomic forecast.

The allowance for credit losses on HTM collateralized loan obligations and U.S. residential mortgage-backed securities is calculated as the difference between the amortized cost and the present value of the cash flows expected to be collected, discounted at the security's effective interest rate. These cash flow estimates are developed based on expectations of underlying collateral performance derived using the eight-quarter macroeconomic forecast and the single year straight-line interpolation, as well as considering the structural features of the security. The application of different inputs and assumptions into the calculation of the allowance for credit losses is subject to significant management judgment, and emphasizing one input or assumption over another, or considering other inputs or assumptions, could affect the estimate of the allowance for credit losses on HTM securities. The allowance for credit losses on HTM securities was \$ 78 million as of December 31, 2020, reflecting \$ 68 million recognized in the provision for credit losses for the year ended December 31, 2020.

The effective yield considers the contractual coupon, amortization of premiums and accretion of discounts, and the effect of related hedging derivatives. Taxable-equivalent amounts are used where applicable. The effective yield excludes unscheduled principal prepayments; and accordingly, actual maturities of securities may differ from their contractual or expected maturities as certain securities may be prepaid. However, for certain callable debt securities, the average yield is calculated to the earliest call date. (b) Substantially all of the Firm's U.S. residential MBS and collateralized mortgage obligations are due in 10 years or more, based on contractual maturity. The estimated weighted-average life, which reflects anticipated future prepayments, is approximately 5 years for agency residential MBS, 4 years for agency residential collateralized mortgage obligations and 3 years for nonagency residential collateralized mortgage obligations. 228 JPMorgan Chase & Co./2020 Form 10-K Note 11 Securities financing activities JPMorgan Chase enters into resale, repurchase, securities borrowed and securities loaned agreements (collectively, securities financing agreements) primarily to finance the Firm's inventory positions, acquire securities to cover short sales, accommodate customers' financing needs, settle other securities obligations and to deploy the Firm's excess cash. Securities financing agreements are treated as collateralized financings on the Firm's Consolidated balance sheets. Where appropriate under applicable accounting guidance, securities financing agreements with the same counterparty are reported on a net basis. Refer to Note 1 for further discussion of the offsetting of assets and liabilities. Fees received and paid in connection with securities financing agreements are recorded over the life of the agreement in interest income and interest expense on the Consolidated statements of income. The Firm has elected the fair value option for certain securities financing agreements. Refer to Note 3 for further information regarding the fair value option. The securities financing agreements for which the fair value option has been elected are reported within securities purchased under resale agreements, securities loaned or sold under repurchase agreements, and securities borrowed on the Consolidated balance sheets. Generally, for agreements carried at fair value, current-period interest accruals are recorded within interest income and interest expense, with changes in fair value reported in principal transactions revenue. However, for financial instruments containing embedded derivatives that would be separately accounted for in accordance with accounting guidance for hybrid instruments, all changes in fair value, including any interest elements, are reported in principal transactions revenue. Securities financing agreements not elected under the fair value option are measured at amortized cost. As a result of the Firm's credit risk mitigation practices described below, the Firm did not hold any allowance for credit losses with respect to resale and securities borrowed arrangements as of December 31, 2020 and 2019. Credit risk mitigation practices Securities financing agreements expose the Firm primarily to credit and liquidity risk. To manage these risks, the Firm monitors the value of the underlying securities (predominantly high-quality securities collateral, including government-issued debt and U.S. GSEs and government agencies MBS) that it has received from or provided to its counterparties compared to the value of cash proceeds and exchanged collateral, and either requests additional collateral or returns securities or collateral when appropriate. Margin levels are initially established based upon the counterparty, the type of underlying securities, and the permissible collateral, and are monitored on an ongoing basis. In resale and securities borrowed agreements, the Firm is exposed to credit risk to the extent that the value of the securities received is less than initial cash principal advanced and any collateral amounts exchanged. In repurchase and securities loaned agreements, credit risk exposure arises to the extent that the value of underlying securities advanced exceeds the value of the initial cash principal received, and any collateral amounts exchanged. Additionally, the Firm typically enters into master netting agreements and other similar arrangements with its counterparties, which provide for the right to liquidate the underlying securities and any collateral amounts exchanged in the event of a counterparty default. It is also the Firm's policy to take possession, where possible, of the securities underlying resale and securities borrowed agreements. Refer to Note 29 for further information regarding assets pledged and collateral received in securities financing agreements. JPMorgan Chase & Co./2020 Form 10-K 229 Notes to consolidated financial statements The table below summarizes the gross and net amounts of the Firm's securities financing agreements, as of December 31, 2020 and 2019. When the Firm has obtained an appropriate legal opinion with respect to a master netting agreement with a counterparty and where other relevant netting criteria under U.S. GAAP are met, the Firm nets, on the Consolidated balance sheets, the balances outstanding under its securities financing agreements with the same counterparty. In addition, the Firm exchanges securities and/or cash collateral with its counterparty to reduce the economic exposure with the counterparty, but such collateral is not eligible for net

Consolidated balance sheet presentation. Where the Firm has obtained an appropriate legal opinion with respect to the counterparty master netting agreement, such collateral, along with securities financing balances that do not meet all these relevant netting criteria under U.S. GAAP, is presented in the table below as "Amounts not nettable on the Consolidated balance sheets," and reduces the "Net amounts" presented. Where a legal opinion has not been either sought or obtained, the securities financing balances are presented gross in the "Net amounts" below.

2020 December 31, (in millions) Gross amounts Amounts netted on the Consolidated balance sheets Amounts presented on the Consolidated balance sheets Amounts not nettable on the Consolidated balance sheets

(b) Net amounts (c) Assets Securities purchased under resale agreements \$ 666,467; \$ (370,183) \$ 296,284; \$ (273,206) \$ 23,078; Securities borrowed 193,700; (33,065) 160,635; (115,219) 45,416; Liabilities Securities sold under repurchase agreements \$ 578,060; \$ (370,183) \$ 207,877; \$ (191,980) \$ 15,897; Securities loaned and other (a) 41,366; (33,065) 8,301; (8,257) 44; 2019 December 31, (in millions) Gross amounts Amounts netted on the Consolidated balance sheets Amounts presented on the Consolidated balance sheets Amounts not nettable on the Consolidated balance sheets (b) Net amounts (c) Assets Securities purchased under resale agreements \$ 628,609; \$ (379,463) \$ 249,146; \$ (231,147) (d) \$ 17,999; (d) Securities borrowed 166,718; (26,960) 139,758; (104,990) 34,768; Liabilities Securities sold under repurchase agreements \$ 555,172; \$ (379,463) \$ 175,709; \$ (151,566) \$ 24,143; Securities loaned and other (a) 36,649; (26,960) 9,689; (9,654) 35; (a) Includes securities-for-securities lending agreements of \$ 3.4 billion and \$ 3.7 billion at December 31, 2020 and 2019, respectively, accounted for at fair value, where the Firm is acting as lender. In the Consolidated balance sheets, the Firm recognizes the securities received at fair value within other assets and the obligation to return those securities within accounts payable and other liabilities. (b) In some cases, collateral exchanged with a counterparty exceeds the net asset or liability balance with that counterparty. In such cases, the amounts reported in this column are limited to the related net asset or liability with that counterparty. (c) Includes securities financing agreements that provide collateral rights, but where an appropriate legal opinion with respect to the master netting agreement has not been either sought or obtained. At December 31, 2020 and 2019, included \$ 17.0 billion and \$ 11.0 billion, respectively, of securities purchased under resale agreements; \$ 42.1 billion and \$ 31.9 billion, respectively, of securities borrowed; \$ 14.5 billion and \$ 22.7 billion, respectively, of securities sold under repurchase agreements; and \$ 8 million and \$ 7 million, respectively, of securities loaned and other. (d) The prior period amounts have been revised to conform with the current period presentation.

230 JPMorgan Chase & Co./2020 Form 10-K The tables below present as of December 31, 2020 and 2019 the types of financial assets pledged in securities financing agreements and the remaining contractual maturity of the securities financing agreements. Gross liability balance 2020 2019 December 31, (in millions) Securities sold under repurchase agreements Securities loaned and other Securities sold under repurchase agreements Securities loaned and other Mortgage-backed securities: U.S. GSEs and government agencies \$ 56,744; \$ 34,119; \$ 1,016; Residential - nonagency 1,016; 1,239; Commercial - nonagency 855; 1,612; U.S. Treasury, GSEs and government agencies 315,834; 143; 334,398; 29; Obligations of U.S. states and municipalities 1,525; 2; 1,181; Non-U.S. government debt 157,563; 1,730; 145,548; 1,528; Corporate debt securities 22,849; 1,864; 13,826; 1,580; Asset-backed securities 694; 1,794; Equity securities 20,980; 37,627; 21,455; 33,512; Total \$ 578,060; \$ 41,366; \$ 555,172; \$ 36,649; Remaining contractual maturity of the agreements Overnight and continuous Greater than 90 days 2020 (in millions) Up to 30 days 30; 90 days Total Total securities sold under repurchase agreements \$ 238,667; \$ 230,980; \$ 70,777; \$ 37,636; \$ 578,060; Total securities loaned and other 37,887; 1,647; 500; 1,332; 41,366; Remaining contractual maturity of the agreements Overnight and continuous Greater than 90 days 2019 (in millions) Up to 30 days 30; 90 days Total Total securities sold under repurchase agreements \$ 225,134; \$ 195,816; (a) \$ 56,020; (a) \$ 78,202; (a) \$ 555,172; Total securities loaned and other 32,028; 1,706; 937; 1,978; 36,649; (a) The prior period amounts have been revised to conform with the current period presentation. Transfers not qualifying for sale accounting At December 31, 2020 and 2019, the Firm held \$ 598 million and \$ 743 million, respectively, of financial assets for which the rights have been transferred to third parties; however, the transfers did not qualify as a sale in accordance with U.S. GAAP. These transfers have been recognized as collateralized financing transactions. The transferred assets are recorded in trading assets and loans, and the corresponding liabilities are recorded predominantly in short-term borrowings on the Consolidated balance sheets.

231 Notes to consolidated financial statements Note 12 "Loans" Loan accounting framework The accounting for a loan depends on management's strategy for the loan. The Firm accounts for loans based on the following categories: "Originated or purchased loans held-for-investment (i.e., retained);" "Loans held-for-sale;" "Loans at fair value Effective January 1, 2020, the Firm adopted the CECL accounting guidance.

Refer to Note 1 for further information. The following provides a detailed accounting discussion of the Firm's loans by category:

Loans held-for-investment Originated or purchased loans held-for-investment are recorded at the principal amount outstanding, net of the following: charge-offs; interest applied to principal (for loans accounted for on the cost recovery method); unamortized discounts and premiums; and net deferred loan fees or costs. Credit card loans also include billed finance charges and fees. Interest income on performing loans held-for-investment is accrued and recognized as interest income at the contractual rate of interest. Purchase price discounts or premiums, as well as net deferred loan fees or costs, are amortized into interest income over the contractual life of the loan as an adjustment of yield. The Firm classifies accrued interest on loans, including accrued but unbilled interest on credit card loans, in accrued interest and accounts receivables on the Consolidated balance sheets. For credit card loans, accrued interest once billed is then recognized in the loan balances, with the related allowance recorded in the allowance for credit losses. Changes in the allowance for credit losses on accrued interest on credit card loans are recognized in the provision for credit losses and charge-offs are recognized by reversing interest income. Expected losses related to accrued interest on certain performing, modified loans to borrowers impacted by COVID-19 are considered in the Firm's allowance for loan losses. For other loans, the Firm generally does not recognize an allowance for credit losses on accrued interest receivables, consistent with its policy to write them off no later than 90 days past due by reversing interest income.

Nonaccrual loans Nonaccrual loans are those on which the accrual of interest has been suspended. Loans (other than credit card loans and certain consumer loans insured by U.S. government agencies) are placed on nonaccrual status and considered nonperforming when full payment of principal and interest is not expected, regardless of delinquency status, or when principal and interest has been in default for a period of 90 days or more, unless the loan is both well-secured and in the process of collection. A loan is determined to be past due when the minimum payment is not received from the borrower by the contractually specified due date or for certain loans (e.g., residential real estate loans), when a monthly payment is due and unpaid for 30 days or more. Finally, collateral-dependent loans are typically maintained on nonaccrual status. On the date a loan is placed on nonaccrual status, all interest accrued but not collected is reversed against interest income. In addition, the amortization of deferred amounts is suspended. Interest income on nonaccrual loans may be recognized as cash interest payments are received (i.e., on a cash basis) if the recorded loan balance is deemed fully collectible; however, if there is doubt regarding the ultimate collectibility of the recorded loan balance, all interest cash receipts are applied to reduce the carrying value of the loan (the cost recovery method). For consumer loans, application of this policy typically results in the Firm recognizing interest income on nonaccrual consumer loans on a cash basis. A loan may be returned to accrual status when repayment is reasonably assured and there has been demonstrated performance under the terms of the loan or, if applicable, the terms of the restructured loan. As permitted by regulatory guidance, credit card loans are generally exempt from being placed on nonaccrual status; accordingly, interest and fees related to credit card loans continue to accrue until the loan is charged off or paid in full.

Allowance for loan losses The allowance for loan losses represents the estimated expected credit losses in the held-for-investment loan portfolio at the balance sheet date and is recognized on the balance sheet as a contra asset, which brings the amortized cost to the net carrying value. Changes in the allowance for loan losses are recorded in the provision for credit losses on the Firm's Consolidated statements of income. Refer to Note 13 for further information on the Firm's accounting policies for the allowance for loan losses.

Charge-offs Consumer loans are generally charged off or charged down to the lower of the amortized cost or the net realizable value of the underlying collateral (i.e., fair value less estimated costs to sell), with an offset to the allowance for loan losses, upon reaching specified stages of delinquency in accordance with standards established by the FFIEC. Residential real estate loans, unmodified credit card loans and scored business banking loans are generally charged off no later than 180 days past due. Scored auto and modified credit card loans are charged off no later than 120 days past due. 232 JPMorgan Chase & Co./2020 Form 10-K Certain consumer loans are charged off or charged down to their net realizable value earlier than the FFIEC charge-off standards in certain circumstances as follows:

- Loans modified in a TDR that are determined to be collateral-dependent.
- Loans to borrowers who have experienced an event that suggests a loss is either known or highly certain are subject to accelerated charge-off standards (e.g., residential real estate and auto loans are charged off or charged down within 60 days of receiving notification of a bankruptcy filing).
- Auto loans upon repossession of the automobile.

Other than in certain limited circumstances, the Firm typically does not recognize charge-offs on the government-guaranteed portion of loans. Wholesale loans are charged off when it is highly certain that a loss has been realized. The determination of whether to recognize a charge-off includes many factors, including the prioritization of the Firm's claim in bankruptcy, expectations of the workout/restructuring of the loan and valuation of the borrower's equity or the loan collateral. When a loan is charged down to the lower of its amortized cost or the estimated net realizable value of the underlying collateral, the determination of the fair value of the collateral depends on the type of collateral (e.g., securities, real estate). In cases where the collateral is in the form of liquid securities, the fair value is based on quoted market prices or broker quotes. For illiquid securities or other financial assets, the fair value of the collateral is generally estimated using a discounted cash flow model. For residential real estate loans, collateral values are based upon external valuation sources. When it becomes likely that a borrower is either unable or unwilling to pay, the

Firm utilizes a broker's price opinion, appraisal and/or an automated valuation model of the home based on an exterior-only valuation (exterior opinions), which is then updated at least every twelve months, or more frequently depending on various market factors. As soon as practicable after the Firm receives the property in satisfaction of a debt (e.g., by taking legal title or physical possession), the Firm generally obtains an appraisal based on an inspection that includes the interior of the home (interior appraisals). Exterior opinions and interior appraisals are discounted based upon the Firm's experience with actual liquidation values as compared with the estimated values provided by exterior opinions and interior appraisals, considering state-specific factors. For commercial real estate loans, collateral values are generally based on appraisals from internal and external valuation sources. Collateral values are typically updated every six to twelve months, either by obtaining a new appraisal or by performing an internal analysis, in accordance with the Firm's policies. The Firm also considers both borrower- and market-specific factors, which may result in obtaining appraisal updates or broker price opinions at more frequent intervals. Loans held-for-sale Loans held-for-sale are measured at the lower of cost or fair value, with valuation changes recorded in noninterest revenue. For consumer loans, the valuation is performed on a portfolio basis. For wholesale loans, the valuation is performed on an individual loan basis. Interest income on loans held-for-sale is accrued and recognized based on the contractual rate of interest. Loan origination fees or costs and purchase price discounts or premiums are deferred in a contra loan account until the related loan is sold. The deferred fees or costs and discounts or premiums are an adjustment to the basis of the loan and therefore are included in the periodic determination of the lower of cost or fair value adjustments and/or the gain or loss recognized at the time of sale. Because these loans are recognized at the lower of cost or fair value, the Firm's allowance for loan losses and charge-off policies do not apply to these loans. However, loans held-for-sale are subject to the nonaccrual policies described above. Loans at fair value Loans for which the fair value option has been elected are measured at fair value, with changes in fair value recorded in noninterest revenue. Interest income on these loans is accrued and recognized based on the contractual rate of interest. Changes in fair value are recognized in noninterest revenue. Loan origination fees are recognized upfront in noninterest revenue. Loan origination costs are recognized in the associated expense category as incurred. Because these loans are recognized at fair value, the Firm's allowance for loan losses and charge-off policies do not apply to these loans. However, loans at fair value are subject to the nonaccrual policies described above. Refer to Note 3 for further information on the Firm's elections of fair value accounting under the fair value option. Refer to Note 2 and Note 3 for further information on loans carried at fair value and classified as trading assets. JPMorgan Chase & Co./2020 Form 10-K 233 Notes to consolidated financial statements Loan classification changes Loans in the held-for-investment portfolio that management decides to sell are transferred to the held-for-sale portfolio at the lower of cost or fair value on the date of transfer. Credit-related losses are charged against the allowance for loan losses; non-credit related losses such as those due to changes in interest rates or foreign currency exchange rates are recognized in noninterest revenue. In the event that management decides to retain a loan in the held-for-sale portfolio, the loan is transferred to the held-for-investment portfolio at amortized cost on the date of transfer. These loans are subsequently assessed for impairment based on the Firm's allowance methodology. Refer to Note 13 for a further discussion of the methodologies used in establishing the Firm's allowance for loan losses. Loan modifications The Firm seeks to modify certain loans in conjunction with its loss mitigation activities. Through the modification, JPMorgan Chase grants one or more concessions to a borrower who is experiencing financial difficulty in order to minimize the Firm's economic loss and avoid foreclosure or repossession of the collateral, and to ultimately maximize payments received by the Firm from the borrower. The concessions granted vary by program and by borrower-specific characteristics, and may include interest rate reductions, term extensions, payment delays, principal forgiveness, or the acceptance of equity or other assets in lieu of payments. Such modifications are accounted for and reported as TDRs. Loans with short-term and other insignificant modifications that are not considered concessions are not TDRs. Loans, except for credit card loans, modified in a TDR are generally placed on nonaccrual status, although in many cases such loans were already on nonaccrual status prior to modification. These loans may be returned to performing status (the accrual of interest is resumed) if the following criteria are met: (i) the borrower has performed under the modified terms for a minimum of six months and/or six payments, and (ii) the Firm has an expectation that repayment of the modified loan is reasonably assured based on, for example, the borrower's debt capacity and level of future earnings, collateral values, LTV ratios, and other current market considerations. In certain limited and well-defined circumstances in which the loan is current at the modification date, such loans are not placed on nonaccrual status at the time of modification. Loans modified in TDRs are generally measured for impairment using the Firm's established asset-specific allowance methodology, which considers the expected re-default rates for the modified loans. A loan modified in a TDR generally remains subject to the asset-specific component of the allowance throughout its remaining life, regardless of whether the loan is performing and has been returned to accrual status. Refer to Note 13 for further discussion of the methodology used to estimate the Firm's asset-specific allowance. The Firm has granted various forms of assistance to customers and clients impacted by the COVID-19 pandemic, including payment deferrals and covenant modifications. The majority of the Firm's COVID-19 related loan modifications have not been considered TDRs because: they represent short-term or

other insignificant modifications, whether under the Firm's regular loan modification assessments or as permitted by regulatory guidance, or the Firm has elected to apply the option to suspend the application of accounting guidance for TDRs as provided by the CARES Act and extended by the Consolidated Appropriations Act. To the extent that certain modifications do not meet any of the above criteria, the Firm accounts for them as TDRs. As permitted by regulatory guidance, the Firm does not place loans with deferrals granted due to COVID-19 on nonaccrual status where such loans are not otherwise reportable as nonaccrual. The Firm considers expected losses of principal and accrued interest associated with all COVID-19 related loan modifications in its allowance for credit losses. Assistance provided in response to the COVID-19 pandemic could delay the recognition of delinquencies, nonaccrual status, and net charge-offs for those customers who would have otherwise moved into past due or nonaccrual status. Foreclosed property The Firm acquires property from borrowers through loan restructurings, workouts, and foreclosures. Property acquired may include real property (e.g., residential real estate, land, and buildings) and commercial and personal property (e.g., automobiles, aircraft, railcars, and ships). The Firm recognizes foreclosed property upon receiving assets in satisfaction of a loan (e.g., by taking legal title or physical possession). For loans collateralized by real property, the Firm generally recognizes the asset received at foreclosure sale or upon the execution of a deed in lieu of foreclosure transaction with the borrower. Foreclosed assets are reported in other assets on the Consolidated balance sheets and initially recognized at fair value less estimated costs to sell. Each quarter the fair value of the acquired property is reviewed and adjusted, if necessary, to the lower of cost or fair value. Subsequent adjustments to fair value are charged/credited to noninterest revenue. Operating expense, such as real estate taxes and maintenance, are charged to other expense. In response to the COVID-19 pandemic, the Firm has temporarily suspended certain foreclosure activities. This could delay recognition of foreclosed properties until the foreclosure moratoriums are lifted.

234 JPMorgan Chase & Co./2020 Form 10-K Loan portfolio The Firm's loan portfolio is divided into three portfolio segments, which are the same segments used by the Firm to determine the allowance for loan losses: Consumer, excluding credit card; Credit card; and Wholesale. Within each portfolio segment the Firm monitors and assesses the credit risk in the following classes of loans, based on the risk characteristics of each loan class. In conjunction with the adoption of CECL, the Firm revised its loan classes. Prior-period amounts have been revised to conform with the current presentation:

- The consumer, excluding credit card portfolio segment's residential mortgage and home equity loans and lending-related commitments have been combined into a residential real estate class.
- Upon adoption of CECL, the Firm elected to discontinue the pool-level accounting for PCI loans and to account for these loans on an individual loan basis. PCI loans are considered PCD loans under CECL and are subject to the Firm's nonaccrual and charge-off policies. PCD loans are now reported in the consumer, excluding credit card portfolio segment's residential real estate class.
- Risk-rated business banking and auto dealer loans and lending-related commitments held in CCB were reclassified from the consumer, excluding credit card portfolio segment, to the wholesale portfolio segment, to align with the methodology applied when determining the allowance. The remaining scored auto and business banking loans and lending-related commitments have been combined into an auto and other class.
- The wholesale portfolio segment's classes, previously based on the borrower's primary business activity, have been revised to align with the loan classifications as defined by the bank regulatory agencies, based on the loan's collateral, purpose, and type of borrower.

Consumer, excluding credit card Credit card Wholesale (c)

	Residential real estate (a)	Auto and other (b)	Credit card loans	Secured by real estate	Commercial and industrial	Other (d)
Includes scored mortgage and home equity loans held in CCB and AWM, and scored mortgage loans held in CIB and Corporate.						
Includes scored auto and business banking loans and overdrafts.						
Includes loans held in CIB, CB, AWM, Corporate as well as risk-rated business banking and auto dealer loans held in CCB for which the wholesale methodology is applied when determining the allowance for loan losses.						
Includes loans to financial institutions, states and political subdivisions, SPEs, nonprofits, personal investment companies and trusts, as well as loans to individuals and individual entities (predominantly Wealth Management clients within AWM).						

Refer to Note 14 for more information on SPEs. JPMorgan Chase & Co./2020 Form 10-K 235 Notes to consolidated financial statements The following tables summarize the Firm's loan balances by portfolio segment. December 31, 2020 Consumer, excluding credit card Credit card Wholesale Total (b)(c) (in millions) Retained \$ 302,127 \$ 143,432 \$ 514,947 \$ 960,506 Held-for-sale 1,305 784 5,784 7,873 At fair value (a) 15,147 \$ 29,327 44,474 Total \$ 318,579 \$ 144,216 \$ 550,058 \$ 1,012,853 December 31, 2019 Consumer, excluding credit card Credit card Wholesale Total (b)(c) (in millions) Retained \$ 294,999 \$ 168,924 \$ 481,678 \$ 945,601 Held-for-sale 3,002 \$ 4,062 7,064 At fair value (a) 19,816 \$ 25,139 44,955 Total \$ 317,817 \$ 168,924 \$ 510,879 \$ 997,620 (a) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans. Prior-period amounts have been revised to conform with the current presentation. (b) Excludes \$ 2.9 billion of accrued interest receivables at both December 31, 2020 and 2019. The Firm wrote off accrued interest receivables of \$ 121 million and \$ 50 million for the years ended December 31, 2020 and 2019, respectively. (c)

Loans (other than those for which the fair value option has been elected) are presented net of unamortized discounts and premiums and net deferred loan fees or costs. These amounts were not material as of December 31, 2020 and 2019. The following tables provide information about the carrying value of retained loans purchased, sold and reclassified to held-for-sale during the periods indicated. Loans that were reclassified to held-for-sale and sold in a subsequent period are excluded from the sales line of this table. 2020 Year ended December 31, (in millions) Consumer, excluding credit card Credit card Wholesale Total Purchases \$ 3,474 (b)(c) \$ 1,159 \$ 4,633 Sales 352 17,916 18,268 Retained loans reclassified to held-for-sale (a) 2,084 787 1,580 4,451 2019 Year ended December 31, (in millions) Consumer, excluding credit card Credit card Wholesale Total Purchases \$ 1,282 (b)(c) \$ 1,291 \$ 2,573 Sales 30,474 23,445 53,919 Retained loans reclassified to held-for-sale (a) 9,188 2,371 11,559 2018 Year ended December 31, (in millions) Consumer, excluding credit card Credit card Wholesale Total Purchases \$ 2,543 (b)(c) \$ 2,354 \$ 4,897 Sales 9,984 16,741 26,725 Retained loans reclassified to held-for-sale (a) 36 2,276 2,312 (a) Reclassifications of loans to held-for-sale are non-cash transactions. (b) Predominantly includes purchases of residential real estate loans, including the Firm's voluntary repurchases of certain delinquent loans from loan pools as permitted by Government National Mortgage Association (Ginnie Mae) guidelines for the years ended December 31, 2020, 2019 and 2018. The Firm typically elects to repurchase these delinquent loans as it continues to service them and/or manage the foreclosure process in accordance with applicable requirements of Ginnie Mae, FHA, RHS, and/or VA. (c) Excludes purchases of retained loans sourced through the correspondent origination channel and underwritten in accordance with the Firm's standards. Such purchases were \$ 15.3 billion, \$ 16.6 billion and \$ 18.6 billion for the years ended December 31, 2020, 2019 and 2018, respectively. Gains and losses on sales of loans Net gains/(losses) on sales of loans and lending-related commitments (including adjustments to record loans and lending-related commitments held-for-sale at the lower of cost or fair value) recognized in noninterest revenue was \$(43)million for the year ended December 31, 2020 of which \$(36)million was related to loans. Net gains on sales of loans was \$ 394 million for the year ended December 31, 2019. Gains and losses on sales of loans was not material for the year ended December 31, 2018. In addition, the sale of loans may also result in write downs, recoveries or changes in the allowance recognized in the provision for credit losses. 236 JPMorgan Chase & Co./2020 Form 10-K Consumer, excluding credit card loan portfolio Consumer loans, excluding credit card loans, consist primarily of scored residential mortgages, home equity loans and lines of credit, auto and business banking loans, with a focus on serving the prime consumer credit market. The portfolio also includes home equity loans secured by junior liens, prime mortgage loans with an interest-only payment period, and certain payment-option loans that may result in negative amortization. The following table provides information about retained consumer loans, excluding credit card, by class. December 31, (in millions) 2020 2019 Residential real estate \$ 225,302 \$ 243,317 Auto and other (a) 76,825 51,682 Total retained loans \$ 302,127 \$ 294,999 (a) At December 31, 2020, included \$ 19.2 billion of loans in Business Banking under the PPP. Delinquency rates are the primary credit quality indicator for consumer loans. Loans that are more than 30 days past due provide an early warning of borrowers who may be experiencing financial difficulties and/or who may be unable or unwilling to repay the loan. As the loan continues to age, it becomes more clear whether the borrower is likely to be unable or unwilling to pay. In the case of residential real estate loans, late-stage delinquencies (greater than 150 days past due) are a strong indicator of loans that will ultimately result in a foreclosure or similar liquidation transaction. In addition to delinquency rates, other credit quality indicators for consumer loans vary based on the class of loan, as follows: For residential real estate loans, the current estimated LTV ratio, or the combined LTV ratio in the case of junior lien loans, is an indicator of the potential loss severity in the event of default. Additionally, LTV or combined LTV ratios can provide insight into a borrower's continued willingness to pay, as the delinquency rate of high-LTV loans tends to be greater than that for loans where the borrower has equity in the collateral. The geographic distribution of the loan collateral also provides insight as to the credit quality of the portfolio, as factors such as the regional economy, home price changes and specific events such as natural disasters, will affect credit quality. The borrower's current or refreshed FICO score is a secondary credit quality indicator for certain loans, as FICO scores are an indication of the borrower's credit payment history. Thus, a loan to a borrower with a low FICO score (less than 660) is considered to be of higher risk than a loan to a borrower with a higher FICO score. Further, a loan to a borrower with a high LTV ratio and a low FICO score is at greater risk of default than a loan to a borrower that has both a high LTV ratio and a high FICO score. For scored auto and business banking loans, geographic distribution is an indicator of the credit performance of the portfolio. Similar to residential real estate loans, geographic distribution provides insights into the portfolio performance based on regional economic activity and events. JPMorgan Chase & Co./2020 Form 10-K 237 Notes to consolidated financial statements Residential real estate The following table provides information on delinquency, which is the primary credit quality indicator for retained residential real estate loans. (in millions, except ratios) December 31, 2020 December 31, 2019 Term loans by origination

year Revolving loans Total Total 2020 2019 2018 2017 2016 Prior to 2016 Within the revolving period Converted to term loans

Loan delinquency (a)(b) Current \$ 55,562 \$ 31,820 \$ 13,900 \$ 20,410 \$ 27,978 \$ 50,232 \$ 7,370 \$ 15,792 \$ 223,064 \$ 239,979 30–149 days past due 9 25 20 22 29 674 21 245 1,045 1,910 150 or more days past due 3 14 10 18 18 844 22 264 1,193 1,428 Total retained loans \$ 55,574 \$ 31,859 \$ 13,930 \$ 20,450 \$ 28,025 \$ 51,750 \$ 7,413 \$ 16,301 \$ 225,302 \$ 243,317 % of 30+ days past due to total retained loans (c) 0.02 % 0.12 % 0.22 % 0.20 % 0.17 % 2.86 % 0.58 % 3.12 % 0.98 % 1.35 % (a) Individual delinquency classifications include mortgage loans insured by U.S. government agencies as follows: current included \$ 36 million and \$ 17 million; 30–149 days past due included \$ 16 million and \$ 20 million; and 150 or more days past due included \$ 24 million and \$ 26 million at December 31, 2020 and 2019, respectively. (b) At December 31, 2020, loans under payment deferral programs offered in response to the COVID-19 pandemic which are still within their deferral period and performing according to their modified terms are generally not considered delinquent. (c) At December 31, 2020 and 2019, residential real estate loans excluded mortgage loans insured by U.S. government agencies of \$ 40 million and \$ 46 million, respectively, that are 30 or more days past due. These amounts have been excluded based upon the government guarantee. Approximately 35 % of the total revolving loans are senior lien loans; the remaining balance are junior lien loans. The lien position the Firm holds is considered in the Firm’s allowance for credit losses. Revolving loans that have been converted to term loans have higher delinquency rates than those that are still within the revolving period. That is primarily because the fully-amortizing payment that is generally required for those products is higher than the minimum payment options available for revolving loans within the revolving period. 238 JPMorgan Chase & Co./2020 Form 10-K

Nonaccrual loans and other credit quality indicators The following table provides information on nonaccrual and other credit quality indicators for retained residential real estate loans. (in millions, except weighted-average data) December 31, 2020 December 31, 2019

Nonaccrual loans (a)(b)(c)(d)(e) \$ 5,313 \$ 2,780 90 or more days past due and government guaranteed (f) 33 38 Current estimated LTV ratios (g)(h) Greater than 125% and refreshed FICO scores: Equal to or greater than 660 \$ 10 \$ 31 Less than 660 18 38 101% to 125% and refreshed FICO scores: Equal to or greater than 660 72 134 Less than 660 65 132 80% to 100% and refreshed FICO scores: Equal to or greater than 660 2,365 5,953 Less than 660 435 764 Less than 80% and refreshed FICO scores: Equal to or greater than 660 208,457 219,469 Less than 660 12,072 14,681 No FICO/LTV available 1,732 2,052 U.S. government-guaranteed 76 63 Total retained loans \$ 225,302 \$ 243,317 Weighted average LTV ratio (g)(i) 54 % 55 % Weighted average FICO (h)(i) 763 758 Geographic region (j) California \$ 73,444 \$ 82,147 New York 32,287 31,996 Florida 13,981 13,668 Texas 13,773 14,474 Illinois 13,130 15,587 Colorado 8,235 8,447 Washington 7,917 8,990 New Jersey 7,227 7,752 Massachusetts 5,784 6,210 Connecticut 5,024 4,954 All other (k) 44,500 49,092 Total retained loans \$ 225,302 \$ 243,317 (a) Includes collateral-dependent residential real estate loans that are charged down to the lower of amortized cost or the fair value of the underlying collateral less costs to sell. The Firm reports, in accordance with regulatory guidance, residential real estate loans that have been discharged under Chapter 7 bankruptcy and not reaffirmed by the borrower (“Chapter 7 loans”) as collateral-dependent nonaccrual TDRs, regardless of their delinquency status. At December 31, 2020, approximately 7 % of Chapter 7 residential real estate loans were 30 days or more past due, respectively. (b) At December 31, 2020, nonaccrual loans included \$ 1.6 billion of PCD loans. Prior to the adoption of CECL, nonaccrual loans excluded PCI loans as the Firm recognized interest income on each pool of PCI loans as each of the pools was performing. (c) Generally, all consumer nonaccrual loans have an allowance. In accordance with regulatory guidance, certain nonaccrual loans that are considered collateral-dependent have been charged down to the lower of amortized cost or the fair value of their underlying collateral less costs to sell. If the value of the underlying collateral improves subsequent to the charge down, the related allowance may be negative. (d) Interest income on nonaccrual loans recognized on a cash basis was \$ 161 million and \$ 166 million for the years ended December 31, 2020 and 2019, respectively. (e) Generally excludes loans under payment deferral programs offered in response to the COVID-19 pandemic. Includes loans to customers that have exited COVID-19 payment deferral programs and are 90 or more days past due, predominantly all of which were also at least 150 days past due and therefore considered collateral-dependent. Collateral-dependent loans are charged down to the lower of amortized cost or fair value of the underlying collateral less costs to sell. (f) These balances are excluded from nonaccrual loans as the loans are guaranteed by U.S government agencies. Typically the principal balance of the loans is insured and interest is guaranteed at a specified reimbursement rate subject to meeting agreed-upon servicing guidelines. At December 31, 2020 and 2019, these balances included \$ 33 million and \$ 34 million, respectively, of loans that are no longer accruing interest based on the agreed-upon servicing guidelines. For the remaining balance, interest is being

accrued at the guaranteed reimbursement rate. There were no loans that were not guaranteed by U.S. government agencies that are 90 or more days past due and still accruing interest at December 31, 2020 and 2019. (g) Represents the aggregate unpaid principal balance of loans divided by the estimated current property value. Current property values are estimated, at a minimum, quarterly, based on home valuation models using nationally recognized home price index valuation estimates incorporating actual data to the extent available and forecasted data where actual data is not available. Current estimated combined LTV for junior lien home equity loans considers all available lien positions, as well as unused lines, related to the property. (h) Refreshed FICO scores represent each borrower's most recent credit score, which is obtained by the Firm on at least a quarterly basis. (i) Excludes loans with no FICO and/or LTV data available. (j) The geographic regions presented in the table are ordered based on the magnitude of the corresponding loan balances at December 31, 2020. (k) At December 31, 2020 and 2019, included mortgage loans insured by U.S. government agencies of \$ 76 million and \$ 63 million, respectively. These amounts have been excluded from the geographic regions presented based upon the government guarantee. JPMorgan Chase & Co./2020 Form 10-K 239 Notes to consolidated financial statements

Loan modifications

Modifications of residential real estate loans, where the Firm grants concessions to borrowers who are experiencing financial difficulty are generally accounted for and reported as TDRs. Loans with short-term or other insignificant modifications that are not considered concessions are not TDRs nor are loans for which the Firm has elected to apply the option to suspend the application of accounting guidance for TDRs as provided by the CARES Act and extended by the Consolidated Appropriations Act. The carrying value of new TDRs was \$ 819 million, \$ 490 million and \$ 736 million for the years ended December 31, 2020, 2019 and 2018, respectively. There were no additional commitments to lend to borrowers whose residential real estate loans have been modified in TDRs.

Nature and extent of modifications

The Firm's proprietary modification programs as well as government programs, including U.S. GSE programs, generally provide various concessions to financially troubled borrowers including, but not limited to, interest rate reductions, term or payment extensions and delays of principal and/or interest payments that would otherwise have been required under the terms of the original agreement. The following table provides information about how residential real estate loans were modified in TDRs under the Firm's loss mitigation programs described above during the periods presented. This table excludes Chapter 7 loans where the sole concession granted is the discharge of debt, loans with short-term or other insignificant modifications that are not considered concessions, and loans for which the Firm has elected to apply the option to suspend the application of accounting guidance for TDRs as provided by the CARES Act and extended by the Consolidated Appropriations Act.

	Year ended December 31, 2020	2019	2018
Number of loans approved for a trial modification	5,522	5,872	7,175
Number of loans permanently modified	6,850	4,918	7,853
Concession granted:			
(a) Interest rate reduction	50 %	77 %	54 %
Term or payment extension	49 %	71 %	62 %
Principal and/or interest deferred	14 %	13 %	29 %
Principal forgiveness	2 %	5 %	7 %
Other	66 %	63 %	51 %

(a) Represents concessions granted in permanent modifications as a percentage of the number of loans permanently modified. The sum of the percentages exceeds 100 % because predominantly all of the modifications include more than one type of concession. Concessions offered on trial modifications are generally consistent with those granted on permanent modifications. (b) Includes variable interest rate to fixed interest rate modifications and payment delays that meet the definition of a TDR for the years ended December 31, 2020, 2019 and 2018.

240 JPMorgan Chase & Co./2020 Form 10-K Financial effects of modifications and redefaults

The following table provides information about the financial effects of the various concessions granted in modifications of residential real estate loans under the loss mitigation programs described above and about redefaults of certain loans modified in TDRs for the periods presented. The following table presents only the financial effects of permanent modifications and do not include temporary concessions offered through trial modifications. This table also excludes Chapter 7 loans where the sole concession granted is the discharge of debt, loans with short-term or other insignificant modifications that are not considered concessions, and loans for which the Firm has elected to apply the option to suspend the application of accounting guidance for TDRs as provided by the CARES Act and extended by the Consolidated Appropriations Act.

	Year ended December 31, (in millions, except weighted - average data)	2020	2019	2018
Weighted-average interest rate of loans with interest rate reductions before TDR	5.09 %	5.68 %	5.50 %	
Weighted-average interest rate of loans with interest rate reductions after TDR	3.28 %	3.81 %	3.60 %	
Weighted-average remaining contractual term (in years) of loans with term or payment extensions before TDR	22	20	21	
Weighted-average remaining contractual term (in years) of loans with term or payment extensions after TDR	39	39	38	
Charge-offs recognized upon permanent modification	\$ 5	\$ 1	\$ 2	
Principal deferred	16	19	30	
Principal forgiven	5	7	17	
Balance of loans that redefaulted within one year of permanent modification	(a) \$ 199	\$ 166	\$ 161	

(a) Represents loans permanently modified in TDRs that experienced a payment default in the periods presented, and for which the payment default occurred within one year of the modification. The dollar amounts presented represent the balance of such loans at the end of the reporting period in which such loans defaulted. For residential real estate loans modified in TDRs, payment default is deemed to occur when the loan becomes two

contractual payments past due. In the event that a modified loan redefaults, it will generally be liquidated through foreclosure or another similar type of liquidation transaction. Redefaults of loans modified within the last twelve months may not be representative of ultimate redefault levels. At December 31, 2020, the weighted-average estimated remaining lives of residential real estate loans permanently modified in TDRs were 6 years. The estimated remaining lives of these loans reflect estimated prepayments, both voluntary and involuntary (i.e., foreclosures and other forced liquidations). Active and suspended foreclosure

At December 31, 2020 and 2019, the Firm had residential real estate loans, excluding those insured by U.S. government agencies, with a carrying value of \$ 846 million and \$ 1.2 billion, respectively, that were not included in REO, but were in the process of active or suspended foreclosure. JPMorgan Chase & Co./2020 Form 10-K 241 Notes to consolidated financial statements Auto and other

The following table provides information on delinquency, which is the primary credit quality indicator for retained auto and other consumer loans.

December 31, 2020 December 31, 2019 (in millions, except ratios)

Term Loans by origination year	Revolving loans 2020	2019	2018	2017	2016	Prior to 2016	Within the revolving period	Converted to term loans	Total	Total Loan delinquency (a)

(a) At December 31, 2020, loans under payment deferral programs offered in response to the COVID-19 pandemic which are still within their deferral period and performing according to their modified terms are generally not considered delinquent. (b) At December 31, 2020, included \$ 19.2 billion of loans in Business Banking under the PPP. PPP loans are guaranteed by the SBA. Other than in certain limited circumstances, the Firm typically does not recognize charge-offs, classify as nonaccrual nor record an allowance for loan losses on these loans.

Nonaccrual and other credit quality indicators The following table provides information on nonaccrual and other credit quality indicators for retained auto and other consumer loans. (in millions, except ratios)

Total Auto and other	December 31, 2020	December 31, 2019
Nonaccrual loans (a)(b)(c)	151	146
Geographic region (d)		
California	\$ 12,302	\$ 7,795
New York	8,824	3,706
Texas	8,235	5,457
Florida	4,668	3,025
Illinois	3,768	2,443
New Jersey	2,646	1,798
Arizona	2,465	1,347
Ohio	2,163	1,490
Pennsylvania	1,924	1,721
Colorado	1,910	1,247
All other	27,920	21,653
Total retained loans	\$ 76,825	\$ 51,682

(a) There were no loans that were 90 or more days past due and still accruing interest at December 31, 2020 and 2019. (b) All nonaccrual auto and other consumer loans generally have an allowance. Certain nonaccrual loans that are considered collateral-dependent have been charged down to the lower of amortized cost or the fair value of their underlying collateral less costs to sell. If the value of the underlying collateral improves subsequent to the charge down, the related allowance may be negative. (c) Interest income on nonaccrual loans recognized on a cash basis was not material for the years ended December 31, 2020 and 2019. (d) The geographic regions presented in this table are ordered based on the magnitude of the corresponding loan balances at December 31, 2020. Loan modifications Certain other consumer loan modifications are considered to be TDRs as they provide various concessions to borrowers who are experiencing financial difficulty. Loans with short-term or other insignificant modifications that are not considered concessions are not TDRs. The impact of these modifications, as well as new TDRs, were not material to the Firm for the years ended December 31, 2020, 2019 and 2018. Additional commitments to lend to borrowers whose loans have been modified in TDRs as of December 31, 2020 and 2019 were not material.

242 JPMorgan Chase & Co./2020 Form 10-K Credit card loan portfolio The credit card portfolio segment includes credit card loans originated and purchased by the Firm. Delinquency rates are the primary credit quality indicator for credit card loans as they provide an early warning that borrowers may be experiencing difficulties (30 days past due); information on those borrowers that have been delinquent for a longer period of time (90 days past due) is also considered. In addition to delinquency rates, the geographic distribution of the loans provides insight as to the credit quality of the portfolio based on the regional economy. While the borrower's credit score is another general indicator of credit quality, the Firm does not view credit scores as a primary indicator of credit quality because the borrower's credit score tends to be a lagging indicator. The distribution of such scores provides a general indicator of credit quality trends within the portfolio; however, the score does not capture all factors that would be predictive of future credit performance. Refreshed FICO score information, which is obtained at least quarterly, for a statistically significant random sample of the credit card portfolio is indicated in the following table. FICO is considered to be the industry benchmark for credit scores. The Firm generally originates new card accounts to prime consumer borrowers. However, certain cardholders' FICO scores may decrease over time, depending on the performance of the cardholder and changes in the credit score calculation. The following table provides information on delinquency, which is the primary credit quality indicator for retained credit card loans. (in millions, except

ratios) December 31, 2020 December 31, 2019 Within the revolving period Converted to term loans (b) Total Total Loan delinquency (a) Current and less than 30 days past due and still accruing \$ 139,783 \$ 1,239 \$ 141,022 \$ 165,767 30–89 days past due and still accruing 997 94 1,091 1,550 90 or more days past due and still accruing 1,277 42 1,319 1,607 Total retained loans \$ 142,057 \$ 1,375 \$ 143,432 \$ 168,924 Loan delinquency ratios % of 30+ days past due to total retained loans 1.60 % 9.89 % 1.68 % 1.87 % % of 90+ days past due to total retained loans 0.90 3.05 0.92 0.95 (a) At December 31, 2020, loans under payment deferral programs offered in response to the COVID-19 pandemic which are still within their deferral period and performing according to their modified terms are generally not considered delinquent. (b) Represents TDRs. Other credit quality indicators The following table provides information on other credit quality indicators for retained credit card loans. (in millions, except ratios) December 31, 2020 December 31, 2019 Geographic region (a) California \$ 20,921 \$ 25,783 Texas 14,544 16,728 New York 11,919 14,544 Florida 9,562 10,830 Illinois 8,006 9,579 New Jersey 5,927 7,165 Ohio 4,673 5,406 Pennsylvania 4,476 5,245 Colorado 4,092 4,763 Michigan 3,553 4,164 All other 55,759 64,717 Total retained loans \$ 143,432 \$ 168,924 Percentage of portfolio based on carrying value with estimated refreshed FICO scores Equal to or greater than 660 85.9 % 84.0 % Less than 660 13.9 15.4 No FICO available 0.2 0.6 (a) The geographic regions presented in the table are ordered based on the magnitude of the corresponding loan balances at December 31, 2020. JPMorgan Chase & Co./2020 Form 10-K 243 Notes to consolidated financial statements Loan modifications The Firm may offer one of a number of loan modification programs granting concessions to credit card borrowers who are experiencing financial difficulty. The Firm grants concessions for most of the credit card loans under long-term programs. These modifications involve placing the customer on a fixed payment plan, generally for 60 months, and typically include reducing the interest rate on the credit card. Substantially all modifications under the Firm’s long-term programs are considered to be TDRs. Loans with short-term or other insignificant modifications that are not considered concessions are not TDRs. If the cardholder does not comply with the modified payment terms, then the credit card loan continues to age and will ultimately be charged-off in accordance with the Firm’s standard charge-off policy. In most cases, the Firm does not reinstate the borrower’s line of credit. Financial effects of modifications and redefaults The following table provides information about the financial effects of the concessions granted on credit card loans modified in TDRs and redefaults for the periods presented. For all periods disclosed, new enrollments were less than 1 % of total retained credit card loans. Year ended December 31, (in millions, except weighted-average data) 2020 2019 2018 Balance of new TDRs (a) \$ 818 \$ 961 \$ 866 Weighted-average interest rate of loans – before TDR 18.04 % 19.07 % 17.98 % Weighted-average interest rate of loans – after TDR 4.64 4.70 5.16 Balance of loans that redefaulted within one year of modification (b) \$ 110 \$ 148 \$ 116 (a) Represents the outstanding balance prior to modification. (b) Represents loans modified in TDRs that experienced a payment default in the periods presented, and for which the payment default occurred within one year of the modification. The amounts presented represent the balance of such loans as of the end of the quarter in which they defaulted. For credit card loans modified in TDRs, payment default is deemed to have occurred when the borrower misses two consecutive contractual payments. Defaulted modified credit card loans remain in the modification program and continue to be charged off in accordance with the Firm’s standard charge-off policy. 244 JPMorgan Chase & Co./2020 Form 10-K Wholesale loan portfolio Wholesale loans include loans made to a variety of clients, ranging from large corporate and institutional clients to high-net-worth individuals. The primary credit quality indicator for wholesale loans is the internal risk rating assigned to each loan. Risk ratings are used to identify the credit quality of loans and differentiate risk within the portfolio. Risk ratings on loans consider the PD and the LGD. The PD is the likelihood that a loan will default. The LGD is the estimated loss on the loan that would be realized upon the default of the borrower and takes into consideration collateral and structural support for each credit facility. Management considers several factors to determine an appropriate internal risk rating, including the obligor’s debt capacity and financial flexibility, the level of the obligor’s earnings, the amount and sources for repayment, the level and nature of contingencies, management strength, and the industry and geography in which the obligor operates. The Firm’s internal risk ratings generally align with the qualitative characteristics (e.g., borrower capacity to meet financial commitments and vulnerability to changes in the economic environment) defined by S&P and Moody’s, however the quantitative characteristics (e.g., PD and LGD) may differ as they reflect internal historical experiences and assumptions. The Firm generally considers internal ratings with qualitative characteristics equivalent to BBB-/Baa3 or higher as investment grade, and these ratings have a lower PD and/or lower LGD than non-investment grade ratings. Noninvestment-grade ratings are further classified as noncriticized and criticized, and the criticized portion is further subdivided into performing and nonaccrual loans, representing management’s assessment of the collectibility of principal and interest. Criticized loans have a higher PD than noncriticized loans. The Firm’s definition of criticized aligns with the U.S. banking regulatory definition of criticized exposures, which consist of special mention, substandard and doubtful categories. Risk

ratings are reviewed on a regular and ongoing basis by Credit Risk Management and are adjusted as necessary for updated information affecting the obligor's ability to fulfill its obligations. As noted above, the risk rating of a loan considers the industry in which the obligor conducts its operations. As part of the overall credit risk management framework, the Firm focuses on the management and diversification of its industry and client exposures, with particular attention paid to industries with actual or potential credit concern. Refer to Note 4 for further detail on industry concentrations.

(b) The credit quality of wholesale loans is assessed primarily through ongoing review and monitoring of an obligor's ability to meet contractual obligations rather than relying on the past due status, which is generally a lagging indicator of credit quality. Generally excludes loans under payment deferral programs offered in response to the COVID-19 pandemic. (c) Represents loans that are considered well-collateralized and therefore still accruing interest. Nonaccrual loans The following table provides information on retained wholesale nonaccrual loans. December 31, (in millions) Secured by real estate Commercial and industrial Other Total retained loans 2020 2019 2020 2019 2020 2019 2020 2019 Nonaccrual loans (a) With an allowance \$ 351; \$ 169; \$ 1,667; \$ 688; \$ 800; \$ 28; \$ 2,818; \$ 885; Without an allowance (b) 132; 14; 264; 156; 104; 2; 500; 172; Total nonaccrual loans (c) \$ 483; \$ 183; \$ 1,931; \$ 844; \$ 904; \$ 30; \$ 3,318; \$ 1,057; (a) Loans that were modified in response to the COVID-19 pandemic continue to be risk-rated in accordance with the Firm's overall credit risk management framework. As of December 31, 2020, predominantly all of these loans were considered performing. (b) When the discounted cash flows, collateral value or market price equals or exceeds the amortized cost of the loan, the loan does not require an allowance. This typically occurs when the loans have been partially charged off and/or there have been interest payments received and applied to the loan balance. (c) Interest income on nonaccrual loans recognized on a cash basis were not material for the years ended December 31, 2020 and 2019. Loan modifications Certain loan modifications are considered to be TDRs as they provide various concessions to borrowers who are experiencing financial difficulty. Loans with short-term or other insignificant modifications that are not considered concessions are not TDRs nor are loans for which the Firm has elected to apply the option to suspend the application of accounting guidance for TDRs as provided by the CARES Act and extended by the Consolidated Appropriations Act. The carrying value of TDRs was \$ 954 million and \$ 501 million as of December 31, 2020 and 2019, respectively. The carrying value of new TDRs was \$ 734 million, \$ 407 million and \$ 718 million for the years ended December 31, 2020, 2019 and 2018, respectively. The impact of these modifications, as well as new TDRs, were not material to the Firm for the years ended December 31, 2020, 2019 and 2018. JPMorgan Chase & Co./2020 Form 10-K 247 Notes to consolidated financial statements Note 13; Allowance for credit losses Effective January 1, 2020, the Firm adopted the CECL accounting guidance. The adoption of this guidance established a single allowance framework for all financial assets measured at amortized cost and certain off-balance sheet credit exposures. This framework requires that management's estimate reflects credit losses over the instrument's remaining expected life and considers expected future changes in macroeconomic conditions. Refer to Note 1 for further information. JPMorgan Chase's allowance for credit losses comprises: the allowance for loan losses, which covers the Firm's retained loan portfolios (scored and risk-rated) and is presented separately on the Consolidated balance sheets, the allowance for lending-related commitments, which is presented on the Consolidated balance sheets in accounts payable and other liabilities, and the allowance for credit losses on investment securities, which covers the Firm's HTM and AFS securities and is recognized within Investment Securities on the Consolidated balance sheets. The income statement effect of all changes in the allowance for credit losses is recognized in the provision for credit losses. Determining the appropriateness of the allowance for credit losses is complex and requires significant judgment by management about the effect of matters that are inherently uncertain. At least quarterly, the allowance for credit losses is reviewed by the CRO, the CFO and the Controller of the

Firm. Subsequent evaluations of credit exposures, considering the macroeconomic conditions, forecasts and other factors then prevailing, may result in significant changes in the allowance for credit losses in future periods. The Firm's policies used to determine its allowance for loan losses and its allowance for lending-related commitments are described in the following paragraphs. Refer to Note 10 for a description of the policies used to determine the allowance for credit losses on investment securities.

Methodology for allowances for loan losses and lending-related commitments The allowance for loan losses and allowance for lending-related commitments represents expected credit losses over the remaining expected life of retained loans and lending-related commitments that are not unconditionally cancellable. The Firm does not record an allowance for future draws on unconditionally cancellable lending-related commitments (e.g., credit cards). Expected losses related to accrued interest on credit card loans and certain performing, modified loans to borrowers impacted by COVID-19 are considered in the Firm's allowance for loan losses. However, the Firm does not record an allowance on other accrued interest receivables, due to its policy to write these receivables off no later than 90 days past due by reversing interest income. The expected life of each instrument is determined by considering its contractual term, expected prepayments, cancellation features, and certain extension and call options. The expected life of funded credit card loans is generally estimated by considering expected future payments on the credit card account, and determining how much of those amounts should be allocated to repayments of the funded loan balance (as of the balance sheet date) versus other account activity. This allocation is made using an approach that incorporates the payment application requirements of the Credit Card Accountability Responsibility and Disclosure Act of 2009, generally paying down the highest interest rate balances first. The estimate of expected credit losses includes expected recoveries of amounts previously charged off or expected to be charged off, even if such recoveries result in a negative allowance.

Collective and Individual Assessments When calculating the allowance for loan losses and the allowance for lending-related commitments, the Firm assesses whether exposures share similar risk characteristics. If similar risk characteristics exist, the Firm estimates expected credit losses collectively, considering the risk associated with a particular pool and the probability that the exposures within the pool will deteriorate or default. The assessment of risk characteristics is subject to significant management judgment. Emphasizing one characteristic over another or considering additional characteristics could affect the allowance.

• Relevant risk characteristics for the consumer portfolio include product type, delinquency status, current FICO scores, geographic distribution, and, for collateralized loans, current LTV ratios.

• Relevant risk characteristics for the wholesale portfolio include LOB, geography, risk rating, delinquency status, level and type of collateral, industry, credit enhancement, product type, facility purpose, tenor, and payment terms. The majority of the Firm's credit exposures share risk characteristics with other similar exposures, and as a result are collectively assessed for impairment (portfolio-based component). The portfolio-based component covers consumer loans, performing risk-rated loans and certain lending-related commitments. If an exposure does not share risk characteristics with other exposures, the Firm generally estimates expected credit losses on an individual basis, considering expected repayment and conditions impacting that individual exposure (asset-specific component). The asset-specific component covers modified PCD loans, loans modified or reasonably expected to be modified in a TDR, collateral-dependent loans, as well as, risk-rated loans that have been placed on nonaccrual status.

Portfolio-based component The portfolio-based component begins with a quantitative calculation that considers the likelihood of the borrower changing delinquency status or moving from one risk rating to another. The quantitative calculation covers expected credit losses over an instrument's expected life and is estimated by applying credit loss factors to the Firm's 2020 JPMorgan Chase & Co. Form 10-K estimated exposure at default. The credit loss factors incorporate the probability of borrower default as well as loss severity in the event of default. They are derived using a weighted average of five internally developed macroeconomic scenarios over an eight-quarter forecast period, followed by a single year straight-line interpolation to revert to long run historical information for periods beyond the eight-quarter forecast period. The five macroeconomic scenarios consist of a central, relative adverse, extreme adverse, relative upside and extreme upside scenario, and are updated by the Firm's central forecasting team. The scenarios take into consideration the Firm's overarching economic outlook, internal perspectives from subject matter experts across the Firm, and market consensus and involve a governed process that incorporates feedback from senior management across LOBs, Corporate Finance and Risk Management. The COVID-19 pandemic has stressed many MEVs to degrees not experienced in recent history, which has created additional challenges in the use of modeled credit loss estimates and increased the reliance on management judgment. In periods where certain MEVs are outside the range of historical experience on which the Firm's models have been trained, the Firm makes adjustments to appropriately address these economic circumstances. The Firm also considers the impact of other events, such as government unemployment benefits or other stimulus programs, when determining whether adjustments are necessary. The quantitative calculation is adjusted to take into consideration model imprecision, emerging risk assessments, trends and other subjective factors that are not yet reflected in the calculation. These adjustments are accomplished in part by analyzing the historical loss experience, including during stressed periods, for each major product or model. Management applies judgment in making this adjustment, including taking into account uncertainties associated with the economic and political conditions, quality of underwriting standards, borrower behavior,

credit concentrations or deterioration within an industry, product or portfolio, as well as other relevant internal and external factors affecting the credit quality of the portfolio. In certain instances, the interrelationships between these factors create further uncertainties. Throughout 2020, the Firm made adjustments to its quantitative calculation which placed significant weighting on its adverse scenarios, as a result of continued uncertainty related to the COVID-19 pandemic. The application of different inputs into the quantitative calculation, and the assumptions used by management to adjust the quantitative calculation, are subject to significant management judgment, and emphasizing one input or assumption over another, or considering other inputs or assumptions, could affect the estimate of the allowance for loan losses and the allowance for lending-related commitments. Asset-specific component To determine the asset-specific component of the allowance, collateral-dependent loans (including those loans for which foreclosure is probable) and larger, nonaccrual risk-rated loans in the wholesale portfolio segment are generally evaluated individually, while smaller loans (both scored and risk-rated) are aggregated for evaluation using factors relevant for the respective class of assets. The Firm generally measures the asset-specific allowance as the difference between the amortized cost of the loan and the present value of the cash flows expected to be collected, discounted at the loan's original effective interest rate. Subsequent changes in impairment are generally recognized as an adjustment to the allowance for loan losses. For collateral-dependent loans, the fair value of collateral less estimated costs to sell is used to determine the charge-off amount for declines in value (to reduce the amortized cost of the loan to the fair value of collateral) or the amount of negative allowance that should be recognized (for recoveries of prior charge-offs associated with improvements in the fair value of collateral). The asset-specific component of the allowance for loan losses for loans that have been or are expected to be modified in TDRs incorporates the effect of the modification on the loan's expected cash flows (including forgone interest, principal forgiveness, as well as other concessions), and also the potential for redefault. For residential real estate loans modified in or expected to be modified in TDRs, the Firm develops product-specific probability of default estimates, which are applied at a loan level to compute expected losses. In developing these probabilities of default, the Firm considers the relationship between the credit quality characteristics of the underlying loans and certain assumptions about housing prices and unemployment, based upon industry-wide data. The Firm also considers its own historical loss experience to-date based on actual redefaulted modified loans. For credit card loans modified in or expected to be modified in TDRs, expected losses incorporate projected delinquencies and charge-offs based on the Firm's historical experience by type of modification program. For wholesale loans modified or expected to be modified in TDRs, expected losses incorporate management's expectation of the borrower's ability to repay under the modified terms. Estimating the timing and amounts of future cash flows is highly judgmental as these cash flow projections rely upon estimates such as loss severities, asset valuations, default rates (including redefault rates on modified loans), the amounts and timing of interest or principal payments (including any expected prepayments) or other factors that are reflective of current and expected market conditions. These estimates are, in turn, dependent on factors such as the duration of current overall economic conditions, industry-, portfolio-, or borrower-specific factors, the expected outcome of insolvency proceedings as well as, in certain circumstances, other economic factors. All of these estimates and assumptions require significant management judgment and certain assumptions are highly subjective.

JPMorgan Chase & Co./2020 Form 10-K 249 Notes to consolidated financial statements Allowance for credit losses and related information The table below summarizes information about the allowances for loan losses and lending-related commitments, and includes a breakdown of loans and lending-related commitments by impairment methodology. Refer to Note 10 for further information on the allowance for credit losses on investment securities. The adoption of the CECL accounting guidance resulted in a change in the accounting for PCI loans, which are considered PCD loans. In conjunction with the adoption of CECL, the Firm reclassified risk-rated loans and lending-related commitments from the consumer, excluding credit card portfolio segment to the wholesale portfolio segment, to align with the methodology applied when determining the allowance. Prior-period amounts have been revised to conform with the current presentation. Refer to Note 1 for further information. (Table continued on next page) 2020 (e) Year ended December 31, (in millions)

Form 10-K 251 Notes to consolidated financial statements Discussion of changes in the allowance during 2020 The increase in the allowance for loan losses and lending-related commitments was primarily driven by an increase in the provision for credit losses, reflecting the deterioration in and uncertainty around the future macroeconomic environment as a result of the impact of the COVID-19 pandemic. As of December 31, 2020, the Firm's central case reflected U.S. unemployment rates of approximately 7% through the second quarter of 2021 and remaining above 5% until the second half of 2022. This compared with relatively low levels of unemployment of approximately 4% throughout 2020 and 2021 in the Firm's January 1, 2020 central case. Further, while the Firm's January 1, 2020 central case U.S. GDP forecast reflected a 1.7% expansion in 2020, actual U.S. GDP contracted approximately 2.5% in 2020. As of December 31, 2020, the Firm's central case assumptions reflect a return to pre-pandemic GDP levels in the fourth quarter of 2021. Due to elevated uncertainty in the near term outlook, driven by the potential for increased infection rates and related lock downs resulting from the pandemic, as well as the prospect that government and other consumer relief measures set to expire may not be extended, the Firm has placed significant weighting on its adverse scenarios. These scenarios incorporate more punitive macroeconomic factors than the central case assumptions, resulting in weighted average U.S. unemployment rates remaining elevated throughout 2021 and 2022, ending the fourth quarter of 2022 at approximately 6%, and in U.S. GDP ending 2022 approximately 0.9% higher than fourth quarter 2019 actual pre-pandemic levels. The Firm's central case assumptions reflected U.S. unemployment rates and U.S. real GDP as follows: Assumptions at January 1, 2020 2Q20 4Q20 (b) 2Q21 U.S. unemployment rate (a) 3.7% 3.8% 4.0% Cumulative change in U.S. real GDP from 12/31/2019 0.9% 1.7% 2.4% Assumptions at December 31, 2020 2Q21 4Q21 2Q22 U.S. unemployment rate (a) 6.8% 5.7% 5.1% Cumulative change in U.S. real GDP from 12/31/2019 (1.9)% 0.6% 2.0% (a) Reflects quarterly average of forecasted U.S. unemployment rate. (b) 4Q20 actual U.S. unemployment rate (quarterly average) was 6.8%. 4Q20 actual cumulative change in U.S. real GDP from 4Q19 was (2.5%). Subsequent changes to this forecast and related estimates will be reflected in the provision for credit losses in future periods.

252 JPMorgan Chase & Co./2020 Form 10-K Note 14 Variable interest entities Refer to Note 1 on page 167 for a further description of JPMorgan Chase's accounting policies regarding consolidation of VIEs. The following table summarizes the most significant types of Firm-sponsored VIEs by business segment. The Firm considers a sponsored VIE to include any entity where: (1) JPMorgan Chase is the primary beneficiary of the structure; (2) the VIE is used by JPMorgan Chase to securitize Firm assets; (3) the VIE issues financial instruments with the JPMorgan Chase name; or (4) the entity is a JPMorgan Chase-administered asset-backed commercial paper conduit. Line of Business Transaction Type Activity 2020 Form 10-K page references CCB Credit card securitization trusts Securitization of originated credit card receivables 253-254 Mortgage securitization trusts Servicing and securitization of both originated and purchased residential mortgages 254-256 CIB Mortgage and other securitization trusts Securitization of both originated and purchased residential and commercial mortgages, and other consumer loans 254-256 Multi-seller conduits Assist clients in accessing the financial markets in a cost-efficient manner and structures transactions to meet investor needs 256 Municipal bond vehicles Financing of municipal bond investments 256-257 The Firm's other business segments are also involved with VIEs (both third-party and Firm-sponsored), but to a lesser extent, as follows:

- Asset & Wealth Management: AWM sponsors and manages certain funds that are deemed VIEs. As asset manager of the funds, AWM earns a fee based on assets managed; the fee varies with each fund's investment objective and is competitively priced. For fund entities that qualify as VIEs, AWM's interests are, in certain cases, considered to be significant variable interests that result in consolidation of the financial results of these entities.
- Commercial Banking: CB provides financing and lending-related services to a wide spectrum of clients, including certain third-party-sponsored entities that may meet the definition of a VIE. CB does not control the activities of these entities and does not consolidate these entities. CB's maximum loss exposure, regardless of whether the entity is a VIE, is generally limited to loans and lending-related commitments which are reported and disclosed in the same manner as any other third-party transaction.
- Corporate : Corporate is involved with entities that may meet the definition of VIEs; however these entities are generally subject to specialized investment company accounting, which does not require the consolidation of investments, including VIEs. In addition, Treasury and CIO invest in securities generally issued by third parties which may meet the definition of VIEs (e.g., issuers of asset-backed securities). In general, the Firm does not have the power to direct the significant activities of these entities and therefore does not consolidate these entities. Refer to Note 10 for further information on the Firm's investment securities portfolio. In addition, CIB also invests in and provides financing and other services to VIEs sponsored by third parties. Refer to page 258 of this Note for more information on the VIEs sponsored by third parties. Significant Firm-sponsored variable interest entities Credit card securitizations CCB's Card business may securitize originated credit card loans, primarily through the Chase Issuance Trust (the Trust). The Firm's continuing involvement in credit card securitizations includes servicing the receivables, retaining an undivided seller's interest in the receivables, retaining certain senior and subordinated securities and maintaining escrow accounts. The Firm consolidates the assets and liabilities of its sponsored credit card trusts as it is considered to be the primary beneficiary of these securitization trusts based on the Firm's ability to direct the activities of these VIEs through its servicing responsibilities and other duties, including

making decisions as to the receivables that are transferred into those trusts and as to any related modifications and workouts. Additionally, the nature and extent of the Firm's other continuing involvement with the trusts, as indicated above, obligates the Firm to absorb losses and gives the Firm the right to receive certain benefits from these VIEs that could potentially be significant. The underlying securitized credit card receivables and other assets of the securitization trusts are available only for payment of the beneficial interests issued by the securitization trusts; they are not available to pay the Firm's other obligations or the claims of the Firm's creditors. The agreements with the credit card securitization trusts require the Firm to maintain a minimum undivided interest in the credit card trusts (generally 5 %). As of December 31, 2020 and 2019, the Firm held undivided interests in Firm-sponsored credit card securitization trusts of \$ 5.4 billion and \$ 5.3 billion, respectively. The Firm maintained an average undivided interest in principal receivables owned by those trusts of approximately 39 % and 50 % for the years ended December 31, 2020 and JPMorgan Chase & Co./2020 Form 10-K 253 Notes to consolidated financial statements 2019. The Firm did not retain any senior securities and retained \$ 1.5 billion and \$ 3.0 billion of subordinated securities in certain of its credit card securitization trusts as of December 31, 2020 and 2019, respectively. The Firm's undivided interests in the credit card trusts and securities retained are eliminated in consolidation. Firm-sponsored mortgage and other securitization trusts The Firm securitizes (or has securitized) originated and purchased residential mortgages, commercial mortgages and other consumer loans primarily in its CCB and CIB businesses. Depending on the particular transaction, as well as the respective business involved, the Firm may act as the servicer of the loans and/or retain certain beneficial interests in the securitization trusts. The following table presents the total unpaid principal amount of assets held in Firm-sponsored private-label securitization entities, including those in which the Firm has continuing involvement, and those that are consolidated by the Firm. Continuing involvement includes servicing the loans, holding senior interests or subordinated interests (including amounts required to be held pursuant to credit risk retention rules), recourse or guarantee arrangements, and derivative contracts. In certain instances, the Firm's only continuing involvement is servicing the loans. The Firm's maximum loss exposure from retained and purchased interests is the carrying value of these interests. Refer to Securitization activity on page 259 of this Note for further information regarding the Firm's cash flows associated with and interests retained in nonconsolidated VIEs, and pages 259-260 of this Note for information on the Firm's loan sales and securitization activity related to U.S. GSEs and government agencies.

Principal amount outstanding JPMorgan Chase interest in securitized assets in nonconsolidated VIEs (c)(d)(e) December 31, 2020 (in millions)	Total assets held by securitization VIEs	Assets held in consolidated securitization VIEs	Assets held in nonconsolidated securitization VIEs with continuing involvement	Trading assets	Investment securities	Other financial assets	Total interests held by JPMorgan Chase Securitization-related

(a) Residential mortgage: Prime/Alt-A and option ARMs \$ 60,348; \$ 2,796; \$ 48,734; \$ 535; \$ 625; \$ 1,160; Subprime 14,661; \$ 13,490; 7; \$ 80,878; 785; 773; 241; 1,799; Total \$ 186,912; \$ 2,796; \$ 143,102; \$ 1,327; \$ 1,398; \$ 241; \$ 2,966; (a) Excludes U.S. GSEs and government agency securitizations and re-securitizations, which are not Firm-sponsored. Refer to pages 259-260 of this Note for information on the Firm's loan sales and securitization activity related to U.S. GSEs and government agencies. (b) Consists of securities backed by commercial real estate loans and non-mortgage-related consumer receivables purchased from third parties. (c) Excludes the following: retained servicing (refer to Note 15 for a discussion of MSRs); securities retained from loan sales and securitization activity related to U.S. GSEs and government agencies; interest rate and foreign exchange derivatives primarily used to manage interest rate and foreign exchange risks of securitization entities (refer to Note 5 for further information on derivatives); senior and subordinated securities of \$ 105 million and \$ 40 million, respectively, at December 31, 2020, and \$ 106 million and \$ 94 million, respectively, at December 31, 2019, which the Firm purchased in connection with CIB's secondary market-making activities. (d) Includes interests held in re-securitization transactions. (e) As of December 31, 2020 and 2019, 73 % and 63 %, respectively, of the Firm's retained securitization interests, which are predominantly carried at fair value and include amounts required to be held pursuant to credit risk retention rules, were risk-rated A or better, on an S&P-equivalent basis. The retained interests in prime residential mortgages consisted of \$ 1.3 billion and \$ 1.1 billion of investment-grade retained interests, and \$ 41 million and \$ 72 million of noninvestment-grade retained interests at December 31,							

2020 and 2019, respectively. The retained interests in commercial and other securitization trusts consisted of \$ 2.0 billion and \$ 1.2 billion of investment-grade retained interests, and \$ 753 million and \$ 575 million of noninvestment-grade retained interests at December 31, 2020 and 2019, respectively.

254 JPMorgan Chase & Co./2020 Form 10-K Residential mortgage The Firm securitizes residential mortgage loans originated by CCB, as well as residential mortgage loans purchased from third parties by either CCB or CIB. CCB generally retains servicing for all residential mortgage loans it originated or purchased, and for certain mortgage loans purchased by CIB. For securitizations of loans serviced by CCB, the Firm has the power to direct the significant activities of the VIE because it is responsible for decisions related to loan modifications and workouts. CCB may also retain an interest upon securitization. In addition, CIB engages in underwriting and trading activities involving securities issued by Firm-sponsored securitization trusts. As a result, CIB at times retains senior and/or subordinated interests (including residual interests and amounts required to be held pursuant to credit risk retention rules) in residential mortgage securitizations at the time of securitization, and/or reacquires positions in the secondary market in the normal course of business. In certain instances, as a result of the positions retained or reacquired by CIB or held by Treasury and CIO or CCB, when considered together with the servicing arrangements entered into by CCB, the Firm is deemed to be the primary beneficiary of certain securitization trusts. Refer to the table on page 257 of this Note for more information on consolidated residential mortgage securitizations. The Firm does not consolidate residential mortgage securitizations (Firm-sponsored or third-party-sponsored) when it is not the servicer (and therefore does not have the power to direct the most significant activities of the trust) or does not hold a beneficial interest in the trust that could potentially be significant to the trust. Refer to the table on page 257 of this Note for more information on the consolidated residential mortgage securitizations, and the table on the previous page of this Note for further information on interests held in nonconsolidated residential mortgage securitizations. Commercial mortgages and other consumer securitizations CIB originates and securitizes commercial mortgage loans, and engages in underwriting and trading activities involving the securities issued by securitization trusts. CIB may retain unsold senior and/or subordinated interests (including amounts required to be held pursuant to credit risk retention rules) in commercial mortgage securitizations at the time of securitization but, generally, the Firm does not service commercial loan securitizations. Treasury and CIO may choose to invest in these securitizations as well. For commercial mortgage securitizations the power to direct the significant activities of the VIE generally is held by the servicer or investors in a specified class of securities (controlling class). The Firm generally does not retain an interest in the controlling class in its sponsored commercial mortgage securitization transactions. Refer to the table on page 257 of this Note for more information on the consolidated commercial mortgage securitizations, and the table on the previous page of this Note for further information on interests held in nonconsolidated securitizations.

Re-securitizations The Firm engages in certain re-securitization transactions in which debt securities are transferred to a VIE in exchange for new beneficial interests. These transfers occur in connection with both U.S. GSEs and government agency sponsored VIEs, which are backed by residential mortgages. The Firm's consolidation analysis is largely dependent on the Firm's role and interest in the re-securitization trusts. The following table presents the principal amount of securities transferred to re-securitization VIEs. Year ended December 31, (in millions)

	2020	2019	2018
Transfers of securities to VIEs U.S. GSEs and government agencies	\$ 46,123	\$ 25,852	\$ 15,532

Most re-securitizations with which the Firm is involved are client-driven transactions in which a specific client or group of clients is seeking a specific return or risk profile. For these transactions, the Firm has concluded that the decision-making power of the entity is shared between the Firm and its clients, considering the joint effort and decisions in establishing the re-securitization trust and its assets, as well as the significant economic interest the client holds in the re-securitization trust; therefore the Firm does not consolidate the re-securitization VIE. The Firm did not transfer any private label securities to re-securitization VIEs during 2020, 2019 and 2018, respectively, and retained interests in any such Firm-sponsored VIEs as of December 31, 2020 and 2019 were immaterial. Additionally, the Firm may invest in beneficial interests of third-party-sponsored re-securitizations and generally purchases these interests in the secondary market. In these circumstances, the Firm does not have the unilateral ability to direct the most significant activities of the re-securitization trust, either because it was not involved in the initial design of the trust, or the Firm is involved with an independent third-party sponsor and demonstrates shared power over the creation of the trust; therefore, the Firm does not consolidate the re-securitization VIE.

JPMorgan Chase & Co./2020 Form 10-K 255 Notes to consolidated financial statements The following table presents information on the Firm's interests in nonconsolidated re-securitization VIEs. Nonconsolidated re-securitization VIEs December 31, (in millions)

	2020	2019
U.S. GSEs and government agencies Interest in VIEs	\$ 2,631	\$ 2,928

As of December 31, 2020 and 2019, the Firm did not consolidate any U.S. GSE and government agency re-securitization VIEs or any Firm-sponsored private-label re-securitization VIEs.

Multi-seller conduits Multi-seller conduit entities are separate bankruptcy remote entities that provide secured financing, collateralized by pools of receivables and other financial assets, to customers of the Firm. The conduits fund their financing facilities through the issuance of highly rated commercial paper. The primary source of repayment of the commercial paper is the cash flows from the pools of assets. In most instances, the assets are structured with deal-specific credit enhancements provided to the conduits by the customers (i.e., sellers) or other third parties.

Deal-specific credit enhancements are generally structured to cover a multiple of historical losses expected on the pool of assets, and are typically in the form of overcollateralization provided by the seller. The deal-specific credit enhancements mitigate the Firm's potential losses on its agreements with the conduits. To ensure timely repayment of the commercial paper, and to provide the conduits with funding to provide financing to customers in the event that the conduits do not obtain funding in the commercial paper market, each asset pool financed by the conduits has a minimum 100% deal-specific liquidity facility associated with it provided by JPMorgan Chase Bank, N.A. JPMorgan Chase Bank, N.A. also provides the multi-seller conduit vehicles with uncommitted program-wide liquidity facilities and program-wide credit enhancement in the form of standby letters of credit. The amount of program-wide credit enhancement required is based upon commercial paper issuance and approximates 10 % of the outstanding balance of commercial paper. The Firm consolidates its Firm-administered multi-seller conduits, as the Firm has both the power to direct the significant activities of the conduits and a potentially significant economic interest in the conduits. As administrative agent and in its role in structuring transactions, the Firm makes decisions regarding asset types and credit quality, and manages the commercial paper funding needs of the conduits. The Firm's interests that could potentially be significant to the VIEs include the fees received as administrative agent and liquidity and program-wide credit enhancement provider, as well as the potential exposure created by the liquidity and credit enhancement facilities provided to the conduits. Refer to page 257 of this Note for further information on consolidated VIE assets and liabilities. In the normal course of business, JPMorgan Chase makes markets in and invests in commercial paper issued by the Firm-administered multi-seller conduits. The Firm held \$ 13.5 billion and \$ 16.3 billion of the commercial paper issued by the Firm-administered multi-seller conduits at December 31, 2020 and 2019, respectively, which have been eliminated in consolidation. The Firm's investments reflect the Firm's funding needs and capacity and were not driven by market illiquidity. Other than the amounts required to be held pursuant to credit risk retention rules, the Firm is not obligated under any agreement to purchase the commercial paper issued by the Firm-administered multi-seller conduits. Deal-specific liquidity facilities, program-wide liquidity and credit enhancement provided by the Firm have been eliminated in consolidation. The Firm or the Firm-administered multi-seller conduits provide lending-related commitments to certain clients of the Firm-administered multi-seller conduits. The unfunded commitments were \$ 12.2 billion and \$ 8.9 billion at December 31, 2020 and 2019, respectively, and are reported as off-balance sheet lending-related commitments in other unfunded commitments to extend credit. Refer to Note 28 for more information on off-balance sheet lending-related commitments. Municipal bond vehicles Municipal bond vehicles or tender option bond (TOB) trusts allow institutions to finance their municipal bond investments at short-term rates. In a typical TOB transaction, the trust purchases highly rated municipal bond(s) of a single issuer and funds the purchase by issuing two types of securities: (1) puttable floating-rate certificates (floaters) and (2) inverse floating-rate residual interests (residuals). The floaters are typically purchased by money market funds or other short-term investors and may be tendered, with requisite notice, to the TOB trust. The residuals are retained by the investor seeking to finance its municipal bond investment. TOB transactions where the residual is held by a third-party investor are typically known as customer TOB trusts, and non-customer TOB trusts are transactions where the Residual is retained by the Firm. Customer TOB trusts are sponsored by a third party; refer to page 258 of this Note for further information. The Firm serves as sponsor for all non-customer TOB transactions. The Firm may provide various services to a TOB trust, including remarketing agent, liquidity or tender option provider, and/or sponsor. J.P. Morgan Securities LLC may serve as a remarketing agent on the floaters for TOB trusts. The remarketing agent is responsible for establishing the periodic variable rate on the floaters, conducting the initial placement and remarketing tendered floaters. The remarketing agent may, but is not obligated to, make markets in floaters. Floaters held by the Firm were not material during 2020 and 2019. JPMorgan Chase Bank, N.A. or J.P. Morgan Securities LLC often serves as the sole liquidity or tender option provider for the TOB trusts. The liquidity provider's obligation to 256 JPMorgan Chase & Co./2020 Form 10-K perform is conditional and is limited by certain events (Termination Events), which include bankruptcy or failure to pay by the municipal bond issuer or credit enhancement provider, an event of taxability on the municipal bonds or the immediate downgrade of the municipal bond to below investment grade. In addition, the liquidity provider's exposure is typically further limited by the high credit quality of the underlying municipal bonds, the excess collateralization in the vehicle, or, in certain transactions, the reimbursement agreements with the Residual holders. Holders of the floaters may put, or tender, their floaters to the TOB trust. If the remarketing agent cannot successfully remarket the floaters to another investor, the liquidity provider either provides a loan to the TOB trust for the TOB trust's purchase of the floaters, or it directly purchases the tendered floaters. TOB trusts are considered to be variable interest entities. The Firm consolidates non-customer TOB trusts because as the Residual holder, the Firm has the right to make decisions that significantly impact the economic performance of the municipal bond vehicle, and it has the right to receive benefits and bear losses that could potentially be significant to the municipal bond vehicle.

Consolidated VIE assets and liabilities The following table presents information on assets and liabilities related to VIEs consolidated by the Firm as of December 31, 2020 and 2019. Assets Liabilities December 31, 2020 (in millions)

	Trading assets	Loans	Other (b)	Total assets	(c)	Beneficial interests in VIE assets	(d)	Other	(e)	Total liabilities	VIE

(b) Includes assets classified as cash and other assets on the Consolidated balance sheets. (c) The assets of the consolidated VIEs included in the program types above are used to settle the liabilities of those entities. The assets and liabilities include third-party assets and liabilities of consolidated VIEs and exclude intercompany balances that eliminate in consolidation. (d) The interest-bearing beneficial interest liabilities issued by consolidated VIEs are classified in the line item on the Consolidated balance sheets titled, Beneficial interests issued by consolidated variable interest entities. The holders of these beneficial interests generally do not have recourse to the general credit of JPMorgan Chase. Included in beneficial interests in VIE assets are long-term beneficial interests of \$ 5.2 billion and \$ 6.7 billion at December 31, 2020 and 2019, respectively. Refer to Note 20 for additional information on interest-bearing long-term beneficial interests. (e) Includes liabilities classified as accounts payable and other liabilities on the Consolidated balance sheets. JPMorgan Chase & Co./2020 Form 10-K 257 Notes to consolidated financial statements VIEs sponsored by third parties The Firm enters into transactions with VIEs structured by other parties. These include, for example, acting as a derivative counterparty, liquidity provider, investor, underwriter, placement agent, remarketing agent, trustee or custodian. These transactions are conducted at arm's-length, and individual credit decisions are based on the analysis of the specific VIE, taking into consideration the quality of the underlying assets. Where the Firm does not have the power to direct the activities of the VIE that most significantly impact the VIE's economic performance, or a variable interest that could potentially be significant, the Firm generally does not consolidate the VIE, but it records and reports these positions on its Consolidated balance sheets in the same manner it would record and report positions in respect of any other third-party transaction. Tax credit vehicles The Firm holds investments in unconsolidated tax credit vehicles, which are limited partnerships and similar entities that own and operate affordable housing, energy, and other projects. These entities are primarily considered VIEs. A third party is typically the general partner or managing member and has control over the significant activities of the tax credit vehicles, and accordingly the Firm does not consolidate tax credit vehicles. The Firm generally invests in these partnerships as a limited partner and earns a return primarily through the receipt of tax credits allocated to the projects. The maximum loss exposure, represented by equity investments and funding commitments, was \$ 24.9 billion and \$ 19.1 billion, of which \$ 8.7 billion and \$ 5.5 billion was unfunded at December 31, 2020 and 2019, respectively. In order to reduce the risk of loss, the Firm assesses each project and withholds varying amounts of its capital investment until the project qualifies for tax credits. Refer to Note 25 for further information on affordable housing tax credits. Refer to Note 28 for more information on off-balance sheet lending-related commitments. Customer municipal bond vehicles (TOB trusts) The Firm may provide various services to customer TOB trusts, including remarketing agent, liquidity or tender option provider. In certain customer TOB transactions, the Firm, as liquidity provider, has entered into a reimbursement agreement with the Residual holder. In those transactions, upon the termination of the vehicle, the Firm has recourse to the third-party Residual holders for any shortfall. The Firm does not have any intent to protect Residual holders from potential losses on any of the underlying municipal bonds. The Firm does not consolidate customer TOB trusts, since the Firm does not have the power to make decisions that significantly impact the economic performance of the municipal bond vehicle. The Firm's maximum exposure as a liquidity provider to customer TOB trusts at December 31, 2020 and 2019, was \$ 6.7 billion and \$ 5.5 billion, respectively. The fair value of assets held by such VIEs at December 31, 2020 and 2019 was \$ 10.5 billion and \$ 8.6 billion, respectively. Refer to Note 28 for more information on off-balance sheet lending-related commitments. Loan securitizations The Firm has securitized and sold a variety of loans, including residential mortgage, credit card, and commercial mortgage. The purposes of these securitization transactions were to satisfy investor demand and to generate liquidity for the Firm. For loan securitizations in which the Firm is not required to consolidate the trust, the Firm records the transfer of the loan receivable to the trust as a sale when all of the following accounting criteria for a sale are met: (1) the transferred financial assets are legally isolated from the Firm's creditors; (2) the transferee or beneficial interest holder can pledge or exchange the

transferred financial assets; and (3) the Firm does not maintain effective control over the transferred financial assets (e.g., the Firm cannot repurchase the transferred assets before their maturity and it does not have the ability to unilaterally cause the holder to return the transferred assets). For loan securitizations accounted for as a sale, the Firm recognizes a gain or loss based on the difference between the value of proceeds received (including cash, beneficial interests, or servicing assets received) and the carrying value of the assets sold. Gains and losses on securitizations are reported in noninterest revenue.

258 JPMorgan Chase & Co./2020 Form 10-K

Securitization activity The following table provides information related to the Firm's securitization activities for the years ended December 31, 2020, 2019 and 2018, related to assets held in Firm-sponsored securitization entities that were not consolidated by the Firm, and where sale accounting was achieved at the time of the securitization.

	2020	2019	2018
Year ended December 31, (in millions)			
Residential mortgage (d) Commercial and other (e)	Residential mortgage (d) Commercial and other (e)	Residential mortgage (d) Commercial and other (e)	Residential mortgage (d) Commercial and other (e)
Principal securitized	\$ 7,103	\$ 6,624	\$ 9,957
	\$ 6,431	\$ 10,159	\$ 9,390
All cash flows during the period:			
(a) Proceeds received from loan sales as financial instruments	\$ 7,321	\$ 6,865	\$ 10,238
(b)(c)	\$ 6,865	\$ 10,238	\$ 9,544
Servicing fees collected	211	1	287
	2	319	2
Cash flows received on interests	801	239	507
	237	411	301
(a) Excludes re-securitization transactions.			
(b) Predominantly includes Level 2 assets.			
(c) The carrying value of the loans accounted for at fair value approximated the proceeds received upon loan sale.			
(d) Represents prime mortgages. Excludes loan securitization activity related to U.S. GSEs and government agencies.			
(e) Includes commercial mortgage and other consumer loans.			

Key assumptions used to value retained interests originated during the year are shown in the table below.

	Year ended December 31, 2020	2019	2018
Residential mortgage retained interest:			
Weighted-average life (in years)	4.7	4.8	7.6
Weighted-average discount rate	8.2 %	7.4 %	3.6 %
Commercial mortgage retained interest:			
Weighted-average life (in years)	6.9	6.4	5.3
Weighted-average discount rate	3.0 %	4.1 %	4.0 %

Loans and excess MSR sold to U.S. government-sponsored enterprises and loans in securitization transactions pursuant to Ginnie Mae guidelines In addition to the amounts reported in the securitization activity tables above, the Firm, in the normal course of business, sells originated and purchased mortgage loans and certain originated excess MSRs on a nonrecourse basis, predominantly to U.S. GSEs. These loans and excess MSRs are sold primarily for the purpose of securitization by the U.S. GSEs, who provide certain guarantee provisions (e.g., credit enhancement of the loans). The Firm also sells loans into securitization transactions pursuant to Ginnie Mae guidelines; these loans are typically insured or guaranteed by another U.S. government agency. The Firm does not consolidate the securitization vehicles underlying these transactions as it is not the primary beneficiary. For a limited number of loan sales, the Firm is obligated to share a portion of the credit risk associated with the sold loans with the purchaser. Refer to Note 28 for additional information about the Firm's loan sales- and securitization-related indemnifications. Refer to Note 15 for additional information about the impact of the Firm's sale of certain excess MSRs.

JPMorgan Chase & Co./2020 Form 10-K

259 Notes to consolidated financial statements The following table summarizes the activities related to loans sold to the U.S. GSEs, and loans in securitization transactions pursuant to Ginnie Mae guidelines.

	Year ended December 31, 2020	2019	2018
Carrying value of loans sold	\$ 81,153	\$ 92,349	\$ 44,609
Proceeds received from loan sales as cash	\$ 45	\$ 73	\$ 9
Proceeds from loan sales as securities	(a)(b) 80,186	91,422	43,671
Total proceeds received from loan sales	(c) \$ 80,231	\$ 91,495	\$ 43,680
Gains/(losses) on loan sales	(d)(e) \$ 6	\$ 499	\$ (93)
(a) Includes securities from U.S. GSEs and Ginnie Mae that are generally sold shortly after receipt or retained as part of the Firm's investment securities portfolio.			
(b) Included in level 2 assets.			
(c) Excludes the value of MSRs retained upon the sale of loans.			
(d) Gains/(losses) on loan sales include the value of MSRs.			
(e) The carrying value of the loans accounted for at fair value approximated the proceeds received upon loan sale.			

Options to repurchase delinquent loans In addition to the Firm's obligation to repurchase certain loans due to material breaches of representations and warranties as discussed in Note 28, the Firm also has the option to repurchase delinquent loans that it services for Ginnie Mae loan pools, as well as for other U.S. government agencies under certain arrangements. The Firm typically elects to repurchase delinquent loans from Ginnie Mae loan pools as it continues to service them and/or manage the foreclosure process in accordance with the applicable requirements, and such loans continue to be insured or guaranteed. When the Firm's repurchase option becomes exercisable, such loans must be reported on the Consolidated balance sheets as a loan with a corresponding liability. Refer to Note 12 for additional information.

The following table presents loans the Firm repurchased or had an option to repurchase, real estate owned, and foreclosed government-guaranteed residential mortgage loans recognized on the Firm's Consolidated balance sheets as of December 31, 2020 and 2019. Substantially all of these loans and real estate are insured or guaranteed by U.S. government agencies.

	December 31, 2020	2019
Loans repurchased or option to repurchase	(a) \$ 1,413	\$ 2,941
Real estate owned	9	41
Foreclosed government-guaranteed residential mortgage loans	(b) 64	198
(a) Predominantly all of these amounts relate to loans that have been repurchased from Ginnie Mae loan pools.		
(b) Relates to voluntary repurchases of loans, which are included in accrued interest and accounts receivable.

JPMorgan Chase & Co./2020 Form 10-K 275 Notes to consolidated financial statements The following table presents the pre-tax and after-tax changes in the components of OCI. 2020 2019 2018 Year ended December 31, (in millions) Pre-tax Tax effect After-tax Pre-tax Tax effect After-tax Unrealized gains/(losses) on investment securities: Net unrealized gains/(losses) arising during the period \$ 6,228; \$ (1,495); \$ 4,733; \$ 4,025; \$ (974); \$ 3,051; \$ (2,825); \$ 665; \$ (2,160); Reclassification adjustment for realized (gains)/losses included in net income (a) (802); 192; (610); (258); 62; (196); 395; (93); 302; Net change 5,426; (1,303); 4,123; 3,767; (912); 2,855; (2,430); 572; (1,858); Translation adjustments (b) : Translation 1,407; (103); 1,304; (49); 33; (16); (1,078); 156; (922); Hedges (1,411); 341; (1,070); 46; (10); 36; 1,236; (294); 942; Net change (4); 238; 234; (3); 23; 20; 158; (138); 20; Fair value hedges, net change (c) : 25; (6); 19; 39; (9); 30; (140); 33; (107); Cash flow hedges: Net unrealized gains/(losses) arising during the period 3,623; (870); 2,753; 122; (28); 94; (245); 58; (187); Reclassification adjustment for realized (gains)/losses included in net income (d) (570); 137; (433); 103; (25); 78; (18); 4; (14); Net change 3,053; (733); 2,320; 225; (53); 172; (263); 62; (201); Defined benefit pension and OPEB plans, net change: 214; (2); 212; 1,157; (193); 964; (450); 77; (373); DVA on fair value option elected liabilities, net change: \$ (648); \$ 157; \$ (491); \$ (1,264); \$ 299; \$ (965); \$ 1,364; \$ (321); \$ 1,043; Total other comprehensive income/(loss) \$ 8,066; \$ (1,649); \$ 6,417; \$ 3,921; \$ (845); \$ 3,076; \$ (1,761); \$ 285; \$ (1,476); (a) The pre-tax amount is reported in Investment securities gains/(losses) in the Consolidated statements of income. (b) Reclassifications of pre-tax realized gains/(losses) on translation adjustments and related hedges are reported in other income/expense in the Consolidated statements of income. During the year ended December 31, 2020, the Firm reclassified a net pre-tax gain of \$ 6 million to other income related to the liquidation of legal entities, \$ 3 million related to net investment hedge gains and \$ 3 million related to cumulative translation adjustments. During the year ended December 31, 2019, the Firm reclassified net pre-tax gains of \$ 7 million to other income and \$ 1 million to other expense, respectively. These amounts, which related to the liquidation of certain legal entities, are comprised of \$ 18 million related to net investment hedge gains and \$ 10 million related to cumulative translation adjustments. During the year ended December 31, 2018, the Firm reclassified a net pre-tax loss of \$ 168 million to other expense related to the liquidation of certain legal entities, \$ 17 million related to net investment hedge losses and \$ 151 million related to cumulative translation adjustments. (c) Represents changes in fair value of cross-currency swaps

attributable to changes in cross-currency basis spreads, which are excluded from the assessment of hedge effectiveness and recorded in other comprehensive income. The initial cost of cross-currency basis spreads is recognized in earnings as part of the accrual of interest on the cross-currency swap. (d) The pre-tax amounts are primarily recorded in noninterest revenue, net interest income and compensation expense in the Consolidated statements of income. 276 JPMorgan Chase & Co./2020 Form 10-K Note 25

Income taxes JPMorgan Chase and its eligible subsidiaries file a consolidated U.S. federal income tax return. JPMorgan Chase uses the asset and liability method to provide income taxes on all transactions recorded in the Consolidated Financial Statements. This method requires that income taxes reflect the expected future tax consequences of temporary differences between the carrying amounts of assets or liabilities for book and tax purposes. Accordingly, a deferred tax asset or liability for each temporary difference is determined based on the tax rates that the Firm expects to be in effect when the underlying items of income and expense are realized. JPMorgan Chase's expense for income taxes includes the current and deferred portions of that expense. A valuation allowance is established to reduce deferred tax assets to the amount the Firm expects to realize. Due to the inherent complexities arising from the nature of the Firm's businesses, and from conducting business and being taxed in a substantial number of jurisdictions, significant judgments and estimates are required to be made. Agreement of tax liabilities between JPMorgan Chase and the many tax jurisdictions in which the Firm files tax returns may not be finalized for several years. Thus, the Firm's final tax-related assets and liabilities may ultimately be different from those currently reported. Effective tax rate and expense The following table presents a reconciliation of the applicable statutory U.S. federal income tax rate to the effective tax rate. Effective tax rate Year ended December 31, 2020 2019 2018

Statutory U.S. federal tax rate	21.0 %	21.0 %	21.0 %
Increase/(decrease) in tax rate resulting from:			
U.S. state and local income taxes, net of U.S. federal income tax benefit	2.5	3.5	4.0
Tax-exempt income	(1.6)	(1.4)	(1.5)
Non-U.S. earnings	1.4	1.8	0.6
Business tax credits	(6.3)	(4.4)	(3.5)
Tax audit resolutions		(2.3)	(0.1)
Impact of the TCJA (a)			
Other, net	0.7	0.5	0.5
Effective tax rate	17.7 %	18.2 %	20.3 %

(a) Represents changes in the estimates related to the remeasurement of certain deferred taxes and the deemed repatriation tax on non-U.S. earnings under SEC Staff Accounting Bulletin No. 118 which was completed in 2018. The following table reflects the components of income tax expense/(benefit) included in the Consolidated statements of income. Income tax expense/(benefit) Year ended December 31, (in millions) 2020 2019 2018

Current income tax expense/(benefit)	U.S. federal	\$ 5,759	\$ 3,284	\$ 2,854
Non-U.S.	2,705	2,103	2,077	
U.S. state and local	1,793	1,778	1,638	
Total current income tax expense/(benefit)	10,257	7,165	6,569	
Deferred income tax expense/(benefit)	U.S. federal	(3,184)	709	1,359
Non-U.S.	(126)	20	(93)	
U.S. state and local	(671)	220	455	
Total deferred income tax expense/(benefit)	(3,981)	949	1,721	
Total income tax expense	\$ 6,276	\$ 8,114	\$ 8,290	

Total income tax expense includes \$ 72 million, \$ 1.1 billion and \$ 54 million of tax benefits recorded in 2020, 2019, and 2018, respectively, resulting from the resolution of tax audits. Tax effect of items recorded in stockholders' equity The preceding table does not reflect the tax effect of certain items that are recorded each period directly in stockholders' equity. The tax effect of all items recorded directly to stockholders' equity resulted in a decrease of \$ 827 million and \$ 862 million in 2020 and 2019, respectively, and an increase of \$ 172 million in 2018. Results from Non-U.S. earnings The following table presents the U.S. and non-U.S. components of income before income tax expense. Year ended December 31, (in millions) 2020 2019 2018

U.S.	\$ 26,904	\$ 36,670	\$ 33,052
Non-U.S.	(a) 8,503	7,875	7,712
Income before income tax expense	\$ 35,407	\$ 44,545	\$ 40,764

(a) For purposes of this table, non-U.S. income is defined as income generated from operations located outside the U.S. The Firm will recognize any U.S. income tax expense it may incur on global intangible low tax income as income tax expense in the period in which the tax is incurred. JPMorgan Chase & Co./2020 Form 10-K 277

Notes to consolidated financial statements Affordable housing tax credits The Firm recognized \$ 1.5 billion of tax credits and other tax benefits associated with investments in affordable housing projects within income tax expense for each of the three years ended 2020, 2019 and 2018. The amount of amortization of such investments reported in income tax expense was \$ 1.2 billion, \$ 1.1 billion and \$ 1.2 billion, respectively. The carrying value of these investments, which are reported in other assets on the Firm's Consolidated balance sheets, was \$ 9.7 billion and \$ 8.6 billion at December 31, 2020 and 2019, respectively. The amount of commitments related to these investments, which are reported in accounts payable and other liabilities on the Firm's Consolidated balance sheets, was \$ 3.8 billion and \$ 2.8 billion at December 31, 2020 and 2019, respectively. Deferred taxes Deferred income tax expense/(benefit) results from differences between assets and liabilities measured for financial reporting purposes versus income tax return purposes. Deferred tax assets are recognized if, in management's judgment, their realizability is determined to be more likely than not. If a deferred tax asset is determined to be unrealizable, a valuation allowance is established. The significant components of deferred tax assets and liabilities are reflected in the following table. December 31, (in millions) 2020 2019

Deferred tax assets	Allowance for loan losses	\$ 7,270	\$ 3,400
Employee benefits	1,104	1,039	
Accrued expenses and other	3,332	2,767	

Non-U.S. operations 849 949 Tax attribute carryforwards 757 605 Gross deferred tax assets 13,312 8,760 Valuation allowance (560) (557) Deferred tax assets, net of valuation allowance \$ 12,752 \$ 8,203 Deferred tax liabilities Depreciation and amortization \$ 3,329 \$ 2,852 Mortgage servicing rights, net of hedges 2,184 2,354 Leasing transactions 5,124 5,598 Other, net 6,025 4,683 Gross deferred tax liabilities 16,662 15,487 Net deferred tax (liabilities)/assets \$ (3,910) \$ (7,284) JPMorgan Chase has recorded deferred tax assets of \$ 757 million at December 31, 2020, in connection with U.S. federal and non-U.S. NOL carryforwards, FTC carryforwards, and state and local capital loss carryforwards. At December 31, 2020, total U.S. federal NOL carryforwards were \$ 799 million, non-U.S. NOL carryforwards were \$ 139 million, FTC carryforwards were \$ 444 million, state and local capital loss carryforwards were \$ 1.1 billion, and other federal tax attributes were \$ 393 million. If not utilized, a portion of the U.S. federal NOL carryforwards and other U.S. federal tax attributes will expire between 2022 and 2037 whereas others have an unlimited carryforward period. Similarly, certain non-U.S. NOL carryforwards will expire between 2026 and 2036 whereas others have an unlimited carryforward period. The FTC carryforwards will expire between 2029 and 2030, and the state and local capital loss carryforwards will expire between 2021 and 2022. The valuation allowance at December 31, 2020, was due to the state and local capital loss carryforwards, FTC carryforwards, and certain non-U.S. deferred tax assets, including NOL carryforwards. Unrecognized tax benefits At December 31, 2020, 2019 and 2018, JPMorgan Chase’s unrecognized tax benefits, excluding related interest expense and penalties, were \$ 4.3 billion, \$ 4.0 billion and \$ 4.9 billion, respectively, of which \$ 3.1 billion, \$ 2.8 billion and \$ 3.8 billion, respectively, if recognized, would reduce the annual effective tax rate. Included in the amount of unrecognized tax benefits are certain items that would not affect the effective tax rate if they were recognized in the Consolidated statements of income. These unrecognized items include the tax effect of certain temporary differences, the portion of gross state and local unrecognized tax benefits that would be offset by the benefit from associated U.S. federal income tax deductions, and the portion of gross non-U.S. unrecognized tax benefits that would have offsets in other jurisdictions. JPMorgan Chase is presently under audit by a number of taxing authorities, most notably by the Internal Revenue Service as summarized in the Tax examination status table below. As JPMorgan Chase is presently under audit by a number of taxing authorities, it is reasonably possible that over the next 12 months the resolution of these examinations may increase or decrease the gross balance of unrecognized tax benefits by as much as approximately \$ 300 million. Upon settlement of an audit, the change in the unrecognized tax benefit would result from payment or income statement recognition. The following table presents a reconciliation of the beginning and ending amount of unrecognized tax benefits. Year ended December 31, (in millions) 2020 2019 2018 Balance at January 1, \$ 4,024 \$ 4,861 \$ 4,747 Increases based on tax positions related to the current period 685 871 980 Increases based on tax positions related to prior periods 362 10 649 Decreases based on tax positions related to prior periods (705) (706) (1,249) Decreases related to cash settlements with taxing authorities (116) (1,012) (266) Balance at December 31, \$ 4,250 \$ 4,024 \$ 4,861 After-tax interest expense/(benefit) and penalties related to income tax liabilities recognized in income tax expense were \$ 147 million, \$(52) million and \$ 192 million in 2020, 2019 and 2018, respectively. At December 31, 2020 and 2019, in addition to the liability for unrecognized tax benefits, the Firm had accrued \$ 966 million and \$ 817 million, respectively, for income tax-related interest and penalties. 278 JPMorgan Chase & Co./2020 Form 10-K Tax examination status JPMorgan Chase is continually under examination by the Internal Revenue Service, by taxing authorities throughout the world, and by many state and local jurisdictions throughout the U.S. The following table summarizes the status of significant income tax examinations of JPMorgan Chase and its consolidated subsidiaries as of December 31, 2020. Periods under examination Status JPMorgan Chase – U.S. 2009 – 2013 Field examination of amended returns JPMorgan Chase – U.S. 2014 - 2016 Field Examination JPMorgan Chase – New York State 2012 - 2014 Field Examination JPMorgan Chase – New York City 2012 - 2014 Field Examination JPMorgan Chase – California 2011 – 2012 Field Examination JPMorgan Chase – U.K. 2006 – 2018 Field examination of certain select entities JPMorgan Chase & Co./2020 Form 10-K 279 Notes to consolidated financial statements Note 26 – Restricted cash, other restricted assets and intercompany funds transfers Restricted cash and other restricted assets Certain of the Firm’s cash and other assets are restricted as to withdrawal or usage. These restrictions are imposed by various regulatory authorities based on the particular activities of the Firm’s subsidiaries. The business of JPMorgan Chase Bank, N.A. is subject to examination and regulation by the OCC. The Bank is a member of the U.S. Federal Reserve System, and its deposits in the U.S. are insured by the FDIC, subject to applicable limits. The Firm is required to maintain cash reserves at certain non-US central banks. The Firm is also subject to rules and regulations established by other U.S. and non U.S. regulators. As part of its compliance with the respective regulatory requirements, the Firm’s broker-dealers (principally J.P. Morgan Securities LLC in the U.S and J.P. Morgan Securities plc in the U.K.) are subject to certain restrictions on cash and other assets. The following table presents the components of the Firm’s restricted cash: December 31, (in billions) 2020 2019 Cash reserves – Federal Reserve Banks (a) \$ — \$ 26.6 Segregated for the benefit of securities and cleared derivative customers 19.3 16.0 Cash reserves at non-U.S. central

banks and held for other general purposes 5.1 %; 3.9 %; Total restricted cash (b) \$ 24.4 %; \$ 46.5 %; (a) Effective March 26, 2020, the Federal Reserve eliminated reserve requirements for depository institutions (b) Comprises \$ 22.7 billion and \$ 45.3 billion in deposits with banks, and \$ 1.7 billion and \$ 1.2 billion in cash and due from banks on the Consolidated balance sheets as of December 31, 2020 and 2019, respectively. Also, as of December 31, 2020 and 2019, the Firm had the following other restricted assets: Cash and securities pledged with clearing organizations for the benefit of customers of \$ 37.2 billion and \$ 24.7 billion, respectively. Securities with a fair value of \$ 1.3 billion and \$ 8.8 billion, respectively, were also restricted in relation to customer activity. Intercompany funds transfers Restrictions imposed by U.S. federal law prohibit JPMorgan Chase & Co. (Parent Company) and certain of its affiliates from borrowing from banking subsidiaries unless the loans are secured in specified amounts. Such secured loans provided by any banking subsidiary to the Parent Company or to any particular affiliate, together with certain other transactions with such affiliate (collectively referred to as covered transactions), are generally limited to 10 % of the banking subsidiary's total capital, as determined by the risk-based capital guidelines; the aggregate amount of covered transactions between any banking subsidiary and all of its affiliates is limited to 20 % of the banking subsidiary's total capital. The Parent Company's two principal subsidiaries are JPMorgan Chase Bank, N.A. and JPMorgan Chase Holdings LLC, an intermediate holding company (the IHC”). The IHC holds the stock of substantially all of JPMorgan Chase's subsidiaries other than JPMorgan Chase Bank, N.A. and its subsidiaries. The IHC also owns other assets and owes intercompany indebtedness to the holding company. The Parent Company is obligated to contribute to the IHC substantially all the net proceeds received from securities issuances (including issuances of senior and subordinated debt securities and of preferred and common stock). The principal sources of income and funding for the Parent Company are dividends from JPMorgan Chase Bank, N.A. and dividends and extensions of credit from the IHC. In addition to dividend restrictions set forth in statutes and regulations, the Federal Reserve, the OCC and the FDIC have authority under the Financial Institutions Supervisory Act to prohibit or to limit the payment of dividends by the banking organizations they supervise, including the Parent Company and its subsidiaries that are banks or bank holding companies, if, in the banking regulator's opinion, payment of a dividend would constitute an unsafe or unsound practice in light of the financial condition of the banking organization. The IHC is prohibited from paying dividends or extending credit to the Parent Company if certain capital or liquidity thresholds are breached or if limits are otherwise imposed by the Parent Company's management or Board of Directors. At January 1, 2021, the Parent Company's banking subsidiaries could pay, in the aggregate, approximately \$ 13 billion in dividends to their respective bank holding companies without the prior approval of their relevant banking regulators. The capacity to pay dividends in 2021 will be supplemented by the banking subsidiaries' earnings during the year. 280 JPMorgan Chase & Co./2020 Form 10-K Note 27 Regulatory capital The Federal Reserve establishes capital requirements, including well-capitalized standards, for the consolidated financial holding company. The OCC establishes similar minimum capital requirements and standards for the Firm's principal IDI subsidiary, JPMorgan Chase Bank, N.A. The capital rules under Basel III establish minimum capital ratios and overall capital adequacy standards for large and internationally active U.S. bank holding companies and banks, including the Firm and its IDI subsidiaries, including JPMorgan Chase Bank, N.A. Two comprehensive approaches are prescribed for calculating RWA: a standardized approach (Basel III Standardized), and an advanced approach (Basel III Advanced). For each of the risk-based capital ratios, the capital adequacy of the Firm and JPMorgan Chase Bank, N.A. is evaluated against the lower of the Standardized or Advanced approaches compared to their respective minimum capital ratios. The three components of regulatory capital under the Basel III rules are as illustrated below: Under the risk-based capital and leverage-based guidelines of the Federal Reserve, JPMorgan Chase is required to maintain minimum ratios for CET1 capital, Tier 1 capital, Total capital, Tier 1 leverage and the SLR. Failure to meet these minimum requirements could cause the Federal Reserve to take action. IDI subsidiaries are also subject to these capital requirements established by their respective primary regulators. The following table presents the minimum and well-capitalized ratios to which the Firm and its IDI subsidiaries were subject as of December 31, 2020 and 2019. Standardized Minimum capital ratios Advanced Minimum capital ratios Well-capitalized ratios BHC (a)(b)(c) IDI (c)(d) BHC (a)(c) IDI (c)(d) BHC (e) IDI (f) Capital ratios %; %; CET1 capital 11.3 %; 7.0 %; 10.5 %; 7.0 %; NA 6.5 %; % Tier 1 capital 12.8 %; 8.5 %; 12.0 %; 8.5 %; 6.0 %; 8.0 %; Total capital 14.8 %; 10.5 %; 14.0 %; 10.5 %; 10.0 %; 10.0 %; Tier 1 leverage 4.0 %; 4.0 %; 4.0 %; 4.0 %; NA 5.0 %; SLR NA NA 5.0 %; 6.0 %; NA 6.0 %; Note: The table above is as defined by the regulations issued by the Federal Reserve, OCC and FDIC and to which the Firm and its IDI subsidiaries are subject. (a) Represents the minimum capital ratios applicable to the Firm. The CET1, Tier 1 and Total capital minimum capital ratios each include a respective minimum requirement plus a GSIB surcharge of 3.5 % as calculated under Method 2; plus a 3.3 % SCB for Basel III Standardized ratios and a fixed 2.5 % capital conservation buffer for Basel III Advanced ratios. The countercyclical buffer is currently set to 0 % by the federal banking agencies. (b) For the period ended December 31, 2019, the CET1, Tier 1, Total, Tier 1 leverage and SLR minimum capital ratios under Basel III Standardized applicable to

the Firm were 10.5 %, 12.0 %, 14.0 %, 4.0 %, and 5.0 %, respectively. (c) Represents minimum SLR requirement of 3.0 %, as well as supplementary leverage buffer requirements of 2.0 % and 3.0 % for BHC and IDI, respectively. (d) Represents requirements for JPMorgan Chase's IDI subsidiaries. The CET1, Tier 1 and Total capital minimum capital ratios include a fixed capital conservation buffer requirement of 2.5 % that is applicable to the IDI subsidiaries. The IDI subsidiaries are not subject to the GSIB surcharge. (e) Represents requirements for bank holding companies pursuant to regulations issued by the Federal Reserve. (f) Represents requirements for IDI subsidiaries pursuant to regulations issued under the FDIC Improvement Act. Current Expected Credit Losses Effective January 1, 2020, the Firm adopted the Financial Instruments' Credit Losses guidance under U.S. GAAP. As permitted under the U.S. capital rules issued by the federal banking agencies in 2019, the Firm initially elected to phase-in the January 1, 2020 (day 1) CECL adoption impact to retained earnings of \$2.7 billion to CET1 capital, at 25% per year in each of 2020 to 2023. As part of their response to the impact of the COVID-19 pandemic, on March 31, 2020, the federal banking agencies issued an interim final rule (issued as final on August 26, 2020) that provided the option to delay the effects of CECL on regulatory capital for two years, followed by a three-year transition period. The final rule provides a uniform approach for estimating the effects of CECL compared to the legacy incurred loss model during the first two years of the transition period (the transition amount), whereby the Firm may exclude from CET1 capital 25% of the change in the JPMorgan Chase & Co./2020 Form 10-K 281 Notes to consolidated financial statements allowance for credit losses (excluding allowances on PCD loans). The cumulative day 2 transition amount as at December 31, 2021 that is not recognized in CET1 capital, as well as the \$ 2.7 billion day 1 impact, will be phased into CET1 capital at 25% per year beginning January 1, 2022. The Firm has elected to apply the CECL capital transition provisions, and accordingly, for the year ended December 31, 2020, the capital metrics of the Firm exclude \$ 5.7 billion, which is the \$ 2.7 billion day 1 impact to retained earnings and 25% of the \$ 12.2 billion increase in the allowance for credit losses (excluding allowances on PCD loans). The impacts of the CECL capital transition provisions have also been incorporated into Tier 2 capital, adjusted average assets, and total leverage exposure. Refer to Note 1 for further information on the CECL accounting guidance. The following tables present the risk-based and leverage-based capital metrics for JPMorgan Chase and JPMorgan Chase Bank, N.A. under both the Basel III Standardized and Basel III Advanced Approaches. As of December 31, 2020, the capital metrics are presented applying the CECL capital transition provisions. As of December 31, 2020 and 2019, JPMorgan Chase and JPMorgan Chase Bank, N.A. were well-capitalized and met all capital requirements to which each was subject. December 31, 2020 (in millions, except ratios)

SLR (b)	NA	6.3 %	6.8 %	6.8 %	NA	6.3 %

(a) Adjusted average assets, for purposes of calculating the leverage ratio, includes total quarterly average assets adjusted for on-balance sheet assets that are subject to deduction from Tier 1 capital, predominantly goodwill and other intangible assets. (b) As of December 31, 2020, JPMorgan Chase's total leverage exposure for purposes of calculating the SLR, excludes on-balance sheet amounts of U.S. Treasury securities and deposits at Federal Reserve Banks, as provided by the interim final rule issued by the Federal Reserve on April 1, 2020. On June 1, 2020, the Federal Reserve, OCC and FDIC issued an interim final rule that provides IDI subsidiaries with an option to apply this temporary exclusion subject to certain restrictions. As of December 31, 2020, JPMorgan Chase Bank, N.A. has not elected to apply this exclusion. (c) As of December 31, 2020, the capital metrics for the Firm reflect the exclusion of assets purchased from money market mutual fund clients pursuant to nonrecourse advances provided under the MMLF. Additionally, loans originated under the PPP for the Firm and JPMorgan Chase Bank, N.A. receive a zero percent risk weight. 282 JPMorgan Chase & Co./2020

Form 10-K Note 28 Off-balance sheet lending-related financial instruments, guarantees, and other commitments JPMorgan Chase provides lending-related financial instruments (e.g., commitments and guarantees) to address the financing needs of its customers and clients. The contractual amount of these financial instruments represents the maximum possible credit risk to the Firm should the customer or client draw upon the commitment or the Firm be required to fulfill its obligation under the guarantee, and should the customer or client subsequently fail to perform according to the terms of the contract. Most of these commitments and guarantees have historically been refinanced, extended, cancelled, or expired without being drawn or a default occurring. As a result, the total contractual amount of these instruments is not, in the Firm's view, representative of its expected future credit exposure or funding requirements. To provide for expected credit losses in wholesale and certain consumer lending-related commitments, an allowance for credit losses on lending-related commitments is maintained. Refer to Note 13 for further information regarding the allowance for credit losses on lending-related commitments, including the impact of the Firm's adoption of CECL accounting guidance on January 1, 2020. The following table summarizes the contractual amounts and carrying values of off-balance sheet lending-related financial instruments, guarantees and other commitments at December 31, 2020 and 2019. The amounts in the table below for credit card and home equity lending-related commitments represent the total available credit for these products. The Firm has not experienced, and does not anticipate, that all available lines of credit for these products will be utilized at the same time. The Firm can reduce or cancel credit card lines of credit by providing the borrower notice or, in some cases as permitted by law, without notice. In addition, the Firm typically closes credit card lines when the borrower is 60 days or more past due. The Firm may reduce or close HELOCs when there are significant decreases in the value of the underlying property, or when there has been a demonstrable decline in the creditworthiness of the borrower. JPMorgan Chase & Co./2020 Form 10-K 283

Notes to consolidated financial statements In conjunction with the adoption of CECL, the Firm reclassified risk-rated loans and lending-related commitments from the consumer, excluding credit card portfolio segment to the wholesale portfolio segment, to align with the methodology applied in determining the allowance. Prior-period amounts have been revised to conform with the current presentation. Refer to Note 1 for further information.

(i) 52						
(66) (a)	Includes certain commitments to purchase loans from correspondents. (b) Also includes commercial card lending-related commitments primarily in CB and CIB. (c) Predominantly all consumer and wholesale lending-related commitments are in the U.S. (d) At December 31, 2020 and 2019, reflected the contractual amount net of risk participations totaling \$ 72 million and \$ 76 million, respectively, for other unfunded commitments to extend credit; \$ 8.5 billion and \$ 9.8 billion, respectively, for standby letters of credit and other financial guarantees; and \$ 357 million and \$ 546 million, respectively, for other letters of credit. In regulatory filings with the Federal Reserve these commitments are shown gross of risk participations. (e) In the third quarter of 2020, the					

Firm reclassified certain fair value option elected lending-related positions from trading assets to loans, which resulted in a corresponding reclassification of commitments from Other guarantees and commitments to Wholesale other unfunded commitments to extend credit. Prior-period amounts have been revised to conform with the current presentation. (f) At December 31, 2020 and 2019, collateral held by the Firm in support of securities lending indemnification agreements was \$ 264.3 billion and \$ 216.2 billion, respectively. Securities lending collateral primarily consists of cash, G7 government securities, and securities issued by U.S. GSEs and government agencies. (g) At December 31, 2020 and 2019, includes guarantees to the Fixed Income Clearing Corporation under the sponsored member repo program and commitments and guarantees associated with the Firm's membership in certain clearing houses. (h) At December 31, 2020 and 2019, primarily includes letters of credit hedged by derivative transactions and managed on a market risk basis, and unfunded commitments related to certain tax-oriented equity investments. (i) Prior-period amounts have been revised to conform with the current presentation. (j) For lending-related products, the carrying value represents the allowance for lending-related commitments and the guarantee liability; for derivative-related products, and lending-related commitments for which the fair value option was elected, the carrying value represents the fair value.

284 JPMorgan Chase & Co./2020 Form 10-K Other unfunded commitments to extend credit Other unfunded commitments to extend credit generally consist of commitments for working capital and general corporate purposes, extensions of credit to support commercial paper facilities and bond financings in the event that those obligations cannot be remarketed to new investors, as well as committed liquidity facilities to clearing organizations. The Firm also issues commitments under multipurpose facilities which could be drawn upon in several forms, including the issuance of a standby letter of credit. Guarantees U.S. GAAP requires that a guarantor recognize, at the inception of a guarantee, a liability in an amount equal to the fair value of the obligation undertaken in issuing the guarantee. U.S. GAAP defines a guarantee as a contract that contingently requires the guarantor to pay a guaranteed party based upon: (a) changes in an underlying asset, liability or equity security of the guaranteed party; or (b) a third party's failure to perform under a specified agreement. The Firm considers the following off-balance sheet arrangements to be guarantees under U.S. GAAP: standby letters of credit and other financial guarantees, securities lending indemnifications, certain indemnification agreements included within third-party contractual arrangements, certain derivative contracts and the guarantees under the sponsored member repo program. As required by U.S. GAAP, the Firm initially records guarantees at the inception date fair value of the non-contingent obligation assumed (e.g., the amount of consideration received or the net present value of the premium receivable). For these obligations, the Firm records this fair value amount in other liabilities with an offsetting entry recorded in cash (for premiums received), or other assets (for premiums receivable). Any premium receivable recorded in other assets is reduced as cash is received under the contract, and the fair value of the liability recorded at inception is amortized into income as lending and deposit-related fees over the life of the guarantee contract. The lending-related contingent obligation is recognized based on expected credit losses in addition to, and separate from, any non-contingent obligation. Non-lending-related contingent obligations are recognized when the liability becomes probable and reasonably estimable. These obligations are not recognized if the estimated amount is less than the carrying amount of any non-contingent liability recognized at inception (adjusted for any amortization). Examples of non-lending-related contingent obligations include indemnifications provided in sales agreements, where a portion of the sale proceeds is allocated to the guarantee, which adjusts the gain or loss that would otherwise result from the transaction. For these indemnifications, the initial liability is amortized to income as the Firm's risk is reduced (i.e., over time or when the indemnification expires). The contractual amount and carrying value of guarantees and indemnifications are included in the table on page 284. For additional information on the guarantees, see below. Standby letters of credit and other financial guarantees Standby letters of credit and other financial guarantees are conditional lending commitments issued by the Firm to guarantee the performance of a client or customer to a third party under certain arrangements, such as commercial paper facilities, bond financings, acquisition financings, trade and similar transactions. The following table summarizes the contractual amount and carrying value of standby letters of credit and other financial guarantees and other letters of credit arrangements as of December 31, 2020 and 2019. Standby letters of credit, other financial guarantees and other letters of credit 2020 2019 December 31, (in millions)

	Standby letters of credit	Other financial guarantees	Other letters of credit

	\$ 728		

(a) The ratings scale is based on the Firm's internal risk ratings. Refer to Note 12 for further information on internal risk ratings. JPMorgan Chase & Co./2020 Form 10-K 285 Notes to consolidated financial statements Securities lending indemnifications Through the Firm's securities lending program, counterparties' securities, via custodial and non-custodial arrangements, may be lent to third parties. As part of this program, the Firm provides an indemnification in the lending agreements which protects the lender against the failure

of the borrower to return the lent securities. To minimize its liability under these indemnification agreements, the Firm obtains cash or other highly liquid collateral with a market value exceeding 100 % of the value of the securities on loan from the borrower. Collateral is marked to market daily to help assure that collateralization is adequate. Additional collateral is called from the borrower if a shortfall exists, or collateral may be released to the borrower in the event of overcollateralization. If a borrower defaults, the Firm would use the collateral held to purchase replacement securities in the market or to credit the lending client or counterparty with the cash equivalent thereof. The cash collateral held by the Firm may be invested on behalf of the client in indemnified resale agreements, whereby the Firm indemnifies the client against the loss of principal invested. To minimize its liability under these agreements, the Firm obtains collateral with a market value exceeding 100 % of the principal invested.

Derivatives qualifying as guarantees The Firm transacts in certain derivative contracts that have the characteristics of a guarantee under U.S. GAAP. These contracts include written put options that require the Firm to purchase assets upon exercise by the option holder at a specified price by a specified date in the future. The Firm may enter into written put option contracts in order to meet client needs, or for other trading purposes. The terms of written put options are typically five years or less. Derivatives deemed to be guarantees also includes stable value contracts, commonly referred to as "stable value products", that require the Firm to make a payment of the difference between the market value and the book value of a counterparty's reference portfolio of assets in the event that market value is less than book value and certain other conditions have been met. Stable value products are transacted in order to allow investors to realize investment returns with less volatility than an unprotected portfolio. These contracts are typically longer-term or may have no stated maturity, but allow the Firm to elect to terminate the contract under certain conditions. The notional value of derivatives guarantees generally represents the Firm's maximum exposure. However, exposure to certain stable value products is contractually limited to a substantially lower percentage of the notional amount. The fair value of derivative guarantees reflects the probability, in the Firm's view, of whether the Firm will be required to perform under the contract. The Firm reduces exposures to these contracts by entering into offsetting transactions, or by entering into contracts that hedge the market risk related to the derivative guarantees. The following table summarizes the derivatives qualifying as guarantees as of December 31, 2020 and 2019. (in millions)

	December 31, 2020	December 31, 2019
Notional amounts	\$ 54,415	\$ 53,089
Derivative guarantees	\$ 54,415	\$ 53,089
Stable value contracts with contractually limited exposure	27,752	28,877
Maximum exposure of stable value contracts with contractually limited exposure	2,803	2,967
Fair value	322	159

Derivative payables 322; 159; In addition to derivative contracts that meet the characteristics of a guarantee, the Firm is both a purchaser and seller of credit protection in the credit derivatives market. Refer to Note 5 for a further discussion of credit derivatives.

Unsettled securities financing agreements In the normal course of business, the Firm enters into resale and securities borrowed agreements. At settlement, these commitments result in the Firm advancing cash to and receiving securities collateral from the counterparty. The Firm also enters into repurchase and securities loaned agreements. At settlement, these commitments result in the Firm receiving cash from and providing securities collateral to the counterparty. Such agreements settle at a future date. These agreements generally do not meet the definition of a derivative, and therefore, are not recorded on the Consolidated balance sheets until settlement date. These agreements predominantly have regular-way settlement terms. Refer to Note 11 for a further discussion of securities financing agreements.

Loan sales- and securitization-related indemnifications

Mortgage repurchase liability In connection with the Firm's mortgage loan sale and securitization activities with U.S. GSEs the Firm has made representations and warranties that the loans sold meet certain requirements, and that may require the Firm to repurchase mortgage loans and/or indemnify the loan purchaser if such representations and warranties are breached by the Firm. Private label securitizations The liability related to repurchase demands associated with private label securitizations is separately evaluated by the Firm in establishing its litigation reserves. Refer to Note 30 for additional information regarding litigation.

Loans sold with recourse The Firm provides servicing for mortgages and certain commercial lending products on both a recourse and nonrecourse basis. In nonrecourse servicing, the principal credit risk to the Firm is the cost of temporary servicing advances of funds (i.e., normal servicing advances). In recourse servicing, the servicer agrees to share credit risk.

286 JPMorgan Chase & Co./2020 Form 10-K with the owner of the mortgage loans, such as Fannie Mae or Freddie Mac or a private investor, insurer or guarantor. Losses on recourse servicing predominantly occur when foreclosure sales proceeds of the property underlying a defaulted loan are less than the sum of the outstanding principal balance, plus accrued interest on the loan and the cost of holding and disposing of the underlying property. The Firm's securitizations are predominantly nonrecourse, thereby effectively transferring the risk of future credit losses to the purchaser of the mortgage-backed securities issued by the trust. At December 31, 2020 and 2019, the unpaid principal balance of loans sold with recourse totaled \$ 889 million and \$ 944 million, respectively. The carrying value of the related liability that the Firm has recorded in accounts payable and other liabilities on the Consolidated balance sheets, which is representative of the Firm's view of the likelihood it will have to perform under its recourse obligations, was \$ 23 million and \$ 27 million at December 31, 2020 and 2019, respectively. Other off-balance sheet arrangements

Indemnification agreements general In connection with issuing securities to investors outside the U.S., the Firm may agree to pay additional amounts to the holders of the

securities in the event that, due to a change in tax law, certain types of withholding taxes are imposed on payments on the securities. The terms of the securities may also give the Firm the right to redeem the securities if such additional amounts are payable. The Firm may also enter into indemnification clauses in connection with the licensing of software to clients (“software licensees”,) or when it sells a business or assets to a third party (“third-party purchasers”), pursuant to which it indemnifies software licensees for claims of liability or damages that may occur subsequent to the licensing of the software, or third-party purchasers for losses they may incur due to actions taken by the Firm prior to the sale of the business or assets. It is difficult to estimate the Firm's maximum exposure under these indemnification arrangements, since this would require an assessment of future changes in tax law and future claims that may be made against the Firm that have not yet occurred. However, based on historical experience, management expects the risk of loss to be remote.

Merchant charge-backs Under the rules of payment networks, the Firm, in its role as a merchant acquirer, retains a contingent liability for disputed processed credit and debit card transactions that result in a charge-back to the merchant. If a dispute is resolved in the cardholder's favor, Merchant Services will (through the cardholder's issuing bank) credit or refund the amount to the cardholder and will charge back the transaction to the merchant. If Merchant Services is unable to collect the amount from the merchant, Merchant Services will bear the loss for the amount credited or refunded to the cardholder. Merchant Services mitigates this risk by withholding future settlements, retaining cash reserve accounts or obtaining other collateral. In addition, Merchant Services recognizes a valuation allowance that covers the payment or performance risk to the Firm related to charge-backs. The carrying value of the valuation allowance was \$ 12 million and \$ 11 million at December 31, 2020 and 2019, respectively. For the years ended December 31, 2020, 2019 and 2018, Merchant Services processed an aggregate volume of \$ 1,597.3 billion, \$ 1,511.5 billion, and \$ 1,366.1 billion, respectively.

Clearing Services **Client Credit Risk** The Firm provides clearing services for clients by entering into securities purchases and sales and derivative contracts with CCPs, including ETDs such as futures and options, as well as OTC-cleared derivative contracts. As a clearing member, the Firm stands behind the performance of its clients, collects cash and securities collateral (margin) as well as any settlement amounts due from or to clients, and remits them to the relevant CCP or client in whole or part. There are two types of margin: variation margin is posted on a daily basis based on the value of clients' derivative contracts and initial margin is posted at inception of a derivative contract, generally on the basis of the potential changes in the variation margin requirement for the contract. As a clearing member, the Firm is exposed to the risk of nonperformance by its clients, but is not liable to clients for the performance of the CCPs. Where possible, the Firm seeks to mitigate its risk to the client through the collection of appropriate amounts of margin at inception and throughout the life of the transactions. The Firm can also cease providing clearing services if clients do not adhere to their obligations under the clearing agreement. In the event of nonperformance by a client, the Firm would close out the client's positions and access available margin. The CCP would utilize any margin it holds to make itself whole, with any remaining shortfalls required to be paid by the Firm as a clearing member. The Firm reflects its exposure to nonperformance risk of the client through the recognition of margin receivables from clients and margin payables to CCPs; the clients' underlying securities or derivative contracts are not reflected in the Firm's Consolidated Financial Statements. It is difficult to estimate the Firm's maximum possible exposure through its role as a clearing member, as this would require an assessment of transactions that clients may execute in the future. However, based upon historical experience, and the credit risk mitigants available to the Firm, management believes it is unlikely that the Firm will have to make any material payments under these arrangements and the risk of loss is expected to be remote. Refer to Note 5 for information on the derivatives that the Firm executes for its own account and records in its Consolidated Financial Statements.

JPMorgan Chase & Co./2020 Form 10-K 287 Notes to consolidated financial statements

Exchange & Clearing House Memberships The Firm is a member of several securities and derivative exchanges and clearing houses, both in the U.S. and other countries, and it provides clearing services to its clients. Membership in some of these organizations requires the Firm to pay a pro rata share of the losses incurred by the organization as a result of the default of another member. Such obligations vary with different organizations. These obligations may be limited to the amount (or a multiple of the amount) of the Firm's contribution to the guarantee fund maintained by a clearing house or exchange as part of the resources available to cover any losses in the event of a member default. Alternatively, these obligations may also include a pro rata share of the residual losses after applying the guarantee fund. Additionally, certain clearing houses require the Firm as a member to pay a pro rata share of losses that may result from the clearing house's investment of guarantee fund contributions and initial margin, unrelated to and independent of the default of another member. Generally a payment would only be required should such losses exceed the resources of the clearing house or exchange that are contractually required to absorb the losses in the first instance. In certain cases, it is difficult to estimate the Firm's maximum possible exposure under these membership agreements, since this would require an assessment of future claims that may be made against the Firm that have not yet occurred. However, based on historical experience, management expects the risk of loss to the Firm to be remote. Where the Firm's maximum possible exposure can be estimated, the amount is disclosed in the table on page 284, in the Exchange & clearing house guarantees and commitments line.

Sponsored member repo program The Firm acts as a sponsoring member to clear eligible overnight

resale and repurchase agreements through the Government Securities Division of the Fixed Income Clearing Corporation (“FICC”); on behalf of clients that become sponsored members under the FICC’s rules. The Firm also guarantees to the FICC the prompt and full payment and performance of its sponsored member clients’ respective obligations under the FICC’s rules. The Firm minimizes its liability under these overnight guarantees by obtaining a security interest in the cash or high-quality securities collateral that the clients place with the clearing house; therefore, the Firm expects the risk of loss to be remote. The Firm’s maximum possible exposure, without taking into consideration the associated collateral, is included in the Exchange & clearing house guarantees and commitments line on page 284. Refer to Note 11 for additional information on credit risk mitigation practices on resale agreements and the types of collateral pledged under repurchase agreements.

Guarantees of subsidiaries In the normal course of business, the Parent Company may provide counterparties with guarantees of certain of the trading and other obligations of its subsidiaries on a contract-by-contract basis, as negotiated with the Firm’s counterparties. The obligations of the subsidiaries are included on the Firm’s Consolidated balance sheets or are reflected as off-balance sheet commitments; therefore, the Parent Company has not recognized a separate liability for these guarantees. The Firm believes that the occurrence of any event that would trigger payments by the Parent Company under these guarantees is remote. The Parent Company has guaranteed certain long-term debt and structured notes of its subsidiaries, including JPMorgan Chase Financial Company LLC (“JPMFC”), a 100 %-owned and consolidated finance subsidiary. All securities issued by JPMFC are fully and unconditionally guaranteed by the Parent Company and no other subsidiary of the parent company guarantees these securities. These guarantees, which rank on a parity with the Firm’s unsecured and unsubordinated indebtedness, are not included in the table on page 284 of this Note. Refer to Note 20 for additional information.

288 JPMorgan Chase & Co./2020 Form 10-K Note 29 – Pledged assets and collateral Pledged assets The Firm pledges financial assets that it owns to maintain potential borrowing capacity at discount windows with Federal Reserve banks, various other central banks and FHLBs. Additionally, the Firm pledges assets for other purposes, including to collateralize repurchase and other securities financing agreements, to cover short sales and to collateralize derivative contracts and deposits. Certain of these pledged assets may be sold or repledged or otherwise used by the secured parties and are parenthetically identified on the Consolidated balance sheets as assets pledged. The following table presents the Firm’s pledged assets.

	December 31, (in billions) 2020	2019
Assets that may be sold or repledged or otherwise used by secured parties	\$ 166.6	\$ 125.2
Assets that may not be sold or repledged or otherwise used by secured parties	113.9	80.2
Assets pledged at Federal Reserve banks and FHLBs	455.3	478.9
Total pledged assets	\$ 735.8	\$ 684.3

Total pledged assets do not include assets of consolidated VIEs; these assets are used to settle the liabilities of those entities. Refer to Note 14 for additional information on assets and liabilities of consolidated VIEs. Refer to Note 11 for additional information on the Firm’s securities financing activities. Refer to Note 20 for additional information on the Firm’s long-term debt. The significant components of the Firm’s pledged assets were as follows.

	December 31, (in billions) 2020	2019
Investment securities	\$ 80.2	\$ 35.9
Loans	420.5	460.4
Trading assets and other	235.1	188.0
Total pledged assets	\$ 735.8	\$ 684.3

Collateral The Firm accepts financial assets as collateral that it is permitted to sell or repledge, deliver or otherwise use. This collateral is generally obtained under resale and other securities financing agreements, prime brokerage-related held-for-investment customer receivables and derivative contracts. Collateral is generally used under repurchase and other securities financing agreements, to cover short sales, and to collateralize derivative contracts and deposits. The following table presents the fair value of collateral accepted.

	December 31, (in billions) 2020	2019
Collateral permitted to be sold or repledged, delivered, or otherwise used	\$ 1,451.7	\$ 1,282.5
Collateral sold, repledged, delivered or otherwise used	1,038.9	1,000.5

(a) (a) Includes collateral repledged to the Federal Reserve under the Federal Reserve’s open market operations. JPMorgan Chase & Co./2020 Form 10-K 289

Notes to consolidated financial statements Note 30 – Litigation Contingencies As of December 31, 2020, the Firm and its subsidiaries and affiliates are defendants, putative defendants or respondents in numerous legal proceedings, including private, civil litigations and regulatory/government investigations. The litigations range from individual actions involving a single plaintiff to class action lawsuits with potentially millions of class members. Investigations involve both formal and informal proceedings, by both governmental agencies and self-regulatory organizations. These legal proceedings are at varying stages of adjudication, arbitration or investigation, and involve each of the Firm’s lines of business and several geographies and a wide variety of claims (including common law tort and contract claims and statutory antitrust, securities and consumer protection claims), some of which present novel legal theories. The Firm believes the estimate of the aggregate range of reasonably possible losses, in excess of reserves established, for its legal proceedings is from \$ 0 to approximately \$ 1.5 billion at December 31, 2020. This estimated aggregate range of reasonably possible losses was based upon information available as of that date for those proceedings in which the Firm believes that an estimate of reasonably possible loss can be made. For certain matters, the Firm does not believe that such an estimate can be made, as of that date. The Firm’s estimate of the aggregate range of reasonably possible losses involves significant judgment, given: • the number, variety and varying stages of the proceedings, including the fact that many are in

preliminary stages, the existence in many such proceedings of multiple defendants, including the Firm, whose share of liability (if any) has yet to be determined; the numerous yet-unresolved issues in many of the proceedings, including issues regarding class certification and the scope of many of the claims, and the attendant uncertainty of the various potential outcomes of such proceedings, including where the Firm has made assumptions concerning future rulings by the court or other adjudicator, or about the behavior or incentives of adverse parties or regulatory authorities, and those assumptions prove to be incorrect. In addition, the outcome of a particular proceeding may be a result which the Firm did not take into account in its estimate because the Firm had deemed the likelihood of that outcome to be remote. Accordingly, the Firm's estimate of the aggregate range of reasonably possible losses will change from time to time, and actual losses may vary significantly. Set forth below are descriptions of the Firm's material legal proceedings.

Advisory and Other Activities . In November 2020, JPMorgan Chase Bank, N.A. entered into a resolution with the Office of the Comptroller of the Currency (OCC) regarding historical deficiencies in internal controls and internal audit for certain fiduciary activities. In connection with the resolution, JPMorgan Chase Bank, N.A. paid a \$ 250 million Civil Money Penalty. The OCC found that JPMorgan Chase Bank, N.A. has remediated the deficiencies that led to the penalty.

Amrapali . India's Enforcement Directorate (ED) is investigating JPMorgan India Private Limited in connection with investments made in 2010 and 2012 by two offshore funds formerly managed by JPMorgan Chase entities into residential housing projects developed by the Amrapali Group (Amrapali). In 2017, numerous creditors filed civil claims against Amrapali including petitions brought by home buyers relating to delays in delivering or failure to deliver residential units. The home buyers' petitions have been overseen by the Supreme Court of India since 2017 pursuant to its jurisdiction over public interest litigation. In July 2019, the Supreme Court of India issued an order making preliminary findings that Amrapali and other parties, including unspecified JPMorgan Chase entities and the offshore funds that had invested in the projects, violated certain currency control and money laundering provisions, and ordering the ED to conduct a further inquiry under India's Prevention of Money Laundering Act (PMLA) and Foreign Exchange Management Act (FEMA). In May 2020, the Enforcement Directorate issued a provisional attachment order as part of the criminal PMLA proceedings freezing approximately \$ 25 million held by JPMorgan India Private Limited. In June 2020, the funds were transferred to an account held by the Supreme Court of India. A separate civil proceeding relating to alleged FEMA violations is ongoing. The Firm is responding to and cooperating with the investigation.

Federal Republic of Nigeria Litigation. JPMorgan Chase Bank, N.A. operated an escrow and depository account for the Federal Government of Nigeria (FGN) and two major international oil companies. The account held approximately \$ 1.1 billion in connection with a dispute among the clients over rights to an oil field. Following the settlement of the dispute, JPMorgan Chase Bank, N.A. paid out the monies in the account in 2011 and 2013 in accordance with directions received from its clients. In November 2017, the Federal Republic of Nigeria (FRN) commenced a claim in the English High Court for approximately \$ 875 million in payments made out of the accounts. The FRN, claiming to be the same entity as the FGN, alleges that the payments were instructed as part of a complex fraud not involving JPMorgan Chase Bank, N.A., but that JPMorgan Chase Bank, N.A. was or should have been on 290 JPMorgan Chase & Co./2020 Form 10-K notice that the payments may be fraudulent. JPMorgan Chase Bank, N.A. applied for summary judgment and was unsuccessful. The claim is ongoing and a trial has been scheduled to commence in February 2022.

Foreign Exchange Investigations and Litigation. The Firm previously reported settlements with certain government authorities relating to its foreign exchange (FX) sales and trading activities and controls related to those activities. Among those resolutions, in May 2015, the Firm pleaded guilty to a single violation of federal antitrust law. In January 2017, the Firm was sentenced, with judgment entered thereafter and a term of probation ending in January 2020. The term of probation has concluded, with the Firm remaining in good standing throughout the probation period. The Department of Labor granted the Firm a five-year exemption of disqualification that allows the Firm and its affiliates to continue to rely on the Qualified Professional Asset Manager exemption under the Employee Retirement Income Security Act (ERISA) until January 2023. The Firm will need to reapply in due course for a further exemption to cover the remainder of the ten-year disqualification period. A South Africa Competition Commission matter is the remaining FX-related governmental inquiry, and is currently pending before the South Africa Competition Tribunal. In August 2018, the United States District Court for the Southern District of New York granted final approval to the Firm's settlement of a consolidated class action brought by U.S.-based plaintiffs, which principally alleged violations of federal antitrust laws based on an alleged conspiracy to manipulate foreign exchange rates and also sought damages on behalf of persons who transacted in FX futures and options on futures. Certain members of the settlement class filed requests to the Court to be excluded from the class, and certain of them filed a complaint against the Firm and a number of other foreign exchange dealers in November 2018. A number of these actions remain pending. Further, putative class actions have been filed against the Firm and a number of other foreign exchange dealers on behalf of certain consumers who purchased foreign currencies at allegedly inflated rates and purported indirect purchasers of FX instruments; these actions also remain pending in the District Court. In 2020, the Court approved a settlement by the Firm and 11 other defendants of a class action filed by purported indirect purchasers

for a total of \$ 10 billion. In addition, some FX-related individual and putative class actions based on similar alleged underlying conduct have been filed outside the U.S., including in the U.K., Israel and Australia.

Interchange Litigation. Groups of merchants and retail associations filed a series of class action complaints alleging that Visa and Mastercard, as well as certain banks, conspired to set the price of credit and debit card interchange fees and enacted related rules in violation of antitrust laws. In 2012, the parties initially settled the cases for a cash payment, a temporary reduction of credit card interchange, and modifications to certain credit card network rules. In 2017, after the approval of that settlement was reversed on appeal, the case was remanded to the United States District Court for the Eastern District of New York for further proceedings consistent with the appellate decision. The original class action was divided into two separate actions, one seeking primarily monetary relief and the other seeking primarily injunctive relief. In September 2018, the parties to the class action seeking monetary relief finalized an agreement which amends and supersedes the prior settlement agreement. Pursuant to this settlement, the defendants collectively contributed an additional \$ 900 million to the approximately \$ 5.3 billion previously held in escrow from the original settlement. In December 2019, the amended agreement was approved by the District Court. Certain merchants appealed the District Court's approval order, and those appeals are pending. Based on the percentage of merchants that opted out of the amended class settlement, \$ 700 million has been returned to the defendants from the settlement escrow in accordance with the settlement agreement. The class action seeking primarily injunctive relief continues separately. In addition, certain merchants have filed individual actions raising similar allegations against Visa and Mastercard, as well as against the Firm and other banks, and some of those actions remain pending.

LIBOR and Other Benchmark Rate Investigations and Litigation. JPMorgan Chase has responded to inquiries from various governmental agencies and entities around the world relating primarily to the British Bankers Association's London Interbank Offered Rate (LIBOR) for various currencies and the European Banking Federation's Euro Interbank Offered Rate (EURIBOR). The Swiss Competition Commission's investigation relating to EURIBOR, to which the Firm and other banks are subject, continues. In December 2016, the European Commission issued a decision against the Firm and other banks finding an infringement of European antitrust rules relating to EURIBOR. The Firm has filed an appeal of that decision with the European General Court, and that appeal is pending. In addition, the Firm has been named as a defendant along with other banks in a series of individual and putative class actions related to benchmarks, including U.S. dollar LIBOR during the period that it was administered by the BBA and, in a separate consolidated putative class action, during the period that it was administered by ICE Benchmark Administration. These actions have been filed, or consolidated for pre-trial purposes, in the United States District Court for the Southern District of New York. In these actions, plaintiffs make varying allegations that in various periods, starting in 2000 or later, defendants either individually or collectively manipulated various benchmark rates by submitting rates that were artificially low or high. Plaintiffs allege that they transacted in loans, derivatives or other financial instruments whose values are affected by JPMorgan Chase & Co.

2020 Form 10-K 291

Notes to consolidated financial statements changes in these rates and assert a variety of claims including antitrust claims seeking treble damages. In actions related to U.S. dollar LIBOR during the period that it was administered by the BBA, the Firm has resolved certain of these actions, and others are in various stages of litigation. The District Court dismissed certain claims, including antitrust claims brought by some plaintiffs whom the District Court found did not have standing to assert such claims, and permitted certain claims to proceed, including antitrust, Commodity Exchange Act, Section 10(b) of the Securities Exchange Act and common law claims. The plaintiffs whose antitrust claims were dismissed for lack of standing have filed an appeal. The District Court granted class certification of antitrust claims related to bonds and interest rate swaps sold directly by the defendants and denied class certification motions filed by other plaintiffs. In the consolidated putative class action related to the time period that U.S. dollar LIBOR was administered by ICE Benchmark Administration, the District Court granted defendants' motion to dismiss plaintiffs' complaint, and the plaintiffs have appealed. The Firm's settlements of putative class actions related to Swiss franc LIBOR, the Singapore Interbank Offered Rate and the Singapore Swap Offer Rate (SIBOR), and the Australian Bank Bill Swap Reference Rate, and one of the putative class actions related to U.S. dollar LIBOR remain subject to court approval. In the class actions related to SIBOR and Swiss franc LIBOR, the District Court concluded that the Court lacked subject matter jurisdiction, and plaintiffs' appeals of those decisions are pending. In addition to the actions pending or consolidated in the Southern District of New York, in August 2020, a group of individual plaintiffs filed a lawsuit asserting antitrust claims in the United States District Court for the Northern District of California, alleging that the Firm and other defendants were engaged in an unlawful agreement to set LIBOR and conspired to monopolize the market for LIBOR-based consumer loans and credit cards. The complaint seeks injunctive relief and monetary damages.

Metals and U.S. Treasuries Investigations and Litigation and Related Inquiries. The Firm previously reported that it and/or certain of its subsidiaries had entered into resolutions with the U.S. Department of Justice (DOJ), the U.S. Commodity Futures Trading Commission (CFTC) and the U.S. Securities and Exchange Commission (SEC), which, collectively, resolved those agencies' respective investigations relating to historical trading practices by former employees in the precious metals and U.S. treasuries markets and related conduct from 2008 to 2016. The Firm entered into a Deferred Prosecution Agreement (DPA) with the DOJ in which it agreed

to the filing of a criminal information charging JPMorgan Chase & Co. with two counts of wire fraud and agreed, along with JPMorgan Chase Bank, N.A. and J.P. Morgan Securities LLC, to certain terms and obligations as set forth therein. Under the terms of the DPA, the criminal information will be dismissed after three years, provided that JPMorgan Chase & Co., JPMorgan Chase Bank, N.A. and J.P. Morgan Securities LLC fully comply with all of their obligations. Across the three resolutions with the DOJ, CFTC and SEC, JPMorgan Chase & Co., JPMorgan Chase Bank, N.A. and J.P. Morgan Securities LLC agreed to pay a total monetary amount of approximately \$ 920 million. A portion of the total monetary amount includes victim compensation payments. Several putative class action complaints have been filed in the United States District Court for the Southern District of New York against the Firm and certain former employees, alleging a precious metals futures and options price manipulation scheme in violation of the Commodity Exchange Act. Some of the complaints also allege unjust enrichment and deceptive acts or practices under the General Business Law of the State of New York. The Court consolidated these putative class actions in February 2019, and the consolidated action is stayed through May 2021. In addition, several putative class actions have been filed in the United States District Courts for the Northern District of Illinois and Southern District of New York against the Firm, alleging manipulation of U.S. Treasury futures and options, and bringing claims under the Commodity Exchange Act. Some of the complaints also allege unjust enrichment. The actions in the Northern District of Illinois have been transferred to the Southern District of New York. The Court consolidated these putative class actions in October 2020 and set a deadline of February 2021 for the filing of a consolidated complaint. Two putative class action complaints have also been filed under the Securities Exchange Act of 1934 in the United States District Court for the Eastern District of New York against the Firm and certain individual defendants on behalf of shareholders who acquired shares during the putative class period alleging that certain SEC filings of the Firm were materially false or misleading in that they did not disclose certain information relating to the above-referenced investigations. Plaintiffs have filed a stipulation seeking consolidation of the actions and the appointment of co-lead plaintiffs and counsel, which is pending Court approval.

Wendel. Since 2012, the French criminal authorities have been investigating a series of transactions entered into by senior managers of Wendel Investissement (Wendel) during the period from 2004 through 2007 to restructure their shareholdings in Wendel. JPMorgan Chase Bank, N.A., Paris branch provided financing for the transactions to a number of managers of Wendel in 2007. JPMorgan Chase has cooperated with the investigation. The investigating judges issued an *ordonnance de renvoi* in November 2016, referring JPMorgan Chase Bank, N.A. to the French tribunal correctionnel for alleged complicity in tax fraud. In January 2018, the Paris Court of Appeal issued a decision cancelling the *mise en examen* of JPMorgan Chase Bank, N.A. The Court of Cassation, France's highest court, ruled in September 2018 that a *mise en examen* is a prerequisite for an *ordonnance de renvoi* and in January 2020 ordered the annulment of the *ordonnance de renvoi* referring JPMorgan Chase Bank, N.A. to the French tribunal correctionnel. The Court of Appeal found in January 2021 that it had no power to take further action against JPMorgan Chase following the Court of Cassation's ruling. At the opening of a trial of the managers of Wendel in January 2021, the tribunal correctionnel directed the criminal authorities to clarify whether a further investigation should be opened against JPMorgan Chase, pending which the trial was postponed. In addition, a number of the managers have commenced civil proceedings against JPMorgan Chase Bank, N.A. The claims are separate, involve different allegations and are at various stages of proceedings.

*** In addition to the various legal proceedings discussed above, JPMorgan Chase and its subsidiaries are named as defendants or are otherwise involved in a substantial number of other legal proceedings. The Firm believes it has meritorious defenses to the claims asserted against it in its currently outstanding legal proceedings and it intends to defend itself vigorously. Additional legal proceedings may be initiated from time to time in the future. The Firm has established reserves for several hundred of its currently outstanding legal proceedings. In accordance with the provisions of U.S. GAAP for contingencies, the Firm accrues for a litigation-related liability when it is probable that such a liability has been incurred and the amount of the loss can be reasonably estimated. The Firm evaluates its outstanding legal proceedings each quarter to assess its litigation reserves, and makes adjustments in such reserves, upward or downward, as appropriate, based on management's best judgment after consultation with counsel. The Firm's legal expense was \$ 1.1 billion, \$ 239 million and \$ 72 million for the years ended December 31, 2020, 2019 and 2018, respectively. There is no assurance that the Firm's litigation reserves will not need to be adjusted in the future. In view of the inherent difficulty of predicting the outcome of legal proceedings, particularly where the claimants seek very large or indeterminate damages, or where the matters present novel legal theories, involve a large number of parties or are in early stages of discovery, the Firm cannot state with confidence what will be the eventual outcomes of the currently pending matters, the timing of their ultimate resolution or the eventual losses, fines, penalties or consequences related to those matters. JPMorgan Chase believes, based upon its current knowledge and after consultation with counsel, consideration of the material legal proceedings described above and after taking into account its current litigation reserves and its estimated aggregate range of possible losses, that the other legal proceedings currently pending against it should not have a material adverse effect on the Firm's consolidated financial condition. The Firm notes, however, that in light of the uncertainties involved in such proceedings, there is no assurance that the ultimate resolution of these matters will not significantly exceed the reserves it has currently accrued or that a

matter will not have material reputational consequences. As a result, the outcome of a particular matter may be material to JPMorgan Chase's operating results for a particular period, depending on, among other factors, the size of the loss or liability imposed and the level of JPMorgan Chase's income for that period. JPMorgan Chase & Co./2020 Form 10-K 293 Notes to consolidated financial statements Note 31

International operations The following table presents income statement and balance sheet-related information for JPMorgan Chase by major international geographic area. The Firm defines international activities for purposes of this footnote presentation as business transactions that involve clients residing outside of the U.S., and the information presented below is based predominantly on the domicile of the client, the location from which the client relationship is managed, booking location or the location of the trading desk. However, many of the Firm's U.S. operations serve international businesses. As the Firm's operations are highly integrated, estimates and subjective assumptions have been made to apportion revenue and expense between U.S. and international operations. These estimates and assumptions are consistent with the allocations used for the Firm's segment reporting as set forth in Note 32. The Firm's long-lived assets for the periods presented are not considered by management to be significant in relation to total assets. The majority of the Firm's long-lived assets are located in the U.S. As of or for the year ended December 31, (in millions)

(d) Expense is composed of noninterest expense and the provision for credit losses. (e) Total assets for the U.K. were approximately \$ 353 billion, \$ 309 billion and \$ 299 billion at December 31, 2020, 2019 and 2018, respectively.

294 JPMorgan Chase & Co./2020 Form 10-K Note 32

Business segments The Firm is managed on an LOB basis. There are four major reportable business segments: Consumer & Community Banking, Corporate & Investment Bank, Commercial Banking and Asset & Wealth Management. In addition, there is a Corporate segment. The business segments are determined based on the products and services provided, or the type of customer served, and they reflect the manner in which financial information is currently evaluated by the Firm's Operating Committee. Segment results are presented on a managed basis. Refer to Segment results of this footnote for a further discussion of JPMorgan Chase's business segments. The following is a description of each of the Firm's business segments, and the products and services they provide to their respective client bases.

Consumer & Community Banking Consumer & Community Banking offers services to consumers and businesses through bank branches, ATMs, digital (including mobile and online) and telephone banking. CCB is organized into Consumer & Business Banking (including Consumer Banking, J.P. Morgan Wealth Management and Business Banking), Home Lending (including Home Lending Production, Home Lending Servicing and Real Estate Portfolios) and Card & Auto. Consumer & Business Banking offers deposit and investment products, payments and services to consumers, and lending, deposit, and cash management and payment solutions to small businesses. Home Lending includes mortgage origination and servicing activities, as well as portfolios consisting of residential mortgages and home equity loans. Card & Auto issues credit cards to consumers and small businesses and originates and services auto loans and leases.

Corporate & Investment Bank The Corporate & Investment Bank, which consists of Banking and Markets & Securities Services, offers a broad suite of investment banking, market-making, prime brokerage, and treasury and securities products and services to a global client base of corporations, investors, financial institutions, merchants, government and municipal entities. Banking offers a full range of investment banking products and services in all major capital markets, including advising on corporate strategy and structure, capital-raising in equity and debt markets, as well as loan origination and syndication. Banking also includes Wholesale Payments, which provides payments services enabling clients to manage payments and receipts globally, and cross-border financing. Markets & Securities Services includes Markets, a global market-maker across products, including cash and derivative instruments, which also offers sophisticated risk management solutions, prime

brokerage, and research. Markets & Securities Services also includes Securities Services, a leading global custodian which provides custody, fund accounting and administration, and securities lending products principally for asset managers, insurance companies and public and private investment funds. Commercial Banking Commercial Banking provides comprehensive financial solutions, including lending, wholesale payments, investment banking and asset management products across three primary client segments: Middle Market Banking, Corporate Client Banking and Commercial Real Estate Banking. Other includes amounts not aligned with a primary client segment. Middle Market Banking covers small and midsized companies, local governments and nonprofit clients. Corporate Client Banking covers large corporations. Commercial Real Estate Banking covers investors, developers, and owners of multifamily, office, retail, industrial and affordable housing properties. Asset & Wealth Management Asset & Wealth Management, with client assets of \$ 3.7 trillion, is a global leader in investment and wealth management. Asset Management Offers multi-asset investment management solutions across equities, fixed income, alternatives and money market funds to institutional and retail investors providing for a broad range of clients' investment needs. Wealth Management Provides retirement products and services, brokerage, custody, trusts and estates, loans, mortgages, deposits and investment management to high net worth clients. The majority of AWM's client assets are in actively managed portfolios. Corporate The Corporate segment consists of Treasury and Chief Investment Office and Other Corporate, which includes corporate staff functions and expense that is centrally managed. Treasury and CIO is predominantly responsible for measuring, monitoring, reporting and managing the Firm's liquidity, funding, capital, structural interest rate and foreign exchange risks. The major Other Corporate functions include Real Estate, Technology, Legal, Corporate Finance, Human Resources, Internal Audit, Risk Management, Compliance, Control Management, Corporate Responsibility and various Other Corporate groups. JPMorgan Chase & Co./2020 Form 10-K 295 Notes to consolidated financial statements Segment results The following table provides a summary of the Firm's segment results as of or for the years ended December 31, 2020, 2019 and 2018, on a managed basis. The Firm's definition of managed basis starts with the reported U.S. GAAP results and includes certain reclassifications to present total net revenue for the Firm (and each of the reportable business segments) on an FTE basis. Accordingly, revenue from investments that receive tax credits and tax-exempt securities is presented in the managed results on a basis comparable to taxable investments and securities. This allows management to assess the comparability of revenue from year-to-year arising from both taxable and tax-exempt sources. The corresponding income tax impact related to tax-exempt items is recorded within income tax expense/(benefit). These adjustments have no impact on net income as reported by the Firm as a whole or by the LOBs. Business segment capital allocation Each business segment is allocated capital by taking into consideration a variety of factors including capital levels of similarly rated peers and applicable regulatory capital requirements. ROE is measured and internal targets for expected returns are established as key measures of a business segment's performance. The Firm's allocation methodology incorporates Basel III Standardized RWA, Basel III Advanced RWA, the GSIB surcharge, and a simulation of capital in a severe stress environment. The assumptions and methodologies used to allocate capital are periodically assessed and as a result, the capital allocated to the LOBs may change from time to time. Business segment changes In the fourth quarter of 2020, the Firm transferred certain assets, liabilities, revenue, expense and headcount associated with certain wealth management clients from AWM to the J.P. Morgan Wealth Management business unit within CCB. Prior-period amounts have been revised to conform with the current presentation, including the transfer of approximately 1,650 technology and support staff during the second and third quarters of 2020. Ultra-high-net-worth and certain high-net-worth client relationships remained in AWM. In the first quarter of 2020, the Firm began reporting a Wholesale Payments business unit within CIB following a realignment of the Firm's wholesale payments businesses. The Wholesale Payments business comprises: Merchant Services, which was realigned from CCB to CIB; Treasury Services and Trade Finance in CIB. Trade Finance was previously reported in Lending in CIB. In connection with the alignment of Wholesale Payments, the assets, liabilities and headcount associated with the Merchant Services business were realigned to CIB from CCB, and the revenue and expenses of the Merchant Services business are reported across CCB, CIB and CB based primarily on client relationships. In the fourth quarter of 2020, payment processing-only clients along with the associated revenue and expenses were realigned to CIB's Wholesale Payments business from CCB and CB. Payment processing-only clients are those that only use payment services offered by Merchant Services, and in general do not currently utilize other services offered by the Firm. Prior-period amounts have been revised to reflect this realignment and revised allocation methodology. Segment results and reconciliation (a) (Table continued on next page) As of or for the year ended December 31, (in millions, except ratios) Consumer & Community Banking (b) Corporate & Investment Bank Commercial Banking Asset & Wealth Management 2020 2019 2018 2020 2019 2018 2020 2019 2018 2020 2019 2018 2020 2019 2018 Noninterest revenue \$ 17,740; \$ 17,796; \$ 15,338; \$ 35,120; \$ 30,060; \$ 27,854; \$ 3,067; \$ 2,710; \$ 2,620; \$ 10,822; \$ 10,236; \$ 10,052; Net interest income 33,528; 37,337; 35,933; 14,164; 9,205; 9,528; 6,246; 6,554; 6,716; 3,418; 3,355; 3,375; Total net revenue 51,268; 55,133; 51,271; 49,284; 39,265; 37,382; 9,313; 9,264; 9,336; 14,240; 13,591; 13,427

Refer to Note 1 for further information. (a) In the second quarter of 2020, the Firm reclassified certain spend-based credit card reward costs from marketing expense to be a reduction of card income, with no effect on net income. Prior-period amounts have been revised to conform with the current presentation. (b) Pre-provision profit, TBVPS and ROTCE are each non-GAAP financial measures. Tangible common equity (“TCE”) is also a non-GAAP financial measure. Refer to Explanation and Reconciliation of the Firm’s Use of Non-GAAP Financial Measures on pages 62–64 for a further discussion of these measures. (c) Quarterly ratios are based on annualized amounts. (d) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans and other assets. Prior-period amounts have been revised to conform with the current presentation. (e) The capital metrics reflect the relief provided by the Federal Reserve Board in response to the COVID-19 pandemic, including the CECL capital transition provisions that became effective in the first quarter of 2020. The SLR reflects the temporary exclusions of U.S. Treasury securities and deposits at Federal Reserve Banks that became effective in the second quarter of 2020. Refer to Regulatory Developments Relating to the COVID-19 Pandemic on pages 52-53 and Capital Risk Management on pages 91-101 for additional information. JPMorgan Chase & Co./2020 Form 10-K 299 Distribution of assets, liabilities and stockholders’ equity; interest rates and interest differentials Consolidated average balance sheets, interest and rates Provided below is a summary of JPMorgan Chase’s consolidated average balances, interest and rates on a taxable-equivalent basis for the years 2018 through 2020. Income computed on a taxable-equivalent basis is the income reported in the Consolidated statements of income, adjusted to present interest income and rates earned on assets exempt from income taxes (i.e., federal taxes) on a basis comparable with other taxable investments. The incremental tax rate used for calculating the taxable-equivalent adjustment was approximately 24% in 2020, 2019 and 2018 . (Table continued on next page) (Unaudited) 2020 Year ended December 31, (Taxable-equivalent interest and rates; in millions, except rates) Average balance Interest (h) Rate Assets Deposits with banks \$ 444,058 \$ 749 0.17 % Federal funds sold and securities purchased under resale agreements 275,926 2,436 0.88 Securities borrowed 143,472 (302) (0.21) (j) Trading assets – debt instruments (a) 322,936 7,869 2.44 Taxable securities 476,650 7,843 1.65 Non-taxable securities (b) 33,287 1,437 4.32 Total investment securities 509,937 9,280 1.82 (k) Loans (a) 1,004,597 43,886 (i) 4.37 All other interest-earning assets (a)(c) 78,784 1,023 1.30 Total interest-earning assets 2,779,710 64,941 2.34 Allowance for loan losses (25,775) Cash and due from banks 22,241 Trading assets – equity and other instruments (a) 118,055 Trading assets – derivative receivables 76,572 Goodwill, MSRs and other intangible assets 51,934 All other noninterest-earning assets (a) 180,411 Total assets \$ 3,203,148 Liabilities Interest-bearing deposits \$ 1,389,224 \$ 2,357 0.17 % Federal funds purchased and securities loaned or sold under repurchase agreements 255,421 1,058 0.41 Short-term borrowings (d) 38,853 372 0.96 Trading

Prior-period amounts have been revised to conform with the current presentation. (b) Represents securities that are tax-exempt for U.S. federal income tax purposes. (c) Includes brokerage-related held-for-investment customer receivables, which are classified in accrued interest and accounts receivable, and all other interest-earning assets, which are classified in other assets on the Consolidated Balance Sheets. (d) Includes commercial paper. (e) All other interest-bearing liabilities include brokerage-related customer payables. Within the Consolidated average balance sheets, interest and rates summary, the principal amounts of nonaccrual loans have been included in the average loan balances used to determine the average interest rate earned on loans. Refer to Note 12 for additional information on nonaccrual loans, including interest accrued.

(g) The ratio of average stockholders’ equity to average assets was 8.3%, 9.5% and 9.8% for the years ended December 31, 2020, 2019 and 2018, respectively. The return on average stockholders’ equity, based on net income, was 10.9%, 14.0% and 12.7% for the years ended December 31, 2020, 2019 and 2018, respectively. (h) Interest includes the effect of related hedging derivatives. Taxable-equivalent amounts are used where applicable. (i) Fees and commissions on loans included in loan interest amounted to \$1.0 billion for the year ended December 31, 2020, and \$1.2 billion each for the years ended December 31, 2019 and 2018. (j) Negative interest income and yield are related to the impact of current interest rates combined with the fees paid on client-driven securities borrowed balances. The negative interest expense related to prime brokerage customer payables is recognized in interest expense and reported within trading liabilities - debt and all other interest-bearing liabilities. (k) The annualized rate for securities based on amortized cost was 1.85%, 3.05% and 3.25% for the years ended December 31, 2020, 2019 and 2018, respectively, and does not give effect to changes in fair value that are reflected in AOCI. JPMorgan Chase & Co./2020 Form 10-K 301 Interest rates and interest differential analysis of net interest income – U.S. and non-U.S. Presented below is a summary of interest and rates segregated between U.S. and non-U.S. operations for the years 2018 through 2020. The segregation of U.S. and non-U.S. components is based on the location of the office recording the transaction. Intercompany funding generally consists of dollar-denominated deposits originated in various locations that are centrally managed by Treasury and CIO. (Table continued on next page) 2020 (Unaudited) Year ended December 31, (Taxable-equivalent interest and rates; in millions, except rates) Average balance Interest Rate Interest-earning assets Deposits with banks: U.S. \$ 294,669 \$ 768 0.26 % Non-U.S. 149,389 (19) (0.01) Federal funds sold and securities purchased under resale agreements: U.S. 141,409 1,341 0.95 Non-U.S. 134,517 1,095 0.81

The negative interest expense related to prime brokerage customer payables is recognized in interest expense and reported within trading liabilities - debt and all other interest-bearing liabilities. (b) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans and other assets. Prior-period amounts have been revised to conform with the current presentation. (c) Includes commercial paper. (d) Represents the amount of noninterest-bearing liabilities funding interest-earning assets. 302 JPMorgan Chase & Co./2020 Form 10-K Refer to the “Net interest income” discussion in Consolidated Results of Operations on pages 54-56 for further information. (Table continued from previous page) 2019 2018 Average balance Interest Rate Average balance Interest Rate \$ 165,066 \$ 3,588 2.17 % \$ 305,117 \$ 5,703 1.87 % 114,938 299 0.26 100,397 204 0.20 150,205 4,068 2.71 102,144 2,427 2.38 125,224 2,078 1.66 115,006 1,392 1.21 92,625 1,423 1.54 77,027 825 1.07 38,666 151 0.39 38,055 88 0.23 200,811 6,157 3.07 121,967 4,229 3.47 94,147 3,032 3.22 86,299 2,977 3.45 287,961 8,963 3.11 200,883 6,943 3.46 31,914 654 2.05 35,805 697 1.95 898,570 49,058 5.46 882,314 46,227 5.24 91,373 2,954 3.23 95,092 2,981 3.13 53,779 2,146 3.99 52,551 2,035 3.87 2,345,279 84,571 3.61 2,212,657 76,728 3.47 850,493 6,896 0.81 802,786 4,562 0.57 265,355 2,061 0.78 242,251 1,411 0.58 164,284 3,989 2.43 117,754 2,562 2.18 63,710 641 1.01 71,528 504 0.70 147,247 2,574 1.75 147,512 2,225 1.51 87,284 1,259 1.44 85,269 1,306 1.53 22,501 568 2.52 21,079 493 2.34 241,914 8,766 3.62 239,718 7,954 3.32 6,054 41 0.68 3,528 24 0.68 (42,947) (1,414) — (51,933) (746) — 42,947 1,414 — 51,933 746 — 1,848,842 26,795 1.45 1,731,425 21,041 1.22 496,437 481,232 \$ 2,345,279 \$ 26,795 1.14 % \$ 2,212,657 \$ 21,041 0.95 % \$ 57,776 2.46 % \$ 55,687 2.52 % 52,217 2.86 50,236 2.95 5,559 1.07 5,451 1.05 24.5 24.7 22.1 22.3 JPMorgan Chase & Co./2020 Form 10-K 303 Changes in net interest income, volume and rate analysis The table below presents an attribution of net interest income between volume and rate. The attribution between volume and rate is calculated using annual average balances for each category of assets and liabilities shown in the table and the corresponding annual rates (refer to pages 300–304 for more information on average balances and rates). In this analysis, when the change cannot be isolated to either volume or rate, it has been allocated to volume. The annual rates include the impact of changes in market rates, as well as the impact of any change in composition of the various products within each category of asset or liability. This analysis is calculated separately for each category without consideration of the relationship between categories (for example, the net spread between the rates earned on assets and the rates paid on liabilities that fund those assets). As a result, changes in the granularity or groupings considered in this analysis would produce a different attribution result, and due to the complexities involved, precise allocation of changes in interest rates between

volume and rates is inherently complex and judgmental. 2020 versus 2019 2019 versus 2018 (Unaudited)

(b) In the third quarter of 2020, the Firm reclassified certain fair value option elected lending-related positions from trading assets to loans and other assets. Prior-period amounts have been revised to conform with the current presentation. (c) Includes commercial paper. 304 JPMorgan Chase & Co./2020 Form 10-K Glossary of Terms and Acronyms 2020 Form 10-K: Annual report on Form 10-K for year ended December 31, 2020, filed with the U.S. Securities and Exchange Commission. ABS: Asset-backed securities AFS: Available-for-sale ALCO: Asset Liability Committee Amortized cost: Amount at which a financing receivable or investment is originated or acquired, adjusted for accretion or amortization of premium, discount, and net deferred fees or costs, collection of cash, charge-offs, foreign exchange, and fair value hedge accounting adjustments. For AFS securities, amortized cost is also reduced by any impairment losses recognized in earnings. Amortized cost is not reduced by the allowance for credit losses, except where explicitly presented net. AOCI: Accumulated other comprehensive income/(loss) ARM: Adjustable rate mortgage(s) AUC: Assets under custody AUM: “Assets under management”: Represent assets managed by AWM on behalf of its Private Banking, Institutional and Retail clients. Includes “Committed capital not Called.” Auto loan and lease origination volume: Dollar amount of auto loans and leases originated. AWM: Asset & Wealth Management Beneficial interests issued by consolidated VIEs: Represents the interest of third-party holders of debt, equity securities, or other obligations, issued by VIEs that JPMorgan Chase consolidates. Benefit obligation: Refers to the projected benefit obligation for pension plans and the accumulated postretirement benefit obligation for OPEB plans. BHC: Bank holding company CB: Commercial Banking CBB: Consumer & Business Banking CCAR: Comprehensive Capital Analysis and Review CCB: Consumer & Community Banking CCO: Chief Compliance Officer CCP: “Central counterparty” is a clearing house that interposes itself between counterparties to contracts traded in one or more financial markets, becoming the buyer to every seller and the seller to every buyer and thereby ensuring the future performance of open contracts. A CCP becomes a counterparty to trades with market participants through novation, an open offer system, or another legally binding arrangement. CDS: Credit default swaps CECL: Current Expected Credit Losses CEO: Chief Executive Officer CET1 Capital: Common equity Tier 1 capital CFTC: Commodity Futures Trading Commission CFO: Chief Financial Officer CFP: Contingency funding plan Chase Bank USA, N.A.: Chase Bank USA, National Association CIB: Corporate & Investment Bank CIO: Chief Investment Office Client assets: Represent assets under management as well as custody, brokerage, administration and deposit accounts. Client deposits and other third-party liabilities: Deposits, as well as deposits that are swept to on-balance sheet liabilities (e.g., commercial paper, federal funds purchased and securities loaned or sold under repurchase agreements) as part of client cash management programs. CLO: Collateralized loan obligations CLTV: Combined loan-to-value Collateral-dependent: A loan is considered to be collateral-dependent when repayment of the loan is expected to be provided substantially through the operation or sale of the collateral when the borrower is experiencing financial difficulty, including when foreclosure is deemed probable

based on borrower delinquency. Commercial Card: provides a wide range of payment services to corporate and public sector clients worldwide through the commercial card products. Services include procurement, corporate travel and entertainment, expense management services, and business-to-business payment solutions. Credit cycle: A period of time over which credit quality improves, deteriorates and then improves again (or vice versa). The duration of a credit cycle can vary from a couple of years to several years. Credit derivatives: Financial instruments whose value is derived from the credit risk associated with the debt of a third-party issuer (the reference entity) which allow one party (the protection purchaser) to transfer that risk to another party (the protection seller). Upon the occurrence of a credit event by the reference entity, which may include, among other events, the bankruptcy or failure to pay its obligations, or certain restructurings of the debt of the reference entity, neither party has recourse to the reference entity. The protection purchaser has recourse to the protection seller for the difference between the face value of the CDS contract and the fair value at the time of settling the credit derivative contract. The determination as to whether a credit event has occurred is generally made by the relevant International Swaps and Derivatives Association (ISDA) Determinations Committee. JPMorgan Chase & Co./2020 Form 10-K 305 Glossary of Terms and Acronyms Criticized: Criticized loans, lending-related commitments and derivative receivables that are classified as special mention, substandard and doubtful categories for regulatory purposes. CRO: Chief Risk Officer CTC: CIO, Treasury and Corporate CVA: Credit valuation adjustment Debit and credit card sales volume : Dollar amount of card member purchases, net of returns. Deposit margin/deposit spread: Represents net interest income expressed as a percentage of average deposits. Distributed denial-of-service attack: The use of a large number of remote computer systems to electronically send a high volume of traffic to a target website to create a service outage at the target. This is a form of cyberattack. Dodd-Frank Act: Wall Street Reform and Consumer Protection Act DVA: Debit valuation adjustment EC: European Commission Eligible HQLA: Eligible high-quality liquid assets, for purposes of calculating the LCR, is the amount of unencumbered HQLA that satisfy certain operational considerations as defined in the LCR rule. Eligible LTD: Long-term debt satisfying certain eligibility criteria Embedded derivatives: are implicit or explicit terms or features of a financial instrument that affect some or all of the cash flows or the value of the instrument in a manner similar to a derivative. An instrument containing such terms or features is referred to as a hybrid. The component of the hybrid that is the non-derivative instrument is referred to as the host. For example, callable debt is a hybrid instrument that contains a plain vanilla debt instrument (i.e., the host) and an embedded option that allows the issuer to redeem the debt issue at a specified date for a specified amount (i.e., the embedded derivative). However, a floating rate instrument is not a hybrid composed of a fixed-rate instrument and an interest rate swap. ERISA: Employee Retirement Income Security Act of 1974 EPS: Earnings per share ETD: Exchange-traded derivatives; Derivative contracts that are executed on an exchange and settled via a central clearing house. Expense categories: Volume- and revenue-related expenses generally correlate with changes in the related business/transaction volume or revenue. Examples of volume- and revenue-related expenses include commissions and incentive compensation, depreciation expense related to operating lease assets, and brokerage expense related to equities trading transaction volume. Investments include expenses associated with supporting medium- to longer-term strategic plans of the Firm. Examples of investments include initiatives in technology (including related compensation), marketing, and compensation for new bankers and client advisors. Structural expenses are those associated with the day-to-day cost of running the bank and are expenses not covered by the above two categories. Examples of structural expenses include employee salaries and benefits, as well as noncompensation costs such as real estate and all other expenses. EU: European Union Fannie Mae: Federal National Mortgage Association FASB: Financial Accounting Standards Board FCA: Financial Conduct Authority FCC: Firmwide Control Committee FDIA: Federal Depositary Insurance Act FDIC: Federal Deposit Insurance Corporation Federal Reserve: The Board of the Governors of the Federal Reserve System FFIEC: Federal Financial Institutions Examination Council FHA: Federal Housing Administration FHLB: Federal Home Loan Bank FICC: The Fixed Income Clearing Corporation FICO score: A measure of consumer credit risk provided by credit bureaus, typically produced from statistical models by Fair Isaac Corporation utilizing data collected by the credit bureaus. FINRA: Financial Industry Regulatory Authority Firm: JPMorgan Chase & Co. Forward points: Represents the interest rate differential between two currencies, which is either added to or subtracted from the current exchange rate (i.e., spot rate) to determine the forward exchange rate. FRBB: Federal Reserve Bank of Boston FRBNY: Federal Reserve Bank of New York FRC: Firmwide Risk Committee Freddie Mac: Federal Home Loan Mortgage Corporation Free standing derivatives: a derivative contract entered into either separate and apart from any of the Firm's other financial instruments or equity transactions. Or, in conjunction with some other transaction and is legally detachable and separately exercisable. FSB: Financial Stability Board 306 JPMorgan Chase & Co./2020 Form 10-K Glossary of Terms and Acronyms FTE: Fully taxable equivalent FVA: Funding valuation adjustment FX: Foreign exchange G7: Group of Seven nations: Countries in the G7 are Canada, France, Germany, Italy, Japan, the U.K. and the U.S. G7 government bonds: Bonds issued by the government of one of the G7 nations. Ginnie Mae: Government National Mortgage Association GSIB: Global systemically important banks Headcount-related expense: Includes salary and benefits (excluding performance-based incentives), and other noncompensation costs related to employees. HELOC: Home equity line of credit Home equity; senior lien:

Represents loans and commitments where JPMorgan Chase holds the first security interest on the property. Home equity

junior lien: Represents loans and commitments where JPMorgan Chase holds a security interest that is subordinate in rank to other liens. Households: A household is a collection of individuals or entities aggregated together by name, address, tax identifier and phone number. HQLA: High-quality liquid assets; consist of cash and certain high-quality liquid securities as defined in the LCR rule. HTM: Held-to-maturity IBOR: Interbank Offered Rate ICAAP: Internal capital adequacy assessment process IDI: Insured depository institutions IHC : JPMorgan Chase Holdings LLC, an intermediate holding company Investment-grade: An indication of credit quality based on JPMorgan Chase's internal risk assessment. The Firm considers ratings of BBB-/Baa3 or higher as investment-grade. IPO: Initial public offering ISDA: International Swaps and Derivatives Association JPMorgan Chase: JPMorgan Chase & Co. JPMorgan Chase Bank, N.A.: JPMorgan Chase Bank, National Association JPMorgan Securities: J.P. Morgan Securities LLC Loan-equivalent: Represents the portion of the unused commitment or other contingent exposure that is expected, based on historical portfolio experience, to become drawn prior to an event of a default by an obligor. LCR: Liquidity coverage ratio LDA: Loss Distribution Approach LGD: Loss given default LIBOR: London Interbank Offered Rate LLC: Limited Liability Company LOB: Line of business LOB CROs : Line of Business and CTC Chief Risk Officers Loss emergence period: Represents the time period between the date at which the loss is estimated to have been incurred and the ultimate realization of that loss. LTIP: Long-term incentive plan LTV: Loan-to-value; For residential real estate loans, the relationship, expressed as a percentage, between the principal amount of a loan and the appraised value of the collateral (i.e., residential real estate) securing the loan. Origination date LTV ratio The LTV ratio at the origination date of the loan. Origination date LTV ratios are calculated based on the actual appraised values of collateral (i.e., loan-level data) at the origination date. Current estimated LTV ratio An estimate of the LTV as of a certain date. The current estimated LTV ratios are calculated using estimated collateral values derived from a nationally recognized home price index measured at the metropolitan statistical area (MSA) level. These MSA-level home price indices consist of actual data to the extent available and forecasted data where actual data is not available. As a result, the estimated collateral values used to calculate these ratios do not represent actual appraised loan-level collateral values; as such, the resulting LTV ratios are necessarily imprecise and should therefore be viewed as estimates. Combined LTV ratio The LTV ratio considering all available lien positions, as well as unused lines, related to the property. Combined LTV ratios are used for junior lien home equity products. Managed basis: A non-GAAP presentation of Firmwide financial results that includes reclassifications to present revenue on a fully taxable-equivalent basis. Management also uses this financial measure at the segment level, because it believes this provides information to enable investors to understand the underlying operational performance and trends of the particular business segment and facilitates a comparison of the business segment with the performance of competitors. Master netting agreement: A single agreement with a counterparty that permits multiple transactions governed by that agreement to be terminated or accelerated and settled through a single payment in a single currency in the event of a default (e.g., bankruptcy, failure to make a required payment or securities transfer or deliver collateral or margin when due). JPMorgan Chase & Co./2020 Form 10-K 307 Glossary of Terms and Acronyms MBS: Mortgage-backed securities MD&A: Management's discussion and analysis Measurement alternative: Measures equity securities without readily determinable fair values at cost less impairment (if any), plus or minus observable price changes from an identical or similar investment of the same issuer. Merchant Services: offers merchants payment processing capabilities, fraud and risk management, data and analytics, and other payments services. Through Merchant Services, merchants of all sizes can accept payments via credit and debit cards and payments in multiple currencies. MEV: Macroeconomic variable MMLF: Money Market Mutual Fund Liquidity Facility Moody's: Moody's Investor Services Mortgage origination channels: Retail Borrowers who buy or refinance a home through direct contact with a mortgage banker employed by the Firm using a branch office, the Internet or by phone. Borrowers are frequently referred to a mortgage banker by a banker in a Chase branch, real estate brokers, home builders or other third parties. Correspondent Banks, thrifts, other mortgage banks and other financial institutions that sell closed loans to the Firm. Mortgage product types: Alt-A Alt-A loans are generally higher in credit quality than subprime loans but have characteristics that would disqualify the borrower from a traditional prime loan. Alt-A lending characteristics may include one or more of the following: (i) limited documentation; (ii) a high CLTV ratio; (iii) loans secured by non-owner occupied properties; or (iv) a debt-to-income ratio above normal limits. A substantial proportion of the Firm's Alt-A loans are those where a borrower does not provide complete documentation of his or her assets or the amount or source of his or her income. Option ARMs The option ARM real estate loan product is an adjustable-rate mortgage loan that provides the borrower with the option each month to make a fully amortizing, interest-only or minimum payment. The minimum payment on an option ARM loan is based on the interest rate charged during the introductory period. This introductory rate is usually significantly below the fully indexed rate. The fully indexed rate is calculated using an index rate plus a margin. Once the introductory period ends, the contractual interest rate charged on the loan increases to the fully indexed rate and adjusts monthly to reflect movements in the index. The minimum payment is typically insufficient to cover interest accrued in the prior month, and any unpaid interest is deferred and added to the principal balance of the loan. Option ARM loans are subject to payment recast, which

converts the loan to a variable-rate fully amortizing loan upon meeting specified loan balance and anniversary date triggers. Prime mortgage loans are made to borrowers with good credit records who meet specific underwriting requirements, including prescriptive requirements related to income and overall debt levels. New prime mortgage borrowers provide full documentation and generally have reliable payment histories. Subprime loans are loans that, prior to mid-2008, were offered to certain customers with one or more high risk characteristics, including but not limited to: (i) unreliable or poor payment histories; (ii) a high LTV ratio of greater than 80% (without borrower-paid mortgage insurance); (iii) a high debt-to-income ratio; (iv) an occupancy type for the loan is other than the borrower's primary residence; or (v) a history of delinquencies or late payments on the loan. MSA: Metropolitan statistical areas MSR: Mortgage servicing rights Multi-asset: Any fund or account that allocates assets under management to more than one asset class. NA: Data is not applicable or available for the period presented. NAV: Net Asset Value Net Capital Rule: Rule 15c3-1 under the Securities Exchange Act of 1934. Net charge-off/(recovery) rate: Represents net charge-offs/(recoveries) (annualized) divided by average retained loans for the reporting period. Net interchange income includes the following components: • Interchange income : Fees earned by credit and debit card issuers on sales transactions. • Reward costs : The cost to the Firm for points earned by cardholders enrolled in credit card rewards programs generally tied to sales transactions. • Partner payments : Payments to co-brand credit card partners based on the cost of loyalty program rewards earned by cardholders on credit card transactions. Net mortgage servicing revenue: Includes operating revenue earned from servicing third-party mortgage loans, which is recognized over the period in which the service is provided; changes in the fair value of MSRs; the impact of risk management activities associated with MSRs; and gains and losses on securitization of excess mortgage servicing. Net mortgage servicing revenue also includes gains and losses on sales and lower of cost or fair value adjustments of certain repurchased loans insured by U.S. government agencies. Net production revenue: Includes fees and income recognized as earned on mortgage loans originated with the 308 JPMorgan Chase & Co./2020 Form 10-K Glossary of Terms and Acronyms intent to sell, and the impact of risk management activities associated with the mortgage pipeline and warehouse loans. Net production revenue also includes gains and losses on sales and lower of cost or fair value adjustments on mortgage loans held-for-sale (excluding certain repurchased loans insured by U.S. government agencies), and changes in the fair value of financial instruments measured under the fair value option. Net revenue rate: Represents Credit Card net revenue (annualized) expressed as a percentage of average loans for the period. Net yield on interest-earning assets: The average rate for interest-earning assets less the average rate paid for all sources of funds. NFA: National Futures Association NM: Not meaningful NOL: Net operating loss Nonaccrual loans: Loans for which interest income is not recognized on an accrual basis. Loans (other than credit card loans and certain consumer loans insured by U.S. government agencies) are placed on nonaccrual status when full payment of principal and interest is not expected, regardless of delinquency status, or when principal and interest have been in default for a period of 90 days or more unless the loan is both well-secured and in the process of collection. Collateral-dependent loans are typically maintained on nonaccrual status. Nonperforming assets: Nonperforming assets include nonaccrual loans, nonperforming derivatives and certain assets acquired in loan satisfaction, predominantly real estate owned and other commercial and personal property. NOW: Negotiable Order of Withdrawal NSFR: Net Stable Funding Ratio OAS: Option-adjusted spread OCC: Office of the Comptroller of the Currency OCI: Other comprehensive income/(loss) OPEB: Other postretirement employee benefit OTTI: Other-than-temporary impairment Over-the-counter (&OTC;) derivatives: Derivative contracts that are negotiated, executed and settled bilaterally between two derivative counterparties, where one or both counterparties is a derivatives dealer. Over-the-counter cleared (&OTC-cleared;) derivatives: Derivative contracts that are negotiated and executed bilaterally, but subsequently settled via a central clearing house, such that each derivative counterparty is only exposed to the default of that clearing house. Overhead ratio: Noninterest expense as a percentage of total net revenue. Parent Company: JPMorgan Chase & Co. Participating securities: Represents unvested share-based compensation awards containing nonforfeitable rights to dividends or dividend equivalents (collectively, ÷nds;), which are included in the earnings per share calculation using the two-class method. JPMorgan Chase grants RSUs to certain employees under its share-based compensation programs, which entitle the recipients to receive nonforfeitable dividends during the vesting period on a basis equivalent to the dividends paid to holders of common stock. These unvested awards meet the definition of participating securities. Under the two-class method, all earnings (distributed and undistributed) are allocated to each class of common stock and participating securities, based on their respective rights to receive dividends. PCA: Prompt corrective action PCD : &Purchased credit deteriorated; assets represent acquired financial assets that as of the date of acquisition have experienced a more-than-insignificant deterioration in credit quality since origination, as determined by the Firm. PCI: &Purchased credit-impaired; loans represented certain loans that were acquired and deemed to be credit-impaired on the acquisition date. The superseded FASB guidance allowed purchasers to aggregate credit-impaired loans acquired in the same fiscal quarter into one or more pools, provided that the loans had common risk characteristics (e.g., product type, LTV ratios, FICO scores, past due status, geographic location). A pool was then accounted for as a single asset with a single composite interest rate and an aggregate expectation of cash flows. PD: Probability of default

PDCF: Primary Dealer Credit Facility PPP: Paycheck Protection Program PPPL Facility: Paycheck Protection Program Lending Facility PRA: Prudential Regulation Authority Pre-provision profit/(loss): Represents total net revenue less noninterest expense. The Firm believes that this financial measure is useful in assessing the ability of a lending institution to generate income in excess of its provision for credit losses. Pretax margin: Represents income before income tax expense divided by total net revenue, which is, in management's view, a comprehensive measure of pretax performance derived by measuring earnings after all costs are taken into consideration. It is one basis upon which management evaluates the performance of AWM against the performance of their respective competitors. Principal transactions revenue: Principal transactions revenue is driven by many factors, including: the bid-offer spread, which is the difference between the price at which a market participant is willing and able to sell an instrument to the Firm; and the price at which another market participant is willing and able to buy it from the Firm, and vice versa; and realized and unrealized gains and losses on financial instruments and commodities transactions, including those accounted for under the fair value option, primarily used in client-driven market-making activities, and on private equity investments. Realized gains and losses result from the sale of instruments, closing out or termination of transactions, or interim cash payments. Unrealized gains and losses result from changes in valuation. In connection with its client-driven market-making activities, the Firm transacts in debt and equity instruments, derivatives and commodities, including physical commodities inventories and financial instruments that reference commodities. Principal transactions revenue also includes realized and unrealized gains and losses related to: derivatives designated in qualifying hedge accounting relationships, primarily fair value hedges of commodity and foreign exchange risk; derivatives used for specific risk management purposes, primarily to mitigate credit risk and foreign exchange risk. PSUs: Performance share units REIT: Real estate investment trust: A special purpose investment vehicle that provides investors with the ability to participate directly in the ownership or financing of real-estate related assets by pooling their capital to purchase and manage income property (i.e., equity REIT) and/or mortgage loans (i.e., mortgage REIT). REITs can be publicly or privately held and they also qualify for certain favorable tax considerations. Regulatory VaR: Daily aggregated VaR calculated in accordance with regulatory rules. REO: Real estate owned Reported basis: Financial statements prepared under U.S. GAAP, which excludes the impact of taxable-equivalent adjustments. Retained loans: Loans that are held-for-investment (i.e., excludes loans held-for-sale and loans at fair value). Revenue wallet: Proportion of fee revenue based on estimates of investment banking fees generated across the industry (i.e., the revenue wallet) from investment banking transactions in M&A, equity and debt underwriting, and loan syndications. Source: Dealogic, a third-party provider of investment banking competitive analysis and volume-based league tables for the above noted industry products. RHS: Rural Housing Service of the U.S. Department of Agriculture Risk-rated portfolio: Credit loss estimates are based on estimates of the probability of default (PD) and loss severity given a default. The probability of default is the likelihood that a borrower will default on its obligation; the loss given default (LGD) is the estimated loss on the loan that would be realized upon the default and takes into consideration collateral and structural support for each credit facility. ROA: Return on assets ROE: Return on equity ROTCE: Return on tangible common equity ROU assets: Right-of-use assets RSU(s): Restricted stock units RWA: Risk-weighted assets: Basel III establishes two comprehensive approaches for calculating RWA (a Standardized approach and an Advanced approach) which include capital requirements for credit risk, market risk, and in the case of Basel III Advanced, also operational risk. Key differences in the calculation of credit risk RWA between the Standardized and Advanced approaches are that for Basel III Advanced, credit risk RWA is based on risk-sensitive approaches which largely rely on the use of internal credit models and parameters, whereas for Basel III Standardized, credit risk RWA is generally based on supervisory risk-weightings which vary primarily by counterparty type and asset class. Market risk RWA is calculated on a generally consistent basis between Basel III Standardized and Basel III Advanced. S&P: Standard and Poor's 500 Index SAR(s): Stock appreciation rights SCB: Stress Capital Buffer Scored portfolios: Consumer loan portfolios that predominantly include residential real estate loans, credit card loans, auto loans to individuals and certain small business loans. SEC: Securities and Exchange Commission Securities financing agreements: Include resale, repurchase, securities borrowed and securities loaned agreements Seed capital: Initial JPMorgan capital invested in products, such as mutual funds, with the intention of ensuring the fund is of sufficient size to represent a viable offering to clients, enabling pricing of its shares, and allowing the manager to develop a track record. After these goals are achieved, the intent is to remove the Firm's capital from the investment. Shelf securities: Securities registered with the SEC under a shelf registration statement that have not been issued, offered or sold. These securities are not included in league tables until they have actually been issued. Single-name: Single reference-entities 310 JPMorgan Chase & Co./2020 Form 10-K Glossary of Terms and Acronyms SLR: Supplementary leverage ratio SMBS: Stripped mortgage-backed securities SOFR: Secured Overnight Financing Rate SPEs: Special purpose entities Structural interest rate risk: Represents interest rate risk of the non-trading assets and liabilities of the Firm. Structured notes: Structured notes are financial instruments whose cash flows are linked to the movement in one or more indexes, interest rates, foreign exchange rates, commodities prices, prepayment rates, or other market variables. The notes typically contain embedded (but not separable or detachable)
